**BiblioBazaar Reproduction Series:** Our goal at BiblioBazaar is to help readers, educators and researchers by bringing back in print hard-to-find original publications at a reasonable price and, at the same time, preserve the legacy of literary history. The following book represents an authentic reproduction of the text as printed by the original publisher and may contain prior copyright references. While we have attempted to accurately maintain the integrity of the original work(s), from time to time there are problems with the original book scan that may result in minor errors in the reproduction, including imperfections such as missing and blurred pages, poor pictures, markings and other reproduction issues beyond our control. Because this work is culturally important, we have made it available as a part of our commitment to protecting, preserving and promoting the world's literature.

All of our books are in the “public domain” and many are derived from Open Source projects dedicated to digitizing historic literature. We believe that when we undertake the difficult task of re-creating them as attractive, readable and affordable books, we further the mutual goal of sharing these works with a larger audience. A portion of Bibliobazaar profits go back to Open Source projects in the form of a donation to the groups that do this important work around the world. If you would like to make a donation to these worthy Open Source projects, or would just like to get more information about these important initiatives, please visit [www.bibliobazaar.com/opensource](http://www.bibliobazaar.com/opensource).

GRAMMAR  
OF  
THE P A Š T Ō  
OR  
LANGUAGE OF THE AFGHĀNS,

COMPARED  
WITH THE ĪRĀNIAN AND NORTH-INDIAN IDIOMS

BY  
Dr. ERNEST TRUMPP.

---

PRINTED UNDER THE AUSPICES AND BY THE AID OF THE  
IMPERIAL ACADEMY OF SCIENCES, VIENNA.

in 2025

## PREFACE.

---

IN offering this work to the public I need not apologize for bringing out a new Grammar of the Paštō; for every body conversant with this branch of literature is quite aware, that this is as yet by no means a superfluous task. Without disparaging the merits of my predecessors on this field of labour I may be allowed to state, that I have independently of them followed my own course and subjected the Paštō to a searching intercomparative examination, in order to elucidate its grammatical formation and structure and at the same time to assign to it its proper place in the family of languages. I trust, that my researches may prove to some extent useful to the student and that others may thereby be moved to turn their studies to this field, in which there is still ample space for the cooperation of others. What we stand most in need of are critically sifted texts, not mere reprints of manuscripts with all the blunders of the copyists. A good edition of the *Divān* of Rah'mān, Xush'āl, H'amīd etc., of the Paštō translation of the *Anvārī Suhailī* (*Kalīlah ō Damanah*), the *Tārīḫ-i murassaḥ* etc. would be most heartily welcomed by all, who take an interest in Paštō studies. But the editors of such works should not consider it beneath their dignity to add explanations of difficult or rare words: for our Paštō lexicography has only commenced as yet and not every body has the advantage of consulting learned natives.

The pronunciation, put down in this Grammar, I believe on the whole to be correct; I have heard with own ears the *Pāṣṭō* spoken by the Afghāns and I have paid the greatest attention to the sounds and frequently inquired from learned men in Peshawer and Lahore, whenever I was doubtful; but it is possible, that I may have erred in this or that point.

Most of the quotations inserted in this Grammar are taken from Raverty's *Gulshan-i Rōh* and Dr. Dorn's *Chrestomathy of the Pushtū or Afghān Language* (St. Petersburg 1847), as it was my intention to illustrate the grammatical rules, as far as possible, by examples drawn from such works, as are generally accessible; quotations from Mss. have therefore been introduced only sparingly.

My best thanks are due to the Imperial Academy of Vienna, which encouraged me to publish this Grammar by offering to defray a part of the printing expenses and to the Supreme Government of India, which liberally subscribed for a number of copies.

Tübingen, 16<sup>th</sup> Jan. 1873.

**E. Trumpp.**

# Contents.

Introduction.	page.
<b>I. Section. The Paṣṭō system of sounds.</b>	
1. The Paṣṭō Alphabet. §. 1. . . . .	1
2. The Paṣṭō consonants. §. 2—6. . . . .	5
Accumulation and transposition of letters. §. 7. . . . .	19
3. The Paṣṭō vowel-system §. 8. . . . .	20
<b>II. Section. The formation of themes in Paṣṭō.</b>	
I. The terminations of nouns. . . . .	28
A. Masculine nouns. §. 9. . . . .	28
B. Feminine nouns. §. 10. . . . .	32
II. Primary themes derived directly from verbal roots. §. 11—18. . . . .	34
III. Secondary themes. . . . .	40
A. Abstract nouns. §. 19—24. . . . .	40
B. Appellatives and adjectives. §. 25—34. . . . .	45
IV. Formation of Diminutives. §. 35—37. . . . .	49
V. Composition of nouns. §. 38. . . . .	52
VI. Formation of the gender. §. 39. . . . .	55
<b>III. Section. Flexion of the noun.</b>	
I. Formation of the Plural. §. 41. . . . .	59
A. Formation of the Plural of masc. nouns. §. 42—50. . . . .	60
B. Formation of the Plural of fem. nouns. §. 51—58 . . . . .	68
II. Formation of the Formative Sing. and Plural. . . . .	77
1. Formative of the Singular. §. 60—61. . . . .	77
2. Formative of the Plural. §. 62—64. . . . .	79
III. Formation of cases. §. 65. . . . .	84
Survey of the declensional process. §. 67—83 . . . . .	91
The Adjective and its flexion. §. 84. . . . .	106
1. adjectives ending in a consonant. §. 85—86. . . . .	106
2. adjectives ending in ai. §. 87. . . . .	111
3. adjectives ending in ā. §. 88. . . . .	115
4. adjectives ending in ō. §. 89. . . . .	116
5. adjectives ending in ḡh. §. 90. . . . .	116
6. adjectives ending in e. §. 91. . . . .	118
7. adjectives ending in i, u, au. §. 92. . . . .	118
Comparison of adjectives. §. 93. . . . .	120
<b>IV. Section. The Numerals.</b>	
1. Cardinal numbers. §. 94. . . . .	122
2. Ordinal numbers. §. 95. . . . .	128
3. Distributive numbers. §. 96. . . . .	130

4. Multiplicative numbers. §. 97. . . . .	page. 130
5. Fractional numbers. §. 98. . . . .	132
<b>V. Section. Pronouns.</b>	
I. Personal pronouns. §. 99—101. . . . .	133
Pronominal suffixes. §. 102. . . . .	138
II. Demonstrative pronouns. §. 103—107. . . . .	141
III. Relative pronoun. §. 108. . . . .	147
IV. The reflexive pronominal adjective <i>خبر</i> . §. 109. . . . .	148
V. Interrogative pronouns. §. 110—111. . . . .	149
VI. Correlative pronouns. §. 112. . . . .	152
VII. Indefinite pronouns. §. 113—114. . . . .	154
VIII. Pronominal adjectives. §. 115. . . . .	163
<b>VI. Section. The Verb.</b>	
I. Formation of the verbal themes. §. 116—118. . . . .	164
Verbal prefixes. §. 119. . . . .	170
II. Formation of the Imperative. §. 120. . . . .	173
A. The Imperative of intrans. verbs. §. 121—123. . . . .	173
The Imperative prefix <i>ي</i> . §. 124. . . . .	179
B. The Imperative of trans. verbs. §. 125—127. . . . .	181
The Imperative prefix <i>ي</i> . §. 128. . . . .	188
C. The Imperative of causal verbs. §. 129. . . . .	189
III. The formation of the tenses and moods. . . . .	191
A. Tenses and moods derived from the Imperative . . . . .	191
1. The Present. §. 131. . . . .	191
2. The Subjunctive Present. §. 132. . . . .	193
3. The Future. §. 133. . . . .	194
B. Tenses and moods formed by means of the participle preterite. §. 134. . . . .	197
a. Intrans. verbs. . . . .	198
1. The Imperfect. §. 135. . . . .	198
Formation of the participle preterite. §. 136. . . . .	202
2. The habitual Imperfect. §. 137. . . . .	205
3. The Conditional (Optative) of the Imperfect. §. 138. . . . .	206
4. The Aorist. §. 139. . . . .	207
5. The habitual Aorist. §. 140. . . . .	209
b. Trans. and causal verbs. . . . .	210
1. The Imperfect. §. 142. . . . .	210
Formation of the participle past. §. 143. . . . .	211
2. The habitual Imperfect. §. 144. . . . .	218
3. The Conditional (Optative). §. 145. . . . .	218
4. The Aorist. §. 146. . . . .	219
5. The habitual Aorist. §. 147. . . . .	221
c. Tenses and moods, formed by means of the participle perfect and the auxiliary „to be“. . . . .	221
1. Intrans. verbs. . . . .	222
1. The Perfect. §. 149. . . . .	222
2. The Subjunctive of the Perfect. §. 150. . . . .	223

3. The Pluperfect. §. 151. . . . .	page. 223
4. The Subjunctive of the Pluperfect. §. 152. . . . .	224
5. The Conditional of the Pluperfect. §. 153. . . . .	224
6. The past Future. §. 154. . . . .	225
II. Trans. and causal verbs. §. 155. . . . .	225
1. The Perfect. §. 156. . . . .	226
2. The Subjunctive of the Perfect. §. 157. . . . .	226
3. The Pluperfect. §. 158. . . . .	227
4. The Subjunctive of the Pluperfect. §. 159. . . . .	227
5. The Conditional of the Pluperfect. §. 160. . . . .	228
6. The past Future. §. 161. . . . .	228
IV. The auxiliary verbs. . . . .	229
1. The auxiliary verb „to be“. §. 162. . . . .	229
II. The auxiliary verb شَوَّلَ §. 163. . . . .	236
III. The auxiliary verb كَبَدَلَ §. 164. . . . .	246
IV. The auxiliary verb كَرَّمَ §. 165. . . . .	248
V. The auxiliary verb كَوَّلَ §. 166. . . . .	255
V. The verb compounded with شَوَّلَ, to be able. §. 169. . . . .	260
VI. The Passive voice. §. 170. . . . .	277
The position of the negative adverbs مَ and لَ with the verb. §. 171. . . . .	273
VII. Section. Adverbs, prepositions, postpositions, conjunctions, interjections. . . . .	
I. The adverb. §. 172—173. . . . .	276
II. Prepositions and postpositions. §. 174. . . . .	281
III. Conjunctions. §. 175—176. . . . .	298
IV. Interjections. §. 177. . . . .	303

## Syntax.

VII. The defective verb <i>آغلل</i> , to come. . . . .	410

## Introduction.

On the origin and relationship of the Paṣtō.

---

We hope that the time is passed for ever, when the Paṣtō was classified under the Semitic languages and that such assertions will in future only be looked upon as a curiosity. For the Paṣtō does not contain a single Hebrew word, and the substantive آتش ōr, fire, which was identified with the Hebrew אור, light, is derived from the Zend ātar (Nom. ātarsh, thence Pārsī ātash and modern Persian آتش.\*)

But if it is agreed on all hands, that the Paṣtō belongs to the Indo-germanic family of languages, the further question is, if it is to be classified with the Zend family or with the Indo-Ārian stock?

Hitherto those, whose judgement has a great weight in deciding questions of this kind, ascribed the Paṣtō unhesitatingly to the Zend family; so the learned Prof. Frederic Müller in his fine remarks on the Paṣtō sounds.\*\*)

---

\*) Arabic words, used in the Paṣtō, prove nothing, as little as in Persian.

\*\*) Ueber die Sprache der Afgānen. Wien 1862.

that the palatal sibilants ञ, ण, फ़ can only have had their origin from the Zend (cf. §. 3 of this Grammar), that the change of the Sanskrit ञ to ञ and ण in Pāṣṭō can only be explained by the medium of the Zend and that in the pronouns and numerals many forms receive their only light from the Zend. But on the other hand it must not be forgotten, that the Pāṣṭō has preserved the whole cerebral row (of course with exception of the aspirates) of the Indian Prākṛit tongues, that a very large stock of pure Pāṣṭō words is directly derived from the adjoining Prākṛit idioms (chiefly the Sindhī, less the Panjābī), that the whole formation of the declensional and conjugational process bears the closest analogy to the Sindhī, that the whole structure of the Pāṣṭō active and causal verbs in the past tenses fully coincides with and can only be explained from the Sindhī, as shown in this Grammar.\*) The Pāṣṭō however is by no means a Prākṛit idiom, like the Sindhī, Panjābī etc., but an old independent language, forming the first transition from the Indo-Ārian to the Īrānian family and therefore participating of the characteristics of both, but still with predominant Prākṛit features. This is also fully borne out by the geographical position of the Pāṣṭō between the Indian and Īrānian idioms.

Lassen already has proved\*\*), that the *Πάκτες* of Herodotus are in all likelihood the forefathers of our modern Afghāns. He puts down in this map of Ancient India the country of *Πακτινῆ* in the Sulaimānī range of mountains, where no doubt the ancient seat of the Afghāns is to be sought, as they are frequently called thence Sulaimānīs (by the Arabs). But the ancient *Πακτινῆ* is not to be restricted to this mountain range alone but must

---

\*) This affinity of the Pāṣṭō to the modern Indian Prākṛit idioms is already recognised by Dr. Dorn in his learned „Grammatical remarks on the Pushtō“.

\*\*) Indische Antiquitäten I, p. 428 sqq.

have extended more westwards, including the ancient Arachosia; for according to some old traditions of the Afghāns they were originally settled (or at least a portion of them) in a country called Ghōr (غور)\* which must be sought eastward of Herāt and north-west of Ghaznī. This would account for the fact, that Sulṭān Mahmūd Ghāzī (A. D. 1010.) could subdue a portion of the Afghāns, whereas those dwelling in the (Sulaimānī) mountains remained rebellious (see: Dorn, Niamat Ullah, history of the Afghāns, Annotations p. 76). So much is certain, that at the time of Amīr Nāsir Ud-dīn Sabuktaghīn of Ghaznī (about A. D. 962) the Afghāns were already settled in the districts of Qandahār and Ghaznī; their migration to the north did not take place before the latter half of the 14<sup>th</sup> century and the conquest of Swāt by the Yusufzais in A. D. 1413—1424.

The Afghāns appear, as early as history mentions them, as a distinct nation, divided into many tribes or clans which are often at war against each other, but comprehended under one common national name.

The name 'Afghān' or 'Avghān' (أَفْغَان, آوْغَان\*\*) is according to a tradition of the Afghāns themselves that of the son of Ermia, son of Tālūt (Saul), king of Israēl; \*\*\*) for the Afghāns pretend to be descended from Yazqūb (Jacob, the Patriarch).†) The

\*) غور is apparently an appellative, 'a mountainous country' (now غور); this accounts for the different Ghōrs mentioned. Elphinstone (Caulbul, p. 153, note) mentions also another Ghōr, east of Furrah.

\*\*) Also spelled أَفْغَانَه.

\*\*\*) Dorn, Niamat Ullah, p. 23.

†) Compare Gulsh. II, p. 64, 3:

دَ بَعْقُوبِ قَوْمِ رَ تَبَارِكِي

„They are the tribe and race of Yazqub.“

The whole pedigree is exhibited in Dorn's Niamat Ullah, p. 37, and totally irreconcilable with the Biblical accounts.

name „Pathān,“ which they bear chiefly in India, they account for in the following way. The Afghān Malik, called Qais, went to Medīnah to see and hear the Prophet, invited by a letter from Khālīd. The Prophet gave to this personage the name of Abd-ur-rashīd and on account of his bravery in the battle against the Koraishites he said, „that the attachment (of the Afghāns) to the faith would be in strength like the wood, upon which they lay the keel, when constructing a ship“, which wood the seamen call ‘Pathān’; on this account he conferred upon Abd-ur-rashīd the title of ‘Pathān’ also.\*)

Though the tradition of a people deserves all attention, yet we must state, that the derivation of the name of ‘Afghān’ from a supposed son of Ermia, called ‘Afghān’ or ‘Afghānah’,\*\*) is without any foundation whatever and a mere fiction, and with it we must also declare the whole story of their Jewish descent, based on this very name, a wilful invention, made with no other object but to vindicate some noble origin to the Afghān race; their own language totally contradicts their claims of a Jewish descent, of which the inventors of this myth were not aware.\*\*\*) That the derivation of the name ‘Pathān’, put into the mouth of the Prophet, is equally fanciful, will be shown presently.

The name ‘Afghān’ is, at it is well known, not the national name, which the Afghāns apply to themselves, but given them by the Persians. Its etymology or meaning is not known, as little as we know up to the present day, why the Romans called

---

\*) Dorn, Niamat Ullah, p. 38.

\*\*) Another curious explanation of the name ‘Afghān’ see: Dorn, Niamat Ullah, Annotations, p. 64.

\*\*\*) Their Jewish features are greatly exaggerated by such, as believe in the Jewish descent of the Afghāns; I for my own part could detect nothing of them.

the Teutons 'Germani', the Germans themselves not making use of this name.

The *Burhān-i-qātis* simply says about the word 'Afghān':

افغان بآ غین نقطه دار بر وزن مَسْتَن بمعنی فریاد وزاری باشد و نام  
قبیله است مشهور و معروف و جمعش افغانه است بر وزن فراعنه  
بطریق جمع عربی

„Afghān, with the dotted ع, after the analogy of 'mastān', occurs in the sense of 'complaint and wailing', it is also well known as name of a people and its plural is 'Afāghinah', after the analogy of *farāṣinah*, after the manner of an Arabic plural.“

The national name with which the Afghāns designate themselves, is پښتون, pronounced now in the west 'paštūn', and in the east 'paṣṭūn'. It is seen at the first glance, that this is the very name, which they bear already in the list of Herodotus, who has transcribed it in Greek, as accurately as possible, by Πάκτυες. (Herodotus VII, 68). From 'paštūn', by a regular Prākṛit assimilation, the Indian 'paṭhān' is formed (see my *Sindhī Grammar*, *Introd.* p. XLII, under ط); there is no such word in Arabic as 'paṭhān' (the Arabic knowing neither the letter p nor th) nor in Persian either, and if the eastern Afghāns use occasionally the name پَتان, it is the same as the Indian پَتھان (the Paṣṭō being destitute of an aspirate).

In India the Afghāns are also known under the name of 'Rōhillah'. The Afghāns themselves call their country 'rōh', but only in contradistinction to the Indian low-lands. Rōh is by no means a proper name, but an appellative signifying 'a mountainous country', as still used in Sindhī (रोहु). Thence is regularly derived روهیل, rōhīl, a mountaineer (see §. 33), Sindhī रोहीलो.

We trust that the comparative remarks, which we have inserted in this Grammar, will prove our assertion regarding the origin and affinity of the Paṣṭō and incite to a deeper comparative study of the language of an old warlike nation, which has played already so great a roll in the commotions of Asia and which, according to all the signs of the time, is destined to play a still greater one.

---

## I. Section.

### The Paṣṭō system of sounds.

#### §. 1.

#### 1. The Paṣṭō Alphabet.

With the Islām the Afghāns have also received the Arabic characters, as most other nations, converted to the Islām. When and by whom the Arabic characters were adapted to the Paṣṭō sounds, is unknown\*), at any rate this difficulty has been solved with great skill. Only one consonant has been left indistinct, the media  $\text{ع}$   $\text{q}$  (= dz), which was not distinguished from its tenuis  $\text{ع}$   $\text{t}$  (= ts) by separate diacritical marks. We have endeavoured to supply this want by placing two dots above  $\text{ع}$ , viz  $\text{ع}$ , as for a foreigner at any rate the non-distinction of the two sounds must prove very troublesome.

At the beginning the punctuation of the Paṣṭō alphabet seems to have been subject to many variations, the old manuscripts differing from each other very considerably in the use of the diacritical marks, e. g.  $\text{ع}$ ,  $\text{ع}$  and  $\text{ع}$  are often found expressed by  $\text{ع}$ ,  $\text{ع}$  and  $\text{ع}$  (see Dorn, Chrestomathy of the Pushtō language, Introduction. p. V); we find also partly the system, which gradually has been adopted for the Hindūstānī, marking the letters t, d, r by the superscription of  $\text{ط}$ , as  $\text{ط}$ ,  $\text{ط}$ ,  $\text{ط}$ , or by putting four dots above them, as  $\text{ط}$ ,  $\text{ط}$ ,  $\text{ط}$ , in use, especially in manuscripts, written

---

\*) With our present deficient knowledge of Paṣṭō literature it is difficult to state, which is likely to be considered as the oldest Paṣṭō work. Raverty (Introduction to his Paṣṭō grammar, p. 32) states, that Shēkh Mall is the oldest Paṣṭō author, who has described the conquest of Svāt (A.D. 1413–1424). But he seems not to have seen himself the work in question.

in India. But gradually the present system of writing has been so thoroughly fixed in Paṣtō, in consequence of its clearness and easy applicability, that in more modern manuscripts a mistake is seldom to be met with, which may unhesitatingly be ascribed to the ignorance of the copyist, with the exception of such words, the orthography of which is not yet quite settled.

For the vowel-system the adopted arabic signs are not quite sufficient, as they do not fully cover the Paṣtō sounds. We shall try to supply this want, which the Afghāns themselves may not have felt much, as they could easily enough find out the correct pronunciation of every noun without the addition of peculiar diacritical marks, by an accurate transcription in romanized letters, for which purpose we have adopted the Linguistical Alphabet of Prof. R. Lepsius (Standard Alphabet, 2d edit.), with a few slight modifications.

We let now follow a phonetic survey of the Paṣtō alphabet, separating the foreign elements from the pure Paṣtō sounds.

Paṣtō consonants.				Arabic consonants.			
Gutturals:	ک, (ق); گ, (ج)	غ; خ	(خ)	...	ء	ق; ع; ح;	
	k, (q); g, (g)	γ; χ	(χ)	...	h	q; i; h;	
Palatals:	چ; ج	چ; چ	چ; ج; ج	...	ی		
	č; j	č; q	č; j; z		y		
Cerebrals:	پ; د	...	پ; د	ن	د		
	t; d		t; d	n	d		
Linguals:	...	...	...	...	...	ط; ص; ض;	
						t; s; z; ḍ	
Dentals:	ت; د	...	س, ش	ن, ر	ل, ر	ث; ذ	
	t; d		s; š	n, r	l, r	ṯ; ḏ	
Labials:	پ; ب	...	...	م	و	ف	
	p; b			m	v	f	

With reference to the pronunciation of the purely Arabic consonants, it is to be observed, that the Afghāns pronounce them in the same way, as the Persians; thus ط is pronounced like common t, ط, ص, ذ like z, ص and ث like s, ق like k, ح like h, and the deep guttural touch, which is communicated to the accompanying vowel by ع, is generally not heard, only the mullās affect the original arabic pronunciation of these letters. For the sake of etymology the different sounds have been rendered in the romanized system in conformity with the Standard Alphabet.

We subjoin here the common alphabetical order of the Paštō letters:

Unconnected	Final	Medial	Initial	Name	Pronunciation & Rom. transcription
ا	ا	ا	ا	آلې	— (')
ب	ب	ب	ب	بي	b
پ	پ	پ	پ	پي	p
ت	ت	ت	ت	تي	t
ټ	ټ	ټ	ټ	ټي	ʈ
ث	ث	ث	ث	ټي	θ (s)
ج	ج	ج	ج	چي	ʃ
ځ	ځ	ځ	ځ	ځي	ɟ (dz)
چ	چ	چ	چ	چي	tʃ
ع	ع	ع	ع	عي	t (ts)
ح	ح	ح	ح	حي	h'
خ	خ	خ	خ	خي	x
د	د	د	د	ډال	d
ډ	ډ	ډ	ډ	ډال	ɖ
ښ	ښ	ښ	ښ	ښال	ʒ (z)
ر	ر	ر	ر	ري	r
ړ	ړ	ړ	ړ	ړي	ɾ
ز	ز	ز	ز	زي	z
ژ	ژ	ژ	ژ	ژي	ʒ (zh)
س	س	س	س	سي	ʒ (g)
س	س	س	س	سين	s
ش	ش	ش	ش	شين	ʃ (sh)

connected	Final	Medial	Initial	Name	Pronunciation & Rom. transcription
خ	خ	خ	خ	خَبِيب	ḫ (ḫ)
ص	ص	ص	ص	صَاد	g
ض	ض	ض	ض	ضَاد	z
ط	ط	ط	ط	طَوْتُي	t
ظ	ظ	ظ	ظ	ظَوْتُي	ḏ (z)
ع	ع	ع	ع	عَيْن	i
غ	غ	غ	غ	غَيْن	γ
ف	ف	ف	ف	فِي	f
ق	ق	ق	ق	قَات	q
ك	ك, ك	ك	ك, ك	كَاف	k
گ	گ	گ	گ	كَاف	g
ل	ل	ل	ل	لَام	l
م	م	م	م	مِيم	m
ن	ن	ن	ن	نُون	n
ڻ	ڻ	ڻ	ڻ	ڻُون	ɳ
ر	ر	ر	ر	رَاد	r
ه	ه	ه	ه	هِي	h
ی	ی	ی	ی	یِي	y

A consonant may be doubled by putting the sign = (تَشْدِيد) above it, as: مَلَّا mullā, a Mullā or mu-  
mmadan priest. In Arabic all consonants may be doubled (even  
if provided with Hamzah not excepted). The Persian consonants  
p, چ č, ژ ž and گ g never take Tašdīd, except بَچَه baččah,  
: young of an animal, a child. In pure Paḡtō nouns the Tašdīd  
never met with.

The (purely) Arabic letters are also used as numerical values, in recording (by brief sentences, in which the sum of all the letters must be added together) historical events.

ا	1	ح	8	س	60	ت	400
ب	2	ط	9	ع	70	ث	500
ج	3	ي	10	ف	80	خ	600
د	4	ك	20	ص	90	ذ	700
ه	5	ل	30	ق	100	ض	800
ز	6	م	40	ر	200	ظ	900
ر	7	ن	50	ش	300	غ	1000

This method of computation is called *abjad*, from the first four letters, which are pronounced as a group. The following technical groups are (read from the right to the left):

قَوْرَ , حَطِي , كَلَمَن , سَعَفَص , قَرَشَت , فَخَذ , ضَطَغ

The Arabs have borrowed this whole system from the Hebrews and have therefore also followed the order of the Hebrew alphabet; the first nine letters represent the units 1—9; the nine following the tens, and the next nine the hundreds and the last letter (غ) a thousand.

The order of the Hebrew alphabet goes only as far as *ת* (Hebr. *n*) 400; from thence the Arabs have gone their own way, by using those letters, which are peculiar to their own language.

## §. 2.

### 2. The Paṣṭō consonants.

It must surprize us at the first look, that the Paṣṭō alphabet is not possessed of any Aspirates\*), and in this respect it agrees with the Irānian idioms, but on the other hand it has preserved the full row of the Cerebrals, whereby it closely approaches the Indian Prākṛit tongues, yea, it has even preserved a

\*) Words like *پهلوارق*, a white rose, *پهلیدل* *phōlēdal*, to spread, *تَهانه* *thānah*, a small fort etc. are no Paṣṭō words at all but borrowed from the Hindi and only in use on the Indian frontier.

cerebral ڳ (ڳن), which has long ago disappeared in Prākṛit and the idioms sprung from it. Let us now consider the different classes of sounds in detail. \*)

### 1) The Gutturals.

The tenuis ک k and its media گ g (the Persian manner of writing this letter, viz: گ is not in use with the Afghāns) are pronounced in the usual way. Besides ک k there is also ق q found in pure Paṣṭō words; but this must be considered as a mistake, owing to the want of a strict orthography. This ق is always pronounced like simple k, to which it also corresponds etymologically. Examples of this kind are: تاق taq, a blow, a slap, Sindhī धकु dhaku; تواق tūqāh, a blunt arrow, Pers. تَنخار = تَنك, etc. Thus we find alternately written تواق tūqāh or توكه tōkāh, derision, Sindhī टोक. We find even ق interchanging with غ, as دقارہ daqarāh or دغارہ dagarāh, a push, Sindhī टकर (with transition of the tenuis ʈ into the media ɖ).

The Paṣṭō k corresponds in most cases to an original k or kh, as: کول kōl, family, Sansk. कुल; कुهای kūhai, a well, Sindhī கூஹ (Panjābī likewise khūhā, but Sansk. कूप); کت kat, a bedstead, Sindhī खट Sansk. खटा. More rarely to the media g or gh, as کند kand, gum-resin, Sindhī गोइंदु, Hindī गोन्द; کور kōr, house, Sindhī घर (Prākṛit already घर, Sansk. गृह).

The media گ g corresponds generally to an original g or gh, as: گنرل ganr-al, to consider, Sindhī गणलु; گندی gundī, a button, Sindhī घुंडी; گونر gūnr, a weevil, Sindhī घुणो. Now and then an original tenuis (k, kh) has been changed to the media g, as: گاراندہ garandāh, a kind of sloe, Hindī करोन्दा (Sansk. कारमर्हक); گوت gūt, a hole in a wall, Sindhī साटु. Initial g

\*) The following somewhat minute observations are destined to throw out a few hints for the intercomparison of the Paṣṭō with the cognate tongues.

may also, according to the Persian laws of sound, correspond to original v (= b = p), as: گېدّہ gēdāh, belly, Sindhī पेदु.

Not differing from گ g is , گ, as regards its present pronunciation in Eastern Afghānistān, and it is therefore now and then (but wrongly) interchanged with گ, though, according to its etymology, it must be distinguished from it as an (originally) separate sound. In Western Afghānistān it has quite a different pronunciation, as will be seen under the Palatals; both pronunciations are softened from an original ج j, and some of the eastern tribes pronounce it also as ج.

Peculiar to the Paštō is the sound غ γ, which the Afghāns pronounce with a deep articulation, common to mountainous people\*). In most purely Paštō words it corresponds to the simple g or gh of the Sanskrit-Prākṛit as غر γar, mountain, Sansk. गिरि; غوا γwā, cow, Sansk. गो (Hindī गाड़); غور γwāḡ, ear, Pers. گوش (Sansk. घोष, Zend gaosha). In some cases غ is a softening of an original tennis (k), as غ زay, noise, Sindhī رک; غات γat, large, Hindī कट्टा; غینر γēnṛ, penis, Pers. کبر.

The sound خ χ the Paštō has in common with the Persian; its origin is various. It corresponds to old k, kh, g and gh, as: خلتی xalai, a sprout, Hindī कली; وخت vaxt, time, arab. وقت (q = k); خوتی xūtai, small, Sansk. सुद्र (kṣ in Prākṛit = kh or çh, thence Hindī छोटा); جخ jax, foam, Sindhī رڱ (Hindī रग).

Like the modern Persian the Paštō also changes the Sansk. conjunct letters ख sv commonly to خو (by the medium of the

---

\*) After initial j z we find غ occasionally interpolated merely for euphony's sake (i. e. out of fondness for a harsh articulation) as: زغرد زγard, quick, Pers. جلد; زغره zγarāh, coat of mail, Pers. زره; زغمل زγam-āl, to bear, Sansk. खम् (kṣ = j).

Zendic q), as: خواب  $x\bar{u}b$ , sleep (Zend qafna), Persian خواب (properly:  $x\bar{f}\bar{a}b$ ), Sansk. स्वप्न; خور  $x\bar{o}r$ , sister (Zend qanhar), Pers. خواهر, Sansk. स्वसार् (स्वसृ). In the same way the conjunct letters  $q\bar{v}$  are treated (श being commonly changed in Prākṛit to स), as: خوانده  $xv\bar{a}d\bar{e}h$ , mother-in-law, Sansk. श्वश्रू (Sindhī ससू), Pers. خوشدامن  $xv\bar{a}š-d\bar{a}man$ ; but سختر  $s\bar{x}ar$ , father-in-law, Sansk. श्वशुर (Sindhī सदुरो), Pers. خسر. An exception makes the pronominal adjective خپل  $x\bar{p}al$ , own, self, the group خو being changed to خپ ( $p = b = v$ ), and final d to l (see under the letter l), Sansk. स्वदीय, Pers. خُون.

A peculiarly deep guttural is  $h$ , as pronounced by the eastern tribes; e. g. غاښ  $g\bar{a}h$ , tooth, خټه  $x\bar{a}h$ , brick. In Western Afghānistān it is pronounced as a cerebral  $\xi$ ; see under the Cerebrals.

$h$  corresponds generally to original  $h$ , as دروه  $dr\bar{o}h$ , malice, Sansk. द्रोह. At the beginning of a word  $h$  is now and then the remnant of an aspirated Labial, as: هېر  $h\bar{e}r$ , time, period, Sindhī پهړه; هېرې  $h\bar{e}rai$ , a sheep, Hindī भेड़ा. Initial  $h$  is now and then added, merely for euphony's sake, as: هډه  $h\bar{e}d$  or هډه  $h\bar{o}y\bar{a}h$ , egg, Sindhī छानो, Sansk. अण्ड, in Persian the aspiration is still deeper, خانه  $h\bar{a}d$ ; هډه  $h\bar{a}d$ , bone, Sansk. अस्थि, Sindhī already हड्ड  $h\bar{a}d$ .

### §. 5.

#### 2) The Palatals.

The greatest variety of sounds the Paštō exhibits in the Palatal row; it possesses more palatal sounds than the Sanskrit and even the Zend.

$\check{c}$  is pronounced like the Persian چ (Engl. ch); it corresponds to the Sanskrit-Prākṛit क, k, (ख kh) च  $\check{c}$  and छ  $\check{ch}$  (= chh),

as: چار cār, work, Sindhī कारि, (Sansk. कार्य), Pera. کار;  
 چارہ cārāh, a long knife, Pera. کارد (Sansk. कर्तरी = कर्षी,  
 Sindhī काती). In some cases چ has sprung from an original  
 media (j, jh), as: چارّا cārā, stammering, Sindhī जड़ु; rarely  
 from original s, as: چاڙل cāval, a plummet, Sindhī शाहलु,  
 Hindi साहिल.

چ j mostly corresponds to original j, jh, as: چور jōr,  
 healthy, well, Sindhī जोड़ु; چرئی jarai, rainy weather, Sindhī म्ही.  
 In a few words چ j has sprung from original k, as: چنی jinaī,  
 girl, Sansk. कन्या; and from s, as: ولجہ valjāh, weapon, iden-  
 tical with ولسہ or ولسہ. It is to be noted, that چ frequently  
 interchanges with ز, as چار or زار, sacrifice.

By a gradual softening of the pronunciation the Paṣtō has  
 formed out of چ č and چ j two new sounds, viz چ ʈ (= ts) and چ ɖ  
 (= dz) respectively. Both sounds, i. e. č and ʈ, j and ɖ, are  
 now firmly fixed and only in a few nouns the pronunciation is  
 varying between چ and چ ʈ and چ and چ ɖ. E. g. چاری čārī, a spy,  
 Sindhī चारी; چارہ čārāh, single, alone, Sindhī छड़हो (čharhō);  
 چوان čvān, young, Pera. جوان; چوئی čōlai, wallet, Sindhī  
 झेली. — Like च also च ʈ is frequently interchanging with ز z,  
 as چانہ čanāh or زانہ zanāh, chin, Pera. زنج; Original ख kh also  
 has been changed to च (kh = k = j), as چاڙھ čaḍāh, woman,  
 Sansk. सखी.

It is to be noticed, that also original ش has been changed  
 to چ ʈ, and س to च ɖ, as: چاڙيدل čaḍed-al, to fall by drops,  
 Pera. شاشيدن; چسوتی čsotī or چاڙونای čaḍūnai, an ambush.

ڙ ž is, as regards its pronunciation, identical with the Persian ڙ;  
 it is pronounced like the French j in jour. In Paṣtō as well as

in Persian it has been softened down from ج j, and it is written and pronounced ج by some of the eastern tribes. The Ghāzīs in middle Afghānistān pronounce it still more softly like ز z. E. g. زَبَدَ žabāh, tongue, Sindhī ज़िभ, Sansk. जिह्वा; زَنْجِي žai, the string of a bow, Sindhī जिहु, Pers. زَنْجِلَ vaḡl-āl or وَجَلَدَ vajl-āl, to kill; زَارَا žarā or جَارَا Jarā, lamentation.

ژ ž has also sprung from original h (= z) by the medium of the Zend and Persian, as زِمَی žimai, winter, Zend zima, Pers. زم, Sansk. हिम; وَرِيژِي vrīžē (pl. fem.) rice, Sansk. व्रीहि; زَن žan = Pers. زَن zan (Sansk. हन्), a nominal affix, as: زَمَزَن yamžan, sorrowful, which is also written and pronounced جَن jan (ž = j), as مَكْرِجَن makrjan, deceitful, or مَكْرُونَ.

The palatal sibilant , ژ does now not essentially differ from ز ž, as regards its pronunciation; at least I have not succeeded to find out a marked difference of sound. I refer to the fact, that the modern Afghāns themselves are not able to fix the difference of sound between , and ز; in manuscripts of more recent date both letters also are frequently confounded and only old manuscripts can be taken as a sure guide, as they strictly distinguish between both letters, a few words excepted, the orthography of which seems always to have fluctuated between , and ز. There can be no doubt, that at the time, when the Paṣtō alphabet was fixed, the people must have been conscious of a perceptible difference between the two sibilants , and ز, else they would not have been marked by different diacritical signs. As we have no longer a sure guide on these dark paths, we must endeavour to investigate the nature and origin of the sibilant , by etymology. We have already noticed (§. 2, 1.), that the sibilant in question is now pronounced like g in the east of Afghānistān and only differing from the guttural g by its etymology, whereas in the west the pronunciation ž has become predominant. Similar transitions of sounds we find in the Semitic languages, e. g. the Hebrew gamal (camel) becomes in Arabic jamal (g = j), then (by a palatal subsounding y) gyamal and thence even žamal. Quite in analogy with this we find in Paṣtō a threefold pronunciation of , the verbal termination زَم — ežam etc. for instance is pronounced in the east ežam, in middle Afghānistān ējam and in the west ežam. The original pro-

nunciation of *j*, seems therefore to have been *žy* and *gy* respectively (with a more or less distinct subsounding *y*).

As regards the origin of *j*, it has mostly sprung from *č* *j*, as *كُج*, *kōž*, crooked, Sansk. कुज्, Prākṛit (by assimilation) कुञ्ज, Pers. *كج*; *ي* *yaž* bear, Sansk. *यस्य* (*kā* = *čh* = *č* = *j*). Original *s*, *š*, *ṣ* has frequently passed into *j*, *ž* (no doubt, by the medium of *j*, as noticed already), as *اُز*, *ōžāh*, shoulder, Sansk. *अंस*; *اَل*, *žd-al*, to place, Sansk. r. *स्था*; *ل*, *laž*, little, Sansk. *लेश*; *مَرَك*, *mažak*, mouse, Sansk. *मूषिक*. It is worthy of notice, that the Paštō has changed also original *d* to the sibilant *j*, *ž*, (or *z*) after the precedent of the Zend, as: *خَو*, *xōž*, sweet, Sansk. *स्वादु*; *گَرز* *garz*, dust, Pers. *گَرْد*.

*z* is an original Paštō sound, corresponding to the Persian *z* and pronounced like the English *z*. It is either softened from original *j*, like *زَوِي*, *zōe*, son, Sansk. *जात*, Pers. *زاده*; *زَه*, *zdh*, known, Sansk. *ज्ञात*, Zend *znā*; or it has sprung, after the precedent of the Zend, from original *h*, as *زَهَر*, *ziyar*, yellow, Sansk. *हरित्*, Zend *zairi*, Pers. *زَرْد*; *زَهَر*, *zrah*, heart, Zend *zaredhaya*, Sansk. *हृदय*; or from *s* (*š*) (by transition to *č*) as *زَر*, *zar*, quick, Sansk. *शीघ्र*. *K* (*q*) and *g* (*γ*) also may pass into *z*, by the medium of *č*, as *زَالِيحَه*, *zaličāh*, carpet, Pers. *قالیچه* or *غالیچه*; likewise the tennis *چ* (by passing first into the media *ج*), as: *زَنَمِ غُوز*, *zanryōzāh*, the cone of the pine-tree, Pers. *چلغوز*.

The palatal semivowel *y* replaces not unfrequently an initial vowel or *h*, as *يَبَل*, *yabal*, weak, instead of *اَبَل*, *abal* (Sansk. *अबल*); *يَاڤ-ال*, *yaž-al* = *اَبَنَل*, *ēž-al*, to place; *ي*, *yaž* bear, Sansk. *यस्य*; *يَرَرَي*, *yērrai*, sheep, instead of *هَرَرَي*, *hērrai*; *يَوَاد*, *yavād*, a far land, instead of *هَوَاد*. *ی* may also replace an initial

consonant, that has been dropped, as: **یارہ** yarāh (yerāh) fear, instead of: **ویرہ** vērah\*); **یور** yōr, a husband's younger brother's wife, Sansk.-Hindī **देवराणी** (Sindhī **ڈیراणी**).

§. 4.

3) The Cerebrals.

The Cerebrals form quite a characteristic feature of the Paṣtō; as it shows by the number of sibilants its affinity to the Zend on the one hand, so it enters into close connexion with the Indian Prākṛit tongues by the cerebral row, which it has preserved more fully, than the Prākṛit itself. Every Paṣtō noun therefore, which contains a Cerebral, may easily be traced back to its Indian origin.

The tennis **ط** t commonly corresponds to an original **ट** ṭ or **ठ** ṭh, and is pronounced in the same way as the Sansk. Prākṛit **ट** ṭ, by bending the tip of the tongue towards the cerebral point. E. g. **تول** tōl, all, Sindhī **टोलो**, company (cf. Paṣtō **تولی**); **تپار** tapar, family, Sindhī **टपड़**; **موت** mūt, fist, Sindhī **मुठि** (Sansk. **मुष्टि**). The Paṣtō shows already such a predilection for cerebral sounds, that also original dentals have been changed to cerebrals, as: **توپک** tōpak and **توپک** tōpak, matchlock (Dimin. from **توب**).

The media **ڍ** ḍ corresponds commonly to an original **द** ḍ and **ध** ḍh, as: **ڍڪال** ḍukāl, famine, Sindhī **डुकालु** (Sansk. **दुष्काल**); **ڍوب** ḍub, drowned, Sindhī **डुबणु**; **ڍير** ḍēr, much, Sindhī **ढेर**, heap; **ڍڏ** ḍaḍāh, bribe, Sindhī **वढी**. Now and then the media **ڍ** ḍ has replaced an original tennis (t) as: **گاونڊ** gāvand, neighbourhood (thence **گاونڊي** gāvandai neighbour), Hindī **गासोंटी**, Sansk. **यामान्त**; **ڍاڦار** ḍaḡarāh, a push, Sindhī **टकर**.

\*) Similarly in Persian **بیل**, from Sansk. **वीर**, a hero.

In some cases *ḍ* has sprung from an original *r*, *ṛ*, *as*: دُرْدَاہِ *dōḍaī*, bread, Sindhī - Hindī रोटी; گَادَاہِ *gāḍaī*, a cart, Hindī गाड़ी (*gārī*), Sindhī गाड़ी (*gāḍī*), Sansk. गन्त्री.

س *ṣ* has, as noticed already, a twofold pronunciation; in the east of Afghānistān it is pronounced as a deep Guttural, whereas in the west it has become a cerebral sibilant (*ṣ̌*). A similar phenomenon we find already in Sindhī and in the other Indian Prākṛit idioms. In Sindhī, which stands nearest to the Paṣtō geographically \*) and linguistically, the Sanskrit cerebral ष *ṣ̌* is pronounced either as ख *kh* (= *χ*) or as छ *ch* or changed to simple *s* (cf. my Sindhī Grammar, Introd. §. 5, c. §. 16, d.). In Paṣtō *ṣ̌* has been either changed to *χ* or the original cerebral *ṣ̌* has been retained. According to its origin the Paṣtō س corresponds therefore

a) to the Sansk. cerebral ष *ṣ̌*, as: اَوْس *ūṣ*, camel, Sansk.

उष्टر, Zend *ustra*, Pers. شتر *šter*; کڙاڻ *kṣ-āḷ*, to draw, Sansk. कृष्, Zend *kareshb*; ڇاڻ *ṣ̌-āḷ* (= *ṣ̌-āḷ*) to drink, Sansk. चष्, Zend *čash*.

b) to the palatal ś (श), as: شاخ *šāḥ*, bough, Sansk. शाखा, Pers. شاخ *šāḥ*, tear, Sansk. अश्रु (Sindhī आसू); خواجیه *ḥvāṣṣāh*, mother-in-law, Sansk. अश्व. Also to the palatal ṣ̌ (*ch*), *j*, as: پڻتيدڻ *puṣtēd-āḷ*, to ask, Sansk. पृच्छ, Sindhī पुछण; ڦڙاڻ *ṣ̌-āḷ*, to flee, Sansk. तंच (Zend *tač*), رڻتيا *riṣtiā*, true, right, Sansk. अज (Lat. *rectus*), Zend *raz*. — Also original *s* has passed into س *ṣ̌*, as: ڀڻي *ṣ̌ai*, right (hand), Sindhī सजो; ساڻه *ṣ̌aḍāh*, woman, Sansk. सखी.

In ڀپه *ṣ̌pāh*, foot, س *ṣ̌* seems to have been euphonically placed before the labial *p*, as the cognate idioms show, Sansk.

पाद, Zend *pādha*, Pers. پا.

\*) The Paṣtō tribes have only in later times removed more to wards the north.

Frequently the Persian ش is changed in Paṣtō to ڀ, merely as it appears, out of fondness for a harsher pronunciation, but the words, in which this change takes place, are fixed; e. g. ڀوڻ *χvaṣ*, pleased, Pers. خوش; دشمن *dušman*, enemy, Pers. دشمن; ڀڪار *ḡkār*, chase, Pers. شڪار etc.

The cerebral ڀ *ṇ* of the Paṣtō is identical with the Sindhi ڻ *ṇ*, as regards its pronunciation. It is pronounced rather harshly, so that in many manuscripts it is rendered by the compound letter ڻر *nṛ*, which however must be taken as a simple sound. In the use of this sound the Paṣtō does not always follow the track of the cognate idioms, but according to its own fancy it has sometimes changed an original cerebral *ṇ* again to a dental and sometimes an original dental *n* to a cerebral. E. g. انگڻ *angan* (also written انگڻر *anganṛ*), courtyard, Sindhi ڪڙنگو *baṇ*, forest, Sindhi ڀڻو (Sansk. वन) (vice versa in Paṣtō ڻو *vanāh*, tree, Sindhi वणु); ڳڻڻ *gaṇ-ṇ*, to count, estimate, Sindhi ڳڻڻو *gaṇu*; کڻر *kṇṛ*, left (hand), Sindhi ڪڙيو (Sansk. क्षीण, properly: the weak hand).

Original *ṇ* passes easily into *r* \*), as the pronunciation of both letters is very akin; e. g. منگر *mungar* or منگرڻ *munganṛ*, Sindhi منڱيو, a bug.

The cerebral ڙ *ṛ* the Paṣtō has in common with the Indian Prākṛit tongues; it has sprung from an original *ḍ*. In the use of this (comparatively new) letter the Paṣtō agrees in the main with its cognate idioms, although in some nouns it has gone its own way; e. g. پردہ *pardāh*, screen, Pers. پردہ, Sindhi already पड़ो; ڦڙي *ōrai*, summer, Sindhi ڪاڙهو (ārharu) the hot season; لومبار *lūmbar*, fox, Sindhi ڳوٺو *lūṇṛ*, deaf, Pers. کَر (Sansk. अकर्ण); پراڻڪ *prāṅk*, tiger, Pers. پرنک (*l* = *r*).

\*) The same is the case in Sindhi, where ڻ *ṇ* and ڙ *ṛ* frequently interchange (cf. Sindhi Gr. p. 16, 3).

The Persian conjunct letters **ر**, **rd** are generally dissolved in Paṣtō into **r** as: **آرد** ūrāh, flour, Pers. **آرد** marānai, manly, Pers. **مَرْدَانَه**; **خورد** xvar-al, to eat, Pers. **خوردن** (Sansk. **हृ**).

§. 5.

4) The Dentals.

**ت** **t** generally corresponds with original **t**, **th**, as: **تال** tal, bottom, Sansk. **तल**; **تالای** tālai, a plate, Sansk. **स्थाल**, Sindhi **चालु**. Now and then original Cerebrals have passed into Dentals, as: **ترپ** trap, a jump, Sindhi **ट्रपो**; **تروت** trōt, loss, Sindhi **ट्रोट्रो**, Panjābī **ṭōṭ** (but old Hindī **तोदि**). A media (**d**, **dh**) may also be changed into a tennis (**t**), as: **تار** tār, a gang of robbers, Sindhi **धाड़ो**, Panjābī likewise **dhārā**.

**د** **d** corresponds commonly to original **d**, **dh**, as: **تند** tandāh, thirst, Sansk. **तन्द्रा** (properly: lassitude); **دند** dund, base, mist, Sindhi **धुंधु**. In some nouns **d** has taken its rise from an original tenuis (**t**), as: **دری** drē, three, Sansk. **त्रि** (Sindhi **ट्रे**); **دندای** dvandai, living, Sansk. **जीवन्त**.

**س** **s** corresponds to the Sansk. **स** and **श**, which in the Prākṛit dialects are no longer distinguished; e. g. **سیند** sīnd, river, Sansk. **सिन्धु**; **سوی** sōe, hare, Sansk. **शश**; **سپی** spai, dog, Sansk.

**ڀڻ** (Zend **spā**). Also original **ष** **ṣ** has partly passed into **s**, as: **سانر** sānr, a male buffalo, Sansk. **षण्ड**, Hindī **सांड** or **साड़**; similarly: **سڙي** saṣai, lung, Pers. **شش**. **S** has also been softened down from an original Palatal (**چ** **č** and **ج** **j**) by the medium of **خ** and **غ**, as: **سڪل** sk-ḡl and **ڪڪل** k-ḡl, to drink (Sansk. **चष**, Sindhi **चसणु**); **سول** sv-ḡl, to barn, Sansk. **जल**, Sindhi **जलगु**.

In some words s is only a euphonic prefix, to facilitate the pronunciation of an initial Dental or Labial, as: ستَا stā, thy, of thee (instead of تَا); سپرہ spērāh, gray, Sindhī पीलो (= Sansk. पीत); similarly also is غ used, as حمَا qmā, my, of me (instead of مَا).

ش s corresponds to the Sansk. ष ē and chiefly to श ś, which has frequently passed into š, as شِمَه špāh, night, Sansk. क्षपस् (initial k being dropped); ورَاشَه vrāśāh, language, talk, Sansk. भाषा (with euphonic interpolated r); شِخَر špaṣ, six (after the analogy of the Zend khshvas) Sansk. षष्. कَشَر kaśar the younger (brother), Zend kaśu; مَشَر maśar, the elder (brother), Zend maś; شَوْلَه šōlāh, rice in the husk, Sansk. शालि, Pers. شَالِي šālī, colic, Sansk. शूल.

Also original s has passed into š (as partly already in Persian), as: شَوَلَ šv-āl, to become, to go, Sansk. सु, Pers. شَرِهیدل šarhēd-āl, to rot, Sindhī सड़णु; شَنَد šand, barren, Sindhī संहि (fem.).

ن n is purely dental as in Persian; when preceding ر r it loses its proper sound and must be pronounced with ر as one sound or like the Sansk. Anusvāra, as: پانْرَه panrāh, shoe (pronounce: pārāh, ā = अं). Before b, n is always pronounced like m, as رَنْبِي vrumbai, first. When the short vowel preceding n is lengthened, it is frequently dropped, as اَوَّه ōṣāh, shoulder, Sansk. अस. In some nouns n has sprung from original m, as شِین šīn, green, blue, Sansk. श्याम, from original t in سِین spīn, white, Sansk. श्वेत.

The Paṣṭō shows a great fondness for the letter ل l, which is frequently substituted for the Dentals n, t and d. Thus we find l instead of n in the Infinitive termination (verbal noun), as کَرَل kr-āl, to do, Sindhī करणु (Hindī करना), Pers. کَرْدَن; کَرْدَنی

landai, small, little, Sindhī नंडो; لڙ جڙ (but also جن جن), a girl, Pers. زن; غليم yalīm, enemy, Arabic, غليم. — پلار plār, father, Sansk. पितर, Pers. پدر; پلن plan, broad, Zend pathana, Pers. پهن; سل sal, hundred, Sansk. शत. — ليور lēvar, husband's (younger) brother, Sansk. देवर (Latin: levir); لاس lās, hand, Pers. دست; لڙلڙ lid-al, to see, Pers. ديڏن.

L interchanges also with r, as: چيئي cēlai, a male kid, Hindī छेरी (Sindhī छेली); رڱي ragai, relationship, Sindhī लगو.

L is also added, for euphony's sake, especially before an initial labial v, as: لوارہ lvārāh, all, instead of the common وارہ vārāh; لواڙہ lvažāh, hunger (instead of وڙہ, which is not in use), from وڙي važai, hungry, Sindhī বুখো, Hindī भूखा. L seems also to be a euphonic interpolation in سوارلي svarli, riding, (from سوار sōr or سوار svōr) instead of ساري svarī, similarly in سپرلي sparlai, spring, Zend vanhra, Pahlavī vañhri (see Haug: Zand-Pahlavī Glossary, p. 116), with prefixed euphonic s and transition of v to p = sp (= spar-l-ai); ترپل trapl-al, to jump, Sindhī ट्रपणु (Paštō causal: ترپول trap-av-al).

r corresponds to original r and is mostly preserved in Paštō, as پلار plār, father, Sansk. पितर; سپور spōr, mounted (= سوور), Sansk. अश्ववार, Pers. سوار. For euphony's sake r is interpolated in ورآشہ vrāšāh, talk, Sansk. भाषा.

#### §. 6.

##### 5) The Labials.

It is characteristic for the Paštō, that, in contradistinction to the Irānian languages, it knows no ف f. It is written and even found in proper names, like آفريدی, but obstinately pronounced, even by the Āfrīdīs themselves, Āprīdai.

پ p corresponds to original p and ph, as پَانِرَ pānrāh, leaf, Sansk. पणै; پَت pat, honour, Sindhī पति; پَالَه pālāh, ploughshare, Sansk. फाल. Seldom has p sprung from original v (or b); as: پَرَسَاکَال parśakāl, the rainy season, Sansk. वर्षकाल.

In the compound letters sp however p is, after the precedent of the Zend, in which the Sansk. conjunct letters स्प् sy have already passed into śp, pretty regularly hardened from v, as سَپَ spai, dog, Zend śpā, Sansk. श्वन्; سپين spīn, white, Sansk. श्वेत, Zend śpaēta.

ب b corresponds to original b and bh, as: بَامْبَانِر bāmbanr, a Brahman, Sindhī बांभण, Sansk. ब्राह्मण; بَنَك bang, hemp, Sansk. भङ्गा; Sindhī भंग. Now and then b has been softened from p, as: غَوْبَه γōbāh, cowherd, Sansk. गोप; بَنَر banrāh, feather, Sansk. पणै (Sindhī पण). At the beginning of a word b is often hardened from v, as: بَاتِي bātī, a wick, Sansk. वर्ति, Sindhī वटि; بَدَائِي badāī, greatness, Sindhī वडाई (Sansk. वड़).

م m corresponds to original m, as: مَخ max, face, Sansk. मुख; مُولِي mūlī, radish, Sindhī मूरी, Sansk. मूलक. In some nouns m has sprung from original n, as: مِينَه mīnāh, love, Sindhī नीहु, Sansk. स्नेह; or from a Labial, as: نَوْم nūm, navel, Sansk. नाभि, Pers. نَاف (compare also in Persian مَنَك = مَنَك). Besides نَوْم nūm we find in Pāṣtō also نُو nū, with ejection of final h (bh = h), Pers. نَاح.

The labial semivowel v does not always form in Pāṣtō a diphthong with a preceding a, but is frequently pronounced as a consonant, as: اَوَغَان avyān, an Afghān; اَوَرِيدَل āvrēd-al, to hear.

According to its origin و v corresponds commonly to v, as وَتِي va-ai (or vayai) saying, word, Sindhī वाई (Prākṛit वाञ्छा,

Sansk. वाच्); وَر, vō, wind, Sansk. वायु. — V has frequently sprung from original b, bh, p and f, as: وَند vand, a dike, an embankment, Sindhi वंधि, Pers. بَند; وَرَل vr-āl, to bear, Sansk. भर्, Pers. بَرَن; تار tāv, heat, (also tād), Sansk. ताप, Pers. وَاوَر; وَاوَر vāvrāh, snow, Zend vafra, Pers. وُل vl-āl, to wash, (Sansk. सु, caus. सावय्). Initial v, with following u or ō is frequently a euphonic addition (or supplying an elided h), as: وَاوَر udah or وَاوَر vūdah, asleep; وَاوَرِند ōrēd-āl or وَاوَرِند vōrēd-āl, to rain; وُص vūč, dry, Sansk. शुष्क, Zend huska; وَر vōr, small, Sansk. सुद, Pers. خَر (rd = r in Paštō). — V keeps its place more tenaciously in Paštō, than in Persian, e. g. وَر var, gate, Pers. وَر, from the Sansk. वार; وَرَن vrūn, the thigh, Pers. رَان, Sansk. ऊरु (u = v).

### §. 7.

#### Accumulation and transposition of letters.

The Paštō, as a rough mountainous idiom, accumulates at the beginning of a word two (and even three) consonants. A sibilant (as first or second letter) is thus very frequently joined to an other consonant, as: وَاوَر špūn, shepherd (Pers. شَبَان); وَاوَر skōr, charcoal; وَاوَر psōl, a necklace of gold or silver coins; وَاوَر ŷd-āl, to place; وَاوَر zdah, known; وَاوَر ŷš-āl, to drink; or a liquida is joined with another consonant, which to our ear often sounds harsh, as: وَاوَر mlā, the loins; وَاوَر mzarai, tiger; وَاوَر nmar, sun; وَاوَر ryašt-āl, to roll; وَاوَر nyvat-āl, to attend.

A peculiar phenomenon in Paštō is the transposition of letters, to which chiefly the Sibilants and Labials are subject. In some cases, especially in monosyllabic words, the whole word may thus be inverted, so that the original position of the letters

can only be found out by etymology; e. g. کَنَدَل kē-ḡl, to draw out, to write, Pers. کَشِیدَن, Sansk. कृष्, or بَنَدَل ēk-ḡl; بُزَرگ buzarg, great (Pers. بُزَرگ) or زَبَرگ zbarg; رَوَاح rvaḡ, day (Pers. رَوَاح) or رَوَاح vrad; آوَیَدَل āvrēd-ḡl, to hear (Sansk. श्राव्यु) or آوَیَدَل āvrēd-ḡl; پَتیلَن patēlanr, a weaver's beam, (Hindī पलेटना) or پَلِیتَن palētanr.

In some cases only the transposed form has remained in use, as: لَار lār, way (Zend ratha = rat, t = l and transposed lār); پارسِیدَل parsēd-ḡl, to swell, to be enlarged, Sindhī पसिरणु (Sansk. प्रसृ); زِیرَہ žirāh, beard, Zend raēsha, Pers. ریش.

### §. 8.

### 3. The Paṣtō vowel-system.

The Paṣtō has a great variety of vowels, so that the Arabic signs are not sufficient, to express them accurately, we shall therefore add everywhere a transcription in roman letters.

We give here first a general survey of the Paṣtō vowel-system:

ا		آ	
ē, ē		ō, ō	
i, i		u, u	
ai		au	

In Paṣtō the short vowels a, i, u are not expressed in the body of the consonants, according to the Arabic-Persian method of writing, but only by signs, placed above or beneath the consonant, after which they are to be sounded.

The sign for a (on the designation of ا see below a)) is َ, which is placed above the consonant and is called either فَتْحَة fath'ah (Arabic) or زَبَر zabar (Persian), as فَ fa, س sa, شال šal.

The sign for i (at the end of a word sounded as ē) is ِ; it is placed beneath the consonant and called in Arabic كَسْرَة

kasrah, in Persian زیر, zīr (zēr\*), as ف fi (fē), س si (sē), ش šil.

The sign for u is  $\text{ـُـ}$  and is placed above the consonant; it is called in Arabic ضمة zammah and in Persian پیش pīš (pēš), as: ف fu, سُ su, ش ūl.

But if a noun commence with a short vowel (a, i, u), Alif (!) must be written to serve as base for it, the vowels themselves being considered only as auxiliary signs to the consonants, as: ا a, ا i, ا u. In Arabic initial Alif is in this case always provided with Hamzah (see below), which is placed above or beneath it, as ا a, ا i, ا u, but in Paštō it is dispensed with.

The three long vowels ā, ī (ē), ū (ō) are expressed in the body of the consonants by the letters ا, ی, و, with the addition of the respective vowel points, which must be supported by the preceding letter; ا, ی and و are then called ساکن sākīn or quiescent, because they are not moved by a vowel of their own, as: با\*\* bā, بی bī, بو bū; بال bāl, بیل bīl, بول būl.

But when a noun commences with ā, the sign  $\text{ـَـ}$  is placed horizontally above the Alif =  $\text{آ}$ . This sign is called in Arabic

\*) In Khorāsān the (original) distinction between ū and ō, ī and ē is still made; the Afghāns pronounce therefore zēr, pēš etc.

\*\*) In some Arabic nouns final ی (above which ا also is now and then placed) is treated and pronounced like Alif, as موسى Mūsā, (also written موسى) Moses; عيسى ʿIsā, Jesus; ذكرى dīkrā, recollection etc. Also in the midst of some nouns و and ی is written instead of Alif. In this case, in order to point out the proper pronunciation, the Fath'ah is written vertically, as صَلَوَات صَلَوَات, prayer, تَوَرَّوَات or تَوْرَات taurāt, the Pentateuch (Hebr. תּוֹרָה). In الله allāhu original و has been ejected and the length of the vowel is now indicated by a vertical Fath'ah.

مَدَّ maddah (extension) and is properly an Alif placed above horizontally, so that  $\bar{\text{I}}$  stands for  $\text{II}$ . If a noun commences with  $\bar{\text{I}}$  ( $\bar{\text{e}}$ ) or  $\bar{\text{u}}$  ( $\bar{\text{o}}$ ),  $\text{ى}$  and  $\text{و}$  must be likewise preceded by Alif, to support the vowel-sign, as  $\text{ى}$  and  $\text{و}$  themselves are quiescent; e. g.  $\text{اِید}$   $\bar{\text{I}}$ d,  $\text{اُود}$   $\bar{\text{u}}$ d. The Arabs put, when  $\text{ى}$  and  $\text{و}$  are quiescent, for the sake of accuracy the sign جَزْم jazm (see below) above them, as:  $\text{اَید}$   $\bar{\text{I}}$ d,  $\text{اُود}$   $\bar{\text{u}}$ d etc., but this practice is dropped in Paštō as superfluous.

In the Arabic-Persian manner of writing  $\bar{\text{I}}$  cannot be distinguished from  $\bar{\text{e}}$  nor  $\bar{\text{u}}$  from  $\bar{\text{o}}$ , as the old Grammarians did not consider it necessary to invent new signs for  $\bar{\text{e}}$  and  $\bar{\text{o}}$ . The Afghāns therefore leave it to the reader to find out for himself, when  $\bar{\text{I}}$  or  $\bar{\text{e}}$ ,  $\bar{\text{u}}$  or  $\bar{\text{o}}$  is to be pronounced, though  $\bar{\text{e}}$  and  $\bar{\text{o}}$  are by no means a dialectical variation of  $\bar{\text{I}}$  and  $\bar{\text{u}}$ , but original and independent sounds, founded in the nature of the language. For the Afghāns themselves this non-distinction of  $\bar{\text{e}}$  and  $\bar{\text{o}}$  in writing may have little disadvantage, but for a foreigner many difficulties arise therefrom. We have endeavoured to obviate this difficulty by putting the Kasrah, whenever  $\bar{\text{e}}$  is to be sounded, vertically, as  $\text{اَید}$   $\bar{\text{e}}$ d,  $\text{دَی}$   $\bar{\text{e}}$ , and by placing the sign  $\text{و}$  above  $\text{و}$ , whenever  $\bar{\text{o}}$  is to be sounded, as  $\text{اُود}$   $\bar{\text{o}}$ d,  $\text{دُود}$   $\bar{\text{o}}$ d, dropping at the same time the zammah, as superfluous.

When  $\text{و}$  or  $\text{ى}$  are moved by a vowel, put above or beneath them, they are no longer quiescent, but regular consonants, as  $\text{وَار}$   $\text{vār}$ ,  $\text{خَوَار}$   $\text{xvār}$ ,  $\text{مَآوَا}$   $\text{māvā}$ ,  $\text{يَار}$   $\text{yār}$ ,  $\text{نِيَاَز}$   $\text{niyāz}$  etc.

The diphthongs  $\text{ai}$  and  $\text{au}$  are expressed by a preceding Fath'ah and a following quiescent  $\text{ى}$  or  $\text{و}$ , which must be provided with a Jazm (جَزْم), as  $\text{اَي}$   $\text{ai}$ ,  $\text{اَو}$   $\text{au}$ ,  $\text{بَاي}$   $\text{bail}$ ,  $\text{بَاو}$   $\text{baul}$ . It has been noticed already (§. 6), that  $\text{و}$  with a preceding Fath'ah does not always form a diphthong.

Other orthographic signs are:

1) The جَزْم jazm (abscission)  $\text{جَزْم}$ , which is placed above a consonant, to denote, that it is not moved by any vowel, as  $\text{تَخْت}$   $\text{xtat}$ , throne,  $\text{خِپَل}$   $\text{xpal}$ , self, own.

2) The قَمَزْ hamzah, ʾ, in the midst and at the end of a word takes the place of Alif, to keep asunder two convening vowels, of which the second must be supported by the base ى (usually written without the two dots) furnished with Hamzah, as: لَاقِفْ lā-iq, بَاتِلْ bā-ʾl-aḡ; نَائِي nā-ī; هَوَسِي hōsa-ī; when the second vowel is ū or ǝ, Hamzah alone is placed between them (without the base ى), as طَاوِس pā-ʾs, پَاوِ pā-ǝ\*). When the final vowel is short, Hamzah alone may serve as base for it, as زَوْه zō-ʾ, son (or زَوِي).

3) The وَصْل waḡl, - (conjunction) is only found in Arabic phrases. It joins two words, the latter of which begins with Alif, the accompanying vowel of which is dropped and the final vowel of the preceding word drawn over or joined to the following, as: عَبْدُ الْمَلِكِ ʾabdu-lmaliki; بِسْمِ اللَّهِ bismi-llāhi.

4) The so-called Tanvīn, the doubling of a final vowel-sign (i. e. a un, i an, u in) only occurs in a few words borrowed from the Arabic, especially in the Accusative (which is frequently used in an adverbial sense), as: قَصْدًا qaṣḍan, intentionally, اِتِّفَاقًا ittifāqan, accidentally etc.

We will now consider the nature and origin of the Paṣtō vowels separately:

#### a) The indistinct vowel ǣ.

The Paṣtō has an indistinct vowel-sound, which is also found in the language of the adjoining Kāfirs\*\*). It is somewhat shorter and more indistinct than u in but and can therefore only be learned by hearing. This vowel sound is quite essential to the Paṣtō and is not to be confounded with the short open a, as it is pronounced with the lips only so much opened as to emit a short sound, which fluctuates between ǣ and ĕ. In a grammatical point of view the distinction between ǣ and ǣ is very important, as we shall see hereafter. The Afghāns themselves also are so much conscious

\*) But in common writing Hamzah is generally left out, as پَاوِ.

\*\*) See my essay: On the language of the so-called Kāfirs in the Indian Caucasus. Journal of the Royal Asiatic Society, Vol. XLIX.

of this difference of sound, that in some cases, where grammatical accuracy demands it, they have designated  $\text{ā}$  by a superscribed Hamzah, as:  $\text{كِرْ}$  krāh, done (facta, Sing. fem.)  $\text{كِرْ}$  krāh, facti (Pl. masc.). How important the distinction of  $\text{ā}$  and  $\text{a}$  is, we may see from a few examples,  $\text{خَر}$  ḫar, donkey, but  $\text{خَر}$  ḫar, snoring;  $\text{كَر}$  kar, ploughing and sowing, but  $\text{كَر}$  kaḥ, thin excrement;  $\text{مَت}$  maṭ, quickness, but  $\text{مَت}$  maṭ, the arm above the elbow. This distinction of both sounds is also very essential in the formation of the Plural of some nouns, as:  $\text{سَخَر}$  sḫar, Sing. stone, Plur.  $\text{سَخَر}$  sḫar;  $\text{مَيِّن}$  mayan, Sing. a lover, Pl.  $\text{مَيِّن}$  mayan. The indistinct  $\text{a}$  is therefore mostly found in monosyllabic words or at the end of a noun, the last syllable of which is pronounced very fleet.  $\text{a}$  is now and then exchanged for  $\text{i}$ , both sounds being much alike, as  $\text{زَر}$  zaḥ, quick or  $\text{زِر}$  zir; it interchanges also with  $\text{ū}$ , as  $\text{بَخ}$  paḥ or  $\text{بُخ}$  pūḥ, scurf;  $\text{بَهْتُو}$  paḥtū or  $\text{بُهْتُو}$  pūḥtū.

b) Short  $\text{a}$  is pronounced somewhat indistinctly, like the English  $\text{u}$  in but and as  $\text{a}$  in Sanskrit and the modern Indian vernaculars; only in conjunction with the Gutturals  $\text{خ}$  ḫ,  $\text{ح}$  ḥ,  $\text{ع}$  ʿ a distinct  $\text{a}$  is sounded.

It corresponds generally to original  $\text{a}$ , as  $\text{پَنْد}$  pand, journey, Sindhī  $\text{पन्धु}$  (Sansk.  $\text{पन्था}$ );  $\text{a}$  is not unfrequently shortened from  $\text{ā}$ , as  $\text{وَر}$  var, gate, Sansk.  $\text{वार}$  (in Persian also  $\text{دَر}$ );  $\text{لَمَن}$  laman, skirt of a dress, Pers.  $\text{لَمان}$ . Far more rarely has  $\text{a}$  been transmuted from original  $\text{u}$  ( $\text{ū}$ ),  $\text{i}$  and  $\text{ē}$ , as:  $\text{مَخ}$  maḥ, face, Sansk.  $\text{मुख}$ ;  $\text{مَزَك}$  maḥak, mouse, Sansk.  $\text{मूषिक}$ ;  $\text{پَنْدَنِي}$  paṇḍai, the calf of the leg, Sansk.  $\text{पिण्ड}$ ;  $\text{مَر}$  maḥ, ram, Sansk.  $\text{मेघ}$ .

c) Long  $\text{ā}$ .

$\text{ā}$  corresponds to original  $\text{ā}$ , as  $\text{جَار}$  cār, business, work, Sansk.  $\text{कार्य}$ , Sindhī  $\text{कारि}$ ;  $\text{آسَر}$  āsrāb, refuge, Sansk.  $\text{आश्रय}$  (Sindhī  $\text{आसिरो}$ );  $\text{ā}$  is but rarely lengthened from original  $\text{ā}$ , as  $\text{بَاتِي}$ ,

a wick, Sindhī वट्टि, (Sansk. वस्ति), the double consonant being dissolved into a single one by lengthening the preceding vowel, as in Prākṛit. Now and then ā has taken its rise from the diphthong au, as چاپیر čāpēr, round about, Hindī चौफेर.

d) ě and ē.

Both vowels are in Paštō separate sounds, though in writing they are frequently confounded (as they are expressed by kasrah or ى with kasrah respectively). The ear therefore alone can be a safe guide. On the whole the following rule holds good: e is always pronounced short at the end of a word, be it written by kasrah alone or by ى; it may therefore be considered an cept,

as: کښ kṣě (or کښى kṣē) in; وړاند vṛāndě, before, (written also وړاندې lōṣ, great; زوی zōṣ, son (= زړه)). Long is final ē only in the Format. Sing. and Nom. Plur. of fem. nouns ending in āh, because it is not without an accent, as otherwise; it is therefore always written with ى, as: ښځى ښځ-ē, both syllables being accented. In the midst of a noun ē is always long and must be written by ى, as ډیر đēr, much, پټى pēt-ai, a load. Short e can here only occur, when preceded immediately by a long vowel, which has the accent; in this case ě (= Y) is usually expressed by the base ى, but without dots, as: پاټکو pā-ĕkō, a lever for pounding grain.

e) ǒ, ȳ.

Short ǒ is only found at the beginning or end of a noun and is always expressed by Pěš, as: وکړه vō kṛah, do! لار lār, Format. Pl. of لار lār, road. Final ǒ is properly long and is commonly written so, as لارو lārō, but as the accent is on the preceding syllable in such like nouns, it is also pronounced short and written accordingly.

Long ȳ corresponds to original ō, as ډولای dōlāi, a sedan chair, Hindī डोली, Sansk. दोला; کډه kōḍāh, house, Hindī कोठा, Sansk. कोष्ठ. The contracted ō of the Indian idioms has

likewise been received in Paṣtō, as: نُولَيَّ nōlai, a weasel, Sindhī **नोरु**, Sansk. नकुल (Prāk. णउल). Very frequently ō has sprung from original ā, the Paṣtō showing a particular predilection for this sound; e. g. وَر vō, wind, Sindhī **वाउ**, Sansk. वायु; زَوِي zōe, son, Sansk. जात; اَوْبَه awbāh, water, Pers. آب; this is especially the case, when a letter has been elided, as مَوْر mōr, mother, Sansk. मातर, وَرَر vrōr, brother, Sansk. भ्रातर; خَلَوْر ṭalōr, four, Sansk. चत्वार. But original short a also has frequently passed into ō in Paṣtō, as كَوْر kōr, house, Hindī घर; اَوْبَه awbāh, tear, Sansk. अश्रु.

u and ū also have often been changed to ō, as: كَوْر kōṛ, crooked, Sansk. कुज, कुज्जो (Pers. كَج) نَزَر nẓōr, daughter-in-law, Sansk. सुषा; سَوْغ sōḡ, a sniff, Hindī सूँघ; original au too is commonly contracted to ō, as خَوْنِي ṭōkai, a guard, Hindī चौकी; چَوْپَار čōpār, a summer-house, Hindī चौपाड़.

ō corresponds also in some nouns to original p and b (by transition into v), as: تَامَو tād, heat, Sansk. ताम; اَوَّه awāh, seven, Sansk. सप्तन् (s being first changed to h and then elided); شَو šō, night (or شَو šav, Pers. شَب); اَوْرَه awrāh, cloud, Pers. آبَر (Pārsī avr) Sansk. अभ.

f) Y and ī.

Y corresponds to original i, as: سِنْكَار singār, ornament, Sindhī **सिंगार** (Sansk. शृङ्गार, r = i in Prākṛit); Y is frequently shortened from original a, as جِنِي jina-i, girl, Sansk. कनी; سِل sil, hundred, (also سَل sal) Sansk. शत (Pers. صد). At the beginning of a noun short i is often elided, as the Paṣtō is rather fond of harsh conjunct letters, as: سَتَوْرِي stōrai, star, Pers.

ستاره; درنگ drang, delay, Pers. گران; گرآن grān, heavy, Pers. گران girān.

I corresponds to old ī, as دیوہ dīvāh, lamp, Sansk. दीप; ī is now and then lengthened from i, as سیند sīnd, river, Sansk. सिन्धु; चित्ती cīṭai, letter, Hindī चिट्ठी (by dissolving ṭṭh into single ṭh and lengthening the preceding vowel as in Prākṛit). Original ē also has passed into ī, as سپین spīn, white, Sansk. श्वेत.

g) u and ū.

u corresponds to original u, as: جُغ Juy, yoke, Sansk. युग (Hindī जुग).

ū is old ū, as چور čūr, bruised, Sindhī चूर, Sansk. चूर्ण; short u, which is long by position, is frequently lengthened (by dissolving the conjunct letters) as: کُوتہ kūṭah, dog, Sindhī कुतो (Sansk. कुकुर); کُوبی kūbai, hump-backed, Sindhī कुबो (kubbō) Sansk. कुब्ज (cf. کُوب); مُوت mūt, the fist, Sindhī मुट्टि, Sansk. मुष्टि; سُوند sūnd, dry ginger, Sindhī सुंढि, Sansk. शुण्डि.

Long a often passes into ū in Paṣṭō (as in Persian to, where ā is vulgarly pronounced ū), as: خُونَه xūnāh, a chamber, Pers. خانَه; شپون špūn, shepherd, Pers. شَبان nūm, name, Sansk. नाम (Pers. نام); لُوم lūm, net, Pers. دَام. Also short a, which is long by position, may pass into ū, as کُونَر kūnṛ, deaf, (Pers. کر) Sansk. अकारो.

h) The diphthong ai.

It is to be noticed, that this diphthong is pronounced in Paṣṭō like i in wise (not like the German ai, but ei). Not to be confounded with ai is aī, which is no diphthong at all, but must be pronounced as two separate vowels.

At the end of a noun ai corresponds to the Sindhī ō, ū (Prākṛit ō, and in the inferior dialects already ē; cf. §. 9, 2.), as

تَلَي talai, foot-sole, Sindhī तलो, Sansk. तल; in the midst of a pure Paṣtō noun it is seldom found, oftener in words borrowed from foreign languages, as مَيِل mail, dirt, Sindhī मैलु Sansk. मल.

i) The diphthong au.

In pure Paṣtō words au is rather scarce, as: کَوْتَر kantar, pigeon (contracted from the Persian کَبوتر); پَلَو palau, the hem (of a dress), Sindhī पलउ; au is commonly contracted to ō in Paṣtō, as تَوْبَه tōbāh, repentance (Arab. تَوْبَه); رَوَّشَن rōṣān, bright, Pers. رَوَّشَن; or it is dissolved into av, as اَوْلَاد ōlād (= اَوْلَان) or اَوْلَاد avlād, children; au is even now and then depressed into ā, as قَام qām, tribe, Arab. قَوْم.

## II. Section.

### The formation of themes in Paṣtō.

#### I. The terminations of nouns.

##### §. 9.

#### A. Masculine nouns.

##### 1) Nouns ending in a consonant.

The vocalic termination of the Sanskrit-Prākṛit सो ō, which has still been preserved in Sindhī (ū), has for the greatest part been cast off in Paṣtō, as in Hindī and Panjābī, and most nouns end therefore in a consonant, as کَوْر kōr, house, کَال kāl, year. Most Paṣtō nouns ending in a consonant are therefore masculine, those nouns only being excepted, which imply a female being, as مَوْر mōr, mother, خَوْر ḫōr, sister, لَوْر lōr, daughter etc.; further a certain number of nouns, which in the Nom. Sing. have already dropped their vocalic feminine termination, but restore it again in the Formative Sing. and in the Nom. Plur. §. 10, 5; 51, a.

## 2) Nouns ending in ai.

The termination ai corresponds 1) to the Sindhī termination ʾ ( §. 8, h.). It is worthy of notice, that nearly in all those nouns, in which the Sindhī has preserved the termination ʾ, Hindī and Panjābī commonly ā, (see my Sindhī grammar, §. 6, II), the Pāṣtō exhibits the termination ai, and where the Sindhī has shortened ʾ to u, the Pāṣtō has dropped the vocalic termination altogether, as mentioned already; e. g. ستورۍ stōrai, star, Sindhī तारा; गेंदۍ gēndai, rhinoceros, Sindhī गेंडो (gēndō); ہڈۍ haḍai, bone, Sindhī हड्डो; लٹۍ laṭai, small, Sindhī लटो. 2) To the Sindhī adjective termination ī, as: ہڈۍ hōḍai, obstinate, Sindhī होड़ी; but the Persian adjective termination ī is generally preserved in Pāṣtō, as such adjectives are considered as foreign, as زخمی zaymī, wounded; similarly: کړۍ kōrī, leprous, Hindī कोढ़ी (kōṛhī), the proper Pāṣtō formation being پېسۍ pēsai, from پيس (Pers.).

## 3) Nouns ending in ā.

The termination ā occurs only in a comparatively small number of nouns, which are for the greatest part borrowed from foreign sources, especially the Hindī, Panjābī and Persian, as: جولاۍ jōlā, a weaver, Pers. جولا; چوڑاۍ čūrā, a bangle, Hindī चूड़ा, Sindhī चूड़ो (m.) گوداۍ gūdā, a doll, Hindī गुदा (m.); بېگاۍ bēgā, (= بېگه) evening.

It is remarkable and only to be explained by the Sindhī, that the following nouns are treated as masculine in Pāṣtō: زناۍ zinā, adultery (also written زنا, Sindhī already जिनाहु (زنا)) m., but in Hindī fem., صباۍ sabā, (= صباح, which is also met

with) morning, Sindhī सुन्दु m., but in Hindī-Hindūstānī صَبَا or صَبَاح fem.; صَبَّاء gabbā, red wine \*).

Also adjectives, which are borrowed from the Sindhī, Hindī or Persian, may terminate in ā, as لَگِیَا lagīā, applied, Hindī लगा; رَاو rāvā, proper, Pers.

#### 4) Nouns ending in ō.

The termination ō which is occasionally also written u, with Pēś) is of rare occurrence, as چَرَكَمَوُ čarkā-ō, sprinkling water, Sindhī छिड़काओ; بَانَرُو banrō, eyelash (Sindhī बाणु, Sansk. बाण).

Some adjectives also end in ō, as پِرَزُو pirzō, becoming, Pers. پَرِبَر; پَیَاو payā-ō, fordable, Pers. پَیَاو.

Some nouns ending in ō are feminine: بَارَخُو bārḡō, the cheek; پَآکُو pākō, a flail, pounder; پَآڻُو paṣṭō, the language of the Afghāns; زَانگو zāngō, a swing, cradle; لَآمَبُو lāmbō, swimming; وَرَشُو varšō, meadow; هِنْدِکُو hindkō, the language of the Hindūs, Hindī.

The names of animals, which end in ō, are generic communia, as: بَیَزُو bīzō, m. f. monkey; پِشُو pišō, m. f. cat.

#### 5) Nouns ending in āh.

The termination āh corresponds to the Sindhī termination ō and u and is therefore masculine throughout. It must be well distinguished from the termination āh, which is always feminine, though in writing commonly no distinction is made, as: کُورَہ kūrāh, dog, (Sindhī कुत्तो), but کُورَہ kūrāh, bitch; وَہَڻَہ vēṣṭāh,

\*) Shakespear has not ventured to add a gender in his Hindūst. Dictionary.

hair; تَلَهْ tlah, going. — Many adjectives also end in ah, as: اَرْهْ ūdah, asleep. In some manuscripts the termination ah is occasionally expressed by Fathīah (a) only, as خَوَارْ = خَوَارَهْ xvarāh, food; but this is to be disproved of. — All Persian nouns, which are ending in ـه and are masculine, are reckoned amongst this class.

#### 6) Nouns ending in ē.

The termination ē is peculiar to the Paṣtō, though it is already in some instances met with in Sindhī (राइ rāe = राउ rā-u, cf. Sindhī Grammar, §. 6, VII.), as: زَهْ zē, son; نِهْ nē, mother's brother (Sindhī मामो); دِهْ dē, custom. Nouns, borrowed from foreign sources and ending in ā often affix e (for euphony's sake), as: خُداهْ xudāe, God; اَمْرَاهْ umarāe, a noble (Arab. broken Plural); آشنَاهْ āšnāe, an acquaintance, Pers. آشنا.

Adjectives also may end in ē, as: لَوِيْ lōe, great, تَوِيْ tōe, spilt.

#### 7) Nouns ending in ī.

The termination ī is seldom found in masc. nouns, most nouns of this ending being taken from foreign sources, as: هَرْدَایِ harḍāī, a vagabond (an everywhere); خَاری xārī, a spy, Sindhī चारी; خَایِ hāī, an elephant, Sindhī हाथी.

The termination ī is more common with adjectives, as: خُنْدِی xundī, preserved; چَوِيْ čōī, unplaited (hair); خَوَرَاکِی xvarākī, edible.

#### 8) Nouns ending in ū.

The termination ū is not unfrequent in Paṣtō, as: تَپُوْ t̰pū, island, Sindhī टापू; کَنْدُوْ kandū, a large earthen vessel for holding grain; مِیلُوْ mīlū, bear.

Only a few nouns ending in ū are feminine, as: بَکْرُو bāgū, a bug-bear; پُنبی چُو pumbē-čū, a cotton pod.

Names of animals, ending in ū, are generis communis, as: میلو mīlū, m. and f., bear.

Adjectives also may terminate in ū, as in Sindhī; e. g. پَاسُو pāsū, low-born; لَہو لَہو lāhū, carried away by the water (Sindhī لَہو).

#### 9) Nouns ending in au.

The termination au is found only in a few nouns, as: پَلاو palau, hem of a garment; چَو chau, a small canal; لو lau, harvest; سو sau, hundred.

The only adjective ending in au is: یَو yau, one.

#### §. 10.

#### B. Feminine nouns.

##### 1) Nouns ending in ā.

Most Paṣtō nouns, ending in ā, are feminine (cf. §. 9, 3). This termination corresponds to the Sansk.-Prākṛit formation of fem. nouns in ā, which has been more or less preserved in all the modern vernaculars of India\*), as: غَلَا galā, theft, 'from غَل gal, thief; تَنَّا tanā, thunder; مَلَّا mlā, the loins.

Some foreign nouns, which originally end in āh' or āh (i. e. in a consonant), are treated as feminine in Paṣtō, the final consonants ح h' and ه h not been heard in pronunciation, as: پَنَّا panāh, fem. asylum; صَلَاح salāh', advice (fem. also in Hindūstānī).

##### 2) Nouns ending in āh.

This termination comprises the greatest part of all the fem. nouns in Paṣtō. It corresponds to the Sindhī fem. termination ā, which is shortened from original ā (cf. Sindhī Gram. §. 6, V); the Paṣtō

\*) The Drāvidian idioms of the South being of course excluded.

does not strictly follow the Sindhī in this respect, but according to its own fancy it has subsumed under this termination also such nouns, as end in Sindhī in ī (fem.), or has arbitrarily changed the gender. E. g. **زَبَّ** žabāh, tongue, Sindhī **زِیْم**, Sansk. जिह्वा; **وَاغ** vāgāh, bridle, Sindhī **واگ**, Sansk. वागा; **قَانَتَه** qāntāh, stalk of Indian corn, Sindhī **ڈانڈی**, Hindī **डांडी**; **نَاک** nākāh, alligator, Hindī **नाका** m.

Foreign words ending in ع, preceded by Fath'ah, are likewise feminine, the ع not being heard in Paštō, as **طَمَع** ṭamaṭ, avidity, also written **طَمَعَه** ṭamaṭh; similarly final ه is dropped in **صُلَح** ṣulḥa (or **صُلَحَه** ṣulḥ'āh), peace.

Foreign words, ending in هـ, are on an average feminine, except they imply a male being, as: **نُقْطَه** nuqtāh, point, in Sindhī and Hindī masc.; **نَاشَتَه** nāštāh, breakfast, in Hindūstānī masc.; even **پَرِیْشَتَه** pirištāh, angel, is in Paštō fem.

### 3) Nouns ending in ī.

This termination, which in the Indian Prākṛit tongues comprises most feminine nouns, is comparatively scarce in Paštō and chiefly found in such words, as have been taken from the Persian or the Indian idioms, as: **سِيَالِي** siālī, equality; **وَرَوَرِي** vrōrī, brotherhood; **دُشْنِي** dušnī, enmity (instead of **دُشْمِنِي**); **سَهِيلِي** sahēlī, a handmaid.

### 4) Nouns ending in aī.

Instead of the termination ī the Paštō uses very extensively the termination aī, which originally is identical with it. Already in Sindhī āī is only a variation of ī (cf. Sindhī Gram. §. 10, I, 1. 2.). In Paštō the termination aī has so much got the ascendancy, that most Sindhī nouns ending in ī have been changed to the termination aī in Paštō, as: **ټوپاۍ** ṭōpaī, hat, Sindhī

ढौपी; मَانِری māraī, an upper-storied house, Sindhī माड़ी;  
چیتھی čitaī, letter, Sindhī चिठी.

5) Nouns ending in ě (and in a consonant).

The termination e (i), which is originally identical with I (see Sindhī Gram. §. 6, VII) is only found in a small number of substantives, as ناری nāre, bride; تروری trōre, aunt; یوی yaue, ploughing; it is chiefly used to form the feminine from adjectives and participles (present and past), as وَری vārai, m., hungry, fem. وَری vāre or وَری kavūnkai, m. doing, fem. کَوونکی kavūnke (کَوونک); cf. §. 39, 2.

A certain number of feminine nouns, which originally ended in e, have dropped it in the Nom. Sing., but restore it again in the Format. Sing. and in the Nom. Plur. As in Sindhī already both feminine terminations, ā and ě are interchanging, so has the Paṣtō also some nouns, which in Sindhī end as yet in ā, subsumed under the termination e; e. g. چار čār, business, (instead of چار, Sindhī कारि), Gen. Sing. دَ چار da čāre, Nom. Pl. چاری čāre (or چار); گَوَہار gōhār, a herd (= گَوَہار, Sindhī गोहरि), Gen. Sing. دَ گَوَہار da gōhāre etc.; واپ vāṭ, road (Sindhī वाट), Gen. Sing. دَ واپ da vāṭe etc.; cf. §. 51, a.

Only a small number of fem. nouns ends in an original consonant, which are all irregular in their Plural cf. §. 51, b.

## II. Primary themes derived directly from verbal roots.

### §. 11.

The roots having passed through so manifold and partly radical transmutations in Paṣtō, it is very often difficult, to point out the primary themes, as the etymology of a great many Paṣtō nouns is still wrapt up in darkness.

Notwithstanding this it is very interesting to follow them up, as far as they can be distinctly recognised, as we get thereby a glimpse into the internal fabric of the language and are enabled to lay bare the links, which connect the Paṣṭō with the Indian Prākṛit tongues.

§. 12.

1) The verbal noun ending in ḡh (masc.) and āh (fem.).

Like as in Sindhī a verbal noun, ending in u, may be derived from the verbal root (see Sindhī Gram. §. 8, I, 1, c.), in the same way a verbal noun may be derived in Paṣṭō by dropping the termination of the Infinitive ḡl, and adding to the root of the verb the termination ḡh (= Sindhī u, cf. §. 9, 5), as:

پاڻسِيڊ پاڻسِيڊ-ḡh, grieving, Inf. پاڻسِيڊل پاڻسِيڊ-ḡl, v. n.

ليڏ ليڏ-ḡh, seeing, Inf. ليڏل ليڏ-ḡl, v. a.

The causal verbs do not form a verbal noun in ḡh (nor any verb ending in av-ḡl or ḡv-ḡl), but employ either the termination -unāh, -ūn, or -āun (§. 13. 15.).

Of the formation of a verbal noun in āh, which is so frequent in Sindhī (= ā), only a few remnants have been left in Paṣṭō, as:

نَاسَتِ nāst-āh, f., sitting, Inf. نَاسَتِل nāst-ḡl;

کَپِنَاسَتِ kṣṛ-nāst-āh, sitting down, Inf. کَپِنَاسَتِل kṣṛ-nāst-ḡl.

زِغَاسَتِ zyāst-āh, running, Inf. زِغَاسَتِل zyāst-ḡl.

مِلَاسَتِ mlāst-āh, reposing, Inf. مِلَاسَتِل mlāst-ḡl.

A variation of the verbal nouns in ḡh are those verbal nouns, which are derived from the root by lengthening at the same time the root-vowel, as:

وَاتِ vāt-ḡh, going out, Inf. وَاتِل vāt-ḡl,

and the compounds from وَاتِل, as:

آلِوَاتِ āl-vāt-ḡh, flying, Inf. آلِوَاتِل āl-vāt-ḡl.

کَاتِ kāt-ḡh, seeing, Inf. کَاتِل kāt-ḡl.

يَاسَتِ yāst-ḡh, ejecting, Inf. يَاسَتِل yāst-ḡl.

But in the Formative Plur. the lengthened root vowel is shortened again on account of the accession of the heavy termination ō,

as **دَ كَتُو** *da kat-o*, of seeing. It is to be observed, that the verbal nouns ending in **ah** are always treated as Plurals; only in poetry they are occasionally used in the Sing.

§. 13.

2) The verbal noun ending in -anāh, -unāh.

The most common formation of verbal nouns is that ending in -anāh (fem.), which corresponds to the Sindhī affix **انہ** (Sindhī Gram. §. 8, I, 2), with the only difference, that the gender has been changed in Paṣtō. This affix is added to the verbal root in the same way as the affix **ah**.

The causals and all (active) verbs, which end in **av-āl** or **ōv-āl**, change the termination **anāh** to **unāh**, by the influence of the labial **v**. E. g.

**تَبَنَہ** *tā-anāh*, fleeing, Inf. **تَبَل** *tā-āl*.

**مَرِيدَنَہ** *marēd-anāh*, the being satiated, Inf. **مَرِيدَل** *marēd-āl*.

**پَرَوَرَنَہ** *parvar-anāh*, fostering, Inf. **پَرَوَرَل** *parvar-āl*.

**پَرَاوَنَہ** *parav-unāh*, instigating, Inf. **پَرَاوَل** *parav-āl*.

**پَرَوَنَہ** *prōv-unāh*, selling, Inf. **پَرَوَل** *prōv-āl*.

§. 14.

3) The verbal noun ending in **āl**.

This verbal noun has now become the Infinitive, which is regularly inflected like all other nouns. The termination **āl** is originally identical with the affix **an** (**anāh**), by transition of **n** to **l**. It is remarkable, that the verbal noun in **āl** is always treated as a Plural in Paṣtō (like the verbal noun in **ah**) §. 42, f. In the Formative Plural the affix **āl** may be dropped altogether, so that such a noun outwardly quite coincides with the verbal noun ending in **ah**, as: **دَ لِيدَلُو** *da līdal-ō*, or **دَ لِيدُو** *da līd-ō*, of seeing.

§. 15.

4) The verbal noun ending in **ūn** (**ā-ūn**).

This affix corresponds to the Sindhī form in **anō**, which implies in Sindhī a lasting state or occupation (see Sindhī Gramm. §. 8, I, 2, b). The Sindhī termination **anō** has been

changed to ūn in Paṣṭō, by transition of a to ū, final ō (u) being cast off at the same time. The affix ūn is immediately joined to the verbal root (the termination of the Infinitive ʾal being first cleared away), and in those derivative neuter verbs, which end in ʾed-ʾal, it either accedes to the pure verbal root or to the verbal termination ʾed-, as:

تَرُون tar-ūn, binding, Inf. تَر ʾal tar-ʾal.

گَدُون gad-ūn  
گَدِيدُون gad-ʾed-ūn } intercourse, Inf. گَدِيد ʾal gad-ʾed-ʾal.

But when the termination -ʾed- is a part of the verbal root (i. e. when the verb ending in ʾed-ʾal is not a derivative or no longer considered as such), the affix ūn must always accede to it, as:

آرَوِيدُون ʾarv-ʾed-ūn, hearing, Inf. آرَوِيد ʾal ʾarv-ʾed-ʾal.

وَرِيدُون vēr-ʾed-ūn, being afraid, Inf. وَرِيد ʾal vēr-ʾed-ʾal.

In causal verbs ʾā is inserted before the affix ūn, after the analogy of the Sindhī (Sindhī Gram. §. 42, II), the causal character of the verb being expressed thereby, as:

دَرَسْتَاُون drast-ʾā-ūn, completing, Inf. دَرَسْتَاو ʾal drast-av-ʾal.

بُورَرَاُون būr-ʾā-ūn, shaking, Inf. بُورَرَاو ʾal būr-av-ʾal.

But the formation of the causal verbal noun without inserted ʾā is also admissible, as:

پَاخُون paḡ-av-ūn, cooking, Inf. پَاخَو ʾal paḡ-av-ʾal.

#### §. 16.

##### 5) The Gerundive ending in ūnai.

The Paṣṭō forms a Gerundive, by joining the affix ūnai (corresponding to the Sindhī affix anō, see Sindhī Gram. §. 9, 13. b) immediately to the verbal root. Outwardly it coincides with the affix ūnai, forming the participle present (§. 17), but it is well to be distinguished from it. Its use is not frequent, the Paṣṭō generally preferring another turn, to express the idea of the Gerundive, very likely from no other reason but its liability to being confounded with the participle present. E. g.

لِيدُونِي līd-ūnai, what is or ought to be seen, Inf. لِيد ʾal līd-ʾal.

کَرُونِي kr-ūnai, what is to be done, Inf. کَر ʾal kr-ʾal.

نَه تَرَكْ هَه دَ دِي نَه كِرُونِي وَ نَه كِرِي زَه طَاقَت دَ دِي نَه لِيَدُونِي كَار  
 نَه لَرَم  
 Kallāh 3 Damanah (Rav. Gulsh. I, 97).

Thou wilt not give up this not to be done (work) and I have  
 no strength for this not to be seen work.

§. 17.

6) The participle present ending in ūnai and ūnkai.

The participle present has two terminations, which are affixed to the root of the verb, after the termination of the Infinitive ʔl has been cast off.

a) The termination ūnai (fem. ūne).

This participial affix is identical with the Sindhī affix andō (see Sindhī Gram. §. 8, I, 10); in Paṣtō the dental d (= t) has been ejected and a deepened to ū, to restore the original quantity.

گِرَزِدُونِي girzēd-ūnai, going about, Inf. گِرَزِدَل girzēd-ʔl.

مَاتِيدُونِي māt-ēd-ūnai, being broken, Inf. مَاتِيدَل māt-ēd-ʔl.

چُوِيُونِي čūp-ūnai, sucking, Inf. چُوِيَل čūp-ʔl.

كَبُوِيُونِي kə-av-ūnai, causing to write, Inf. كَبُوَل kə-av-ʔl.

b) The termination ūnkai (fem. ūnke).

This termination is formed from the preceding and the adjective affix kai (Sindhī kō), so that it is properly a verbal adjective. For this reason it is frequently used in the sense of a substantive.

مَسِيدُونَكِي masēd-ūnkai, smiling, Inf. مَسِيدَل masēd-ʔl.

لُوتُونَكِي lūt-ūnkai, a plunderer, Inf. لُوتَل lūt-ʔl.

§. 18.

7) The participle perfect ending in ai and alai.

As in the Present, the Paṣtō has also two participial terminations in the Perfect.

1) The termination ai (fem. e), which, after the rejection of the Infinitive termination ʔl, is immediately added to the verbal

root. This affix corresponds to the Sindhī affix *yō*, Hindī *ā* (Persian *ah*), which has sprung from the Sansk. affix *ā* *ta* by elision of *t* (see: Sindhī Gram. §. 9, 14). Like the Sindhī (Hindī etc.) the Pāṣtō can form a perfect participle of the Active Voice only from neuter verbs, whereas the perfect participle of transitive and causal verbs has always a passive signification.

As regards the formation of the perfect participle the following particulars are to be noticed:

a) Monosyllabic verbs, commencing with a conjunct letter, insert a euphonic *a* between the two consonants, to facilitate the pronunciation, as:

تَلَّی tal-ai, gone, Inf. تَلَّی tl-ai.

شَوَّی šav-ai, having become, Inf. شَوَّی šv-ai.

کَرَّی kar-ai, having been made, Inf. کَرَّی kr-ai.

b) The neuter derivative verbs (compounded with a substantive or adjective) are dissolved in the participle perfect into their component parts and use the perfect participle of شَوَّی šv-ai,

to become, i. e. شَوَّی šavai, which is put after the substantive or adjective. Those neuter verbs, which end in *ēd-ai* and are not derivatives or no longer considered as such, form their perfect participle regularly, by adding the affix *ai* to the verbal root. E. g.

دَاغ شَوَّی dāy šavai, branded, Inf. دَاغِشَد dāy-ēd-ai (دَاغ subst.)

زَرَّ شَوَّی zōr šavai, having become old, Inf. زَرَّشَد zar-ēd-ai (زَرَّ adj.)

وَرَّیدَ verēd-ai, having been afraid, Inf. وَرَّیدَ vērēd-ai.

c) The causals (*av-ai*), which are not compounded with a substantive or adjective (§. 118) or which are no longer treated as such, form their participle perfect seldom by the termination *ai*, but mostly by *alai* (cf. 2). The derivative causals are dissolved in the participle perfect into their component parts and put after the substantive or adjective the perf. participle of کَرَّی kr-ai,

i. e. کَرَّی karai. E. g.

جَارَ کَرَّی jār karai, sacrificed, Inf. جَارَوَل jār-av-ai (جَار subst.)

جَوَّزَ کَرَّی jōr karai, made healthy, Inf. جَوَّزَوَل jōr-av-ai (جَوَّز adj.)

2) The termination *alai*, which is joined to the verbal root in the same way as *ai*. The very same termination we find

already in Sindhī (a-lai, see Sindhī Gram. §. 10, 21, b), Marāṭhī and Gujarātī, by which the perfect participle is rendered more like an adjective in form, without essentially affecting its original participial signification. The affix (a-)lai is originally an adjective affix, the use of which is already known in Prākṛit (cf. Varar. Prāk. Prakāśa, IV, 26, Cowell's ed.). In Paṣṭō ai (the proper affix of the perfect participle) has been changed to a before the affix lai, similarly as in Sindhī ō has passed into a.

It is to be noticed, that the causals ending in av-ai (as far as they are not derivatives) and generally also the active verbs ending in -v-ai, form their participle perfect mostly by alai, less by ai. E. g.

وَرَهَوَلَيَّ varh-av-alai, released, Inf. وَرَهَوَل varh-av-ai.

نِيَّوَلَيَّ ōv-alai, shown, Inf. نِيَّوَل ōv-ai.

نِيَّوَلَيَّ nīv-alai, } seized, Inf. نِيَّوَل nīv-ai.  
نِيَّوَل nīv-ai }

All verbs may assume the termination alai instead of ai. The causals eject now and then before alai the syllable -av-, as نَمَلَيَّ dam-alai, breathed, instead of نَمَوَلَيَّ dam-av-alai. The monosyllabic verbs commencing with a conjunct consonant, do not insert between the two consonants a euphonic a, when assuming the termination alai, as:

تَلَلَيَّ tl-alai, gone, Inf. تَلَل tl-ai.

### III. Secondary themes.

Under this class we comprise all those nouns (substantives as well as adjectives), which are derived, according to fixed laws, from another (primary) theme.

#### A. Formation of abstract nouns,

which, by means of different affixes are derived from other nominal themes (substantives and adjectives).

##### §. 19.

##### 1) Nouns ending in ī (fem.).

This termination, which in Sindhī (see: Sindhī Gram. §. 10, I, 1) and Persian comprises the greatest number of abstract nouns, is not so frequent in Paṣṭō. E. g.

بَدَائِي badā-ī (baḍā-y-ī) greatness, from بَدَائِي badāe, great.  
 خَوَاشِي xvaṣ-ī, pleasure, from خَوَاش xvaṣ, pleased.  
 جَاسُوسِي jāśūs-ī, spying, from جَاسُوس jāśūs, spy.

§. 20.

2) Nouns ending in ā and āī (fem.).

By means of these two affixes (which are essentially identical) abstract nouns are derived from substantives and adjectives. E. g.

غَلَّāl-ā, theft, from غَلَّāl, thief.

رُونَرَا rūnr-ā or: رُونَرَاī rūnr-āī } splendour, from رُونَر rūnr, splendid.  
 رَنَرَا ranr-ā رَنَرَاī ranr-āī }

رَوَّشَنَاī rōṣn-āī, brightness, from رَوَّشَن rōṣan, bright.

§. 21.

3) Nouns ending in āh (fem.).

The affix āh (shortened from original ā) forms abstract nouns from adjectives; final ō is changed before it to av and ai to i; e. g.

پَوَّه pōh-āh, understanding, from پَوَّه pōh, intelligent.

پِرْزَوَّه pirzav-āh, desire, from پِرْزَوَّه pirzō, desirous.

سَتَرَاī stārī-ah, fatigue, from سَتَرَاī starai, fatigued.

§. 22.

4) Nouns ending in tiā (stiā, siā) (fem.).

The Paṣtō affix tiā corresponds to the Sindhī affix ता, ताई, which forms numerous abstract nouns from substantives and adjectives (see: Sindhī Gram. §. 10, 3). The affix stiā and (thence by assimilation) siā is identical with tiā, the sibilant being only a euphonic addition; it is only found in a few nouns. The affix tiā is immediately joined to the noun; in some adjectives however the

original (long) root-vowel (ā), which in the Nom. Sing. had been deepened to ɔ or ʉ is restored again, but shortened at the same time to a before the accession of this (heavy) affix; final ai is changed to ī (i. e. the noun is put in the Formative), and final a dropped.

دُرُوندِیَا drūnd-tiā, heaviness, from دُرُوند drūnd, heavy.

زُورِیَا zōr-tiā }  
زَرِیَا zār-tiā } oldage, from زُر zōr, old.

سَترِیَا stār-tiā, fatigue, from سَترِی starai, fatigued.

مِیلمَستیَا mēlma-stiā, hospitality, from مِیلمَ mēlmaḥ, guest.

تَنگیسیَا tang-siā, tightness, from تَنگ tang, tight.

§. 23.

5) Nouns ending in at, tōb (ōb), tūn (ūn), vālai, valī, galvī, avī.

All these abstract affixes are derived from one Sanskrit affix, as different from each other as they may appear at the first glimpse. We have here an instance, how the modern Prākṛit idioms (and amongst them also the Pāṣṭō) have managed to derive from one affix a variety of abstract formations. The Sansk. affix, from which all these various forms have sprung, is त्व tva\*) (cf. Sindhī Gram. §. 10, 6).

a) The affix at (masc.).

This affix corresponds to the Sindhī affix āta (Sindhī Gram. §. 10, b). (The process of assimilation is: त्व tv = त् tt, and by lengthening the conjunctive vowel a = āt; by transition to the cerebral class = āt; in Pāṣṭō however the conjunctive vowel is not lengthened.) This formation is in Pāṣṭō, as well as in Sindhī, of rare occurrence.

لَوِی لَوِی-at, greatness, from لَوِی lōe, great.

\*) Or त्वान् tvān, Prāk. त्वान्; cf. Lassen, Instit. Linguae Prāk. §. 89.

b) The affix tōb (ōb) (masc.).

In the case of this affix the process of assimilation is: tva is dissolved into tav = tab and short a deepened to ō = tōb; from tōb has sprung ōb by elision of t (in accordance with a common Prākṛit rule). — This formation is very common in Paṣṭō and derives abstract nouns from substantives and adjectives. In some adjectives the original (long) a, which in the Nom. Sing. has been deepened to ō (ū) is restored again before the accession of this (heavy) affix, but shortened at the same time. Nouns ending in ai are put in the Formative (= 1) before this affix, and some adjectives ending in ai, drop their final syllable altogether. E. g.

سپینتوب spīn-tōb, whiteness, from سپین spīn, white.

سرتوب sar-tōb } coldness, from سور sōr, cold.  
سورتوب sōr-tōb }

سارینتوب sarī-tōb, humanity, from ساری sarai, man.

لیوانتوب lēvan-tōb, madness, from لیوانی lēvanai, mad.

پارسوب pars-ōb, swelling; Adj. not in use (cf. پارسیدل pars-ed-al).

c) The affix tūn (ūn) (masc.)

This affix is lengthened from تن; ūn is the same as tūn, only with elision of t. Both affixes derive abstract nouns from adjectives, seldom from substantives. Before the affix ūn final ai, ah etc. is dropped. \*)

بیالتون biyal-tūn, separation, from بیال biyal, separated.

پایاستون paivast-ūn, connexion, from پایاسته paivastah.

زوندون žvand-ūn, life, from زندی žvandai, alive.

کندتون kunda-tūn } widowhood, from کنده kundāh, widow.  
کندآهتون kundāh-tūn }

\*) Not to be confounded with the abstract affix تون tūn is the noun تون tūn = Pers. ستان place, which also forms compounds, as میتون mēzā-tūn, an ant's nest or place (§. 38, 2).

d) The affix vālai (masc.)\*).

The affix vālai is equally to be derived from वन = त्वन, the medial a being lengthened to ā and n changed to l. By means of this affix numerous abstract nouns are formed from substantives and adjectives. Before the accession of this affix original (long) a, which in the Nom. Sing. has been deepened to ǝ (or ǝ), may be restored again in adjectives, but must be shortened. E. g.

سُورَوَالِي sūr-vālai, redness, from سُور sūr, red.

کَنُورَوَالِي kanṛ-vālai }  
کُونُورَوَالِي kūṇṛ-vālai } deafness, from کُونُ kōṇṛ, deaf.

مُورَوَالِي mōr-vālai, motherhood, from مُور mōr, mother.

e) The affix valī (fem.).

The affix valī is apparently shortened from vālai and the masc. termination changed at the same time to the feminine. It is of rare occurrence and implies chiefly relationship. E. g.

قَامَوَالِي qām-valī, clanship, from قَام qām, clan, tribe.

وَرَوَالِي vrōr-valī, brotherhood, from وَر vrōr, brother.

f) The affix galvī, galī (fem.).

The origin of this affix is rather obscure; but we do not hesitate to derive it too from वन = त्वन. In Persian already initial v is often changed to g, and that n is often changed to l in Paṣtō, we have noticed already (§ 5). The original form of this affix is galī, which is also found; in gal-v-i v seems to be a euphonic insertion. It denotes, like valī, relationship. E. g.

وَرَوَرِ گَلَوِي vrōr-galvī, brotherhood, from وَر vrōr, brother.

پېژند گَلَوِي pēžand-galvī }  
پېژند گَالِي pēžand-galī } acquaintance, from پېژندِي (part.perf., known).

\*) The abstract affix vālai is not to be compared with the Hindi vālā (Sindhi vārō), for we have its form in Paṣtō still (vāl).

g) The affix *avī* (fem.).

The affix *a-vī* (for *a* is the conjunctive vowel) corresponds to the Sindhī affix *pī* (Sindhī Gram. § 10, 6) = *bī* = *vī*. It implies likewise relationship and is not used much. E. g.

خپلوی *xpal-avī*, relationship, from خپل *xpal*, own.

§ 24.

b) Nouns ending in *garāh* (fem.) and *garai* (masc.).

The affix *garāh* corresponds to the Sindhī affix **कार**, which already in Sindhī forms abstract nouns (Sindhī Gram. § 10, 7). In Paṣṭō *k* has passed into the media *g* and *r* into *r*, *ā* being shortened at the same time (cf. Pers. کَر). This formation is very scarce; e. g.

بڻيڪاري <i>ṣṭe-garāh</i> بڻيڪاري <i>ṣṭe-garai</i>	}	goodness, from بڻ <i>ṣṭh</i> , good.
--	---	--------------------------------------

**B. Formation of appellatives and adjectives.**

§ 25.

In the following formations we comprise only such appellatives and adjectives, the derivation of which from another nominal theme by means of an affix may be clearly established. The Persian formations, which have been brought over to the Paṣṭō, we shall pass by as foreign to our investigation.

§ 26.

1) The affix *ai* (ī).

By means of the affix *ai* numerous adjectives are formed; it corresponds according to etymology:

a) To the Sindhī affix *ō* = Sansk. **औ** (Sindhī Gram. § 10, 14), which is subjoined to the nominal theme, as:

پاخِي *pax-ai*, mangy, from پاخ *pax*, mange.

ماخي *max-ai*, even, equal, from ماخ *max*, face.

پارُونِي *parūn-ai*, yester, from پارُون *parūn*, yesterday (adv.).

b) To the Sindhī affix I (Sansk. ईय, इय; Sindhī Gram. § 10, 9, b), which forms adjectives implying descent, as:

پېښاورى pēṣāwar-ai, of Peshāwar, from پېښاور Pēshāwar.

سواتى svāt-ai, of Svāt, from سوات Svāt.

In Persian formations or such as are made in analogy with the Persian (or Hindī) the affix I is used, as:

روښاني rōṣān-i, an adherent of Pīr rōṣān;

هندي hind-i, Indian, from هند Hind, India.

خرچى xart-i, prodigal, from خرچ xart, expense.

#### §. 27.

##### 2) The affix anai, an (Inai, ūnai).

This affix corresponds to the Sindhī affix āṇō (Sindhī Gram. § 10, 27), by which adjectives are formed implying time, place or relation generally. When the nominal theme ends in a vowel or final ah (āh), the initial a of the affix anai is dropped as well as final h of the theme. E. g.

اوسى ōs-anai present (time), from اوس ōs, now (adv.).

بيگاني bēgā-nai, last night's, from بيگا bēgā (or بېگه) evening.

پورتي pōrta-nai, upper, from پورته pōrtah, above.

The termination ai is also frequently dropped, as:

اوسن ōs-an, hodiernal.

An irregular formation is:

برنى bar-anai, last night's, from برانه barāyah, last night (adv.).

Besides the form anai we find also ūnai (Sindhī Gram. § 10, 28, a) and inai, the latter form always, when the nominal theme ends in i (e) and ē; e. g.

ريڻوڻي riṭ-ūnai } true, truthful, from an obsolete theme ريڻت

ريڻي riṭ-inai } (Pers. راست).

وړاندي vṛānd-inai, foremost, from وړاند vṛānde, ahead (adv.).

§ 28.

3) The affix tai and tū.

Both affixes, which are only found now in a few nouns, are identical with the Sindhi affix atu (Sindhi Gram. § 10, 18), and form appellatives, which denote an occupation or usual action; e. g.

رَوَهِتَى rōḥah-tai, one who fasts much, from رَوَهِ رōḥāh, fast.

جِرگَتُو jirga-tū, a member of the جِرگَه jirgāh, assembly of the clan.

§ 29.

4) The affix zan, žan, jan.

This affix is of Persian origin but frequently used in Paštō nouns; žan and jan is only a different pronunciation of zan. The fem. termination āh is dropped before the accession of this affix. E. g.

غَمَزَن yam-zan	}	sorrowful, from غَم yam, sorrow.
غَمَزَن yam-žan		
غَمَجَن yam-jan		

تَبَجَن tab-jan, feverish, from تَب tabāh, fever.

§. 30.

5) The affix man (an).

The affix man is shortened from the Persian affix mand (Sansk. मन्, Prāk. मन्त), from which has sprung the affix an by elision of initial m. It forms adjectives implying possession. Before man final ī and aī are changed to a, and before an final āh, ī and aī are dropped altogether. E. g.

دَوْلَتَمَن daulat-man, rich, from دَوْلَت daulat, wealth.

مِیرْطَمَن mīrṭa-man, hateful, from مِیرْطِ mīrṭī, spite.

پَمان pam-an, mangy, from پَم pam, mange.

خِیرَان xīr-an, dirty, from خِیرَه xīrāh, dirt.

وَرَن var-an, woollen, from وَرَنِي varai, wool.

§. 31.

6) The affix *bār*, *var* and *vāl*.

These three affixes are identical and correspond to the Sindhī affix *vārō* (Hindhī *vāl* or *vālā*, Sansk. वल; see Sindhī Gram. § 10, 36). The Paṣtō affix *bār* and *var* is used in the same sense as the Persian وار and ور\*) and the Sindhī *vārō*, denoting possession, whereas *vāl* is now used to form a few appellatives implying descent, which is already partly the case in Hindī.

When a noun ends in a consonant, the affix *var* (but not *bār*) is joined to the nominal theme by the conjunctive vowel *a*, (as in Sindhī), to facilitate the pronunciation.

منتبار minnat-bār, obliged, from منت obligation.

زړوار zraḥ-var, bold (having a heart), زړه zraḥ, heart.

بختور bayt-a-var, lucky, from بخت bayt, luck.

بڼيروال bunēr-vāl, a man of Bunēr.

پاکلای وړ paklai-vāl, a man of Paklai.

The affix وار *vār* is also found in Paṣtō, but only in nouns borrowed directly from the Persian.

§. 32.

7) The affix *yālai*.

This affix corresponds to the Sindhī affix *ārō* or *ālu* (Sindhī Gram. § 10, 15), which forms adjectives implying possession. In Paṣtō a euphonic *y* has been inserted before *ālō* = *y-ālai*.

The termination *ai*, *āh* (*ai*) is dropped before the accession of this affix. E. g.

جنگيالی jang-yālai, warlike, from جنگ war (Pers. جنگار).

توريالی tūr-yālai, a swordsman, from تور tūrāh, sword.

برکيالی brag-yālai, spotted by leprosy, from برکي bragai, leprosy.

\*) Vullers, *Institutiones Linguae Persicae*, p. 165, 174. 175. derives all these affixes from آورین, but the Sindhī and Hindī speaks too strongly and also too clearly against it.

§. 33.

8) The affix *ĕlah*, *ĕlai* and *ilai*.

These affixes, which are all identical, correspond to the Sindhi affix *irō*, *ērō* (*ĕlō*) (Sindhi Gram. § 10, 16). In *Paṣtō* they are now used only in a few words and form appellatives of descent.

رَوِيلَه	rōh-ĕlah	} a mountaineer, from رَوِي, rōh, a mountainous country (Sindhi رَوِي).
رَوِيلَي	rōh-ĕlai	
رَوِيلِي	rōh-ilai	

§. 34.

9) The affix *in*, *ināh*.

This affix corresponds to the Sindhi affix *inō*, (Sansk. *इन*; Sindhi Gram. § 10, 30), Persian *in*, *ināh*, and forms adjectives, which signify „consisting of, made of“. The termination *ai*, *ai* and *āh* is dropped before the accession of this affix. E. g.

رِيَسَمِيَن rēṣm-in, silken, from رِيَسَم rēṣam, silk.

خَوَرِيَن xavv-in, made of clay, from خَوَرِي xavrai, clay.

وَرِيَن var-ināh, woollen, from وَرِي varai, wool.

IV. Formation of Diminutives.

§. 35.

As in Sindhi so also in *Paṣtō* a diminutive may be formed by using the fem. termination of a noun, where this is admissible, as:

دَنَدِي dand a (somewhat large) tank, دَنَدِي dandāh (fem.) a (somewhat) smaller tank.

But the *Paṣtō* possesses also a great variety of diminutive affixes, more so than any of the cognate idioms. They are the following:

1) *K*, which corresponds to the Sansk. dimin. affix *क*. When a noun ends in consonant, *a* is used as conjunctive vowel, but when it ends in *āh* (fem.), *h* only is dropped and the fem. noun passes into a masculine on account of the affix *k*; the fem. termination *kāh* however is also in use.

مَرْدَكْ mard-a-k, a little man, from مَرْد mard, man.

تَوْبَكْ tōp-a-k, a musket (small cannon), from تَوْبْ tōp, cannon.

بَنْرَكْ banra-kāh, a small feather, from بَنْرْ banrāh, a (large) feather.

2) Kai (fem. kaī). This affix is identical with the preceding. In monosyllabic words, which have *ō* or *ū* in the Nom. Sing. deepened from original *ā*, this vowel is restored again before the affix *kai* but shortened, the addition of the (heavy) affix not admitting any longer the retention of the (long) root-vowel.

When the noun ends in *ai* or *āh*, *i* and *h* are dropped before the affix; long *ā* is frequently shortened and *ai* dropped altogether. E. g.

خَیْرَكْ ẓapar-kai, a thin sheet of water, from خَیْرَی ẓaparaī, a pool.

شَیْنَكْ špan-kai m. a little shepherd }  
شَیْنَكْ špan-kai f. a little shepherdess } from شَیْرُن špūn, shepherd.

جَیْنَكْ jīna-kai, a little girl, from جَیْنِی jīnai, girl.

تَوْتَكْ tōta-kai, a swallow (a small parrot), from تَوْتَا tōtā (m.) a parrot.

وَرَكْ vru-kai, very small (fem. وَرَكْ vru-ke) from وَر vūr, small.

3) gai (fem. gai). This affix is identical with *kai*, only the tenuis *k* having passed into the corresponding media *g*.

بَازَرَكْ bāzār-gai, a small Bāzār, from بَازَر bāzār.

بُوْدَاَكْ būdā-gai, an old little man }  
بُوْدَاَكْ būdā-gai, an old little woman } from بُوْدَا būdā, old.

تَافِلَكْ ẓafl-gai, a small pony, from تَافِل ẓafl, a pony.

Irregular is:

زَرَكْ zar-gai, a small heart, from زَر zrah, heart.

4) ū-kai, ū-gai. Both these affixes do not differ in any way from the preceding affixes, only *ū* being added as conjunctive vowel, before which every final vowel (or diphthong) disappears. E. g.

دَنْدَوَكْ dand-ū-kai, a small pond, from دَنْد dand, a pond.

چُرَوَكْ čur-ū-kai, a small knife, from چُرَی čurai, knife.

5) ai. This affix is identical with kai, k being elided and only ai added to the noun, if the final consonant be a guttural or a liquida (l, r). E. g.

خَتَكِ tatak-ai, a small hammer, from خَتَك tatak, hammer.

جُونَكِي jūng-ai, a small young camel, from جُونَك jūng, a young camel.

غَرَخِي tarx-ai, a reel, from غَرَخ tarx, a wheel.

بَهَادُرِي bahādur-ai, a little hero, from بَهَادُر bahādur, a hero.

§ 36.

Besides k, kai, gai the Paštō makes also use of the second diminutive affix of the Sanskrit, र r, deriving from it a variety of new diminutive affixes.

b) rai (fem. rai). This affix corresponds to the Sindhi diminutive affix rō (= र); its conjunctive vowel is a, before which a final vowel (or diphthong) is dropped.

خَسَرِي xas-a-rai, a little bit of straw, from خَس xas, a straw.

بَاچَرِي bača-rai, a little infant, from بَاچِي bačai, infant.

كُوزَرِي kūz-a-rai, a small gugglet, from كُوز kūzāh, a gugglet.

7) ū-rai (ūrai), ō-rai (ō-rai) (fem. ūrai, ōrai or ūre, ōre). These affixes are identical with rai, with the only difference, that ū or ō are used as conjunctive vowels, before which a vocalic termination must disappear.

جَنگُورِي jangū-rai, skirmish, from جَنگ jang, battle.

گَدَورِي gad-ō-rai, lamb, from گَد gad, a ram.

مَازَکُورِي mažak-ūrai, a little mouse, from مَاز maža-k, a mouse.

§ 37.

8) Karai, garai, gūrai (fem. kare, gare, gūrai and gūre). It appears, that these affixes, which are of rare occurrence, comprise both diminutive affixes k, g and r (r). E. g.

تَوَتَکَرِي tōta-karai, swallow, from تَوَتَا tōtā, parrot.

وَزَگَرِي vuz-garai  
 وَزَگُورِي vuz-gūrai

} a kid, from وَز vuz, a he-goat.

garai is now and then also added to adjectives, as :

نیمگرای nīm-garai, incomplete (a little half), from نیم nīm, half.

9) ūn-garai. This affix, which is only found in a few words, is identical with garai, with the only difference, that ūn (= ū) is used as conjunctive vowel; e. g.

بچونگری bac-ūngarai, a little infant, from بچی bačai, infant.

10) ū-ṭai, ō-ṭai (fem. ūṭai, ōṭai with subst., ūṭe, ōṭe with adj.). The origin of these (identical) affixes is somewhat obscure. There can be no doubt, that ū and ō are conjunctive vowels, the proper diminutive affix is therefore ṭai. We find the very same affix in Sindhī, ūṭō or ōṭō (Sindhī Gram. § 11). It is probable, that r has been first changed to ḍ (ڑ, as already in Prākṛit) and thence to ṭ. Before ū-ṭai or ōṭai a final vocalic termination is dropped. This diminutive affix is not only joined to substantives but also to adjectives. E. g.

ساروٹی sar-ōṭai, a little, man, from ساری sarai, man.

کچوٹی kač-ūṭai, very small, from کچ kač, small.

جینوٹی jin-ōṭai, a little girl, from جینی jinaī, girl.

11) gūṭai or gōṭai (fem. gūṭai, gōṭai). This affix is apparently a combination of ūṭai (ōṭai) with the affix g = k, like karai and garai. E. g.

ملاوٹی mullā-gūṭai a little (= ignorant) mullā.

کاروٹی kār-gōṭai, a small matter, from کار kār, matter.

زاروٹی zar-gōṭai, a little heart, from زار zarh, heart.

#### §. 38.

### V. Composition of nouns.

The Paṣṭō uses (abstracted from those, which are directly taken from the Persian), four kinds of compound nouns:

1) Copulative compounds (so-called Dvandva), two nouns being joined together either by the Persian copula و (ō) or by the insertion of the long vowel ā. Such like compounds are considered, from a grammatical point of view, as one word. E. g.

سَرومَال sar-ō-māl, head and property.

کُورَاکُور kōr-ā-kōr, house by house.

Compositions, made after the analogy of the Persian, by the proposition پَه pah (= Pers. به) are not frequent, as: پَه پَهَر town by town. Juxtapositions, like نَاسَت وَلَاز sitting, standing (= restless), رَاکِر وَرکِر giving to him, giving to me = commerce, are not treated in Paṣtō as one noun (and therefore no compound), as every word is inflected separately.

2) Dependent compounds (so-called Tatpuruṣa), the first of which is grammatically dependent on the second. The first noun stands mostly in a Genitive-relation to the second, far more rarely is another case-relation implied. E. g.

نُور پَرَوَانَه nvar-prēvāṭah, sun-set.

کَلَه مَنَار kalāh-minar, a tower of skulls.

In such like compounds the first noun commonly remains unaltered, but a vocalic termination may also undergo a change; so may final ai be changed to a and final āh be dropped altogether.

مِهَرُون mēḥa-tūn, an ants' nest (نُون = Pers. ستان), from مِهَرِي mēḥai.

خَاوَرگَارِي xāvr-gārai, a clay-pit (خَاوَر xāvrāh).

اُوسپِن خَاوَر ōspīn-xārai iron-dross (اُوسپِنَه ōspīnāh).

Only in poetry such compounds are found, as:

کَمَر پَرُوت kamar-prōt, fallen on the waist.

More common are such compounds, as are formed after the analogy of the Persian, as:

گَوَښَه نِشِين gōṣāh-nišīn, sitting in a corner.

گَنَدپُوش gand-pōš, wearing a patched garment.

3) Descriptive compounds (so-called karmadhāraya), in which the first noun nearer defines the second. Properly speaking the Paṣtō has not formed any compounds of this kind from its own resources, but adopted them from the Persian or the

adjoining Prākṛit idioms, though substituting occasionally a Paṣṭō noun\*).

مہاجن mahājan, a banker (a great man) (Hindī).

مہراج maha-rāj, a king (Hindī).

ناپاک nā-pāk, impure (Pers.).

ہم زوڑئی ham- zōvalai, cotemporary (born together).

#### 4) Possessive compounds (so-called Bahuvrīhi).

This class of compounds is very frequent in Paṣṭō and formed in various ways, as it comprises again all the three preceding classes. On the whole the Paṣṭō agrees therein with the Persian, but it has also formed such compounds, as are foreign to the Persian and are more in accordance with Sanskrit usage.

a) Two substantives may form a possessive compound as:

گل اندامہ gul-andāmāh, having the body of a rose (fem.);

گل اندام is Tatpuruṣa, body of a rose.

سینہ کباب sīnāh kabāb, having the breast roasted; سینہ کباب

may also be Tatpuruṣa.

b) An adjective or participle perfect is put before a substantive. The substantive itself may either remain unaltered or it changes a final āh, āh and the Plural-termination ūnah to ai, ūn-ai respectively, whereby the substantive is transferred to an adjective. The adjective which is placed before the substantive, commonly remains in the Masc. Sing., but it may also take the gender of its substantive.

نیک خوی nēk xōe, having a good temper.

پاک زروئے pāk zrūnai, having pure hearts (زروئے, Plur. of زرو).

سپین وبری spīn ūīrai, having a white beard (وبری ūīrāh).

ویرہ خوئے vīrāh xūlai, having an open mouth (خوئے xūlāh).

\*) Appositions, like کولہ سبئی Kūṭāh spai, a dog of the Kūṭāh race, cannot be considered as compounds, as every noun is treated as independent; in the fem. therefore کولہ سبئی Kūṭāh spai, a bitch of the Kūṭāh race.

c) Another kind of possessive compounds, which is peculiar to the Paṣṭō, is formed by placing the adjective or participle perfect after the substantive. When the adjective ends in a consonant, it may add the termination ai, whereas substantives ending in āh drop it before the adjective. E. g.

زوی مَرِّی zōe marai, having a dead son.

لَاس پَرِکَرِی lās prēkarai, having the hand cut off.

مَیخ تَوَرِی may tōrai, having a black face. (تَوَرِ black).

سَتَرِکِ رَوِی starg vaṣai, having hungry eyes.

## VI. Formation of the gender.

### § 39.

The Paṣṭō has, like most of the Indian Prākṛit tongues, lost the neuter and distinguishes only between masculine and feminine. The gender is on the whole very easily recognisable by the terminations of the nouns (§ 9. 10); only the termination *ai* causes some difficulties, though the pronunciation itself clearly distinguishes between masculine (āh) and feminine nouns (āḥ).

The gender is either expressed by different nouns, as it is the case in most languages with nouns denoting relationship, like: پَلار plar, father, مَور mōr, mother; ورور vrōr, brother, خور xōr, sister; مَیرāh mērah, husband, آرَتینāh artināh, wife; زوی zōe, son, لور lūr, daughter; the same is the case with some common domestic animals, as سَنَدāh sandāh, a male buffalo, مَیجāh mējāh, a female buffalo: or the feminine is formed from the masculine by a different termination. This is done in the following manner:

1) From masc. nouns ending in a consonant the feminine is formed by adding the termination āḥ (§ 10, 2), as:

خَمِیار famiār, a tanner, fem. خَمِیارāḥ famiār-āḥ, the wife of a tanner.

چال چāl, a thief, fem. چālāḥ (instead of چāl-āḥ) a female thief.

Those nouns, which have deepened original *ā* to *ō* or *u* in the Nom. Sing., restore it again, but shortened before the fem. termination *āh*, which is accented.

شېون *špūn*, shepherd, fem. شېنه *špān-āh*, shepherdess.

پښتون *pəštūn*, an Afghān, fem. پښتنه *pəštān-āh*, an Afghān woman.

The same rule holds good in reference to adjectives ending in a consonant (§ 86).

ډېر *dēr*, much, fem. ډېره *dēr-āh*.

رون *rūr*, bright, fem. رونه *raur-āh*.

خړب *ṭōrb*, fat, fem. خړبه *ṭarb-āh*.

2) From masc. nouns, ending in *ai* the feminine is formed by changing final *ai* to *aī* (seldom to *i*), as:

دُرَانِي *durānai*, a Durāni, fem. دُرَانِي *durānaī*, a female Durāni.

خُورِي *ṭōrai*, a bullock (with crumpled horns), fem. خُورِي *ṭōraī*.

وَرْمَبِي *vrambai*, the first, fem. وَرْمَبِي *vrambaī*.

پِشِي *pisai*, cat, fem. پِشِي *pišī* (besides پِشِي).

An exception from this rule makes a number of adjectives, which form their feminine not by *aī* but by *e* (cf. § 87, 2); further all participles present and perfect (§ 87, d).

Similarly a number of substantives, especially such, as are originally adjectives, form their feminine by the termination *e*, as:

زُنَرِي *zanrai*, a lad, fem. زُنَرِي *zanre*, a girl.

سَرَكُوزِي *sarkūzai*, a hog, fem. سَرَكُوزِي *sarkūze*.

كُچُوتِي *kačūtai*, a little child (dim.), fem. كُچُوتِي *kačūte*.

كُوتِي *kūtai*, a young donkey, fem. كُوتِي *kūte* \*).

وَرَابَانَرِي *vṛābānrai*, a man of a marriage procession, fem. وَرَابَانَرِي *vṛābānre*.

The diminutive affixes *karai* and *garai* form their feminine by *e* (§ 37); so also *garai*, when corresponding to the Persian

\*) Similarly كُوتِي *kūtai*, a young donkey, fem. كُوتِي *kūte*.

affix کر, making, doing (cf. § 87, 2, c). The dim. affix ٲrai admits of both fem. terminations, aī and e;

وڙگري vuzgarai, a small goat, fem. وڙگري vuzgare.

چرگري čirkurai, a little cock, fem. چرگري and چرگري.

3) From masc. nouns ending in ā the feminine is derived by changing ā to ī, as:

توتا tōtā a parrot, fem. توتي tōtī.

Besides the fem. termination ī however aī is also in use, as:

کاکا kākā, paternal uncle, fem. کاکاي kākāī, paternal aunt.

گودا gōdā, a male puppet, fem. گودي gōdāī, a female puppet.

Adjectives, ending in ā, remain unaltered in the feminine (§ 38).

4) From masc. nouns ending in ʁh the feminine is formed by changing ʁh to āh. Though this change is not expressed in writing, it is heard in pronunciation. E. g.

کارگه kārʁah, a male crow, fem. کارگاه kārḡāh.

کوتہ kūṭḡah, dog, fem. کوتہ kūṭāh, bitch.

Adjectives ending in ʁh form their feminine in the same way, cf. §. 90. From substantives, denoting human beings or occupations the feminine is formed by means of the affix anāh (Sindhi āpī etc; Sindhi Gram. § 14, 1), before which the termination ʁh is dropped. E. g.

غوبه gōbḡah, cowherd, fem. غوبنه gōbanāh, herdswoman.

ميله mēlmḡah, guest, fem. ميلنه mēlmanāh, female guest.

5) From masc. nouns ending in e the feminine is formed by adding the termination āh, before which final e is changed to y. E. g.

آشناي āšnāe, acquaintance, friend, fem. آشنايه āšnāy-āh.

سوے sōe, hare, fem. سويه sōy-āh.

The same is the case with adjectives, § 91.

6) From masc. nouns ending in *I* the feminine is formed by changing *ī* to *aī*, as \*):

دُوبِي dōbī, a washerman, fem. دُوبِي dōbaī, washerwoman.

كُمَكِي kumakī, a helper, fem. كُمَكِي kumakaī.

With nouns denoting human and other living beings (of a higher kind) or occupations, the fem. termination *āḥ* (Sindhī āṇī, Sindhī Gram. § 14, 4) is also in use, before which final *I* is either dropped or changed to *y*, when preceded by a vowel.

مُوجِي mōcī, a shoemaker, fem. مَوْجِي mōc-āḥ.

نَائِي mā-ī a barber, fem. نَائِي nāy-āḥ.

هَائِي hāī, elephant, fem. هَائِي hāt-āḥ.

Adjectives, ending in *I* (mostly of foreign origin) remain unchanged in the feminine § 92.

7) From masc. nouns ending in *ō* a feminine is only rarely formed, as most nouns with the termination *ō* are generis communis (§ 9, 4). When a feminine is formed, it is done by adding the fem. termination *āḥ* and changing (for euphony's sake) at the same time final *ō* to *v*. E. g.

كَارَسَاوُ kārṣā-ō, a long faced person, fem. كَارَسَاوُ kārṣāv-āḥ.

Adjectives in *ō* remain unchanged in the feminine. § 89.

8) From masc. nouns ending in *ū* the feminine is formed by adding the fem. termination *āḥ*, before which final *ū* is changed to *av*, as:

تَافُو taṭū, a pony, fem. تَافُو taṭav-āḥ.

Some substantives in *ū* are generis communis § 9, 8.

With nouns denoting human beings, the fem. termination āṇāī (āṇṛāī) = Sindhī āṇī (Sindhī Gram. § 14, 3), is also found, before which final *ū* is changed to the semivowel *v*, as:

---

\*) That Arabic words ending in *I*, may have *āḥ* in the fem., is understood, as: نَبِي nabī, prophet, fem. نَبِي nabiāḥ, prophetess. Some are generis communis, as هَادِي hādī, m. and fem., a guide.

ہندو hindū, a Hindū, fem. ہندوائی hindv-āpai, a Hindū woman.

Adjectives in ū remain unchanged in the feminine, §. 92.

9) From maso. nouns ending in au a feminine is seldom formed as: پیرو pairau, a follower, fem. پیرو pairaw-āh (pairav-āh).

About the fem. termination of the numeral adjective یو yau, one, see §. 92, 8; 94.

## III. Section.

### Flexion of the noun. \*)

#### §. 40.

From a grammatical point of view the Paṣṭō has no declension, as little as the modern vernaculars of India. The old case-remnants, which are as yet found in the Indian Prākṛit idioms, have totally disappeared in Paṣṭō and the whole declensional process is made up by means of prefixes and postfixes.

The whole declension of the Paṣṭō noun is therefore concentrated in the formation of the Plural and of the Formative Singular and Plural (the so-called oblique case), from which, by prefixing or postfixing certain particles, the several cases are formed.

#### §. 41.

### I. Formation of the Plural.

The crude form of a noun represents in Paṣṭō always the Nom. Sing., from which, according to the following rules, the Nom. Plural is formed.

We must treat separately of masc. and fem. nouns, every gender forming its Nom. Plur. in a different manner, according to its termination.

---

\*) The Paṣṭō has neither a definite nor indefinite article; see §. 178.

## A. Formation of the Plural of masc. nouns.

### §. 42.

#### 1) Nouns ending in a consonant.

These form their Nom. Plur.

##### a) by adding the termination *ān*.

This Plural-termination, which the Paṣtō has in common with the Persian, is commonly used in such nouns, as denote animate objects, as:

مَلِك malik, a chief, Plur. مَلِكَان mālik-ān.

مَار mār, a snake, Plur. مَارَان mār-ān.

But this rule is by no means strict; for many nouns, denoting inanimate objects, take also the termination *ān* or use promiscuously *ān* and *ūnah(b)*, as:

خَاḥ ṭāh, a well, Pl. خَاḥَان ṭāh-ān or خَاḥُونَه ṭāh-ūnah.

شُونَد šūnd, lip, Pl. شُونَدَان šūnd-ān.

To this Plur. affix *ān* the poets add again (as well as to the Plur. termination *gān*) the termination *ē* (= *ān-ē*) and transfer thus the masc. Plur. termination to the feminine, as: دِلْبَارَانِی dilbar-ān-ē, heart-ravishing (women).

##### b) by adding the termination *ūnah* (*ūna*).

This Plur. termination (which, according to its origin, is identical with the preceding, *ā* having been changed to *ū*) is commonly used in nouns denoting inanimate objects, far less in such as imply living beings. E. g.

کُور kūr, house, Pl. کُورُونَه kūr-ūnah.

گُل gul, rose, Pl. گُلُونَه gul-ūnah.

یَار yar, mountain, Pl. یَارُونَه yr-ūnah. \*)

---

\*) With ejection of a (instead of yar-ūnah), the Paṣtō being very fond of such hard initial sounds. Similarly کَال kāl, year, is also often shortened to کَالُونَه kal-ūnah (instead of کَالُونَه).

The following nouns' denoting animate objects, always form their Plural by ūnah;

آس ās, horse, Pl. آسُونَه āsūnah.

پلار plār, father, Pl. پلارُونَه plārūnah.

تربور tarbūr, a cousin, Pl. تربورُونَه tarbūrūnah.

لار lar, thief, Pl. لارُونَه larūnah.

c) by adding the termination āh.

Some nouns chiefly monosyllabic ones with radical a or ʔ, form their Plural by ejecting the short root-vowel and adding the termination āh, as:

خَر ʔar, donkey, Pl. خَرَاه ʔar-āh.

غار ʔar, mountain, Pl. غَرَاه ʔar-āh.

غل ʔal, thief, Pl. غَلَاه ʔal-āh.

مل mal, companion, Pl. مَلَاه ml-āh.

خَرَسَن ʔaršan, horse-dung, Pl. خَرَسَنَاه ʔaršan-āh.

In the same way form their Plural some adjectives, cf. §. 85.

d) by adding the termination ah.  
(with internal vowel-change).

A certain number of nouns, in which original long a is deepened to ā in the Nom. Sing., restore it again before adding the Plural termination ah. \*) E. g.

پاښتون pāštūn, Afghān, Pl. پاښتانه pāštān-ah.

شپون špān, shepherd, Pl. شپانه špān-ah.

بيلتون bial-tūn, separation, Pl. بيلتانه bial-tān-ah.

نمونځ nmūnḡ, prayer, Pl. نمونده nmānḡ-ah.

In the same way a number of adjectives form their Plural, cf. §. 86. Besides this Plural-formation we find also the regular one

\*) The Plural termination ah differs so far from the fem. termination āh see § 39, i.

(ūnah) in use, but only in nouns denoting inanimate objects, as:

نَمُونَدِ nmūd, Pl. نَمُونَدُونَه nmūd-ūnah.

The following two nouns form their Plural somewhat irregularly, by changing the final ū to a before the termination ūnah:

زَنْگُون zangūn, knee, Pl. زَنْگُونَه zangan-ūnah.

وَرُون vrūn, the thigh, Pl. وَرُونَه vran-ūnah.

e) by adding the termination ahār.

This Plural termination is only added to such nouns, as denote a sound, as:

تَرَبْ trap, the sound of a jump, Pl. تَرَبَّاهَر trap-ahār.

غُرْمَبْ gurumb, a boom, Pl. غُرْمَبَّاهَر gurumb-ahār.

Some of these nouns are only used in the Plural, as: كَشَّاهَر kaš-ahār, rustling.

f) by changing final radical a to ʔ.

This Plural formation, which is effected by a slight change of the final vowel of the noun, is quite peculiar to the Paṣtō. E. g.

سَخَر s̄xar, stone, Pl. سَخَرَّ s̄xar.

نَبَتَر naṭtar, pine-tree, Pl. نَبَتَرَّ naṭtar.

بَاقُونَك baqūnak, a hermaphrodite, Pl. بَاقُونَكَّ baqūnak.

مَیْن mayan (adj.) a lover, Pl. مَیْنَّ mayan.

There is a small number of nouns of this kind, the Plural of which must be well taken notice of.

In the same way form their Plural all adjectives, made up by means of the affixes زَنْ, zan, (جَنْ, ځَنْ) and گَر gar, when used substantively.

Very likely from the same reason the Infinitive (ending in 'al) is also treated as a Plurale tantum.

- g) by adding the termination **ah** (a).  
(in conjunction with numerals\*).

Not to be confounded with the Plural formation c) d) is the Plural termination **ah**, which does not require any vowel change within the noun and is only added to nouns, denoting inanimate objects, when preceded by a numeral. E. g.

دِری کَالِه drē kāl-ah, three years; شِیستِه هُنَر spētah hunar-a, sixty artifices.

کَس kas, somebody, a person, may also take the Pl. termination **ah** (a), when preceded by a numeral, as تِیرِصو کَس tērgū kas-a, three hundred men.

Instead of this Plural formation the common one (ending in **ūnah**) may be optionally used, as: دِری کَالُونِه drē kāl-ūnah, three years.

#### b) Irregular Plural formation.

دِرُور vrōr, brother, forms its Plural quite irregularly دِرُورَنِه vrūnrah (also written دِرُورَنِه).

Many nouns are considered as collective in Paṣtō and are therefore constructed as Plurals, without taking any of the preceding Plural terminations. Such are: پَنیر panīr, cheese, غَنَم ganam, wheat, سیو sēv, apple, کُچ kuč, butter, مَالُوج mālūč, cleaned cotton, and many others.

#### §. 48.

#### 2) Nouns ending in ai.

These form their Plural by changing **ai** to **i**, as:

لِندِی lindai, archer, Pl. لِنْدِی lind-i.

کَسِی kas-ai, pupil of the eye, Pl. کَسِی kas-i.

---

\*) To these may also be added indefinite pronouns as: هُوَ hū, some, etc.

Some nouns are only found in the Plural, as:

سُورَى būsūrī, bran; تَرَسَرَى tarsarī, yellowish spots on the skin;  
غَوْرَى yvarī, clarified butter; نَمَرَى nmarī, clothes.

The following nouns assume different terminations in the Plural:

پَیْرَى pērai, a demon, one of the Genii, Pl. پَیْرِی pēr-i and  
پَیْرِیَان pēri-ān.

مَرِیْتَى mrai-ai, slave, Pl. مَرِیْتِی mrai-i or مَرِیْتَان mrai-ān  
or مَرِیْتُونَه mrai-ūnah.

#### §. 44.

#### 3) Nouns ending in ā

These form their Plural after the analogy of the Persian by adding the termination ān with euphonic y or g inserted between the final vowel of the noun and the termination, as:

گَدَا gadā, a beggar, Pl. گَدَايَان gadā-y-ān

مَامَا māmā, paternal uncle, Pl. مَامَايَان māmā-g-ān.

کُودَا gūdā, puppet, Pl. کُودَايَان gūdā-g-ān.

Arabic nouns, ending in ā in the broken Plural, may besides add the Pl. termination y-ān or g-ān, as: اُمَرَا ʾumarā (from اُمَیْر ʾamīr) nobles, Pl. اُمَرَايَان ʾumarā-y-ān or اُمَرَاگَان ʾumarā-g-ān.

Some nouns ending in ā are considered collective and take therefore no Plural termination, as: جُورَا jūrā Sing. and Pl., bangle; صَبَا sabā, morning breeze; پَیْشَوَا pēšvā, guide, leader.

#### §. 45.

#### 4) Nouns ending in ō. \*)

These form their Plural in a threefold manner:

a) by adding the termination ān, when the noun denotes an animate object, as:

---

\*) Now and then only written with final u (Pēš).

سَقَّاقُ saqqāḍ, a water-carrier, Pl. سَقَّاقُونَ saqqāḍ-ān.

b) by adding the termination gān, may the noun denote an animate or inanimate object, as:

سَكَلَاوُ saglāwḍ \*), an otter, Pl. سَكَلَاوُكَان saglāwḍ-gān.

بَانِرُ bānrḍ, eyelash, Pl. بَانِرُكَان bānrḍ-gān.

c) by adding the termination ūnah, when the noun denotes inanimate objects, as:

پِتَاوُ pitā-ḍ, sun's ray, Pl. پِتَاوُڼه pitāḍ-ūnah. \*\*)

سَكُو skḍ, stitch, Pl. سَكُوڼه skḍ-ūnah.

It is to be noted, that پَاوُ pāḍ, a quarter, when preceded by a numeral, forms its plural by adding ah (a), before which ḍ is changed to v, as دَرې پَاوُ drē pāva, three quarters.

Some nouns are considered as collectives and do not take any Plural termination, as: تِيكَاوُ tīkāḍ, abode, etc.

#### §. 46.

#### 5) Nouns ending in ḡh.

These form their Plural in different ways:

a) they remain unchanged in the Plural, so that the number must be gathered from the context. To this class belong all verbal nouns ending in ḡh (§. 12), which are always treated as Pluralia tantum. E. g.

غَارْمَه γārmah, noon-day heat, Pl. غَارْمَه γārmah.

خَاتَه xātah, ascending, Pl. (from خَتَل).

b) or they drop final ḡh and add the termination ān, when denoting living beings, or ūnah, when denoting things and abstract ideas. E. g.

\*) Also pronounced saglāv, in which case its Plural is saglāv-ān.

\*\*) These and similar nouns ought to be written سَكُوڼه, پِتَاوُڼه, but the Hamzah (or ی) is never written.

لَبَوَّهَ lēvāh, wolf, Pl. لَبَوَّاهُ lēv-ān.

كَارَغَه kārāh, crow, Pl. كَارَغَان kār-ān.

زَرْه zrah, heart, Pl. زَرْوَنَه zr-ūnah.

The following nouns, denoting living beings, are to be noted as exceptions:

تَرْه trāh, uncle, Pl. تَرْوَنَه tr-ūnah.

مَيْرَه mērah, master, husband, Pl. مَيْرَوَنَه mēr-ūnah.

نَيْكَه nīkah, paternal grand-father, Pl. نَيْكَوَنَه nīk-ūnah.

وَرَرَه vrārah, nephew, Pl. وَرَرَوَنَه vrār-ūnah.

c) or they add simply the termination gān; this is done chiefly by nouns denoting animate objects, but also by those, which denote things. Most Persian words ending in *an* take this Pl. termination. E. g.

لَبَوَّهَ lēvāh, wolf, Pl. لَبَوَّهَ گَان lēvah-gān \*).

شِيَّه šīah, a Shīah, Pl. شِيَّه گَان šīah-gān.

نَانَكَه nāngah, black-berry, Pl. نَانَكَه گَان nāngah-gān.

d) Some few nouns form their Plural by adding the termination ānah, before which final *ah* is dropped, as:

مَيْلَمَه mēlmāh, guest, Pl. مَيْلَمَانَه mēlm-ānah.

In the same way form their Plural all nouns compounded with the affix *āh* (= Sansk. *आ*), as:

غَوْبَه gōbah, cowherd, Pl. غَوْبَانَه gōb-ānah.

كُورَبَه kōrbah, master of the house, Pl. كُورَبَانَه kōrb-ānah.

مَالِغَبَه mālgbah, collector of salt, Pl. مَالِغَبَانَه mālgb-ānah.

#### §. 47.

##### 6) Nouns ending in *a*.

These form their Plural, when denoting animate objects, by adding the termination ān, and when denoting inanimate

\*) When final *ah*, *al*, *an* etc. of polysyllabic nouns is followed by another syllable, *ā* passes naturally into the more distinct *a*.

objects, by adding the termination *unah*, before which termination final *e* is changed to *y*. E. g.

آشناي *āšnāe*, friend, acquaintance, Pl. آشنایان *āšnāy-ān*.

دوی *dōe*, custom, Pl. دویونه *dōy-unah*.

#### Irregular Plural formation.

زوی *zōe* } son, Pl. زامن *zāman* } or زامن *zahman*.  
خوی *qōe* } حامن *qāman* }

غوشوی *γōšōe* } cow-dung, Pl. { غوشایه *γōšāyah*.  
خوشوی *χōšōe* } خوشایه *χōšāyah*.

#### §. 48.

#### 7) Nouns ending in *i*.

These form their Plural by adding the termination *ān* (seldom *gān*); before this Plural termination final *i* is pronounced either as *i* or *iy*.

بندی *bāndī*, a captive, Pl. بندیان *bāndi-ān*.

سیاهی *sipāhī*, a soldier, Pl. سیاهیان *sipāhi-ān*.

سیلیمی *silamči*, a wash-hand basin, Pl. سیلیمیان *silāmči-ān*.

سَلایی *salāi*, the upright post of a Persian wheel, Pl. سَلاییگان *salāi-gān*.

#### §. 49.

#### 8) Nouns ending in *ū*.

These form their Plural by adding either the termination *ān* or *gān*. E. g.

کندو *kandū*, a corn-bin, Pl. کندوان *kāndū-ān*.

بَارو *ḡārū*, a Maina (bird) Pl. باروگان *ḡārū-gān*.

بَاهو *bāhū*, an ornament for the arm, Pl. باهوگان *bāhū-gān*.

Some nouns ending in *ū* are considered as collectives and do therefore not assume a Plural termination, as: *آرزو* Ārzū, Sing. and Plur., wish; *دارو* dārū, medicine; *تَمَاکو* tamākū, tobacco.

§. 50.

9) Nouns ending in *au*.

These form their Plural, when denoting animate objects, by adding the termination *ān*, and when denoting inanimate objects, by adding that of *ūnah*. E. g.

*پیرو* pairan, a follower, Pl. *پیروان* pairau-ān.

*پَلو* palau, hem of a garment, Pl. *پَلَوَنه* palau-ūnah.

Some nouns ending in *au* are considered as collectives, as *جو* jau, Sing. and Pl., barley.

B. Formation of the Plural of fem. nouns.

§. 51.

1) Nouns ending in a consonant (i. e. 8).

We have subsumed these nouns (§. 10, 5) under those, which end in *ē*, because they have now dropped in the Nom. Sing. (original) final *e*. But as they deviate in the formation of their Plural from those, which have retained final *e* in the Nom. Sing., they must be treated here separately.

But this class of fem. nouns, which have dropped final *e* in the Nom. Sing. and restore it again in the Nom. Plur. (as well as in the Format. Sing.) must not be confounded with those, which likewise end in a consonant in the Nom. Sing., but do not add *e* to the Format. Sing. and form their Plural irregularly. We must therefore distinguish:

a) Fem. nouns, which add *e* in the Nom. Plural.

These are the following:

*بِجَل* bijal, a knuckle-bone, Pl. *بِجَلِ-ه* bijal-e (بِجَلِي).

برستن brastan, coverlet, Pl. برستن brastan-e.

بان ban, a rival wife, Pl. بان ban-e.

بورجل bōrjal, abode, home, Pl. بورجل bōrjal-e. \*)

بول baul, urine, Pl. بول baul-e. \*\*)

پالتن paltan, battalion, Pl. پالتن paltan-e.

تاخت taxāḍ	} adze, Pl.	تاخت taxāḍ-e
ترتبخ tarḡḡḍ		ترتبخ tarḡḡḍ-e

تندار tandār	} father's brother's wife, Pl.	تندار tandār-e
تندور tandōr		تندور tandōr-e

تبر tabar, wife, Pl. تبر tabar-e.

جل jal	} a maid, Pl.	جل jal-e
جن jan		جن jan-e

چار čār, work, Pl. چار čār-e.

چنگل čangul, claw, Pl. چنگل čangul-e.

چرم čarman, skin, Pl. چرم čarman-e.

چنگل čangal, the forearm, Pl. چنگل čangal-e.

خپار xapar, the palm of the hand, Pl. خپار xapar-e.

\*) It is also used as a masculine and forms then the  
بورجلونه bōrjal-unab.

\*\*) Mostly used in the Plural.

دَرَشَل daršal, the frame of a door, Pl. دَرَشَلِ daršal-e.

دَرَک drakar the felly of a wheel, Pl. دَرَکِ drakar-e.

رُندار rundār\*), a brother's wife, Pl. رُندارِ rundār-e.

زَمَنَز zmanz\*\*), comb, Pl. زَمَنَزِ zmanz-e.

سَتَن stan, needle, Pl. سَتَنِ stane.

سُگُل sugul, a kind of buskin, Pl. سُگُلِ sugul-e.

سَمَاح smaḥ	} a cavern, Pl.	سَمَاحِ smaḥ-e.
سَمِست samist		سَمِستِ samist-e.

غَنَدَل yandal, sprout, Pl. غَنَدَلِ yandal-e.

غَوَجَل yōjal, cow-pen, Pl. غَوَجَلِ yōjal-e.

غَبِرَ غَبِرَ\*\*\*), embrace, Pl. غَبِرِ غَبِرَ-e.

گَآر gāhar	} herd of cattle, Pl.	گَآرِ gāhar-e
گَوَّار gōār		گَوَّارِ gōār-e
گَوَّارِ gōhār		گَوَّارِ gōhār-e

لَاشَکَر laṣkar †), army, Pl. لَاشَکَرِ laṣkar-e.

لَمَن laman, skirt of a dress, Pl. لَمَنِ laman-e.

\*) Other forms are: وَرَنَدَار vrandār, Pl. وَرَنَدَارِ vrandāre;  
وَنَدیار vandyār, Pl. وَنَدیارِ vandyār-e.

\*\*) Also written (by transposition of letters) مَنگَر mangaz.

\*\*\*) غَبِرَ is also used as masc., Pl. غَبِرُونَه.

†) لَاشَکَر laṣkar is also used as masc., Plur. لَاشَکَرُونَه laṣkarūnah.

لَنگُور langōr } a span, Pl. لَنگُورِ langōr-e.  
لَوِشْت lvēšt } لَوِشْتِ lvēšt-e.

مَاریج mārij, a flame of fire, Pl. مَاریجِ mārij-e.

مَآک maṭāk, a kind of walnut, Pl. مَآکِ maṭāk-e.

مِرَز mīraz\*), a quail, Pl. مِرَزِ mīraz-e.

مَنگُل mangul, a talon, Pl. مَنگُلِ mangul-e.

مِیَاشْت miāšt, month, Pl. مِیَاشْتِ miāšt-e.

مِیَچَن mičan, a handmill, Pl. مِیَچَنِ mičan-e.

مِیَرمَن mēрман, mistress, Pl. مِیَرمَنِ mēрман-e.

مِیَز mēž, a ewe, Pl. مِیَزِ mēž-e.

نَوَرَز nvarz, a sandpiper, Pl. نَوَرَزِ nvarz-e.

وَآت vāt, way, Pl. وَآتِ vāt-e.

وَآد vrad } day, Pl. وَآدِ vrad-e  
وَآدِ vrad } وَآدِ vrad-e

وَآدِ varyad } cloud, Pl. وَآدِ varyad-e  
وَآدِ varyaz } وَآدِ varyaz-e

وَآدِ vandar, a tethering rope with nooses, Pl. وَآدِ vandar.

\*) Also written: نَوَرَز nvarz, nv = m.

b) Fem. nouns, which form their Plural irregularly.

ترور trör\*), aunt, Pl. ترورانی trör-āne.

خور xör, sister, Pl. خویندی xvēnde (خویندی).

درور drör } درند drande.

ندرور ndrör } Pl. ندرند ndrande.

لور lör, daughter, Pl. لونړه lōṛah }  
لونړی lōṛe }

نړور nžör } نړیندی nžēnde }  
son's wife, Pl. }  
نګور ngör } نګیندی ngēnde }

یور yör, husband's brother's wife, Pl. یونړی yūṛe.

§. 52.

2) Nouns ending in ā.

These form their Plural, when denoting animate objects, by adding the termination gāne (cf. §. 44), but when they denote inanimate objects, they remain unchanged in the eastern dialect, whereas they add the termination vī (or vē) in the western. E. g.

نیا niā, grandmother, Pl. نیانیا niā-gāne.

بالā, misfortune, Pl. بالā, بالوی balā-vī.

---

\*) From another Sing. ترور tröre, the Plural تروریکان tröre-gāne is formed. §. 57.

§. 53.

3) Nouns ending in āh.

These form their Plural by changing āh to ē. \*)

بَدَہ bad-āh, bribe, Pl. بَدِی bad-ē.

لِندَہ lind-āh, bow, Pl. لِنْدِی lind-ē.

Some nouns ending in āh are considered as collectives and form therefore no Plural, as اُوبَہ ūbāh, Sing. and Pl., water; بَانِرَہ bānrāh, eyelash; جُونَہ jūnāh, girl etc.

Some foreign nouns ending in āh and denoting animate objects, add also the termination gāne, as:

فِرِیْطَہ firīṭāh, (fem.) angel, Pl. فِرِیْطَہ کَانِ firīṭah-gāne.

A certain number of nouns of this class are only used in the Plural:

اِیْرِہ irē, ashes.

پُوْخَلِہ pūḫalē, the hooping cough.

پِیْرُونِی pīrūnī, the Pleiades.

پِیْیِی پِیْیِی pēṭṭē, mockery.

تَرَاوِی tarāvē, a prayer consisting of 20 genuflexions in Ramazān.

تَرَوِی tarvē, sour milk, whey.

خَاوِی ḫāvrē, dust, clay.

خَاوِلِہ ḫaṭlī, muddy water.

خَوِلِہ ḫvalē, sweat, perspiration.

\*) In Mss. often written only َ, which, as well as the Sing. ے, instead of ے, ought to be avoided.

دُورِ dūrē, fine dust.

رَمِ ramē, dysentery.

زَوِ zavē, matter, pus.

سَرَوَانْدِ sarvānde, fallow land.

سُورِ sūre, shout, noise.

شَلُونَبِ šlōmbē	}	buttermilk.
شُومَلِ šōmlē		

شَنِ šnē, the fruit of the mastin tree.

شُولِ šölē, rice; شَوْتِ šolāh, the rice plant.

عَی yanē, thorns, bramble; عَنَ branch of a thorn tree.

عَیْلِ yēlē, sheep and goats; عَیْلَه a herd of sheep and goats.

نَکَرَزِ nakrēzē, Henna.

نَبِ nīnē, roasted grain; نَبِنَه a grain of parched corn.

وَاوَرِ vāvrē, snow.

وَرَبُوشِ vurbūšē	}	barley; وَرَبُوشَه a corn of barley.
وَرَبُوشِ ōrbūšē		

وَرَجِ vrižē	}	rice; وَرَجَه etc. a corn of rice.
وَرِژِ vrižē		
وَرِژِ vrižē		

وَبِ vīnē, blood.

§. 54.

4) Nouns ending in ɔ.

These form their Plural by adding the termination gāne, be they denoting animate or inanimate objects; cf. §. 45, b).

پِشَو pišɔ, a cat, Pl. پِشَوَنگَارِي pišɔ-gāne.

پَاکَو pākɔ, a flail, Pl. پَاکَوَنگَارِي pākɔ-gāne.

Some nouns ending in ɔ are considered as collectives and remain therefore unchanged in the Plural, as: بَرخَو baryɔ, Sing. and Pl., cheek; زَانگَو zanyɔ, swing, cradle; وُرَشَو vursɔ, meadow.

§. 55.

5) Nouns ending in i.

These form their Plural:

a) when denoting animate objects, by changing final i to ai, or by adding the termination gāne or āne, the latter chiefly, when the masc. Plur. termination ends in ān (§. 48).

سَهِيلِي saheilī, a handmaid, Pl. سَهِيلَتِي saheilī-āi.

دَائِي dāi, a nurse, Pl. دَائِيگَان dāi-gāne.

هَادِي hādī, a female guide, Pl. هَادِيگَان hādī-āne.

پِشِي pišī, cat, Pl. پِشِيگَان pišī-āne.

b) by changing final i to ai, when denoting inanimate objects, as:

دُڤَنِي duḡnī, enmity, Pl. دُڤَنَتِي duḡnai.

طَاشَتِي ṭaštī, breakfast, Pl. طَاشَتَتِي ṭaštai.

§. 56.

6) Nouns ending in aī.

These remain unchanged in the Plural, as:

جَنِيّ jinaī, girl, Pl. جَنِيّ jinaī.

كَانِرِيّ gānraī, oil-press, Pl. كَانِرِيّ gānraī.

§. 57.

7) Nouns ending in e.

There are very few fem. substantives ending in e. They form their Plural either by adding the termination gāne or āne; before the latter a euphonic y may be inserted (= -y-āne\*). E. g.

تَرَرِيّ trōre, aunt, Pl. تَرَرِيّكَان trōre-gāne.

نَاوِي nāve, bride, Pl. نَاوِيان nāve-y-āne.

From this class of nouns those are to be well distinguished, which end likewise in e, but which are (originally) adjectives used substantively and follow therefore the Plural-formation of the adjectives, by changing final e to ī (§. 87, 6. c. a.).

سَرْكُوزِي sarkūze\*\*), a sow, Pl. سَرْكُوزِي sarkūzī.

مَرْغَمِي maryame, a female kid, Pl. مَرْغَمِي maryamī.

§. 58.

8) Nouns ending in ū.

The few fem. nouns ending in ū form their Plural, denote they animate or inanimate objects, by adding the termination gāne. E. g.

\*) In Qandahār تَرَرِيّ and نَاوِي remain unchanged in the Plural.

\*\*) Literally: having the head downwards.

میلو mīlū, a female bear, Pl. میلوگان mīlū-gāne.

برجُو barjū, a bone, Pl. برجُوگان barjū-gāne.

## II. The formation of the Formative Singular and Plural.

### §. 59.

Before the prefixes and postfixes (see sub III), by means of which the several cases are made up in Paštō, can be connected with the noun, it must first be put in the Formative or oblique case (Sing. and Plural), which is always identical with the Instrumental; after this is done, the prefixes or postfixes do not any longer affect the noun.

### 1) The Formative of the Singular.

#### §. 60.

#### A. The Formative of masc. nouns.

a) Nouns ending in a consonant remain unchanged in the Format. Sing. Excepted are those nouns, in which original ā is changed to ū in the Nom. Sing. (§. 42, d). In their Format. Sing. ā reappears again and at the same time ah is added to the theme, so that the Format. Sing. and the Nom. Plur. outwardly coincide. E. g.

شپڼ špūn, shepherd, Form. Sing. شپانۀ špān-ah.

نوم nūm, name, Form. Sing. نامۀ nām-ah.

This rule however is not strict and in many instances the Form. Sing. is not distinguished from the Nom. Sing., especially in nouns denoting inanimate objects.

Those nouns, which according to §. 42, c, form their Plural by adding the termination āh, form their Form. Sing. in the same way, as:

غار yar, mountain, Form. Sing. غارۀ yr-āh.

مل mal, companion, Form. Sing. ملۀ ml-āh.

b) Nouns ending in *ai* change it to *I*, as:

سُونْگَی songai, a dwarf, Form. Sing. سُونْگِی song-I.

c) Nouns ending in *ā*, *ō*, *āh*, *e*, *I*, *ū*, *au* remain unchanged in the Format. Sing. The only exception is the numeral نَوْ yau, one, the Formative of which is نَوْ-āh yau-āh.

§. 61.

B. The Formative of fem. nouns.

a) Those nouns, which are comprised in the list of §. 51, a, form the Format. Sing. by restoring (original) *e*, so that the Form. Sing. and the Nom. Pl. are outwardly identical. E. g.

لَار lār, way, Form. Sing. لَار-ē lār-e.

Those under §. 51, b, remain unchanged in the Form. Sing., as:

مَوْر mōr, mother, Form. Sing. مَوْر-ē mōr.

b) Nouns ending in *ā* remain unchanged in the Form. Sing.

c) Nouns ending in *āh* change it to *ē*, as:

سَرْوِی sarvāh, cypress, Form. Sing. سَرْوِی-ē sarv-ē.

Such nouns, as are borrowed from the Arabic or Persian and are still treated as foreign words, remain unchanged in the Format. Sing., as لَالَه lālāh, a tulip, Form. Sing. لَالَه lālāh; جُمْلَه jumlāh, total sum\*), all (نَ جُمْلَه, نَ جُمْلَه etc.); غَلَه yalāh, corn.

d) Nouns ending in *ō* remain unchanged in the Form. Sing.

e) Nouns ending in *I* change it to *ai*, as:

سَهِيلِي sahēli, handmaid, Form. Sing. سَهِيلِي-ai sahēlai.

گَرْمِي garmi, heat, Form. Sing. گَرْمِي-ai garmai.

---

\*) جُمْلَه is also treated like an adjective and constructed accordingly, cf. §. 90.

A few nouns remain unchanged in the Form. Sing., as سِيَرِي sīznī, a swaddling band, Form. Sing. سِيَرِي sīznī, and commonly all foreign nouns, as دَائِي dāī, a nurse; حَادِي hādī, a (female) guide.

f) Nouns ending in āī remain unchanged in the Form. Sing.

g) The few substantives ending in e remain unchanged in the Form. Sing., as نَارِي nāvē, bride, Form. Sing. نَارِي nāve.

Those nouns, which are originally adjectives (§. 57), change e to ī in the Form. Sing., as سَرَكُوزِي sarkūze, a sow, Form. Sing. سَرَكُوزِي sarkūzī.

h) Nouns ending in ū remain unchanged in the Form. Sing.

## §. 62.

### 2) The Formative of the Plural.

The termination of the Formative Plural is ڙ (Hindī ڑ, Sindhī and Panjābī ڑ — Prāk. Gen. Plur. **आणं** or **आण**), which is either added to the Plural terminations, as ān-ڙ, ūn-ڙ (āh being dropped before it), gān-ڙ, or which is affixed to the theme itself\*\*), by dropping the Plural termination altogether, as پَلَرِڙ plār-ڙ (Plur. پَلَرُونِڙ = پَلَرُونِڙ plār-ūn-ڙ. Entering into particulars we have to consider:

## §. 63.

### A. The Formative Plural of masc. nouns.

a) Nouns ending in a consonant form their Nom. Plural, as we have seen, in different ways:

\*) Compare my Essay: „On the declensional features of the North-Indian Vernaculars“, Journal of the Royal Asiatic Society, Vol. XIX, Part 4, p. 402 sqq.

\*\*) This is always the case with all collective nouns.

α) Those ending in the Plural in ān, ūnah (§. 42, a. b.), add the Format. Plur. affix ʾō\*) either to these terminations, as ān-ʾō, ūn-ʾō, or they add it directly to the crude form of the noun, as:

مَلِكَانِ malik-ān, chieftains, Form. Pl. مَلِكَانُ malik-ān-ʾō }  
 " " مَلِكُو malik-ʾō. }  
 آسُونَه ʾās-ūnah, horses, Form. Pl. آسُونُو ʾās-ūn-ʾō. }  
 " " آسُو ʾās-ʾō. }

β) Those ending in the Nom. Pl. in ʾah (§. 42, c) drop it before the affix ʾō, as:

جُرُوحُ j-r-ʾah, mountains, Form. Pl. جُرُوحُ j-r-ʾō.

γ) Those ending in the Nom. Pl. in ah (§. 42, d) drop it before the affix ʾō, as:

شِپَانَه špān-ah, shepherds, Form. Pl. شِپَانُو špān-ʾō.

The long (radical) ā however is now and then shortened, especially in such nouns, which are originally adjectives, as:

پَشْتَانَه paštān-ah, Format. Pl. پَشْتَانُو paštān-ʾō.

The affix ʾō also accedes in many cases to the crude form of the Nom. Sing. without any internal vowel change, as پَشْتَانُو paštān-ʾō. This is frequently the case with nouns denoting inanimate objects.

زَنْگُونِ zangūn, knee and وِرُونِ vrūn, the thigh (both in the Form. Sing. زَنْگَانَه zangānah and وِرَانَه vrānah), drop in the Plural the termination ūnah before the affix ʾō, as:

وِرْنُو vran-ūnah, Form. Pl. وِرْنُو vran-ʾō.

زَنْگُونَه zangan-ūnah, Form. Pl. زَنْگُونُو zangan-ʾō.

δ) nouns ending in the Plur. in ahār (§. 42, e) or which change final a to ʾ (§. 42, f) simply add the affix ʾō, as: ahār-ʾō, مَیْنُو mayan-ʾō\*\*); final ah (§. 42, g) is always dropped before ʾō, as: کَالُو kāl-ʾō (or کَالُونُو kal-ūn-ʾō), وِرُونُو vrūn-ʾō (§. 42, h).

\*) This affix ʾō is frequently written by Pšš (ا) only, which is to be disproved of.

\*\*) The affix accedes in this and similar cases to the crude form (Nom. Sing.).

b) Nouns ending in *ai*; Pl. I, add the Formative affix *ō* to the Pl. termination *I*, which becomes thereby *iy-(ō)* or *i (ō)*, or is even dropped altogether, as:

شِکْرِی šīkr-I, hawks, Form. Pl.  $\left\{ \begin{array}{l} \text{شِکْرِیو} \text{ šīkr-iy-ō or šīkr-i-ō.} \\ \text{شِکْرُو} \text{ šīkr-ō.} \end{array} \right.$

Those ending in *ān*, *ūnah* form the Form. Pl. regularly in *ān-ō*, *ūn-ō*, or add the affix *ō* to the crude form of the noun, as:

$\left. \begin{array}{l} \text{مَرَبَّی} \text{ mrai-I} \\ \text{مَرَبَّان} \text{ mrai-ān} \\ \text{مَرَبَّنَه} \text{ mrai-ūnah} \end{array} \right\} \begin{array}{l} \text{مَرَبَّو} \text{ mrai-ō} \\ \text{مَرَبَّانَو} \text{ mrai-ān-ō} \\ \text{مَرَبَّنَو} \text{ mrai-ūn-ō.} \end{array}$  slaves; Form. Pl.

c) Nouns ending in *ā*, Nom. Pl. *y-ān*, *gān* (§. 44) add the affix *ō* to these Pl. terminations, as *y-ān-ō*, *gān-ō*. The Arabic broken Plurals ending in *ā* simply add the affix *ō* as *أُمَرَاءُ* *umarā*, nobles, Format. Pl. *أُمَرَاءَو* *umarā-ō*. The same is the case with collective nouns, as *جُورَاءُ* *čūrā*, a bangle, Sing. and Plur., Form. Pl. *جُورَاءَو* *čūrā-ō*.

d) Nouns ending in *ō*, Nom. Pl. *ān*, *gān*, *ūnah* (§. 45), form their Form. Pl. by *ān-ō*, *gān-ō*, *ūn-ō* or add the affix *ō* to the crude form of the noun with inserted euphonic *v*, as *سَقَاقِو* *saqqāo-v-ō*.

e) Nouns ending in *ah*, Nom. Pl. *ah* (§. 46, a), drop final *ah* and add the affix *ō*, as *وَبَيْتَه* *vēšt-ah*, hairs, Form. Pl. *وَبَيْتَو* *vēšt-ō* \*). Those ending in the Nom. Pl. in *ān*, *gān*, and *ūnah*

\*) Some nouns may remain unchanged in the Format. Pl., as *دَوَارَه* *dvārāh*, both, *دَوَارَه* *da dvārāh*, of both; *جَمَلَه* *jūmlah*, all, *دَجْمَلَه*, of all; *قَمَه* *hamah*, all, *دَ قَمَه* *da hamah*, of all. Thus we find also *مَيْلَمَانَه* *da mēlmānah*, instead of *مَيْلَمَانَو*, *خِدْمَت*: *دَ مَيْلَمَانَو* *de mēlmānaw*, she should serve the guests of her Lord (Uulsh. I, 62).

(§. 46, b. c) change these Pl. terminations in the Format. Pl. to ān-ō, gān-ō, ūn-ō.

Foreign nouns ending in ah retain this final syllable and add to it ō or v-ō in the Form. Pl., as:

كَهَنَه kabinah, priests (from Arab. كَاهِن), Form. Pl. كَهَنَمَوْ kabinah-ō.

هَزَارَه hazārah, the Hazārah people, Form. Pl. هَزَارَهَو hazārah-vō.

Those nouns in ḡh, which in the Nom. Pl. add the termination ānah (§. 46, d), drop final ah before ō, as مَيْلَمَانَه mēlm-ānah, guests, Form. Pl. مَيْلَمَانَو mēlm-ān-ō.

f) Nouns ending in e (Nom. Pl. -y-ān, y-ānah, §. 47), ī (Nom. Pl. ān §. 48), ū (Nom. Pl. ān, gān §. 49) and au (Nom. Pl. ān, ūnah §. 50), form the Format. Pl. either regularly by ān-ō, gān-ō, ūn-ō, or add the affix ō to the crude form of the noun, which is also the case with all collective nouns. Irregular Plurals, such as زَمَن زāman, sons (from زَوِي zōe, §. 47) form the Format. Pl. either by زَامَنَو zāman-ō or زَوِيَو zōy-ō.

#### §. 64.

### B. The Formative Plural of fem. nouns.

a) Nouns ending in the Sing. in a consonant and in the Nom. Pl. in e (§. 51), drop in the Format. Pl. final e before the affix ō, as لَار لāre, ways, Form. Pl. لَارَو lār-ō; similarly the irregular Plurals (§. 51, b), as خَوْبَنَد خvēnde, sisters, Format. Pl. خَوْبَنَدَو xvēnd-ō; لُونَرَه lūnrah, daughters, Form. Pl. لُونَرَو lūnrō.

b) Nouns ending in ā, which either remain unchanged in the Nom. Pl. or add the termination vī (vē) (§. 52), add the Formative Pl. affix ō to the crude form, with or without enphonic v, as بَلَا balā or بَلَاو balāvī, misfortunes, Form. Pl. بَلَاَو balā-ō or بَلَاَو balā-v-ō. Nouns ending in gāne change this Pl. termination to

gān-ō, as: نِيَاكَانِ nīā-gāne, grand-mothers, Form. Pl. نِيَاكَانُوْ nīā-gānū.

c) Nouns ending in āh, Nom. Pl. ē (§. 53), drop this Pl termination before the affix ō, as: لِنْدِي lindē, bows, Format. Pl. لِنْدُوْ lind-ō. Collective nouns, which are identical in the Nom. Sing. and Plural, drop final āh before the affix ō, as: اَوْبَهْ ōbāh, Nom. Sing. and Pl., water and waters, Format. Pl. اَوْبُوْ ōb-ō.

In the older language and in poetry i (= e) is occasionally preserved before the affix ō, as اَوْجِي ōjē, tears (Nom. Sing. اَوْجَهْ ōjāh), Format. Pl. اَوْجِيُوْ ōj-i-ō.

Nouns ending in the Nom. Pl. in gāne, change it in the Format. Pl. to gān-ō, as: فِرِيْطَهْكَانِ firiṣtah-gāne, angels, Format. Pl. فِرِيْطَهْكَانُوْ firiṣtah-gānū; but the forms فِرِيْطَهْ firiṣt-ō, فِرِيْطَهْمُوْ firiṣtah-ō and فِرِيْطَهْدُوْ firiṣtah-vō are also in use.

d) Nouns ending in ō, Nom. Pl. gāne (§. 54), change it in the Format. Pl. to gān-ō. The collective nouns add v-ō in the Format. Pl., as: بَارْخُوْ bārḫō, cheek, Format. Pl. بَارْخُوْ bārḫo-v-ō, final ō being shortened in pronunciation to ā.

e) Nouns ending in ī, Nom. Pl. āī (§. 55), change the Plur. termination āī to i before the affix ō or drop it altogether, as: سَهْلِيْ sahelāī, hand-maids, Format. Pl. سَهْلِيُوْ sahelī-ō or سَهْلُوْ sahel-ō. The Plural termination gāne and āne is changed to gān-ō and ān-ō.

f) Nouns ending in āī, Nom. Pl. āī (§. 56), always drop final āī before the affix ō, as: كَانْرِاِيْ gānraī, oil-presses, Format. Pl. كَانْرُِوْ gānr-ō.

g) Nouns ending in e, Nom. Pl. āne, gāne (§. 57), change these Plur. terminations in the Form. Pl. to ān-ō, gān-ō.

Those ending in the Nom. Pl. in ī, shorten it to i (or iy-) or drop it altogether before the affix ō, as: سَرکُوزِی sarkūzī, sows, Format. Pl. سَرکُوزِی sarkūzi-ō or: سَرکُوزُ sarkūz-ō.

b) Nouns ending in ū, Nom. Pl. gāne (§. 58), form their Format. Pl. regularly by changing gāne to gāu-ō.

### III. Formation of cases.

#### Case-prefixes and postfixes.

##### §. 65.

1) The Nominative Sing. has no particular case-sign, but is identical with the crude form of the noun. The Nom. Plur. is recognised by the change of the final syllable or by the several Plural terminations, as shown in §. 42—58.

2) The Accusative has no particular case-sign, but is identical with the Nom. Singular or Plural.

3) The Instrumental\*) Singular and Plural is identical with the Formative Singular and Plural respectively.

All the other cases (the Vocative of course excepted) must be made up by means of prefixes and postfixes, which require the Formative of the noun, which they precede or follow.

4) The Genitive. In order to express a Genitive-relation the Paṣṭō places the prefix د da\*\*) before the Formative of a noun\*\*\*), which logically stands in the Genitive. The Genitive commonly precedes the governing noun, but it may also follow.

---

\*) See on the formation of the Instrumental my essay: „On the declensional features of the North-Indian Vernaculars, p. 388.

\*\*) That the Paṣṭō Genitive-prefix د da is identical with the Panjābī dā (Prākṛit दो = Sansk. तस) is shown in my essay, „On the declensional features etc. p. 396. 6.

\*\*\*) When a noun, preceded by a numeral ends in ah (§. 42, g), it may remain in the Nom. Plur., though it be governed by a prefix requiring else the Formative, as: دِی کَالَه of three years; دِی کَالَه after three years, etc.

it; e. g. دَ کورَ خَښتن da kōr ʔaʃtan, the master of the house,  
دَ کورونو خَښتن da kōrūnō ʔaʃtan, the master of the houses.

5) The Dative. In order to express the idea of the Dative the Paštō employs a variety of particles, which partly precede and partly follow the Formative of a noun.

a) The prefix و va is now nearly antiquated, but it is frequently met with in older Paštō authors and in poetry, as: و سړى va sarī, to a man. There can be hardly a doubt, that this prefix و is identical with the Pārsī prefix 𐬖, which Spiegel in his Pārsī Grammar, p. 55, note, derives from the Zendic preposition avi. With va the postfixes تَه tah or وَتَه vatah are frequently joined, as و سړى تَه va sarī tah or و سړى وَتَه va sarī vatah, to a man.

b) The postfix تَه tah and وَتَه. The postfix تَه tah is very likely identical with the Hindūstānī تَائِ tāi, Sindhī ताई tāī, which is to be derived from the Sansk. स्थाने. وَतَه vatah very probably is the Sindhī postfix वटि vaṭe, near to, with.

c) The postfix لَه lah and لَرَ laṛah. The postfix لَه is very likely identical with the Pārsī postfix رā, modern Persian likewise رَ, rā, which originally signifies „for the sake of“. The Marāṭhī uses likewise ला lā as Dative postfix, which corresponds to the Sindhī लाइ lāe, Hindūstānī لِیِ liē, for the sake of.

The postfix لَرَ laṛah has no analogy in the cognate idioms and its origin is therefore doubtful.

6) The Ablative. The idea of the Ablative is expressed partly by prefixes alone, partly by prefixes and a postfix.

a) The most common Ablative prefix is لَه lah, which always requires the Formative of a noun, as: لَه لَهتې lah laʃtī, from a brook. When a noun ends in a consonant\*) or in e, au, the

---

\*) Nouns comprised in the list §. 52, a. being excepted.

syllable *ah* (or only *a*) is added for euphony's sake, as: *لَهْ غَمَهْ* lah *gam-ah* (or *gam-a*), out of grief, *لَهْ زَوْنَهْ* lah *zōy-ah*, from the son; *لَهْ خَوْرَهْ* lah *ṭau-a*, from the ambush (or: lah *ṭav-a*). Very frequently *لَهْ* is also followed by the postfix *نَهْ nah* (in the eastern dialect), as: *لَهْ لَبْتِي نَهْ* lah *laṭī nah*, from a brook. When a noun ending in a consonant or *e* is thus followed by the postfix *نَهْ*, the euphonic syllable *ah* or *a* is not added, as *لَهْ غَم نَهْ* lah *gam nah*, out of grief, *لَهْ زَوْن نَهْ* lah *zōe nah*, from a son; but when *لَهْ* is followed by the postposition *سَرَهْ* (سَرَهْ — *لَهْ* with), a euphonic *ah* (*a*) is commonly added to the noun, as *لَهْ كَوْر سَرَهْ* lah *kōr-a sarah*, with the house.

The prefix *لَهْ lah* (not to be confounded with the postfix *لَهْ*) has very likely taken its origin from the Hindī postfix *ते* or *ये*, from (= Prāk. *तो* = Sansk. *तस्*), *t* having passed into *l* in Paṣtō; *नَهْ nah* we would compare with the Gujārātī Genitive affix *nō\**), which in Paṣtō has become a postposition, so that it has properly in *لَهْ — नَهْ* a double Ablative case-sign.

b) Besides *لَهْ* (or *لَهْ — नَهْ*) the Paṣtō uses also the prefix *تَر tar\**), with which the postfix *نَهْ* may also be joined as with *لَهْ*.

When *تَر* precedes a noun ending in a consonant or *e*, *au*, euphonic *ah* or *a* must be added to the noun, as *تَر سَر* tar *sara* from the head, *تَر حَايَهْ* tar *dāyah*, from the place (حَايَهْ); before

\*) Compare: „On the declensional features“ etc. p. 398.

\*\*) *تَر tar* seems to be identical with *لَهْ* as regards its origin, for it is apparently derived from the Sansk. Abl. affix *तस्*, with transition of *s* to *r*.

On the special signification of *تَر* see §. 174, 7.

the other nouns it requires simply the Formative. But when تر precedes a noun in the Singular ending in āh (fem.), it remains in the Nominative, as تر خُلّه tar xulāh, from the mouth. When تر precedes a noun in the Plural, it requires the Formative, as: تر لونړو tar tūnṛō, from the daughters, but nouns with the Plur. termination ūnah may remain in the Nominative, as: تر کورنه tar kaṛ-ūnah, under the chin.

When تر is followed by the postfix نه, nouns ending in a consonant or e, au, do not add a euphonic ah or a, as تر ټباڅ tar ṭbāḡ nah, from a bough, but when followed by the postposition تر قیامت پور (\*), final euphonic ah (a) is commonly added as: تر قیامت پور tar qiāmat-a pōre (قیامت), up to the resurrection. With other nouns the Formative is required, but nouns ending in āh may also remain in the Nom. (Sing.), in the Plural the Formative only is used. E. g. تر زمکې لاند tar zmakē lānde, under the ground or تر سینه لاند tar sīnāh lānde, under the breast; تر پښو لاند tar pēṭ lānde, under the feet.

c) In the east (especially among the Khaṭaks) د de\*\*) is frequently used as an Ablative prefix, which may also be followed by نه. It is constructed in every way like the prefix له, as د ظلم de ḡulma, out of tyranny.

7) The Locative. The idea of the Locative is expressed

\*) On تر—پور see §. 174, 7.

\*\*) In Qandahār however د is pronounced like da. At any rate د is etymologically identical with the Genitive prefix د.

either by the prefix **پہ** pah alone or with following **کهن** 'khe \*) (**کهنی**), which is not used as an independent postfix, but only in connexion with **پہ**, as: **پہ — کهنی** in, on. The prefix **پہ** is identical with the Pārsī prefix pa or fa, modern Persian **په**, Sansk. अभि; the origin of **کهنی** however is doubtful. It appears to have sprung from the Hindhī नीचे, below, down, by dropping initial nē; the form **کی** seems therefore to be original and **ه** a euphonic insertion (as in **پنه** pñāh, foot, etc.).

The construction of **پہ** must be well noticed; it requires, like the other prefixes and postfixes commonly the Formative of the noun, as **پہ لار** pah lāre, on the road, **پہ لارو** pah lārō, on the roads. But from this rule there are many exceptions:

a) If a noun end in **ah** (masc.) or **āh** (fem.), **پہ** is joined to the Nominative, as **پہ وَاغْدَه** pah vāqāh, on the grass; **پہ مینه** pah mīnāh kē, in love; but we find also: **پہ عقی کوتر** on that pigeon (Dorn, Chrest. p. 11).

b) Nouns ending in the Nom. Pl. in **ah**, **āh** (with and without internal vowel-change §. 42. d. g.) ānah, ūnah may, when constructed with **پہ**, remain in the Nominative; e. g. **پہ تله قم** pah tlah ham pah rātlah, in going and in coming; **پہ پهنانه** pah pēstānah kē, amongst the Afghāns; **پہ دری خیره** in three things; **پہ آسونه** pah āsūnah, amongst the horses; **پہ غوبانه** pah gōbānah, amongst the cowherds. But in all these cases the

---

\*) **کهنی** is also written and pronounced **کی** ke in Peshāwar.

**پہ** is also frequently written **پ** pa and thus even joined with the noun itself, which ought to be avoided.

Format. Pl. might also be used, as *په تلو* pah tlō, *په آسونو* pah āsūnō etc.

In the same way a fem. noun may remain in the Nom. Pl., when preceded by a numeral, as *په دوه ورځې* pah dvah vrad̄e, in two days; otherwise *په* is seldom constructed with the Nominative Plural of a fem. noun and only in poetry; so says Xush'āl ḡān (Gulsh. II, 42. 2.):

لوند دى حلق د فر سړى په خپلى لار<sup>\*</sup>

the throat of every man is moist by its own spittle.

c) The fem. nouns ending in *ī*, Format. Sing. *āī* (§. 55; 61, 5), are constructed in the east with the Formative, but in the west with the Nominative, as *په دوستي* pah dōstaī and *په دوستې* pah dōstī; when constructed with the Plural *په* always requires the Formative, as: *په بديو* pah bādīō, by wicked works.

Annotation. Like *په* the preposition *پار* par, on, upon, is also constructed. The poets take the liberty, when *په* is constructed with a noun ending in a consonant, to add a euphonic *ah* (a) to it, similarly as after the prefixes *له*, *تر* and *د*. E. g.

نوم ي ډرگړو د چا نه درومي په سړه

Without giving fame does not come on any body's head. (Gulsh. I, 173).

8) The Vocative, which is, properly speaking, not a case, is formed, after the analogy of the Persian, by adding the syllable *ah* (a) or *ā*, with or without the interjectional particles *ای* ai, *ا* ā, *و* vō. Entering into particulars we have to notice:

<sup>\*</sup> لارې = لارې, Nom. Pl. from لار.

## A. The Vocative Singular.

### a) of masc. nouns.

α) Masc. nouns ending in a consonant add the syllable ah (a) or ā, with or without the interjectional particles, as: <sup>أَيُّ</sup> vrōr-āh, o brother, <sup>أَيُّ</sup> ai vrōr-ah, <sup>أَيُّ</sup> vrōr-ā.

Nouns, which according to §. 60, 1. form their Format. Sing. by internal vowel-change and the addition of the syllable ah, or which add ah, dropping at the same time the short vowel of the crude form, do the same in the Vocative, as: <sup>أَيُّ</sup> vō špānāh, o shepherd! <sup>أَيُّ</sup> ai ḡlah, o thief!

β) Masc. nouns ending in ai add the syllable ah (a) or ā to the Formative Sing., as: <sup>أَيُّ</sup> ai sārīāh, o man!

γ) Masc. nouns ending in ā, ō, ah, ū, an\*) remain unchanged in the Vocative.

δ) Masc. nouns ending in e add ah (a), ā, before which final e is changed to y, as: <sup>أَيُّ</sup> zōy-āh, o son!

ε) Masc. nouns ending in ī add ah (a) ā, shortening ī at the same time to i or iy, as: <sup>أَيُّ</sup> jōgi-āh, o Jōgī!

### b) of fem. nouns.

Fem. nouns, of whatever termination, put the interjectional particles before the Formative Sing., as: <sup>أَيُّ</sup> ai jān-e, o maid! <sup>أَيُّ</sup> vō šād-ē, o woman; the interjectional particles may also be dropped, as <sup>أَيُّ</sup> jān-e.

Those fem. nouns, which end in a consonant but do not add e in the Format. Sing. (§. 51, b), add likewise e in the Vocative, as: <sup>أَيُّ</sup> ai mōre, o mother! <sup>أَيُّ</sup> xōr-e, o sister!

---

\*) Those in ā and ū and au may also add ā, ah; before final ā a euphonic y is inserted, as in Persian, as: <sup>أَيُّ</sup> gadā-yā, o beggar!

## B. The Vocative Plural.

The Vocative Plural of both genders is throughout identical with the Formative Plural, with or without the interjectional particles.

### §. 66.

We let now follow a general survey of the Paṣtō declensional process, according to the different terminations of nouns. In the first paradigm all the cases will be put down, in the following only the Nominative, Formative and Vocative Sing. and the Nominative and Formative Plural will be exhibited, as from these the several cases can easily be made up by means of the prefixes and postfixes, which are the same for the Singular and the Plural.

### §. 67.

#### I. Masculine nouns.

1) Nouns ending in a consonant. (§. 42; 60; 63, 1.)

a) With the Plural termination ān.

Sing.

Nom.      مَلِكْ malik, a chieftain.

Accus.    مَلِكْ malik, a chieftain.

Format. } مَلِكْ malik, by a chieftain.  
Instrum. }

Genit.    دَ مَلِكْ da malik, of a chieftain.

Dative.    مَلِكْ وَتَهْ va malik; مَلِكْ تَهْ va malik tah; مَلِكْ وَتَهْ

va malik vatah; مَلِكْ تَهْ malik tah \*); مَلِكْ وَتَهْ

---

\*) The most common postfixes now in use are تَهْ, لَهْ and وَتَهْ.

malik vatah; لَهُ malik lah; لَهُ malik larah,  
to a chieftain.

Ablative. لَهُ lah malika; لَهُ lah malik nah;  
تَرِ tar malika; تَرِ tar malik nah.  
مِنْ (نَ) de (da) malika; مِنْ de malik nah,  
from a chieftain.

Locat. هَاهُ pah malik; هَاهُ pah malik kə, in  
a chieftain.

Vocat. أَيَّ ai málíkáh, مَلِكَا maliká, o chieftain!

#### Plural.

Nom. مَلِكَانِ málík-ān, chieftains.

Accus. مَلِكَيْنِ malik-ān, chieftains.

Format. } مَلِكَانِ malik-ān-ō, مَلِكُو malik-ō, by chieftains.  
Instrum. }

Genit. مَلِكَانِ da malik-ān-ō; مَلِكُو da malik-ō, of chief-  
tains.

Dative. مَلِكَانِ va malik-ān-ō, مَلِكُو va malik-ō; وَ  
va malik-ān-ō tah, وَ va malik-ō tah etc. etc.  
to chieftains.

Ablat. مَلِكَانِ lah malik-ān-ō, مَلِكَانِ lah malik-ān-ō  
nah; مَلِكُو lah malik-ō, مَلِكُو lah malik-ō nah;  
مَلِكَانِ tar malik-ān-ō, مَلِكُو tar malik-ō; مَلِكَانِ

de (da) malik-ān-ō; د مَلِكُو de (da) malik-ō etc. from chieftains.

Locat. هَاهُ مَلِكَانُو pah malik-ān-ō, هَاهُ مَلِكُو pah malik-ō;  
هَاهُ مَلِكَانُو كِبِي pah malik-ān-ō k̄i etc. in chieftains.

Voact. اَيِّ مَلِكَانُو ai malik-ān-ō, مَلِكُو malik-ō, o chieftains!

b) With the Plural termination ūnah.

Sing.

Nom. آس ās, horse.

Format. آس ās.

Vocat. آسَه āsāh.

Plur.

Nom. آسُونَه ās-ūnah, horses.

Format. آسُونُو ās-ūnō, آسو ās-ō.

c) With the Plural termination ḡh and ejection of the short radical vowel.

Sing.

Nom. غُلّ ڳلḡ, thief.

Format. غُلّه ڳلḡh.

Vocat. اَيِّ غُلّه ai ڳل-ḡh.

Plur.

Nom. غُلّه ڳل-ḡh, thieves (also: غُلُونَه ڳل-ūnah).

Format. غُلُو ڳل-ō (غُلُونُو ڳل-ūnō).

d) With the Plural termination ah and internal vowel-change.

Sing.

Nom. شَيْوْن špūn, shepherd.

Format. شَيْآنَه špān-ah.

Vocat. أَقَى شَيْآنَه ai špān-áh.

Plur.

Nom. شَيْآنَه špān-ah, shepherds.

Format. شَيْآنُو špān-o.

e) With the Plural termination ahār.

Sing.

Nom. تَرَبْ trap, a bump.

Format. تَرَبْ trap.

Plur.

Nom. تَرَبَّاهَار trap-ahār, bumps.

Format. تَرَبَّاهَارُو trap-ahār-ō.

f) With change of final a to ā.

Sing.

Nom. سَخَر s̄xar, a stone.

Format. سَخَر s̄xar.

Vocat. سَخَرَّاه s̄xār-áh.

Plur.

Nom. سَخَرَّاه s̄xār, stones.

Format. سَخَرَّاهُو s̄xār-ō.

With the Plural termination *ah*, in connexion  
numerals.

Plur.

Nom. كَالِه (دری) (*drē*) *kāl-ah*, (three) years.

Format. كَالُو *kāl-ō* or كَالُونُو *kāl-ūn-ō*.

§. 68.

2) Nouns ending in *ai* (§. 48. 60, b; 62, b).

Sing.

Nom. گَوَانْدِی *gavāndī*, neighbour.

Format. گَوَانْدِی *gavāndī*.

Voc. گَوَانْدِیَه *gavāndī-āh*.

Plur.

Nom. گَوَانْدِی *gavāndī*, neighbours.

Format. گَوَانْدِیُو *gavāndī-ō*, گَوَانْدِیُو *gavānd-ō*.

§. 69.

3) Nouns ending in *ā* (§. 44; 60, c; 63, c.)

a) Sing.

Nom. گَدَا *gadā*, beggar.

Format. گَدَا *gadā*.

Vocat. اَی گَدَا (گَدَایَا) *ai gadā* (*gadāyā*).

Plur.

Nom. گَدَايَان *gadā-y-ān*.

Format. گَدَايَانُو *gadā-y-ān-ō*.

b) Sing.

Nom. مَـمَـا māmā, (paternal) uncle.

Format. مَـمَـا māmā.

Vocat. مَـمَـا اَي ai māmā.

Plur.

Nom. مَـمَـا كَـانَ māmā-gān.

Format. مَـمَـا كَـانَ māmā-gān-ō.

§. 70.

4) Nouns ending in ō (§. 45; 60, c; 63, d).

a) Sing.

Nom. سَـقَـاقَـو saqqāō, water-carrier.

Format. سَـقَـاقَـو saqqāō.

Vocat. سَـقَـاقَـو اَي ai saqqāō.

Plur.

Nom. سَـقَـاقَـو اَن saqqāō-ān, water-carriers.

Format. سَـقَـاقَـو اَن saqqāō-ān-ō.

b) Sing.

Nom. بَـيَـزَـو bīzō, monkey.

Format. بَـيَـزَـو bīzō.

Vocat. بَـيَـزَـو اَي ai bīzō.

Plur.

Nom. بَـيَـزَـو كَـانَ bīzō-gān, monkeys.

Format. بَـيَـزَـو كَـانَ bīzō-gān-ō.

c) Sing.

Nom. سَكُو skō, stitch.

Format. سَكُو skō.

Plur.

Nom. سَكُوئَه skō-ūnah, stitches.

Format. سَكُوئُو skō-ūn-ō.

§. 71.

5) Nouns ending in āb (§. 46; 60, c; 63, e).

a) Sing.

Nom. وَبَشْتَه vēštāh, hair.

Format. وَبَشْتَه vēštāh.

Vocat. اَي وَبَشْتَه ai vēštāh.

Plur.

Nom. وَبَشْتُوئَه vēštāh (also: وَبَشْتُوئَه vēštūnah).

Format. وَبَشْتُو vēšt-ō.

b) Sing.

Nom. لَيَوَه lēvāh, a wolf.

Format. لَيَوَه lēvāh.

Vocat. اَي لَيَوَه ai lēvāh.

Plur.

Nom. لَيَوَان lēv-ān, لَيَوَه گان lēvāh-gān.

Format. لَيَوَانُو lēv-ān-ō, } لَيَوَه گانو lēvāh-gān-ō.  
لَيَوَه lēv-ō. }

c) Sing.

Nom. زَرَّ zṛṛah, heart.

Format. زَرَّ zṛṛah.

Vocat. أَيَّ زَرَّ ai zṛṛah.

Plur.

Nom. زَرَرَه zṛ-ṛnāh.

Format. زَرَرَه zṛ-ṛn-ō, زَرَر zṛ-ō.

d) Sing.

Nom. غَوْبَه γōbāh, cowherd.

Format. غَوْبَه γōbāh.

Vocat. أَيَّ غَوْبَه ai γōbāh.

Plur.

Nom. غَوْبَانَه γōb-ānāh.

Format. غَوْبَانَه γōb-ān-ō.

§. 72.

6) Nouns ending in e (§. 47; 60, c; 63, f).

a) Sing.

Nom. آشنای āšnāe, friend.

Format. آشنای āšnāe.

Vocat. أَيَّ آشنای ai āšnāy-āh.

Plur.

Nom. آشنایان āšnāy-ān.

Format. آشنایان āšnāy-ān-ō, آشنایان āšnāy-ō.

b) Sing.

Nom. دڻي dḥe, custom.

Format. دڻي dḥe.

Plur.

Nom. دڻونہ dḥy-ḥnah, customs.

Format. دڻونو dḥy-ḥn-ō, دڻو dḥy-ō.

§. 73.

7) Nouns ending in I (§. 48; 60, c; 63, f).

Sing.

Nom. سپاہی sipāhī, soldier.

Format. سپاہی sipāhī.

Vocat. آئی سپاہی ai sipāhī (سپاہیā sipāhīā).

Plur.

Nom. سپاہیان sipāhī-ān, soldiers.

Format. سپاہیانو sipāhī-ān-ō, سپاہیو sipāhī-ō.

§. 74.

8) Nouns ending in ū.

a) Sing.

Nom. کندو kándū, a corn-bin.

Format. کندو kándū.

Vocat. آئی کندو ai kándū, کندو kandu-ā.

Plur.

Nom. کندوان kándū-ān, corn-bins.

Format. کندوانو kandu-ān-ō.

b) Sing.

Nom. **بَاهُو** bāhū, bracelet, ornament for the arm.

Format. **بَاهُو** bāhū.

Plur.

Nom. **بَاهُوْكَانَ** bāhū-gān, bracelets.

Format. **بَاهُوْكَانُوْ** bāhu-gān-ō.

§. 75.

9) Nouns ending in au. (§. 50; 60, c; 63, f).

a) Sing.

Nom. **مُتَّبِعُو** pairau, a follower.

Format. **مُتَّبِعُو** pairau.

Vocat. **أَيُّ مُتَّبِعُو** ai pairau (مُتَّبِعُو pairau-āh).

Plur.

Nom. **مُتَّبِعَوَانُ** pairau-ān, followers.

Format. **مُتَّبِعَوَانُوْ** pairau-ān-ō, **مُتَّبِعَوُوْ** pairau-ō (pairav-ō).

b) Sing.

Nom. **قَو** čau, a small canal.

Format. **قَو** čau.

Plur.

Nom. **قَوْنَدُ** čau-ūnah.

Format. **قَوْنُونُوْ** čau-ūn-ō, **قَوُوْ** čau-ō.

## II. Feminine nouns.

§. 76.

### 1) Nouns ending in a consonant. (§. 51).

#### a) Nouns adding e in the Formative Sing. and Nom. Plur. (§ 51, a; 61, a; 64, a).

Sing.

Nom. جَن جān, maid, virgin.

Format. جَن جān-e.

Vocat. أَي جَی ai jān-e.

Plur.

Nom. جَن جān-e, maids.

Format. جَنو جān-ō.

#### b) Nouns with irregular Plural formation. (§. 51, b; 61, a; 64, a).

Sing.

Nom. خُور χōr, sister.

Format. خُور χōr.

Vocat. أَي خُور ai χōr-e.

Plur.

Nom. خُوند χvënd-e, sisters.

Format. خُوندو χvënd-ō.

### 2) Nouns ending in ā. (§. 52; 61, b; 64 b).

#### a) Sing.

Nom. نِیَا niā, grandmother.

Format. نِيَا niā.

Vocat. أَيَّ نِيَا ai niā.

Plur.

Nom. نِيَاكَانِي niā-gāne.

Format. نِيَاكَانُو niā-gān-ō.

b) Sing.

Nom. بَلَا balā, misfortune.

Format. بَلَا balā.

Plur.

Nom. بَلَا balā; بَلَاوِي balā-vī (vē), misfortunes.

Format. بَلَاوُ balā-ō, بَلَاوَرُ balā-vō.

§. 78.

3) Nouns ending in āh. (§. 53; 61, c; 64, c).

Sing.

Nom. بَادَآه bād-āh, bribe.

Format. بَادِي bādē.

Vocat. أَيَّ بَادِي ai bād-ē.

Plur.

Nom. بَادِي bād-ē, bribes.

Format. بَادُو bād-ō (بَادِي bādī-ō).

§. 79.

4) Nouns ending in ō. (§. 54; 60, c; 64, d).

Sing.

Nom. پيشو pīšō, cat.

Format. <sup>اَ</sup>پیشو pīšō.

Vocat. <sup>اَی</sup>پیشو ai pīšō.

Plur.

Nom. <sup>اَ</sup>پیشوگان pīšō-gāne, cats.

Format. <sup>اَ</sup>پیشوگانو pīšō-gān-ō.

§. 80.

5) Nouns ending in I. (§. 55; 61, e; 64, e).

a) Sing.

Nom. <sup>اَ</sup>سہیلی sahéli, a handmaid.

Format. <sup>اَی</sup>سہیلی sahélaī.

Vocat. <sup>اَی</sup>سہیلی ai sahélaī.

Plur.

Nom. <sup>اَی</sup>سہیلی sahélaī handmaids.

Format. <sup>اَی</sup>سہیلیو sahéli-ō (<sup>اَی</sup>سہیل sahéi-ō).

b) Sing.

Nom. <sup>اَی</sup>دائی dāī, nurse.

Format. <sup>اَی</sup>دائی dāī.

Vocat. <sup>اَی</sup>دائی ai dāī.

Plur.

Nom. <sup>اَی</sup>دائیکان dāī-gāne, nurses.

Format. <sup>اَی</sup>دائیکانو dāī-gān-ō.

c) Sing.

Nom. <sup>اَی</sup>ہادی hādī, a female guide.

Format. هَادِي hādī.

Vocat. أَيْ هَادِي ai hādī.

Plur.

Nom. هَادِيَانِ hādī-āne, guides.

Format. هَادِيَانُو hādī-ān-ō.

d) Sing.

Nom. سِيْزْنِي sīznī, a swaddling band.

Format. سِيْزْنِي sīznī.

Plur.

Nom. سِيْزْنِي sīznāī, swaddling bands.

Format. سِيْزْنِيُو sīznī-ō (سِيْزْنُو sīzn-ō).

§. 81.

6) Nouns ending in aī. (§. 56; 61, f; 64 f).

Sing.

Nom. بِيْرَتِي bēraī, boat.

Format. بِيْرَتِي bēraī.

Vocat. أَيْ بِيْرَتِي ai bēraī.

Plur.

Nom. بِيْرَتِي bēraī, boats.

Format. بِيْرَتُو bēr-ō.

§. 82.

7) Nouns ending in e.

a) Sing.

Nom. نَارِ náve, bride (نَارِ).

Format. نَارِ náve.

Vocat. نَارِ أَى ai' náve; نَارِه náve-áh.

Plur.

Nom. نَارِیَن náve-áne; نَارِی náve, brides.

Format. نَارِیَن náve-án-ō; نَارِی náve-ō.

b) Sing.

Nom. تَرْدِرِی trōre, aunt.

Format. تَرْدِرِی trōre.

Vocat. تَرْدِرِی أَى ai trōre; تَرْدِرِه trōre-áh.

Plur.

Nom. تَرْدِرِیَن trōre-gáne; تَرْدِرِی trōre, aunts.

Format. تَرْدِرِیَن trōre-gán-ō; تَرْدِرِی trōre-ō.

c) Sing.

Nom. سَرَكُوزِ sarkúze, a sow.

Format. سَرَكُوزِ sarkúzi.

Vocat. سَرَكُوزِ sarkúzi.

Plur.

Nom. سَرَكُوزِی sarkúzi, sows.

Format. سَرَكُوزِی sarkúzi-ō, سَرَكُوزِ sarkúzi-o.

§. 83.

8) Nouns ending in ū. (§. 58; 61, h; 64, h).

Sing.

Nom. مَيْلُو mīlū, a female bear.

Format. مَيْلُو mīlū.

Vocat. مَيْلُو أَيَّ mīlū, مَيْلُو mīlu-ā.

Plur.

Nom. مَيْلُوكَانِ mīlū-gāne.

Format. مَيْلُوكَانُو mīlū-gān-ō.

§. 84.

The Adjective and its flexion.

In the flexion of the substantive that of the adjective is in the main already comprised; we have here to consider only those rules, which apply peculiarly to the adjective.

As regards the position of the adjective, it is placed on the whole before its substantive, but it may also follow it, especially in poetry. One adjective may also precede its substantive and another follow it; even two adjectives may follow (without a conjunction) a substantive, especially if the first be a pronominal adjective, as:

نَهْ وَفَنَمْ هَهْ سَتَرْكُو حَقِيقَتْ وَأَرَهْ مُبِينْ

I do not see with the (my) eyes the whole clear truth. (Gulsh. II, 52, 3).

We have to notice here especially the formation of the gender, further the peculiarities, to which some adjectives are subject in reference to the formation of the Plural and the Formative Sing. and Plur.

§. 85.

1) Adjectives ending in a consonant.

These form, like the substantives (§. 39, 1), the feminine by adding the termination āh (a), as تَوْرَ tōr, black, fem. تَوْرَهْ tōr-āh.

When two adjectives are joined together by the copula *ō* (cf. §. 28, 1), they are considered and treated as one word and therefore only to the latter the fem. termination is added, as: خوشکال و خرسند *χush'āl-ō-χursand-āh*, fem., happy and content. The same is the case, when an adjective is repeated with the preposition *په*, as تار په تار *tār pah tār*, scattered, fem. تار په تار *tār pah tār-āh*; but compounds, formed by means of *په* are commonly used in an adverbial sense and therefore not inflected at all.

When an adjective is intensified by another, both must be inflected, if not joined together by the copula *ō*, as تپ تور *tap tōr* (or تپ تور *tōr*) quite black, fem. تپه توره *tap-āh tōr-āh* (or تپه توره *tōr-āh*).

#### Paradigm.

##### Sing.

	Masc.	Fem.
Nom.	گد <i>gaḍ</i> , mixed.	گده <i>gáḍ-āh</i> .
Format.	گد <i>gaḍ</i> .	گده <i>gáḍ-ē</i> .
Vocat.	گده <i>gáḍáh</i> .	گده <i>gáḍ-ē</i> .

##### Plur.

Nom.	گد <i>gaḍ</i> .	گده <i>gáḍ-ē</i> .
Format.	گدو <i>gáḍ-o</i> .	گده <i>gáḍ-ō</i> .

When the adjective is used in the sense of a substantive, it adds the Plur. termination *ān*, as گدان *gáḍ-ān*, Formative: گدانو *gaḍ-ān-ō* (or گدو *gáḍ-ō*). It is a poetical license, if now and then the pure adjective is used with the Plur. termination of a substantive (i. e. *ān*, *ānō*). So says, for instance, Rah'mān:

ہے سبب د ظالمانو حاکمانو کور و اور او پيشور دى واپه تو دى

On account of tyrannical governors house and fire and Peshāwar, all three are one (thing). (Gulsh. II, 28, 1).

Some adjectives as: مَيَن mayan, in love, and all formed by the affix زَن (جَن, زَن) تَرَ (cf. §. 42, f) follow the declension of سَخَر, when used substantively (§. 67, f).

Some adjectives are inflected irregularly; as مَر mar, dead, fem. مَرِ mr-āh; Format Sing. m. مَرِ mr-āh, fem. مَرِ mr-ē; Nom. Pl. مَرِ mr-āh, fem. مَرِ mr-ē; Format Pl. com. مَرِ mr-ō. Similarly لَوَر lvar, high, fem. لَوَرِ lvar-āh; Nom. Pl. لَوَرِ (lvar-āh) fem. لَوَرِ lvar-ē. زَرْغُون zaryūn, verdant, fem. زَرْغُونِ zaryūn-āh; Nom. Pl. زَرْغُونِ zaryūn-āh, fem. زَرْغُونِ zaryūn-ē.

In some adverbial phrases the adjective remains uninflected, as کُومَه خَوَاتَه kūm-āh xvā tah, to which direction, whereto? (instead of: کُومِى خَوَاتَه); بَلَه خَوَاتَه bal-āh xvā tah, to another direction, somewhere else.

#### §. 86.

Monosyllabic adjectives with secondary ō, ū, ī\*).

There is a certain number of monosyllabic adjectives with secondary ō, ū, ī, which form the Sing. feminine, the Formative Sing. masc., the Nom. Plur. masc. and the Formative Plur. masc. in an irregular way.

The following adjectives, in which original ā has been deepened to ū and ō, restore it again, but shortened, before the fem. termination āh, which is considered half-accented (cf. §. 39, 1), as رُوخ ripe (originally رُوخ, from पाक = Hindi पक्का, Sansk. पक्क)

\*) If ō, ū and ī be radical, they are of course not subject to any change, as رُوح rōy, healthy, fem. رُوحِ rōy-āh, etc.

fem. پَاخَه pāx-āh, thence the regular Plur. پَاخِي pāx-ē. The Formative Sing. masc. is پَاخَه pāx-ah, after the analogy of the substantives noticed in §. 60, a; the Nom. Plur. masc. likewise پَاخَه pāx-ah (§. 42, d), but the Format. Plur. masc. (in contradistinction to the Format. Pl. of the substantives (§. 63, a. γ) پَاخُو pax-ū, which quite coincides with the Format. Plur. fem. In the Vocative Sing. ā is likewise shortened to a, the Vocative affix ah being accented, as پَاخَه pāx-āh.

Irregular is سُر sūr, red (Pers. سُرخ), fem. سَر sār-āh, but Plur. masc. سَر sr-ah. — Some adjectives also change ō to va; see the list.

Some adjectives, which contain ī, change it in a similar way to a, as تَرِيخ trīx, bitter, fem. تَرِيخَه tārīx-āh, Plur. fem. تَرِيخِي tārīx-ē, Format. Plur. تَرِيخُو tārīx-ū. But the Format. Sing. masc. is تَرِيخَه tārīx-ah (like غَلَه §. 90, a) and the Nom. Plur. masc. likewise تَرِيخَه tārīx-ah; Format. Plur. masc. تَرِيخُو tārīx-ū.

#### Paradigm. I.

	Sing.	
	Masc.	Fem.
Nom.	خُورِب fōrb, fat.	خُورِبَه fārb-āh.
Format.	خُورِبَه fārb-ah.	خُورِبِي fārb-ē.
Vocat.	خُورِبَه fārb-āh.	خُورِبِي fārb-ē.
	Plur.	
Nom.	خُورِبَه fārb-ah.	خُورِبِي fārb-ē.

\*) Some adjectives may retain ō and ū in the Feminine, whereas in the Masculine (Format. Sing. and Nom. Plūr. and Format. Plur.) they undergo the vowel-change.

Format. $\text{خَرَبُو} \text{ } \text{ṣarb-ō.}$	$\text{خَرَبُو} \text{ } \text{ṣarb-ō.}$
Vocat. $\text{خَرَبُو} \text{ } \text{ṣarb-ō.}$	$\text{خَرَبُو} \text{ } \text{ṣarb-ō.}$

Paradigm. II.

	Sing.	
	Masc.	Fem.
Nom.	$\text{تَرِيو} \text{ } \text{triv, acid; sour.}$	$\text{تَرَوِ} \text{ } \text{tārv-āh.}$
Format.	$\text{تَرَوِ} \text{ } \text{tārv-āh.}$	$\text{تَرَوِ} \text{ } \text{tārv-ē.}$
Vocat.	$\text{تَرَوِ} \text{ } \text{tārv-āh.}$	$\text{تَرَوِ} \text{ } \text{tārv-ē.}$
	Plur.	
Nom.	$\text{تَرَوِ} \text{ } \text{tārv-āh.}$	$\text{تَرَوِ} \text{ } \text{tārv-ē.}$
Format.	$\text{تَرَوِ} \text{ } \text{tārv-ō.}$	$\text{تَرَوِ} \text{ } \text{tārv-o.}$
Vocat.	$\text{تَرَوِ} \text{ } \text{tārv-ō.}$	$\text{تَرَوِ} \text{ } \text{tārv-ō.}$

The following adjectives are inflected after the two preceding paradigms; the others are regular and not subject to any vowel-change in the formation of the gender or number.

Sing. masc.	Sing. fem.	Plur. masc.

§. 87.

2) Adjectives ending in ai.

a) Adjectives ending in ai form generally their feminine by changing ai to āi (§. 39, 2). In their inflexion they are regular.

Paradigm.

	Masc.	Fem.
Sing.		
Nom.	وړمبای <i>vṛumbai</i> , the first.	وړمباي <i>vṛumbāi</i> .

Format. رُنْبِي vrumbī.	رُنْبِي vrumbaī.
Vocat. رُنْبِي vrumbī.	رُنْبِي vrumbaī.

Plur.

Nom. رُنْبِي vrumbī.	رُنْبِي vrumbaī.
Format. رُنْبِي vrumbi-ō	رُنْبِي vrumb-ō.
رُنْبِي vrumb-ō	
Vocat. رُنْبِي vrumbi-ō	رُنْبِي vrumb-ō.
رُنْبِي vrumb-ō	

When the adjective is used substantively, the Vocative Sing. may affix the syllable ah, as رُنْبِي vrumbi-ah, o first one!

b) The following adjectives form their feminine by changing ai to e and not to aī.

أَسْتَوْحَى astōḡai, sent; a messenger;	fem. أَسْتَوْحَى astōḡe.
أَلَوَى alavai, burnt;	„ أَلَوِ alave.
أُونَى ūnai, babbling.	„ أُونِ ūne.
إِوَاخَى ēvāḡai, alone.	إِوَاخِ ēvāḡe.
بَرَوَى barvai, adhesive.	„ بَرَوِ barve.
بَلَمَكَى balmagāi, saltless.	„ بَلَمَكِ balmage.
بُرَوَى būrai, clipped.	„ بُرَوِ būre.
بُيْرَتَى būpartai, gluttonous.	„ بُيْرَتِ būparte.
پَالَى palai, on foot.	„ پَالِ pale.

پوٲسكئى pōṭuskai, scanty; small.	fem. پوٲسك پōṭuske.
پوٲئى pūtai, little, small.	„ پوٲ pūṭe.
تٲئى taṣai, thirsty.	„ تٲ taṣe.
تورئى tōrai, simple; plain.	„ تور tōre.
چوٲئى čūyai, hump-backed.	„ چوٲ čūye.
چونكئى čūnkai, impudent.	„ چونك čūnke.
چٲولئى čapōlai, matted (as hair).	„ چٲول čapōle.
حرامونئى h'arāmūnai, bastard.	„ حرامون h'arāmūne.
خارورئى ẋarōrai, given to biting.	„ خارور ẋarōre.
خوشئى ẋūšai, crazy.	„ خوش ẋūše.
ريٲتٲنئى riṣṭtūnai	ريٲتٲن riṣṭtūne
ريٲتٲنئى riṣṭtūnai	ريٲتٲن riṣṭtūne
true.	
زارئى zārai, young (of cattle).	„ زار zāre.
سارئى sārai, equal.	„ سار sāre.
ستٲئى staṛai, fatigued.	„ ستٲ staṛe.
سٲكورئى saṭkūrai, scorched.	„ سٲكور saṭkūre.
شاٲلئى šāvlai vāvlai, careless.	„ شاٲل šāvle vāvl
كسورئى kasūrai, distressed.	„ كسور kasūre.
كشئى kašai, only son.	„ كش kaše, only daughter.

كُوشَلَايْ kūṣalai, pretty.	fem. كُوشَلَاةِ kūṣale.
مَزَايْ mazai, strong.	” مَزَاةِ maze.
نَامِي نَامَايْ nāmī nāmai, unknown; mean.	” نَامِي نَامَاةِ nāmī nāme.
نُومَانْدَايْ nūmāndai	نُومَانْدَاةِ nūmānde
نُومَارَايْ nūmarai	نُومَارَاةِ nūmare
نَوَايْ navai, new.	” نَوَاةِ nave.
وَاژَايْ važai, hungry,	” وَاژَاةِ važe.
يَاوَاژَايْ yavāžai, alone.	” يَاوَاژَاةِ yavāže.
يَاوَاصَتَايْ yavastavai, of one fold (as a dress).	” يَاوَاصَتَاةِ yavastave.

c) All possessive compound adjectives (§. 38, 4. c) and all adjectives with the diminutive affixes kai (§. 35, 2), karai, garai (§. 37, 8.), ōžai and ūžai (§. 37, 10).

زُرُونِي پَاكِ pak zrūnai, having pure hearts; fem. زُرُونِي پَاكِةِ pāk zrūne \*).

زَوِي مَرَايْ zōe marai, having a dead son; ” زَوِي مَرَاةِ zōe mare.

d) All participles present and perfect and all compound nouns, the last member of which is a participle.

وَايُونَكَايْ vayūnkai	وَايُونَكَاةِ vayūnke.
وَايُونَايْ vayūnai	وَايُونَاةِ vayūne.
وَايَايْ vayalai, said (dictus),	fem. وَايَاةِ vayale.

For the adjectives noticed under b) c) d) the following may serve as paradigm.

\*) Of course only occurring in the Plural.

Sing.

	Masc.		Fem.
Nom.	كَيْلَى kəulai, pretty.		كَيْلَى kəule.
Format.	كَيْلَى kəúli.		كَيْلَى kəúli.
Vocat.	كَيْلَى kəuli.		كَيْلَى kəuli.

Plur.

Nom.	كَيْلَى kəuli.		كَيْلَى kəuli.
Format.	كَيْلَىو kəúliō		كَيْلَىو kəúliō
	كَيْلَىو kəúliō		كَيْلَىو kəúliō
Vocat.	كَيْلَىو kəuliō.		كَيْلَىو kəuliō.

§. 88.

3) Adjectives ending in ā.

Adjectives ending in ā remain unaltered in both genders, as well in the Singular as in the Plural. In the Format. Pl. they add the affix ō, which however is occasionally dropped in poetry.

Paradigm.

Sing.

	Masc.		Fem.
Nom.	دَانَا dānā, wise.		دَانَا dānā.
Format.	دَانَا dānā.		دَانَا dānā.
Vocat.	دَانَا dānā.		دَانَا dānā.

Plur.

Nom.	دَانَا dānā.	دَانَا dānā.
Format.	دَانَامُو dānā-ō (دَانَا);	دَانَامُو dānā-ō (دَانَا).
Vocat.	دَانَا dānā-ō (دَانَا)	دَانَا dānā-ō (دَانَا).

When an adjective is used substantively, it takes, according to §. 44. the Plural-termination y-ān, as: دَانَايَان dānā-y-ān, the wise ones, Format. Pl. دَانَايَانُو dānā-y-ānō, or دَانَا dānā-ō.

§. 89.

4) Adjectives ending in ō.

The few adjectives ending in ō remain unaltered in both genders; in the Formative Plur. they add the affix ō (with euphonic v = v-ō), which however may be left out altogether.

Paradigm.

Sing.		
Masc.		Fem.
Nom.	پَاتُو pātō, left; remaining.	پَاتُو pātō.
Format.	پَاتُو pātō.	" "
Vocat.	پَاتُو pātō.	" "
Plur.		
Nom.	پَاتُو pātō.	پَاتُو pātō.
Format.	پَاتُوو pāto-v-ō (پَاتُو)	پَاتُوو pāto-v-ō (پَاتُو).
Vocat.	پَاتُوو pāto-v-ō (پَاتُو)	پَاتُوو pāto-v-ō (پَاتُو).

§. 90.

5) Adjectives ending in ʕh.

The adjectives ending in ʕh form their feminine by changing ʕh to āh (cf. §. 39, 4). Their flexion is quite regular.

Paradigm.

Sing.	
Masc.	Fem.
Nom.    اُودَاهُ ūdāh, asleep.	اُودَاهُ ūdāh.
Format. اُودَاهُ ūdāh.	اُودَاهُ ūdē.
Vocat. اُودَاهُ ūdāh.	اُودَاهُ ūdē.
Plur.	
Nom.    اُودَاهُ ūdāh.	اُودَاهُ ūdē.
Format. اُودَاهُ ūdō.	اُودَاهُ ūdō.
Vocat. اُودَاهُ ūdō.	اُودَاهُ ūdō.

Adjectives, which are borrowed from the Persian, either directly or with a little modification, generally undergo no change, neither for gender nor number; they only add the affix ō in the Format. Pl., as: بَيَايَسْتَه šāistah, handsome \*) (Pers. شایسته), Format. Pl. بَيَايَسْتَه‌وُ šāistah-ō or with euphonic v: بَيَايَسْتَه‌وُ šāistah-v-ō; اَشْكَار škārāh, manifest, known (Pers. آشکار).

This is also the case with the pronominal adjectives: جَمْلَه jumlah (Format. Pl. جَمْلَه‌وُ jumlah-ō) all; وَاَرَّ vārāh, all (Format. Pl. وَاَرَّ vār-ō); دَوَاَرَّ dvārāh, both (Format. Pl. دَوَاَرَّ dvār-ō); قَمَه hamah, all, (Form. Pl. قَمَه‌وُ hamah-ō, قَمَه‌وُ hamah-v-ō or قَمَه ham-ō); but they may also dispense with the Formative Pl. affix ō, as: لَه وَاَرَّ ملو from all the wine.

\*) Foreign adjectives, which do not distinguish between šb and āb, we prefer to write simply with ah, without any mark.

§. 91.

6) Adjectives ending in e.

These form their feminine by adding the termination āh, before which final e is changed, for euphony's sake, to y. Some few adjectives undergo no change neither for gender nor number, as: پانی pāte, left.

Paradigm.

	Masc.	Sing.	Fem.
Nom.	لوی lōe, great.		لویہ lōy-āh.
Format.	لوی lōe.		لویہ lōy-ē.
Vocat.	لوی lōe.		لویہ lōy-ē.
		Plur.	
Nom.	لوی lōe.		لویہ lōy-ē.
Format.	لویہ lōy-ō.		لویہ lōy-ō.
Vocat.	لویہ lōy-ō.		لویہ lōy-ō.

When the adjective is used substantively, it may follow the flexion of the substantives ending in e (see §. 72).

§. 92.

7) Adjectives ending in ī and ū.

Adjectives ending in ī and ū undergo no change for gender or number; in the Format. Pl. they may optionally add ō.

Paradigm.

	Masc.	Sing.	Fem.
Nom.	خُماری xumārī, drunken.		خُماری.

Format.	خَمَارِی xumārī.	خَمَارِی.
Vocat.	خَمَارِی xumārī.	"

Plur.

Nom.	خَمَارِی xumārī.	خَمَارِی.
Format.	خَمَارِیَو xumārī-ō	خَمَارِیَو
	خَمَارِی xumārī	خَمَارِی
Vocat.	خَمَارِیَو xumārī-ō	خَمَارِیَو
	خَمَارِی xumārī	خَمَارِی

8) Adjectives ending in an.

These are very few in number and nearly all taken from the Persian; they form the feminine by adding the termination āh. In the Formative Plur. they add the affix ō, which however may also be dropped. On the declension of یَو yau, one, see §. 94.

Paradigm.

	Sing.	
	Masc.	Fem.

Vocat.	تَیَزَرَوِی tēzrau-āh.	تَیَزَرَوِی tēzrauē.

Plur.

Nom.	تَیَزَرَو tēzrau.	تَیَزَرَوِی tēzrauē (tēzrav-ē).
Format.	تَیَزَرَوِی tēzrau-ō.	تَیَزَرَوِی tēzrau-ō (tēzrav-ō).

§. 93.

Comparison of Adjectives.

The Paṣṭō does no longer possess a comparative and superlative degree, as the modern Persian, but is compelled to express the idea of a Comparative and Superlative in the same way, as the modern Indian Prākṛit tongues do, which have likewise lost the power to form a comparative and superlative degree by means of affixes added to the base of the adjectives \*).

The Comparative is formed by putting the compared object in the Ablative by means of the case-particles *نه*, *نه* — *نه* — *نه*, the adjective itself remaining in the Positive. The same is the case, if a Persian comparative form be used, which is now and then met with \*\*).

عقل او بوقه بی زیات تر بیان و فراسمت او دانائی بیره تر حد

His intellect and understanding was greater than can be told, his sagacity and wisdom beyond measure. (Gulsh. I, p. 159) Gulistān.

The idea of the Comparative may be intensified by putting before the adjective *بهر* *bēr*, much (which however must agree with the subject in number and gender), *لا* *lā*, still, even. The object, with which the subject is compared, may not be mentioned and must then be gathered from the context.

د جاعل تر همدمی بهر بهتر نی که نه چا سره همدم وی از قفا

Much better than the intimacy of an ignorant man it is, if a basilisk be one's bosom-friend. (Gulsh. II. p. 7. 1.) Rah'mān.

\*) The method now followed in Paṣṭō and the Indian vernaculars has apparently been brought about by the influence of the Sanskrit. For the compared object is also put in the Ablative already in Sanskrit and this may have been considered sufficient for a comparison.

\*\*) The Persian Comparative is made up by adding to the Positives the affix *تر* *tar*, and the Superlative by adding the affix *ترین* *tarīn*.

بَلَكِه لَا تَر دَرِوېشَانُو چِه غَنِيَان بِي مُحْتَاج تَر دِي

But those, who are rich, are still more needy than the poor. (Gulsh. II, p. 44, 3) Xušh'āl.

The Superlative is formed in the same way as the Comparative, only *ټول* *ṭol*, all, *همه* *hamah*, *جمله* *jumlah*, all, or similar expressions as *تَر حَدّ* *tar hadda*, beyond measure etc. are put before the object, with which the subject is compared.

The idea of the Superlative is often only hinted at by putting *ډېر* *ḍēr*, much, either alone or jointly with an adjective. Often there is no outward indication of the idea of the Superlative at all and it must be gathered solely from the context.

لَه ټولو ځَلَقُو ته سَرِي هِه لِيډ كېښِي ډېر ښه دِي

In appearance man is much better than all creatures (man is the very best of all creatures). Gulistān.

غَم د يار د بېلتانه دِي چِه تر هر څه دِي دشوَار

It is the grief about the separation from the friend, which is the most difficult thing. (Gulsh. II, p. 40, 3.) Xušh'āl.

ډير لوي هِه بېادشاعت د آسمانوډو كېښي څوك دِي

Who is the greatest in the kingdom of heaven? Matth. 18, 1.

ته ټلنډه مرتبه د چا هِه كار دِي لوي مقام دِي عدالت هِه دا دنيا

If a high dignity be of use to any one: the highest station in this world is justice. (Gulsh. II, p. 8). Rah'mān.

The manner in which two sentences are compared together, see in the Syntax, §. 187.

## IV. Section.

### The Numerals.

#### §. 94.

##### 1) Cardinal numbers.

يَوَّ yau, one, fem. يَوَّه yau-äh.

دَوَّ dvah, two, fem. دَوِّي dvē.

دَرِي dre (دِر), three.

خَلَوَّر ʔalör, four.

پِنْقَه pinqah, five.

شِپَاز špaž, six.

اَوَّه övah, seven.

اَتَه atah, eight.

نَه nöh; نَو nō, نَه nah, nine.

لَس las, ten.

يَوَّلاس yaulas or yōlas, eleven.

يَوَّوَّلاس yavōlas.

دَوَّابلاس dvablas, دَوَّوَّلاس dvōlas, دَوَّلاس dōlas, twelve.

دِيارلاس diārlas, thirteen.

خَوَّارلاس ʔvārlas, fourteen.

پِنْقَهلاس pinqahlas, fifteen.

سِپَارلاس spārlas, سِپَاراس spāras, sixteen.

اووهٔ لَس avahlas, seventeen.

آتهٔ لَس atahlas, eighteen.

نُه لَس nublas, نوُنَس nūnas\*), nineteen.

شِل šil, twenty.

یو وِشْت yau, vīšt, twenty one.

دو وِشْت dvah vīšt, twenty two.

دری وِشْت drē vīšt, twenty three.

خالور وِشْت	} twenty four.
خالیر وِشْت	

پنجهٔ وِشْت pinjah vīšt, twenty five.

شپَر وِشْت špaž vīšt, twenty six.

اووهٔ وِشْت avah vīšt, twenty seven.

آتهٔ وِشْت atah vīšt, twenty eight.

نُه وِشْت nōh vīšt, twenty nine.

دیرش dērš, thirty.

یو دیرش yau dērš, thirty one.

دو دیرش	} thirty two.
دو دیرش dvah dērš	

دری دیرش dre dērš, thirty three.

---

نوُنَس is a euphonic change for نوُنَس (\*).

ثَلَاثُونَ دَرِش talōr dērš, thirty four.

etc. etc. etc.

خَلْوِشْت talvēšt, forty.

يَوَّ خَلْوِشْت yau talvēšt, forty one.

دَوَّ خَلْوِشْت dō talvēšt, forty two.

دَرِ خَلْوِشْت dre talvēšt, forty three.

etc. etc. etc.

پَنْخَوَس panqōs, fifty.

شِپْتَه špētah, sixty.

أَوِيَا aviā seventy (indeclin.).

أَتِيَا atiā, eighty (indeclin.).

نَوَّ nave, نَوَّ nave, ninety (indeclin.).

سِل sil (also written صِل sil or صَل gal), hundred.

يَوَّ سِل yau sil, hundred and one.

دَوَّ سِل dvah sil, hundred and two.

سِل دَرِ پَنْخَوَس sil dre panqōs, hundred and fifty three.

etc. etc. etc.

In the numbers the Paštō very closely approaches the Zendic forms. يَوَّ yau, one, Zend aēva, whereas the Persian and the Indian Prākṛit idioms recur to the Sansk. एक.

The declension of يَوَّ yau is somewhat irregular.

	Sing.	
	Masc.	Fem.
Nom.	يَوَّ yau, one.	يَوَّ yau-āh.

Format. <b>دو</b> yau-āh.	<b>دو</b> yau-ē.
Vocat. <b>دو</b> yau-āh.	<b>دو</b> yau-ē.

The masc. form **دو** dvah, two, may also be used for the feminine. In the Format. Pl. it is **دو** dvō, but **دو** may also be used.

**دري** dre, three (Sansk. **त्रि**, Zend thri) has in the Form. Pl. **دريو** dre-ō, though **در** is also in use.

**چلور** čalōr, four (Sansk. **चत्वार**, Zend čathvār), has in the Format. Pl. **چلورو** čalor-ō. **پنجه** pinḡah (Sansk. **पञ्च**, Zend pañčan), **پنجهو** pinḡō. Similarly **شپه** špaž, six (Sansk. **षष्**, Zend khšvas), **شپهو** špaž-ō; **اووه** ōvah, seven (Sansk. **सप्तन्**, Zend haptan), **اووهو** ōv-ō; **آته** atah, eight (Sansk. **अष्टन्**, Zend astan), **آتو** at-ō.

**نه** nōh, nine (Sansk. **नवन्**, Zend navan) remains unchanged in the Format. Plur.

**لس** las, ten (Sansk. **दशन्**, Zend daśan, (in Paštō d = l), Format. Pl. **لسو** las-ō.

**شیل** šil, twenty (Sansk. **विंशति**, Zend vīśaiti; in Paštō the initial syllable vi is thrown off and **शति** changed to šil, by transition of final t to l) is only used when standing alone\*); in the compound numbers 21, 22 etc. the full form **ويشت** vīšt (Persian **بیست**, Hindī **बीस**) is again used. Its Format. Pl. is regularly formed by adding the affix **ō**.

**دېرش** dērš, thirty, is contracted from **دېرشت** dēršt (Sansk.

---

\*) **شیل** is also used as a substantive in the sense of „a score“, and may then form the Plural **شله** šil-ah (Format. **شلو**).

चिंशत्, Zend thrisāta); **خَلَوِیْسَت** *palvēšt*, forty, is likewise a contraction, Sansk. **चत्वारिंशत्**, Zend *čathvaresāta*; instead of **خَلَوِیْسَت** the common people frequently employ a multiplication **دوۂ شِلَه** *dvah šilah*, two scores (two times twenty), similarly **درِ شِلَه** *dre šilah* for **سپِتَه** *špētah*, sixty.

**پَنَاشَت** *panōš*, fifty, Sansk. **पंचाशत्**, Zend *pančāsata*, final t being dropped in *Pāštō*.

**شپِتَه** *špētah*, sixty (Format. Pl. **شپِتَو** *špēt-ō*) recurs to the Zendic form *khāvasti*, Sansk. **षष्टि**, with transition of v to p. — **اَوِیَا** *aviā*, seventy (properly **اَوِیَا** *avviā*), is very much curtailed: Sansk. **सप्तति**, Zend *haptāiti*, which is assimilated in *Pāštō* first to *appā* and thence to *avvā*, and with euphonic i inserted, *avviā*, the final syllable *iti* being dropped altogether. **اَتِیَا** *atiā*, eighty, Sansk. **अशीति**, Zend *astāiti*, which is assimilated in *Pāštō* to *attā*, and with euphonic i inserted *atiā* (instead of *attiā*). **نَوِی**, ninety, Sansk. **नवति**, Zend *navaiti* (Sindhī and Hindī also **नवे**).

**سَل** *sil*, hundred (also written and pronounced **سَل** *sal*) is the Sansk. **शत**, Zend *śata* (Persian **صد**), with transition of t to l. **سَل** is only used of one hundred (up to 199)\*. When the noun, with which **سَل** is connected, stands in the Formative, it takes likewise the affix **و**, as: **وَلَارَدَن سِلَو زَدَو** a father of hundred sons. When two or more hundreds are to be expressed, the numeral **سَو** *san* (**صَو** *gau*) is employed, Plur. **سَو** *sav-a*, **سَوَه** *sav-ah* (Sindhī

\*) But the Plural form **سِلَه** *silah* is also occasionally met with.

सउ, Prāk. सस्य = सद), Format. سَو sav-ō. Instead of سَو the constructed form سُو sū (صُو ḡu) is also used, before which some units take a different form.

دَو dvah savah, two hundred (Format. دَو سَو dvō sav-ō).

دِری dre savah or: تیر سُو tēr sū, three hundred. \*)

خَلَو talōr savah or: خونسُو tūnsū, four hundred.

پنجاه pinjah savah or: پونسُو pūnsū, five hundred.

شپس سَو špaš savah or: شپس سُو špaš sū, six hundred.

اووه ōvah savah or: اووه سُو ōvah sū, seven hundred.

آته atah savah or: آته سُو atah sū, eight hundred.

نُه nuh savah or: نُه سُو nuh sū, nine hundred.

When hundreds are to be expressed generally, سِلْگُونَه silgūnah (Format. سِلْگُونَو silgūnō) is employed.

زَر zar, thousand (قَزَار qazār is also in use).

زَر zar (Sansk. सहस्र, Zend hazāra) is, like سَو sau, a regular substantive and forms the Plur. زَرَنَه zar-ūnah, but with other numerals: زَر zar-ah, as:

دَو dvah zar-ah, two thousands.

دِری dre zar-ah, three thousands.

etc. etc. etc.

---

\*) سَو is indeclinable and undergoes therefore no change in the Format. Plur.

When thousands are to be expressed generally, زَرُونَه zargūnah (Format. زَرُونُو zargūnō) is employed.

For a hundred thousand the Indian word لَک lak (Hindī लाख, Sansk. लक्ष) is used, the regular Plural of which is لَکُونَه lakūnah, but in connexion with numerals لَکَ lakh (laka), as:

دو لَک drah lakah, two Lakhs = two hundred thousands.

لاس لَک las lakah, ten Lakhs = a million.

شیل لَک šil lakah, twenty Lakhs = two millions.

Also the Hindī کَرُوْر karōr (Sansk. कोटि), one hundred Lakhs = 10 millions, is found in Paṣtō.

### §. 95.

#### 2) Ordinal numbers.

The ordinals are formed in Paṣtō, as in Persian, by adding the affix am, before which final ah is dropped; only the first cardinal number makes an exception.

دَوْنَمِي vṛumbai	} the first (fem. دَوْنَمِي vṛumbai).
رَنْمِي rumbai	
أَوَّل avval (Arab.)	

دَوْنَمِ dvayam, fem. دَوْنَمَه dvayam-āh, the second.

دِرْیَم dreyam, the third.

خَلَوْرَم ṭalōram, the fourth.

پِنْځَم pinḡam, the fifth.

\*) In dvayam the root is dva; final ah is therefore not elided, but euphonic y inserted, as in all numerals ending in ā.

شِبْوَم špažam, the sixth.

اَوَم ōvam, the seventh.

اَتَم atam, the eighth.

نُهَم nuham, the ninth.

لَسَم lasam, the tenth.

يَاوَلَسَم yaulasam, the eleventh.

etc. etc. etc.

شِلَم šilam, the twentieth.

يَاوِيْشْتَم yauvištam, the twenty-first.

etc. etc.

دَرْشَم dēršam, the thirtieth.

شِپْتَم špētam, the sixtieth.

اَوِيْأَم aviāyam, the seventieth.

اَتِيْأَم atiāyam, the eightieth.

نَوِيْأَم naveyam, the ninetieth.

سِلَم silam, the hundredth.

سِل وَرْمَبَاي sil wrumbai, the hundred and first.

سِل دَوَايَم sil dvayam, the hundred and second.

etc. etc.

دَوَا سَوَم dvah savam, the two hundredth.

دَوَا سَا دَرِيْأَم dvah sava dreyam, the two hundred and third.

etc. etc.

In compound numbers only the last numeral is formed into an ordinal.

زَرَمَ *zaram*, هَزَارَمَ *hazāram*, the thousandth.

دَوَہ زَرَمَ *dvah zaram*, the two thousandth.

لَکَمَ *lakam*, the hundred thousandth.

For expressing the years of the era the cardinals are employed and not the ordinals; see Syntax, §. 188, 3.

§. 96.

3) Distributive numbers.

Distribution is formed in Paṣṭō by repeating the cardinal number, as: یَو یَو *yau yau*, one by one; پِنْدَہ پِنْدَہ *pinḍah pinḍah*, five by five.

But if the distribution is only to be expressed generally, the prefix پَہ *pah* is put before the cardinal number, as: پَہ پِنْدَہ *pah pinḍō*, by five; پَہ سِلَو *pah silō*, by hundreds; پَہ زَرُونَو *pah zarūno* or پَہ زَرُونَو *pah zarḡnō*, by thousands.

If the distribution is to be fixed exactly (so many and not more), the cardinal number is repeated with the prefix پَہ, as: دَوَہ پَہ دَوَہ *dvah dvah* exactly two (and not more); لَہ پَہ لَہ *lah lah* precisely ten.

§. 97.

4) Multiplicative numbers.

Multiplication is expressed in various ways. A cardinal number is added to the substantive بَرغ *bray*, layer, fold, which however remains in the Singular, as دَرِی بَرغ *dre bray*, threefold, treble; this expression is made use of when referring to strata, layers, folds etc.

by prefixes and postfixes, remain in the Nominative, as: **تِرْ اَوْرُوْ كَلَهْ دُوْر** up to seven times.

§. 98.

5) Fractional numbers.

A quarter ( $\frac{1}{4}$ ) **پَامُوْ** pāṃ \*).

A half ( $\frac{1}{2}$ ) **نِيْم** nīm (adj.).

Three quarters ( $\frac{3}{4}$ ) **دِرِي پَارْ** dre pāva.

Five quarters ( $\frac{5}{4}$ ) **پِنْدَاهْ پَاوْ** pindāh pāva, or **پَامُوْ بَانْدِ يَوْ** pāṃ bānde yau (or **پَامُوْ كَهَاسْ يَوْ**, which is the same), literally: upon a quarter one (in addition).

One and a half ( $1\frac{1}{2}$ ) **يَوْ نِيْم** yau nīm.

One and three quarters ( $1\frac{3}{4}$ ) **پَامُوْ كَمْ دَوْ** pāṃ kam dvah, literally: a quarter less than two.

Two and a quarter ( $2\frac{1}{4}$ ) **پَامُوْ بَانْدِ دَوْ** pāṃ bānde dvah, literally: upon a quarter two (in addition).

Three and three quarters ( $3\frac{3}{4}$ ) **پَامُوْ كَمْ خَلُوْر** pāṃ kam ḫalōr, literally: a quarter less than four.

Without special reference to measure and weight, fraction or portion is expressed by **حِصَّهْ**, as: **دِرِيْمَهْ حِصَّهْ** the third part, **لَسَمَهْ حِصَّهْ** the tenth part.

---

\*) **پَامُوْ** is only used with reference to measure and weight, also of a  $\frac{1}{4}$  Rupee.

## V. Section.

### Pronouns.

§. 99.

#### I. Personal Pronouns.

The personal pronouns of the Paštō are either absolute personal pronouns or pronominal suffixes. The latter class of pronouns the Paštō uses very extensively and coincides in this respect quite with the Persian and even more so with the Sindhī, the only Ārian languages, which, besides the Paštō, know the use of pronominal suffixes.

##### 1) Absolute personal pronouns.

Absolute personal pronouns the Paštō only possesses for the first and second person; for the third person a proximate or remote Demonstrative is employed as required by circumstances \*).

##### a) First personal pronoun.

Sing.

Nom. ز; zah, I.

Accus. ما mā, me.

Format. } ما me.  
Instrum. }

Genit. ما د da mā; ما دما dāmā\*\*); ما د da dāmā, of me;  
my; mine.

---

\*) The only remnant of a personal pronoun of the third person is و var, to him, to them; see below, §. 101.

\*\*) When ما is connected with a noun, which is constructed with a postfix or prefix (or both together), these must follow ما, as:

Dat.	وَمَا تَهْ mā tah; وَا مَا تَهْ va mā tah; وَا مَا تَهْ va mā vatah; مَا لَهْ mā lah; مَا لَرَهْ mā larah; (أَ, rā) رَا تَهْ rā tah, لَهْ لَهْ lah lah, to me.
Ablat.	مَا نَهْ lah mā nah; مَا نَهْ lah mā, from me.
Locat.	مَا هَهْ pah mā; مَا كَهْ pah mā kē, in me.

Plur.

Nom.	مُؤْ mūḡ, مُؤْهْ mūḡah (western); مُونْكَ mūng, مُونْكَهْ mūngah (eastern), we.
Accus.	مُؤْ mūḡ, مُؤْهْ mūḡah; مُونْكَ mūng, مُونْكَهْ mūngah, us.
Format.	{ مُؤْ mūḡ, مُؤْهْ mūḡah; مُونْكَ mūng, مُونْكَهْ mūngah, Instrum. } mūngah, by us *).
Genit.	
	مُؤْ دَ da mūḡ, مُؤْهْ دَ da mūḡah; حُمُؤْ ḡmūḡ, حُمُؤْهْ mūḡah; مُونْكَ دَ da mūng, مُونْكَهْ دَ da mūngah; حُمُونْكَهْ ḡmūngah, of us, our, ours.
Dat.	مُونْكَ تَهْ mūḡ tah **); مُؤْهْ تَهْ mūḡah tah; مُونْكَ تَهْ

حُمَا وَهَلَار تَهْ to my father (not: حُمَا هَلَار تَهْ), or حُمَا follows the noun with the prefixes or postfixes, as: وَهَلَار تَهْ حُمَا. Like حُمَا the Plur. حُمُؤْ our, and سَتَا thy, and the Plur. سَتَاسُوْ, سَتَاسِيْ your, is constructed.

\*) In Raverty's Gulshan-i Rōh I have also met the Formative مُؤْ mūḡō (I, p. 112): هَهْ مُؤْوَ دَوَارُ مِيْنَهْ مِيْ: if thou lovest us both; I have hitherto not found any other instance of it. Raverty himself mentions nothing of it in his Grammar nor Dr. Bellew.

\*\*) Instead of تَهْ the other prefixes and postfixes may be equally used as in the Sing.

mūng tah, مُونْكَ تَه mūngah tah etc.; رَاهْ rātah,  
لَا lā, lah, to us.

Abl. لَاهْ مُوْ lah mūž, لَاهْ مُوْز lah mūžah nah; تَه  
لَاهْ مُونْكَ lah mūng nah; لَاهْ مُونْكَ la mūngah,  
from us.

Locat. پَاهْ مُوْ pah mūž, پَاهْ مُوْز pah mūžah etc., in us.

ز; zah approaches the Zendic azem (Persian اَزَم and dialect-  
ically az, as also in the Ossetic); مَا corresponds to the Sansk.  
Acc. मा. मा is the same as مَا, م being only a euphonic  
addition, as س in سَتَا. The Plural مُونْكَ, مُوْ is difficult to  
explain, as it leaves the traces of the Zend (vaēm) again; it may  
be compared with the Lithuanian mes, Genitive and Ablative musū,  
which corresponds to the Sansk. अस्मे, the letters sm being  
transposed to mas, which is already partly the case in Prākrit  
अम्हे (compare also the Greck ἡμεῖς, Aeolian ἄμμες).

Curious is the form رَاهْ, used in the Dative Sing. (far more  
rarely in the Dative Plur.); similar is the Dative form of the  
second person دَر dar and of the third person وَر (both used in the  
Sing. and Plur.). There can be hardly a doubt, that دَر dar and  
وَر var correspond to the Persian دَر and وَر respectively, the  
Persian Dative postfix رَ (= Paštō لَه), having been retained in  
these cases for euphony's sake, instead of دَ لَह da-lah\*), وَ لَह va-lah  
and final ah dropped at the same time. This etymology of دَر  
and وَر will throw the necessary light on رَ also; رَ rā would thus  
be identical with the Persian مَرَا ma-rā, to me, initial m having

\*) Balōčī also tha-rā, to thee.

been dropped. For this supposition pleads the circumstance, that *lā* (as well as *lā* and *lā*) is originally used without any postfix and so still, whenever preposed to a verb (as *lā* give to me), the addition of postfixes to *lā* (*lā* and *lā*) having come into use in later times, when the language was no longer conscious of the original Dative-signification of *lā* (*lā* and *lā*) and commenced to look on these forms as Formatives, which might be followed by postfixes; for with prefixes they are never constructed. It is to be noticed, that *lā* *lā* *rā-lah* or *lā* *lā* *rā-larah* is changed, for euphony's sake, to *lā* *lā* *lā-lah* and *lā* *lā* *lā-larah*. A similar euphonic change takes place with *lā* and *lā*, when followed by *lā* and *lā*, as will presently be seen.

§. 100.

b) The second personal pronoun.

Sing.

Nom.	<i>tā</i> <i>tā</i> , thou.
Accus.	<i>tā</i> <i>tā</i> , thee.
Format.	{ <i>tā</i> <i>tā</i> , by thee.
Instrum.	
Genit.	<i>tā</i> <i>tā</i> <i>da tā</i> ; <i>tā</i> <i>tā</i> <i>stā</i> (also <i>tā</i> <i>tā</i> <i>stā</i> ); <i>tā</i> <i>tā</i> <i>da stā</i> , of thee, thy; thine.
Dat.	<i>tā</i> <i>tā</i> <i>tā</i> <i>tā</i> ; <i>tā</i> <i>tā</i> <i>tā</i> <i>lah</i> ; <i>tā</i> <i>tā</i> <i>tā</i> <i>lah</i> etc. <i>tā</i> <i>tā</i> <i>dar</i> , <i>tā</i> <i>tā</i> <i>dar</i> <i>tā</i> ; <i>tā</i> <i>tā</i> <i>da</i> <i>lah</i> ; <i>tā</i> <i>tā</i> <i>da</i> <i>lah</i> , to thee.

Ablat.	تَا لَه lah tã; تَا نَه lah tã nah, from thee.
Locat.	تَا پَه pah tã, in thee.
Vocat.	تَا اَي ai tã, تَا وَ vö tã, o thou!

Plural.

Nom.	{ تَاسِي tãse (تَاسِ); تَاسُو tãsū (تَاسُ), you.
Accus.	
Format.	{ تَاسِي tãse; تَاسُو tãsū, by you.
Instrum.	
Genit.	دَا تَاسِي da tãse, دَا تَاسُو da tãsū, دَا سَتَاسُو da stãsū; سَتَاسِي stãse (سَتَاسِ); سَتَاسُو stãsū (سَتَاسُ), of you, your; yours.
Dat.	دَر تَاسِي tãse tah; تَاسُو لَه tãsū lah etc.; دَر تَه dar tah; دَا لَه da lah, دَا لَرَه da larah, to you.
Ablat.	تَا لَه lah tãse; تَاسُو نَه lah tãsū nah, from you.
Locat.	تَا پَه pah tãse etc. in you.
Vocat.	تَا اَي ai tãse, تَاسُو وَ vö tãsū, o ye!

The Paṣtō تَه approaches more closely the Prākṛit form त than the Zendic tūm (Sansk. तम्). The Format. Sing. تَا points to the Sansk. Accus. ता, Zend thvā (Greek τέ, Latin te). In the Genit. Sing. سَتَا (سَتَا) s (ة) is only a euphonic addition, like حَمَا in حَم.

The Plar. forms تَاسِي, تَاسُو have no analogies in the cognate idioms. They are apparently derived from the base تَه (تَا) with

the affixed (original) pronoun **स्म**, which is similarly employed in Prākṛit, as Prāk. **तुम्हे** you = **तुस्से**. In this case **sm** has been assimilated in Pāṣṭō to **s** (**ss**), and not transposed as in **मो**.

§. 101.

c) The remnant of the third personal pronoun.

We have noticed already, that of the third personal pronoun only the form **وَ** *var* has been preserved, which is equally used for the Sing. and the Plural, see §. 99. When preposed to a verb, **وَ** (without a postfix) always expresses the Dative, to him to her, to them, as **وَ** **वर्क़ल** *varkṛal* to give to him (her), them; in other positions it takes a postfix, being considered as a Formative Sing. or Plural, as: **وَ** **तह** *var tah*, to him, to them; **وَ** **خّاحد** *var ḫaxḥ*, with him, them etc. Instead of **وَ** **lah** *var lah*, **وَ** **لاره** *var larah*, it is, for euphony's sake, pronounced and written **وَ** **lah** *va lah*, **وَ** **لاره** *va larah*.

§. 102.

2) Pronominal suffixes.

The pronominal suffixes may represent every case, the Nominative and Vocative excepted; they may be optionally linked to any noun in the sentence (though strictly referring to another), but those, which represent a possessive pronoun, generally precede or follow the noun, to which they belong.

It is to be noticed as a peculiarity of the Pāṣṭō system of writing, that these pronominal suffixes are not added to nouns and verbs, as is the case in Persian and Sindhlī, but written separately, a few prefixes and postfixes excepted, with which **ئى** coalesces.

Sing.

I. Pers. **مى** me or **مى** me, me, by me, my etc.

II. Pers. **د** de or **دی** de, thee, by thee, thy etc.

III. Pers. **ہی** ے, him, her, by him, his, her etc.

#### Plur.

I. Pers. **مو** mū, **مہ** mub; **اُم** um, **وُم** vum, us, by us, our etc.

II. Pers. **مو** mū, **مہ** mub; **اُم** um, **وُم** vum, you, by you, your.

III. Pers. **ہی** ے, them, by them, their etc.

The first pronominal suffix **م** me is identical with the Sindhī

**मि** me, Persian **ام** am, Sansk.-Prākrit Genit. **मे**.

The second pronominal suffix **د** de corresponds to the Persian

**ت** at, Sindhī **e** (= **te**, **t** being elided), Sansk.-Prāk. Genit. **ते**.

The pronominal suffix of the third person Sing. and Plur. **ه** is peculiar to the Pāṣtō and not to be found in this form neither in Persian nor in Sindhī. Its etymology seems to be the following.

In Prākrit we have still the curtailed form of the Genit. Sing. **से** his (Zend **hē**), (which is to be referred to the base **स्व** and not to be identified with the Genitive **अस्य**; Latin **sui**, **se**) and of the Genit. Plur. **सिम्** (= Prāk. **ताण**, Sansk. **तेषाम्**), their. In Pāṣtō both Genitives, **से** and **सिम्** have been contracted into one form and the distinction of the Sing. and Plur. lost thereby. The Persian pronominal suffix **اش** **aš** and the Sindhī **सि** **se** point both to the same Prākrit **से**; in Pāṣtō (as in Zend) **s** has been changed to **h** (**hē**) and then dropped altogether = **ह**. The Persian Plur. suffix **اشان** points again to the Sansk. **एषां** and the Sindhī **-ne** to the Prākrit **एहि**; see my Sindhī Gram. §. 39.

The pronominal suffix of the I. pers. Plur. **مو** **mū**, **مہ** or **وُم** **vum** corresponds to the Persian **ما**, which points back to the Prāk. Genit. Plur. **अम्ह** (cf. the Greek **ἀμύνων**).

The pronominal suffix of the II. pers. Plur. now coincides outwardly with that of the I. pers. Plural, so that only the context can decide, which of both is intended. It is greatly mutilated, the initial syllable *yuš-* having been dropped altogether (Persian شَمَا, Zend *yūšmākem*, Sansk. युष्माकम्); the Greek, though also greatly curtailed, is still more original *ὑμῶν* (cf. Bopp, Compar. Gram. §. 332).

It has been already alluded to, that the pronominal suffix of the III. pers. Sing. and Plur. coalesces with a few prefixes and postfixes. These prefixes are *هَر*, on, upon and *تَر* tar, from, out etc., which are respectively written *هَر* pre (هَرِ) and *تَر* tre (تَرِ), when *ئی* is added to them. The postfixes are: *پَسِ* pase (پَسِ) after, *دِ* dine (دِ) from and *کِ* kē, in. As these end already in *e*, the pronominal suffix *ئی* coalesces with them totally, so that its addition can only be gathered from the context.

Another curious coalition takes place between the Ablative postfix *نَه* nah (now and then also written *نَا* nā) and *تِ* ti, the remnant of an old demonstrative pronoun (تِ); the only form in use now is *تِنَه* tinah or *تِنَا* tinā (also written *تِنَه* tī-nah), from him, her, them.

دَ دِلِیَا لَه آفَتُون مِی دِوَرَه نَه شِی

چِه تَه مِی دِه سَر تِی دِه هَر لَوَرِی دَ بَلَا خَانِطَ

I am not afraid of the calamities the world, since thou art on my head, o protector from misfortune on every side! (Gulsh. II, 113, 2) Xavājah Muḥammad.

فَلَا تَنْی دِئِمَن دِ حَقِّ تَعَالٰی لَه جَهَانِ وَاخِستِ وِ مِی هِیَمِخِ دِ آرِهَمَدِی

بِی چِه مَا دِه هَرِیْدِی

A certain enemy of thine the great God has taken away from the world. He said (by him it was said): hast thou heard, that he will give up me? (Gulsh. I, p. 186) Gulistān.

دَا دُنْيَا خَارِشْتِي بَرَو دَه دِه سَاتِل مِي كِه مَرَو دَه

This world is a mangy goat; what pleasure is there in keeping her? (Gulsh. II, 36, 3) Xūsh'āl.

كِه عَمَل وَه دِه دُنْيَا كِبِي تَابِي كَرِي چِه دَاهَسِي مَرَبِي دُم شَو  
حَاصِلِي دُوبِي بَه وَآئِي صَمَلُون خَمُور دَا دُو چِه اِذَان بَه دُم تَر غُور تَبِير  
شَه نَوَر بَه هَاخِيدُو وَ آوَتَس تَه

What work on earth had you done, that such degrees were allotted to you? They will say: our works were these, that when the call to prayer passed our ear, then we used to rise for ab-  
lution. Favā'id-uš-šarīṣāh.

كِه غَائِب تَر يَو سَاعَت شَم مُسْتَوْجِب نَ عَقُوبَت شَم

If I am absent from him one hour, I deserve punishment.  
(Dorn, Chrest. p. 202).

دِه كِبِي بَدِير دُر نَابَاب دُو چِه رُوشَنِي لَكِه مَهْتَاب دُو

On them were many rare pearls, which were glittering like moonshine. (Dorn, Chrest. p. 206).

§. 103.

II. Demonstrative pronouns.

1) هَه hayah, that, remote demonstrative pronoun.

Sing.

Nom. هَه hayah, com., that.

Accus. هَه hayah, that.

Format. هَه masc.

Instrum. هَه hiyē or هَه hiyih, fem. } by that.

Genit. هَه da hayah, masc.

هَه da hiyē, هَه da hiyih, fem. } of that.

Dat.	هَـاهُ تَهْ hayah tah, masc.	} to that.
	هَـاهُ حَيَّيْ tah, fem.	
Ablat.	هَـاهُ لَهْ lah hayah, masc.	} from that.
	هَـاهُ لَهْ lah hayē, fem.	
Loc.	هَـاهُ پَهْ pah hayah, com.	} in that.
	or هَـاهُ پَهْ pah hayē*), fem.	

Nom.

Nom. هَـاهُ hayah, com. (هَـاهُ hayōe, hayōI, Peshāwar), those.

Accus. هَـاهُ hayah, com., those.

Format. }  
Instrum. } هَـاهُ hayō\*\*), هَـاهُ hayōe, by those.

Genit. هَـاهُ دَ da hayō, of those.

Dat. هَـاهُ تَهْ hayō tah, to those.

Ablat. هَـاهُ لَهْ lah hayō, from those.

Locat. هَـاهُ پَهْ pah hayō, in those.

هَـاهُ is often shortened, especially in poetry, to هَـهْ, Format. Pl. هَـهْ. In the modern language the Singular of this pronoun is often connected with a noun in the Plural, which is not the case in the older language, e. g. هَـهْ رَهْ in those days, instead of هَـهْ رَهْ. In the Plural هَـاهُ may remain uninflected before a noun in the Formative, as : هَـاهُ دَ of those people; هَـاهُ دَ to all those.

\*) This form is only used, when the noun following is put in the Formative.

\*\*) In Qandahār pronounced هَـهْ hayō.

The etymology of this pronoun is rather doubtful; it seems to be compounded of ha-ya. In this case ha would correspond to the Indian hō (= Sansk. सो) and ya to the adjective affix व

§. 104.

2) هَـٰذَا, this, proximate demonstrative pronoun.

Sing.

Nom. هَـٰذَا dayah, com. this.

Accus. هَـٰذَا dayah, com. this.

Format.	} هَـٰذَا dayah, masc.	} by this.
Instrum.		

Genit.	هَـٰذَا دا da dayah, masc.	} by this.
	دِيَّهَ دا da diyē, fem.	

Dat.	هَـٰذَا تَـٰه dayah tah, masc.	} to this.
	دِيَّهَ تَـٰه diyē tah, fem.	

Ablat.	هَـٰذَا لَـٰه lah dayah, masc.	} from this.
	دِيَّهَ لَـٰه lah diyē, fem.	

Locat.	هَـٰذَا فِـٰه com.	} in this.
	or دِيَّهَ فِـٰه pah diyē*), fem.	

Plur.

Nom. هَـٰذَا dayah, com., these.

Accus. هَـٰذَا dayah, com., these.

---

\*) This form is only used when the noun following is put in the formative.

Format.	} دَغَو dayō*), by these.
Instrum.	
Genit.	دَغَو د da dayō, of these.
Dat.	دَغَو تَه dayō tah, to these.
Ablat.	دَغَو لَه lah dayō, from these.
Locat.	دَغَو پَه pah dayō, in these.

دَغَو seems to be compounded of the pronominal base da (= त) and the adjective affix क. In signification it does not differ from دَ this, both pronouns being frequently interchanged.

§. 105.

3) دَ this\*\*), proximate demonstrative pronoun.

Sing.

Nom.	دَ dā, this (com.).
Accus.	دَ dā, this.
Format.	} دَ dah; — دَ dā —, by this.
Instrum.	
Genit.	دَ د da dah; — دَ dā —, of this.
Dat.	دَ dah tah; — دَ dā — tah, to this.
Ablat.	دَ lah dah; — دَ lah dā —, from this.
Voc.	دَ, دَ pah dah, dā; — دَ pah dā —, in this.

---

\*) In Qandahār pronounced دَغَو duyō.

\*\*) With دَ, as well as with دِ, the adverb قَسِی (so, thus) may be joined, as: دَ dā hasē, such a one; or قَسِی may in such compounds also be shortened to سی, as: دَ dā sē.

Plur.

Nom. دَا dā, these (com.)

Accus. دَا dā, these.

Format. }  
Instrum. } دېو dēō or دېوړ dēvō; — دَا dā, by these.

Genit. دېو دَا da dēō; — دَا دَا da dā —, of these.

Dat. دېو ته dēō tah; ته — دَا dā — tah, to these.

Ablat. دېو له lah dēō; — دَا له lah dā —, from these.

Locat. دېو په pah dēō; — دَا په pah dā — in these.

دَا dā generally points to something immediately preceding, more rarely to something following (Latin hic).

When دَا dā is used independently (without a following noun) it is written ده dah in the Formative, but when followed by a noun it remains generally quite unaltered in the Singular and Plural, though in the Plural it may also take the inflected form (دېوو, دېو) when connected with a noun in the Formative.

Gulsh. I, p. 174) د بَاغ وڼې به له بېيخ وکايې د که مړېونه

The trees of the garden his slaves will pull out.

نوم ئې د جود و عدل شته دى لا تر اوس

تير له دا دنيا حاتم طائي نوشيروان شو

The name of their liberality and justice remains till now, (though) H'āṭim Tāi and Nūšīrvān have passed away from this world. (Gulsh. II, p. 117, 3) Xavājah Muḥammad.

چه هونښره به مخونه به دا خاورو کښې ده کور دى

چه دېو لره دروغم کور و ما ته ارم دى

As so many fair faces are in this dust, in the grave, when I go to them, the grave is a Paradise to me. (Gulsh. II, p. 68, 4). Xušb'āl.

يَوِّدَمْ دَ خَوَّارِ خُوشَعَالَ سَرَه تَه هَم فَرَاغَت كَبِيهِنَه

چه زَرَه بِي لَه دِيَو دِهَرَو اَنَدَمِيَنَو خَعَو فَرَاغ شِي

Sit thou a moment together with poor Xush'al in quietness, that his heart may be a little liberated from these many anxieties. (Gulsh. II, p. 69, 2) Xush'al.

§. 106.

4) دِي dē, this, proximate demonstrative pronoun.

Sing.

Nom. دِي dē (دِ), this; he, she.

Accus. دِي dē, this.

Format. } دِي dē, by this.  
Instrum. }

Genit. دِي dē, of this.

Dat. دِي dē tah, to this.

Ablat. دِي lah dē, from this.

Locat. دِي pah dē, in this.

Plur.

Nom. دِي dē; — دِي dē, these, they.

Accus. دِي dē; — دِي de, these, them.

Format. } دِي dē, by these.  
Instrum. }

Genit. دِي dē, of these.

Dat. دِي dē — tah, these.

Ablat. لَه دُوږی lah dūī, لَه دُوږو lah dūiō; — لَه دِی lah dē—,  
from these.

Locat. پَه دُوږی pah dūī, پَه دُوږو pah dūiō; — پَه دِی pah de—,  
in these.

دِی dē corresponds in signification to the Latin *is*, pointing to an object not far distant, without special reference to something preceding or following.

When دِی is connected with a noun in the Plural, it may remain unaltered through all cases.

#### §. 107.

5) هَایَه hāyah, this one here; proximate demonstrative pronoun.

هَایَه hāyah is only used, when a person or thing is pointed at; it is only found in the Nomin. Sing. and Plural\*).

#### §. 108.

### III. The Relative pronoun.

The Paṣṭū has only one relative pronoun چَه čeh, corresponding to the Persian کِه, which is also now and then used. It is not subject to any inflexion and only points out the relation, which must be taken up and nearer defined by a subsequent pronominal suffix, just like the Hebrew וְהַיֵּהוּדִי.

---

\*) Raverty alledges a Formative هَایِ haē and Bellew هَایِ hāē, but I have never been able to detect a trace of it.

Etymologically چه corresponds to the Sansk. relative य, Prākṛit जो (Sindhī and Hindī likewise जो); in Paṣto the media j has passed into the tenuis č (similarly in Persian, k = č).

دوچ کوئی نه چه می اهد د دنیا گا هر کلام و هر گفتار د دنیا

Every word and every talk of this world is nonsensical chat, which the people of the world make (it). (Gulsh. II, p. 9, 2) Rah'mān.

دو سړی د څوکه را وښی نه کوته چه عمل می ده رسوم دی د اخلاص

May somebody show me a single man with the finger, whose action is after the rules of sincerity. (Gulsh. II, p. 89) H'amīd.

چه می ستا د آستانې خاوری بوسه کړی هغه کس ده دواړو کون مخترم دو

He who has kissed the dust of thy threshold, is honoured in both worlds. (Gulsh. II, p. 118, 2) Xavājah Muḥammad.

§. 109.

#### IV. The reflexive خپل xpal\*), own.

The reflexive adjective خپل always refers to the subject of the sentence and may therefore be translated by: my, thy or his, her, their, as the case may be; see §. 189, 5. 2. Its flexion is quite regular.

Sing.

Masc.	Fem.
Nom. خپل xpal, own.	خپله xpal-āh.
Format. خپل xpal.	خپلی xpalē,

Plur.

Nom. خپل xpal.	خپلی xpalē.
Format. خپلو xpālō.	خپلو xpālō.

\*) In Peshāwar also pronounced xpul.

پہ خپلہ pah xpalah (also often written پخپلہ) is used adverbially, sua sponte, by one self, of one's own accord.

The Paṣtō is not possessed of a proper reflexive pronoun, but must circumscribe it by the use of دَان dān, soul (like the Hebrew דָּבָר) or خپسَر xpasar (contracted from خپل سر one's own head), which is also used adverbially, in the sense of پہ خپلہ. When the accent is laid upon the reflexive, خپل is added to دَان, as: دَان خپل دَان for his own sake. See Syntax, §. 189, 5, 1.

§. 110.

V. Interrogative pronouns.

1) دُک dök, who?

Sing. and Plur. (com.).

Nom. دُک dök, who?

Format. چَا cā.

This interrogative is only used substantively and not adjectively and has reference to persons or living beings only. It has sprung from the Sansk. base क (को), Hindī कौन् (= Sansk. Acc. कम्). Final k of the Nominative, which in the Formative is again dropped, is rather curious. (The Indefinite see §. 113, 1).

2) تَه tah, what? which?

تَه only refers to inanimate objects; it may be used independently or in connexion with a substantive; Hindī किन्ना, Sindhī छा, Sansk. किम्).

Sing. and Plur.

Nom. تَه tah, what? which?

Format. **خَه** *ṭah*.

**خَه عَذْر وَرْتَه كَوْمِ اَوْ خَيْلِ خَبْتَنِ تَه خَه رَوَانِم**

What excuse shall I make to him and what shall I say to my husband? (Gulsh. I, p. 119) *Kalīlah ō Damanah*.

Adverbial expressions are: **خَه لَرَه** (also written **خَلَرَه**) why? (what for?) or **خَه لَه** *ṭah lah*, why? **خَه رَنَكَه** *ṭah rangah*, in what manner, how? contracted also to **خَنَكَه** *ṭangah*. **خَه** also by itself (without a postfix) signifies now and then why?

**خَه** assumes also the signification what a, in the sense of an exclamation; in this case it may be connected with a substantive or adjective.

**بِه زَرَه كَهِي فِكْر وَكَيَه خَه بَادَشَاه وَه سَلِيمَان**

Reflect in thy heart, what a king Suleimān was.  
(Gulsh. II, p. 53, 3) *Xuṣh'āl*.

**كَه د زَرَه خَخَو تَرَسْدَار دِي خَه بَه بَه وَر**

If thy heart were a little compassionate, how beautiful it would be!  
(Gulsh. II, p. 54, 3) *Xuṣh'āl*.

3) **كُوم** *kūm* (*kōm*) and **كَم** *kam*, who, which?

**كُوم** and **كَم** (Pers. **كُدام**) are interrogative adjectives and generally connected with a substantive. Their flexion is quite regular.

To be noticed are the expressions: **كَه كُومَه** (i. e. **لَوَر**, side, direction) from whence? **تَر كُومَه**, whereto? whither? how far?

**كُوم** has also now and then the sense of **خَه**, how?, as:

**سَتَا بَه دَا سَوَالِ خَه كَمَالِ نَوِي دَا وَبَل وَ تَا تَه كُومِ مُنَاسِبِ دِي**

What excellence is in this thy question, how does it behove thee to speak such things? (Gulsh. I, p. 92) *Kalīlah ō Damanah*.

4) **كُوم يَو** or **كَم يَو** *kūm yau* or *kam yau*, who, what? which?

These interrogatives, which are compounded of **كُوم** and **كَم** and **يَو**, are as well used absolutely as in connexion with a sub-

stantive. They refer to persons and things, but are only used in the Singular. Both parts are inflected as follows (کوم and کم agreeing with دَو):

	Sing.	
	Masc.	Fem.
Nom.	کوم یَو kum yau, { کم یَو kam yau. }	کومَه یَو kumāh yauāh. { کمَه یَو kamāh yauāh. }
Format.	کومَه یَو kumāh yauāh { کمَه یَو kamāh yauāh }	کومی دَوی kumē yauē { کمی دَوی kamē yauē }

تَه چَه قَسی کُل عِدَار تَی کُل دَ کُوم یَو کُلَوَار تَی

Thou, who art so rosy-cheeked, of what rose-garden art thou a rose? (Dorn, Chrest. p. 189) Yusuf and Zulaiẓā.

لَه هَغُو دَوو تَه کَمَه یَو اَرَاهَه دَ دِلَار وَ بَرَه

Who of those two did the will of the father? Matth. 21, 31.

§. 111.

5) خَو {ō, how much? how many?

خَو {ō does not undergo any change for gender, number or case. It is derived from the Sansk. कियत् (Latin quot), Hindī किता or कितना.

خَو is also used in exclamations with the sense of: how much! how many!

خَو قَوْت دَ دَ مَذَاب دَوی رَاهَه وَ اَبَه کُنَاغُونَه هَم کَوَه دَه هَغَه قَبَاس

How much power hast thou to bear torments? tell me! commit also sins according to that estimate! (Gulsh. II, p. 111, 2) Xavajah Muh'ammad.

مَا دَه خَو خَوَارَتِی سَاتَلِی خَو خَو شَبِی مِی رُونَمَدَلِی

With how many troubles wast thou reared up by me! how many, many nights were illuminated (i. e. made days) by me! (Dorn, Chrest. p. 183) Yūsuf and Zulaiyā.

To be noticed is the expression: هَـ خَوَ pah ḫō (= هَـ خَوَ شَانَ in how many ways) how?

هَـ يَأْتِيكَ هَـ خَوَ بِهَ خَوَ كَانِدِ بِي غَمَ

چِه خَبَرِ رَوِ دَ قَلَمِ لَه تَزَلَزَلِ

How shall those sleep on the bed without care,  
Who are aware of the tremulation of the firmament (= destiny)?  
(Gulsh. II, 49, 2) Xušh'āl.

هَـ is also used adverbially in the sense of: how long?  
(the same as هَـ تَر or هَـ پُور).

6) هَـ خَوَنِي ḫōne, how much, how many?

هَـ خَوَنِي does not undergo any change for gender, number or case, like هَـ.

7) هَـ خَوَنَبَرِ ḫōmbarah, how much? how many?

هَـ خَوَنَبَرِ is also contracted to هَـ خَوَمَرِ ḫōmrab; it is indeclinable like هَـ and هَـ خَوَنِي.

## §. 112.

### VI. Correlative pronouns.

Properly speaking there is only one correlative pronoun in Paštō, هَـ خَوَنَبَرِ ḫōmbarah, so much, answering to the interrogatives هَـ خَوَنَبَرِ and هَـ خَوَنَبَرِ, how much?\*) Besides هَـ خَوَنَبَرِ we find also

\*) When corresponding to the correlative هَـ خَوَنَبَرِ, هَـ etc. usually drops its interrogative sense and assumes a relative signification: as much (quantum).

the form دَهَوْنَبَرَه dahōmbarah, and (contracted from هَوْنَبَرَه hōmrah,

A nearer correlative is دَغَوْنَبَرَه dayōmbarah, this much, and a more remote one: هَهْ هَوْنَبَرَه hayah hōmbarah, that much.

It is understood, that هَوْنَبَرَه etc. may also be used without standing in correlationship with هُوْ etc.

With reference to the position of these correlatives in a sentence, it is to be observed, that هَوْنَبَرَه usually precedes and is followed by هُوْ etc., but the inverted position is also admissible.

هَوْنَبَرَه تَرَسَ حَمَّا لَهْ خِرَسَ وَ خُوْكَ نَهْ شَى  
هُوْ يَهْ زَرَهْ نَمَ لَهْ جَاوَلِ هِرَاسَانَ

I am not so much afraid of the bear and hog, as I am afraid in my heart of the ignorant. (Gulsh. II, p. 53, 2). Xush'āl.

Instead of هَوْنَبَرَه — هُوْ as much — so much, هَوْنَبَرَه — هُوْ is also used; هَوْنَبَرَه may even be omitted in the coordinate sentence, so that only هُوْ indicates the correlationship.

اَوْرَ نَبَبَهْ نَزْدَى نَبَهْ نَهْ دَىْ خُوْ جِهْ لِرَىْ هَنْبَرَهْ نَبَهْ دَىْ

Fire and cotton near (each other) is not good; the more distant (from each other), the better it is. (Gulsh. II, 174) Yusuf and Zulaiḫā.

هُوْ جِهْ دَبَرِ دَبَرِ لَدُنُونَهْ دَبَرِ عَمُونَهْ  
نَبَهْ قَهْ جِهْ بَسَ بَىْ كِبِدَىْ تَهْ كُنْدَكِ دَىْ

As many, many enjoyments there are, so many cares there are; He is well off, on whose belly a little log of wood is enough. (Gulsh. II, p. 68, 2.) Xush'āl.

When reference is made more especially to the manner and way, in which a thing is done, هَسَى thus, may be used instead of هَوْنَبَرَه, as:

سَتَا هِه دِهْدِ مِی سَوِی زِرِه قَسِی تَا زِه شَه  
خَوَرِجَان کَالِدِ وَقَلِی دَ کَرَمَا سَرْدَ

By thy sight my burnt heart has become fresh in such a manner,  
as the Basil cools the oppressed of heat.

(Gulsh. II, p. 156, 1). Ašraf ḫān.

خَوَرِجَان (or خَوَنَبَرَه) is also used adverbially, as  
long — as. Other correlative adverbial expressions are: لَکَه — قَسِی  
as — so, or چِه — قَسِی as — so\*).

§. 113.

## VII. Indefinite pronouns.

The Paštō is possessed of a great number of indefinite pronouns, as many of the Interrogatives are used at the same time as indefinite.

1) خَوک ʃōk, some one; any one.

As an indefinite pronoun خَوک is mostly referred to persons, but also to things; it may be used absolutely or connected with a noun as adjective. Its flexion is the same as that of the Interrogative.

خَوک چِه ʃōk čeh signifies: any one who = he who (they — who); if a person or thing is to be made more prominent, قَهه may be added, as: قَهه خَوک چِه that one, who. Instead of خَوک چِه the position is often inverted to چِه خَوک, he — who; خَوک is always put in that case, in which the Relative ought properly to stand.

---

\* دِی قَسِی dē basē or دَا قَسِی dā basē, such a one (Lat. talis) has no corresponding interrogative (qualis) in Paštō.

هه آنداز حما د سوز کله دوهیوی  
چا چه نه دی آزمیللی د هجران اور

When will he understand the measure of my burning,  
Who has not tried the fire of separation.

(Gulsh. II, 156, 2) Ašraf ḡān.

شوک once or more repeated signifies: one — another  
(Lat. alius — alius).

هر سنگ و کلوخ چه لیده کیوی د دهر  
واره ککریمی دی شوک د شاه شوک د کدا

Every stone and clod of this earth, that is seen,  
Are all skulls, one of a king, another of a beggar.

(Gulsh. II, p. 5. 2.) Raḥ'mān.

2) هه jah, something, anything; any one; some.

هه has usually reference to things, far more rarely to persons. It may be used absolutely or in connexion with a noun.

که هه وادم له هجران وادم هه نه د تود بی درمان وایم هه

If I say any thing, what shall I say of separation? what shall I say of this incurable pain? (Gulsh. II, p. 14) Raḥ'mān.

که هه مرد تو خو ققه تی هه دنیا کپی  
هر چه نه لری حاجت هه دا دنیا

If there is a man in the world, surely it is that, who has no need (of any thing) in this world. (Gulsh. II, p. 9, 1.) Raḥ'mān.

هه بی تر مره کوه هه توی هه غره و خنل

Some of them were killed by him, some of them ascended the mountain. (Gulsh. I, 16) Tārīḡ-e-muraššā.

In a negative sentence, in which هه is not the subject, هه must be translated by: not at all, as in such a case نه

only intensifies the negations. Similarly, when **خَه** in a negative sentence is used adjectively, it must be translated by: not any or none at all.

دَ مَسَنَانَو تَر لغَرِش خَه كَم نَه دَوَى دَ سَرِی اِسْتَقَامَت هَه دَا دُنْیَا

The standing of a man in this world is not at all less than the tumbling of drunken people. (Gulsh. II, p. 8) Rah'mān.

هَه رَوَنْدَوَن بِي خَه اِحْسَان رَا سَرَه نَه كَر

خَه هَه كَار دَوَى كَه بِي كِرِی هَه مِرِدِن مِرِدِن

In (my) lifetime he has not bestowed any kindness on me; of what use is it, if he bestow it after (my) death, death? (Gulsh. II, p. 116, 3) Xavājah Muh'ammad.

After the demonstratives **هَهَه**, **دَا** etc. **خَه** is occasionally added to generalize more the meaning, as **هَهَه خَه** that (which is not nearer defined, something like that).

خَان تَه بَهه رَا بِي بَهه نَه كَر هَهَه خَه رَا بِي دَا خَه كَر

Thou speakest well to thyself, but doest not act well; that thou sayst and this thou doest. (Gulsh. II, p. 85, 2) H'amīd.

**چه خَه** signifies: any thing that, whatever (quodcunque); its position is often inverted to **چه خَه**.

خَه چه نَه خَوَلِی نَه رَاوَزِی سَرِی بَرِی وَلِیْتِ شِی

Whatever comes out of the mouth, by that man becomes polluted. Matth. 15, 11.

چه بِي خَه مَقَرَر كِرِی دُو مَنَع بِي كِرِی

Whatever he had appointed (for their livelihood), he stopped. **بِي خَه** (without any thing) signifies idiomatically: without reason.

3) ڄو ڄو, some one; some.

ڄو ڄو — ڄو some one — another; ڄو ڄو, when immediately repeated, signifies: many, various, different.

خداي ٻه خپل قدرت ڄو ڄو ٿي ڄو ڄو ڪلڪ ڪر  
نه ڇه ڦر ٻيهر ڊيئي شي ٻا لاهور

God has made by his own power either one great or another small; Not that every town becomes Dehli or Lahore. Rah'mān.

ڏ ڏ زمڪي ٻه مخ ڄو ڄو نامداران ور ڦه ڄه شو

On the face of this earth were different famous men; what has become of them? (Gulsh. I, p. 120) Bābū Jān.

ڄو compounded with چنڊ (fem. چنڊه) forms an adjective, which signifies: manifold.

محببت نه ڄو چنڊه سڙا را ڪري  
ڇه مي چري ٿي نه ڇا منلي وعظ

By love a manifold punishment has been given to me; for when have I ever minded exhortation from any one? (Gulsh. II, p. 90, 2.) H'amīd.

ڄو with the following relative چي signifies: as much as, as many as, as long as; now and then چي is also dropped and only ڄو used in the sense given.

ڄو درجي چي ٻه قيد ره وارو ٻي خدمت ڪاوه

As many days as he was in prison, they all served him. (Gulsh. I, p. 177) Gulistān.

4) ڄي (also written ڄين) ڄينه, some.

ڄي ڄينه is always used with a Plural signification; it is generis com. Its Format. Plur. is ڄنو ڄنو (or ڄنن). ڄوڪ — ڄي signifies: some — some, some — others, like ڄني — ڄني.

The same meaning as *جِنِي* *dinī* (with the emphatic I), but with this difference, that *جِنِي* *dinī* remains unchanged in the Format. Plural, whereas *جِن* *dine* is formed into *جِنَر* *dinō*.

دَا آدَمَ هَهِ أَصْلَ رَاوِ سَرَوَ وَصَلَ جِنِي جِنِي بَادشَاهِي كَا خَوَكِ نَتَلِي

All these men are originally connected together; some, some exercise dominion, another is plundered. (Gulsh. II, p. 125) *Mīrzā Xān Anṣārī*.

رَنكَارَنَكِ بُوِي رَزْغُونَه كَا لَه جِنِي فَائِدَه سَتَرَكِه رَاخِلِي لَه جِنُو دُوزَه

(The earth) produces variegated green plants, from some the eye draws advantage, from others the nose. *Gulistān*.

#### 5) *بَعْضِي* *baẓẓī*, some (Arab).

It is only used with a Plur. signification and always referred to persons. In the Format. Plur. it either remains unaltered or is formed into *بَعْضُو*.

6) *فَلَانِي* *falānī* or *فَلَانِي* *palānai* (Arab.), a certain one. Instead of *فَلَانِي* the form *فَلَانَا* or *فَلَانَه* *falānaḥ* is also found; the feminine is *فَلَانِي* *falānāī* or *فَلَانَه* *falānāh*.

زَوِي دَ فُلَانَه دِي چِه دَ تَا لَه مُلَاذِمَانُو قَدِيمُو تَه وَ

He is the son of a certain man, who was from among thy old servants. (Gulsh. I, p. 101). *Kalīlah ō Damanah*.

#### 7) *هِيچ* *hīḡ*, any one, something, anything.

*هِيچ* may be used absolutely or connected with a noun; it has generally reference to things, but now and then also to persons. It is usually joined with a negation and signifies then: nobody, nothing, not at all. But also without a negation

هیچ denotes often nobody, nothing, as indicated by the whole tenor of the sentence.

هیچ is commonly used in the Singular only or with a noun in the Singular, but in poetry the Format. Plur. هیچو is also met with.

هیچ داروئی کمرئی نه شی کور کور کوری حکیمان

They cannot give him any medicine; down, down look the physicians. (Gulsh. II, p. 77, 2) H'amīd.

چه بانه شی کر و قر ن دنیا هیچ

هیچ سرق به کاند فخر به دا هیچ

As the pomp and pride of the world is called a nothing, will any man be proud of this nothing? (Gulsh. II, p. 81, 4) H'amīd.

نه پخو تر آشنا تی بیلتون لیده شوای

هیچ بنده ن خدای به نه وه به دا کار کند

If before the acquaintance separation would be seen, no servant of God would be mixed up with this business. (Gulsh. II, p. 15, 3) Rah'mān.

چه امید به دروغجن مکاره ک به دا هیچ هنر د هیچو انکاره ک

Who puts his hope on a lying, deceitful woman, he makes by this foolishness a firebrand out of nothings. (Gulsh. II, p. 129, 1) Mirzā Xān Anṣārī.

#### §. 144.

Beside these the Paštō uses a number of compound indefinite pronouns.

a) Indefinite pronouns compounded with هر har (every).

1) هر هک har tōk, every one; whoever; fem. هر هک;

Format. masc. هر چا.

2) هَر خَو har tō, however much or many, or هَر خَو چه (\*).

3) هَر خَه har t̪əh, whatever, every thing.

4) هَر يَو har yau, fem. هَرَه يَو harāh yauāh; Format. masc.

هَرَه يَو harāh yauāh\*\*), Format. fem. هَرِي يَو harē

yauē; every one. It is only used in the Singular and properly a pronominal adjective.

فَعِه چِه هَه دَوَلَسَم سَاعَتِ مَرَدُور شَوِي وَر هَرَه يَوَه يَوَه يَبَسَمَه بِيَا مُونَدَه

Of those, who had become labourers at the eleventh hour, every one received one Paisā. Matth. 20, 9.

b) Indefinite pronouns compounded with بَل bal, another, and نَوَر nūr, another.

1) بَل خَوَك bal tōk another, fem. بَلَه خَوَك. Format. masc.

بَل چَا bal t̪ā.

2) بَل يَو bal yau, another one, fem. بَلَه يَو balāh yauāh;

Format. masc. بَلَه يَو balāh yauāh, fem. بَلِي يَو

balē yauē. It is only used in the Singular and properly a pronominal adjective.

\*) هَر خَو is also used in an adverbial sense: how much soever; هَر خَو تَه is used in the sense of an adversative particle, although.

\*\*) هَر takes also the termination āh for euphony's sake, in order to conform with يَو yauāh.

3) بَلْ ٲah, something else, other thing.

4) نَوْر ځوټ nŏr ʃŏk, another, fem. نَوْرَ ځوټ; Format. masc.

نَوْر ځوټ — نَوْر ځوټ; نَوْرِي ځا nŏr čā, and fem. نَوْرِي ځا  
one — another; some — another.

5) نَوْر څه nŏr ʃah, other thing, something else.

6) نَوْر هېڅ nŏr hīʃ, anybody else; anything else.

c) Indefinite pronouns compounded with کوم or کم.

1) کوم ځوټ or کم ځوټ any one, whoever; fem. کومۀ ځوټ;  
Format. m. Sing. ځا کوم.

2) کوم ټو or کم ټو, any one; properly a pronominal ad-  
jective and inflected in the same way as the interro-  
gative §. 110, 4.

په هر صورت څه وی ډه نا آشنا عالم کېږي کډران کوم ځوټ مې ټه  
په ټه ټه ډه حال واقف نه وی

Of whatever kind my livelihood may be amongst strange  
people, nobody will be aware of my good or bad condition (Gulsh. I,  
p. 168) Gulistān.

d) Indefinite pronouns compounded with هېڅ hīʃ.

1) هېڅ ځوټ hīʃ ʃŏk, usually written هېڅوټ hīʃŏk, any  
one; it may also be referred to things: any (thing);  
with a negation: nobody, nothing. ځوټ only is  
inflected.

- 2) (نور هیتج hlġ nŕr (the same as نور هیتج), any body;  
any (thing) else; fem. هیتج نور.

In the same way other indefinite pronouns or pronominal adjectives may be joined with هیتج نو, as هیتج نو (with a negation) none at all.

نَوْنُومْ دَى هَاتُو كَبِيرَى نَوْرَ بَه هیتج خُوكْ هَاتُو نَه شَى

The only thing is the name, that remains, nothing else will remain. (Gulsh. II, p. 53, 3) Xušh'al.

- e) Indefinite pronouns compounded with نَو yau (one).

- 1) نَو خُو yau ŧŭ, some, (a number of), different.

It is only used in a Plural sense and is not subject to any change for gender, number or case.

- 2) نَو تَر بَلَه yau tar bālah or نَو د بَلَه yau da bālah, one

after the other, or one with the other, amongst each other. It remains quite unchanged and the case, in which نَو should stand, is taken up by the pronominal suffix نَى by him (her, them) or by a noun in the Instrumental.

بَه قَر بَنَاحْ نَى دَ كَلْبَن رِ نَو خُو جِيغِي

On every branch of its rose-bush were different noises.  
(Gulsh. II, p. 142, 3) Kāšim xān.

أَلْقَصَه يَهْتَنُو مَلِكْ دَ قَنْدَهَارْ نَو تَر بَلَه قِسْمَتْ كَرَى وَهْ حِصَّه دَ قَرَبَلُو

بَه مِينَجْ كَبِي دَ كَنْدْ أَو دَ زَمَنْدْ وَاقِعْ شَوَى وَهْ نَو تَر بَلَه دَ دَوَارُو دُرُو لَو  
بَه حِمَايَتْ نَه رَسِيدَه

To be short, the Afghāns had divided amongst themselves the country of Qandahār, the portion of the Tarīns had fallen between Kand and Zamand; one after the other did not come to the assistance of both brothers \*). (Gulsh. I, p. 5) Tārīḫ-e murassas.

§. 115.

### VIII. Pronominal adjectives.

Besides the pronominal adjectives, which have partly been mentioned already, the Paṣtō uses the following:

ټول ټول, fem. ټوله ټوله, another \*\*).

ټول ټول, fem. ټوله ټوله, all, whole \*\*\*).

ټوله ټوله, all (com.).

ټوله ټوله, both (com.).

ډیر ډیر, fem. ډیره ډیره, much. ډیر ټول, fem.

ډیره ډیره ټوله, many another.

نور نور, fem. نوره نوره, another. نور ټول, fem. نوره ټوله,

all the rest. نور ډیر, fem. نورې ډیرې many other.

\*) I. e. the two brothers did not come to the assistance of each other.

\*\*) Also pronounced bul. It is apparently the Sansk. पर.

\*\*\*) ټول is the Sindhi टोली, society, band, Hindī टोल. It seems to be non-ārian.

†) ډیر is the Sindhi-Hindi ढेर, heap; very likely non-ārian.

††) نور is the Hindī स्वर (Sansk. स्वर following), in Paṣtō

with abscission of initial a and change of v to u.

وَأَرَاهَ vārah<sup>\*</sup>), all (com.); only used in the Plural.

هَرَّ har, fem. هَرَّهَ harāh, every.

هَمَاهَ hamah, all (com.), only Plur.

On the flexion of جَمِيلَه, دَوَّارَه, وَارَه and قَمَه see §. 90; the others are regular adjectives and inflected according to their several terminations.

## VI Section.

### The Verb.

#### §. 116.

#### I. Formation of the verbal themes.

We have seen already (§. 14), that the Infinitive of all Paštō verbs terminates in al and is, properly speaking, a verbal noun. The Infinitive as such does therefore not exhibit the root of the verb, this must be looked for in the Imperative, which alone contains the pure base of the verb.

It cannot be seen therefore from the Infinitive as such, of what class a verb is, but only from its signification.

There are three classes of verbs in Paštō, viz: intransitive (or neuter), transitive (or active) and causal verbs.

#### 1) Intransitive or neuter verbs.

According to their formation we must distinguish three classes of intrans. verbs:

a) Such as add to the verbal theme itself the Infinitive termination al, as: خَتَلَ xat-al, to ascend, وَتَلَ vat-al, to issue, مَرَلَ mr-al, to die.

---

<sup>\*</sup> وَأَرَاهَ is the Sansk. सर्वे, (Hindi सारा), by the medium of the Zendic haurva (Paštō au = ō = v).

b) Such, the theme of which ends in -ēd and which retain this through all the tenses and moods. These are of two kinds; they are either primitive nenter verbs (with a passive form), or they are originally derivative verbs (as mentioned under c), the nominal theme of which has either become obsolete or which have become primitive verbs by usage. We shall therefore call them primitive intransitive verbs, ending in -ēd. There is a great number of them, e. g. **بہیدل** bah-ēd-āl, to flow (Sindhī **बहण**), **ڦڪیدل** ʔk-ēd-āl, to crawl; **وڙیدل** vēr-ēd-āl, to be afraid (**وڙو** vērāh, fear).

c) Proper derivative verbs, which are compounded of a substantive or adjective and the verbal theme of which necessarily ends in -ēd, as: **بدلیدل** badal-ēd-āl, to be changed (from **بدل** subst., change), **ڃاڻایدل** ʒabar-ēd-āl, to be informed (from **ڃاڻ** s., information). In this way from most adjectives and from a great number of substantives derivate verbs are formed, which are quite peculiar to the Paṣṭō. It is to be noticed, that those adjectives, which in the feminine shorten ū and ӯ to a (§. 86), are subject to the same vowel-change before the termination -ēd, as **زړیدل** zar-ēd-āl, to become old, from **زړ** zōr (fem. **زړه** zar-āh); **ږندیدل** rand-ēd-āl, to become blind, from **ږوند** rūnd (fem. **ږنده** rand-āh). In the same way some other adjectives, which retain ӯ in the feminine, shorten it to a before the termination -ēd, as **رڼیدل** ray-ēd-āl, to get better, to become healthy, from **رڼ** (fem. **رڼه** rōy-āh). The monosyllabic adjectives however, which contain the vowel i, retain the same before the termination -ēd, as **تریځیدل** triḡ-ēd-āl, to become bitter, from **تریځ** (fem. **تریځه** tarḡ-āh); **تریږیدل** trīv-ēd-āl, to become sour, from **تریږ** trīv (fem. **تریږه** tarv-āh).

When the substantive or adjective ends in a vowel or in *āh*, *āh*, compositions are generally avoided and the auxiliary verb *کيدَل* *kēd-āḥ*, to be made, is employed, to make up the idea of a derivative verb, as: *اَوَدَه کيدَل* *ūdāh kēd-āḥ*, to be made asleep, to go to sleep; *ستَرِي کيدَل* *starai kēd-āḥ*, to become tired; *لَکِيَا کيدَل* *lagiā kēd-āḥ*, to be applied. But such like forms are also found (especially in poetry), as: *تيريدَل* *tēr-ēd-āḥ*, to be sharpened (from *تير* *tēr-āh*, sharp), not to be confounded with *تيريدَل* *tēr-ēd-āḥ*, to pass, from *تير* passed; *پيدَا کيدَل* *paidā-ēd-āḥ*, to be created, from *پيدا*; *لوييدَل* *lōy-ēd-āḥ*, to become great, from *لوي*; *واديَدَل* *vād-ēd-āḥ*, to be married, from *وَدَه* *vādāh*, marriage (besides *کيدَل وَدَه* *vādāh kēd-āḥ*).

With reference to the last two classes of intrans. verbs ending in *ēd-āḥ* \*), there can be hardly a doubt, that the termination *-ēd* constitutes a verb by itself. The Imperative (Present, Subjunctive and Future) of these verbs ends, as we shall see hereafter, in *ēḥ* (-*ēḡ*-). This verbal termination *-ēḥ* (-*ēḡ*-) is apparently nothing else but the Sindhī verb *किजणु* *ki-j-āṇu*, to be made, the passive of *करणु*, to make (instead of *किर्जेणु* *kir-j-āṇu* or *कर्जेणु* *kar-j-āṇu*), *r* having been elided before the palatal *j* (the sign of the passive). When the verbal theme *kij-* is added to the noun, an elision of *k* takes place according to a common Prākṛit rule, so that *ij* = *eḥ* remains. In the Infinitive (as in the Imperfect) *-eḥ* (= *keḥ*) has been hardened to *-ēd-āḥ* (= *kēd-āḥ*). But the Sindhī itself changes frequently *j* to *dy*, which in Paṣṭō has become simple *d*. Thence it comes, that it may be optionally said in Paṣṭō: *کيدَل وَدَه* and *واديَدَل*, because both are identical in form and signification.

\*) At the first look one might be tempted, to compare the Paṣṭō *ēd-āḥ* with the Persian termination *īdan*, as the Persian also forms its derivative verbs by means of this termination. But this termination *īdan* is dropped in Persian in the Imperative and Present, whereas in Paṣṭō it is retained throughout. About the Persian Infinitive termination see §. 125, 4, note.

In the same way the primitive intransitive verbs ending in -ēd are to be explained, though now in most cases it cannot be shown, how they are compounded. But also with reference to these the Sindhī gives us a hint. In Sindhī many intransitive verbs take the passive termination **जाणु** J-aṇu, without any change in signification; similarly in Paṣtō some intrans. verbs have still two terminations, one in ʾal and one in ēd-ʾal, as: **درؤمل** drūm-ʾal or **درؤمیدل** drūm-ēd-ʾal, to go.

§. 117.

2) Transitive verbs.

The theme of most trans. verbs ends in a consonant (or even in a conjunct consonant), more rarely in a semivowel; e. g. **موندل** mūd-ʾal, to obtain; **کبئل** kē-ʾal, to draw (instead of **کیئل** ki-ʾal); **نیول** nīv-ʾal, to take; **وئل** vay-ʾal, to speak.

All trans. verbs end in ʾal, with the exception of three, which end in -ēd-ʾal; these are: **آرؤیدل** āvrēd-ʾal (**آرؤیدل** āvrēd-ʾal) to hear, **بلؤسیدل** blōsēd-ʾal, to annoy and **پوئیدل** puēd-ʾal, to ask. Their formation is curious, as the termination -ēd- cannot be considered as an integral part of the verbal theme, because it is dropped again in the Imperative.

Many verbs are considered as transitive in Paṣtō, which we are wont to look upon as intransitive; e. g. **خندل** χand-ʾal, to laugh; **زارل** zar-ʾal, to lament; **دنگل** dang-ʾal, to jump etc.

§. 118.

3) Causal verbs.

Nearly from every intransitive or transitive verb a causal may be formed, by adding the termination -av-ʾal to the verbal theme.

A) From intrans. verbs the causal is formed in the following way:

a) Those intrans. verbs ending in *āl*, which do not change the final consonant in the Imperative, simply add the termination *-av-āl* to the verbal theme, after dropping the Infinitive termination *āl*, as:

تَبَل *tā-āl*, to flee, Imper. تَبَّه *tā-ah*, caus. تَبَّوَل *tā-av-āl*, to make flee.

دَرَبَل *drab-āl*, to fall in, Imper. دَرَبَّه *drab-ah*, caus. دَرَبَّوَل *drab-av-āl*, to make fall in, to pull down.

b) But those intrans. verbs, which in the Imperative change the verbal theme, add the causal termination *-av-āl* to the theme thus changed, as:

آلَوَل *ālvat-āl*, to fly, Imper. آلَوَّه *ālvaz-ah*; caus. آلَوَّرَوَل *ālvaz-av-āl*, to cause to fly.

خَتَل *χat-āl*, to ascend, Imper. خَبَّه *χēz-ah*; caus. خَبَّوَل *χēz-av-āl*, to cause to ascend.

كَبَّيَنَسَتَل *kāē-nāst-āl*, to sit down, Imper. كَبَّيَنَه *kāē-n-ah*; caus. كَبَّيَنَوَل *kāē-n-av-āl*, to make sit down.

c) Those intrans. verbs, the theme of which ends in *-ēd-āl*, be they primitive or derivative, drop *-ēd-āl* before the termination *-av-āl*, as:

رَغَبَدَل *ryar-ēd-āl*, prim. verb, to wallow, caus. رَغَبَّوَل *ryar-av-āl*, to make wallow.

وَرَبَدَل *vōr-ēd-āl*, prim. verb, to rain, caus. وَرَبَّوَل *vōr-av-āl*, to cause to rain.

مَاتَبَدَل *māt-ēd-āl*, derivat. verb, to be broken (مَات), caus. مَاتَوَل *māt-av-āl*, to break.

B) Transitive verbs add the caus. termination *-av-āl* to the verbal root, as exhibited in the Imperative. Those verbs however, which lengthen *a* in the Imperative, shorten it again before the caus. termination. E. g.

خَنَدَل *χand-āl*, to laugh, Imper. خَانَدَه *χānd-ah*; caus. خَنَدَوَل *χand-av-āl*, to make laugh.

آوڀڏڻ āvrēd-ḡal, to hear, Imper. آڀر آvr-ah; caus. آڀرڻ āvr-av-ḡal,  
to cause to hear.

لڀوڻ lvaṣṭ-ḡal, to read, Imper. لڀو lval-ah; caus. لڀوڻ lval-av-ḡal,  
to make read.

Defective verbs, which substitute in the Imperative another verbal root, form their causal, as far as it is used, from the Infinitive, as:

آڻڻ āyust-ḡal, to clothe, Imper. آڻند āyund-ah; caus. آڻڻ āyust-av-ḡal, to cause to clothe.

ڀڄڻ yaṣṭ-ḡal, to place (not used in the Imper.), caus. ڀڄڻ yaṣṭ-av-ḡal, to cause to place.

In the formation of the causal verb too the Paṣṭō has had recourse to a composition and totally abandoned the old causal formation, the remnants of which we still find in the Sindhī — Hindī and in the Persian (ā, ān). The causal termination -av-ḡal is nothing else but the verb کول kav-ḡal, to make, to do, initial k being elided (as in the case of کيڏڻ), when added to a verbal theme. This may be clearly seen from the circumstance, that the form -av-ḡal is generally not added to such nouns, which end in a vowel or ḡh and āh, but in this case the full form کول kav-ḡal is used, as: فنا کول fanā kav-ḡal, to destroy, وعدہ کول vaddāh kav-ḡal, to make a promise; but we find also وادڻ vād-av-ḡal, to cause to marry (cf. 116, 1, c).

The etymology of کول seems to be the following. We have in Paṣṭō two verbs, which are quite identical in signification, کر-ḡal and کول kav-ḡal, to make, to do. کر is the Sindhī करण, Pers. کردن (Sansk. कृ); in Sindhī already r may be dropped, as कजि ka-je, do thou (for r may be also dissolved into a in Prākṛit),

and so it has been likewise elided in Paṣtō, so that ka-ḡl stands for kṛ-ḡl. For euphony's sake v is inserted — ka-v-ḡl<sup>\*)</sup>).

There is also a number of pure causals in Paṣtō, i. e. such verbs, which are only preserved in the causal form, as: **آجول** āč-av-ḡl, to throw, **لَامَسول** lams-av-ḡl, to instigate etc.

The Paṣtō is no longer possessed of a proper passive voice, but must have recourse to a composition, like the Persian, as will be seen in its proper place.

#### §. 119.

#### 4) Verbal prefixes.

With primitive verbs prefixes (prepositions or adverbs) may be connected, as in Persian, which more or less modify the original signification of a verb. The prefixes, as a rule, quite coalesce with the verb, but some of them may again be separated from the verbal root in some tenses (by the interposition of the negative adverb **نه**, not, or a pronominal suffix, see §. 171). These prefixes are:

**آ**, Sansk. **आ**, to, as: **آرَوَدَل** ā-rv-ēd-ḡl, to hear (**आ + श्रु**); inseparable prefix.

**آل** āl, only joined to **وَتَل**, to come out, as: **آلَوَتَل** āl-vat-ḡl, to fly; caus. **آلَوَزَل** āl-vaz-av-ḡl, to make fly; inseparable prefix. Its etymology is obscure.

**بِيا** biā, again, only joined to **مُونَدَل**, to get, as: **بِيامُونَدَل** biā-münd-ḡl, to get, to recover; separable prefix (Pers. **باز**, Sansk. **पश्चात्**).

**پرا** prā, only used in **پرائَتَل** prā-nat-ḡl, to loosen, to open. Pers. **فَر**, **فَر** or **فَرَا**, Zend **fra**, Sansk. **प्र**. Inseparable prefix.

---

<sup>\*)</sup> Similarly **نِمول** nī-v-ḡl, to take, Sindhi **निअणु** ni-aṇu (Sansk. **नी**).

پری prē (also written ږر), as: ږړېدل prē-žd-əl, to give up;  
ږړېدونکې prē-žōd-əl or ږړېږول prē-žv-əl, to give up\*),  
کړېدل prē-kav-əl, to cut, so sever; ږړېدل prē-vat-əl, to  
drop, to fall down. ږری corresponds to the Persian فَری  
(ږر), Zend fra, Sansk. ॠ, on, onward. Separable  
prefix.

چار jār, back, only used in the two verbs: چاروتل jār-vat-əl,  
to return and چارېستل jār-yast-əl, to turn or bring back.  
It has already so thoroughly coalesced with the verbal  
root, that in the Imperative the prefix ږ may be used with  
these verbs. Its etymology is obscure. Inseparable  
prefix.

کښی kṣē or only کی kē, in. It is joined to verbs  
denoting to sit, to put, as: کښېباسل kṣē-bās-əl, to  
insert, to implant, کښېږول kṣē-žd-əl, to put down,  
کښېناستل kṣē-nāst-əl, to sit down. Separable prefix.

ن n, in, as: نغوټل n-ḡvat-əl, to attend to; نجاتل n-jat-əl,  
to thrust in, etc. It corresponds to the Sansk. नि, Persian  
ni (na, nu); in Paṣtō final i of ni has been dropped. In-  
separable prefix.

نن nana, within (adv.), only used with the two verbs  
ننوتل nana-vat-əl, to enter and ننېستل nana-yast-əl, to  
insert, to introduce. It is perhaps a mutilation of the Sansk.  
अन्तर (Pers. آندر). Separable prefix.

\*) All these verbs literally signify: to put away.

رَ vō, as: رَءَعْلَل vō-raʕl-ʔl, to come (instead of رَءَاغْلَل \*);  
 رَءَكْلَل vō-ʕk-ʔl, to draw out (= رَءَكْلَل). This prefix, which  
 is used only in a few verbs, corresponds to the Persian اُر, اِ  
 (as ف (اُفْتَدان) or اُف, Pārsī ō (ava), Zend aivi (aibi),  
 Sansk. अभि (on, towards). Inseparable prefix.

Like the preceding prefixes the pronouns رَ (to me, to us),  
 تَر (to thee, to you) and دَر (to him, her, them) are also joined to  
 verbs, forming thereby a sort of compound verb, as: رَءَاكَوْل  
 rā-kav-ʔl to make to me = to give (to me), دَرءَاكَوْل dar-kav-ʔl, to  
 give to thee, رَءَاكَوْل var-kav-ʔl, to give to him, her, them. Some  
 verbs, compounded with رَ and دَر have already received a fixed  
 signification, without special reference being had to the pronoun,  
 as: رَءَاتْلَل rā-tl-ʔl, to come (literally: to go to me), رَءَاغْلَل ra-ʕl-ʔl,  
 to come (to go to me); دَرءَاتْلَل var-tl-ʔl, to go (to go to him, them),  
 دَرءَاغْلَل var-ʕl-ʔl, to go (to him, them); رَءَانِيَوَل rā-nīv-ʔl, to seize  
 (to take to me); رَءَاوَل rā-vr-ʔl, to bring (to me, us); رَءَاوَسْتَل  
 rā-vast-ʔl, to bring here (to me, us), دَرءَاوَسْتَل var-vast-ʔl, to bring  
 or send there (to him, them). In the modern language رَ and دَر  
 are thus frequently prefixed to verbs, to indicate the direction,  
 as: رَءَاوَاتْلَل rā-vat-ʔl, to come out (in this direction), دَرءَاخَاتْلَل  
 var-xat-ʔl, so ascend (there, in that direction).

---

\*) Not to be confounded with دَرءَاغْلَل var-ʕl-ʔl, to go (to him, them etc.).

## II. Formation of the Imperative.

The root of the Paṣṭō verb, as noticed already, must be sought for in the Imperative, which exhibits the pure verbal theme. From the Imperative is derived the Present, the Subjunctive Present and the Future.

The Paṣṭō Imperative has only two persons, the II. pers. Sing. and the II. pers. Plural. The II. pers. Sing. is formed by the termination *ah*, the II. pers. Plural by the termination *aī*\*). Instead of *aī* the termination *āṇṛaī*, which corresponds somewhat more to a Precative, is also now and then met with, before which the

final consonant of the verbal root must be dropped, as: *وَآخَانِرَتِي* *v-āḫ-āṇṛaī*, take ye, please to take, instead of *وَآخَلَتِي* *v-āḫ-l-aī*, from

*آخَسْتَل* *āḫist-aḥ*; *وَكَانِرَتِي* *vō-k-āṇṛaī*, do or make ye, instead of *وَكَوَتِي* *vō-kav-aī*. This termination however is only found in

transitive verbs. The origin of this termination is doubtful, as the cognate idioms offer no analogies.

Both these terminations, *ah* and *aī* are added to the root of the verb, after the Infinitive affix *aḥ* has been dropped, as:

*تَبِيل* *tā-aḥ*, to flee, Imper. Sing. *تَبِهْ* *tā-ah*, Plur. *تَبِيْتِي* *tā-aī*.

*أَنْكَبِيل* *angēr-aḥ*, to suppose, Imper. Sing. *أَنْكَبِهْ* *angēr-ah*, Plur.

*أَنْكَبِرَتِي* *angēr-aī*.

But as the formation of the Imperative is subject to a great many irregularities, as in Persian, we must enter into particulars.

### A. The Imperative of intransitive verbs.

#### 1) Primitive verbs ending in *aḥ*.

These verbs we have to divide into the following classes:

a) Such, as do not change the verbal theme in the Imperative. They are proportionally few in number, as:

---

\*) The Paṣṭō has preserved the old Prakrit termination of the Sing. *a*, whereas in the modern Indian vernaculars it has been dropped

دِرَبَل drab-āl, to fall in, Imp. دِرَبْ drab-ah.

دِرُومَل drūm-āl, to go, Imp. دِرُومْ drūm-ah.

خَمَلَل ẖaml-āl, to lie down, Imp. خَمَلْ ẖaml-ah.

سَهَل sah-āl, to endure, Imp. سَهْ sah-ah.

مَرَل mr-āl, to die, makes so far an exception, that the cerebral r is changed to a dental, Imp. مَرْ mr-ah.

b) Those verbs, the theme of which ends in ت, change the same in the Imperative to ز, as:

وَتَل val-āl, to come out, Imp. وَزْ vaz-ah (وُزْ vuz-ah). Similarly the compounds of وَتَل, as:

آلَوَتَل āl-val-āl, to fly, Imp. آلَوَزْ āl-vaz-ah.

پَرِوَتَل prē-vat-āl, to fall down, Imp. پَرِوَزْ prē-vaz-ah.

جَارَوَتَل jār-vat-āl, to return, Imp. جَارَوَزْ jār-vaz-ah.

An exception from this rule is:

خَتَل ẖat-āl, to ascend, Imp. خِیَوْ ẖēz-ah.

This verb however is shortened from the Persian خاستن and has therefore in the Imperative likewise recourse to the Persian Imper. خیر, with transition of ز to ز.

The following verbs are irregular and cannot be brought under any rule:

چَاوَدَل čavd-āl, to split, Imp. چَوْ čav-ah.

سَوَل sv-āl, to burn, Imp. سوَھْ svaḍ-ah (or سوَزْ svaz-ah).

This verb (Sindhī जलण, Sansk. जल) recurs to the Persian Imper. سوختن (سوختن).

already (with the exception of the Sindhī). The Plur. termination ai corresponds to the Prākṛit ha, Sansk. ह्य, Sindhī and Hindī ō.

شَوَل šv-əl, to go, to become (Pers. شَدَن), Imp. شَه ē-ah, with ejection of the semivowel v, instead of شَوَه šv-ah.

کَشِنَاسَتَل kšē-nāst-əl, to sit down, Imp. کَشِنَه kšē-n-ah. (Pers. نِشِسْتَن ni-šistan, Sansk. ni-ṣad).

§. 122.

2) Verbs ending in ēd-əl.

a) Primitive verbs.

These form the Imperative by changing -ēd to ēž (ēg), to which the personal terminations are added, as:

رَبَرِیَدَل rabr-ēd-əl, to be perplexed, Imp. رَبَرِیَه rabr-ēž-ah, Plur. رَبَرِیَی رابری rabr-ēž-āi.

That the termination -ēd-əl is originally a separate verb (= کِیَدَل), as shown in §. 116, is further seen from the circumstance, that a certain number of primitive verbs ending in -ēd-əl drop the termination ēž (ēg) again in the Imperative (and consequently in the Present, the Subjunctive Present and the Future). These are:

اَوَرِیَدَل ōr-ēd-əl, to rain, Imp. اَوَرَه ōr-ah.

اَوَسِیَدَل ōs-ēd-əl, to exist, to dwell, Imp. اَوَسَه ōs-ah.

بَرَبَشِیَدَل brēš-ēd-əl, to glitter, Imp. بَرَبَشَه brēš-ah.

پَاڤِیَدَل pāt-ēd-əl, to rise, Imp. پَاڤَه pāt-ah.

پَاڤِیَدَل pā-ēd-əl, to remain, Imp. پَاڤَه pay-ah.

تَشَتِیَدَل tašt-ēd-əl	} to flee; Imp.	تَشَتَه tašt-ah
خَشَتِیَدَل xāšt-ēd-əl		خَشَتَه xāšt-ah

خَاجِدَل *ṭaṭēd-āḷ*, to leek, Imp. خَاجِه (ṭā-ah\*).

رَیَارَدَل *ryar-ēd-āḷ*, to wallow, Imp. رَیَارِه (rā-ah).

رَیَزِدَل *rēzd-ēd-āḷ*, to vibrate, Imp. رَیَزِه (rēzd-ah).

زَیَالَدَل *zyal-ēd-āḷ*, to run, Imp. زَیَالِه (zā-ah).

زَیَزِدَل *zēž-ēd-āḷ*, to be born, Imp. زَیَزِه (zēž-ah).

یُرَزِدَل *yurz-ēd-āḷ*, to leap, Imp. یُرَزِه (yurz-ah).

گِرَزِدَل *girz-ēd-āḷ*, to go about, Imp. گِرَزِه (girz-ah).

لَوَارَدَل *lvar-ēd-āḷ*, to be severed, Imp. لَوَارِه (lvar-ah).

وَرَزِدَل *varzēd-āḷ*, to fly, Imp. وَرَزِه (varz-ah).

یَاشِدَل *yaš-ēd-āḷ*, to bubble, Imp. یَاشِه (yāš-ah).

But all primitive verbs ending in *-ēd-āḷ*, may drop the termination *-ēd* (i. e. *kēd-āḷ*), when the action is only generally referred to or not actually occurring in the presence of the speaker. But when the action is represented as occurring actually in the presence of the speaker or when it has a proximate application, the termination *-ēd-* (*ēž-*) must be used, the verbs exhibited in the preceding list alone being excepted.

#### b) Derivative verbs.

These form their Imperative either like the primitives, by changing *-ed-* to *ēž-* (*ēg*). This, as a rule, is the case, when the negation *مَ* *lest* (*ne*) be joined with the Imperative; but this form of the Imperative is also used in the absense of *مَ*, especially in the more modern levelling language. Or they dissolve themselves into their constituent parts and join to the noun (substantive or adjective) the Imperative of the auxiliary verb شَوَل *šawāl*, to become,

\*) خَاجِدَل lengthens the short root-vowel in the Imperative.

namely **شَه** šah, Plur. **شَتَّى** šaī, which is substituted for **كَبِيرَ** kēž-ah, which is not in use. (§. 164). E. g.

**مَه بَدَلِيَو** badal-ēd-ā, to be changed, with **مَه** (ne): **مَه بَدَلِيَو** mah badal-ēž-ah, be not changed; else: **بَدَل شَه** badah šah, Plur. **بَدَل شَتَّى** badal šaī (from **بَدَل** s. m. change).

**مَه زَرِيَو** mah zar-ēd-ā, to become old, with **مَه** mah zar-ēž-ah, do not become old; else: Plur. **مَه زَرِيَو** mah zar-ēž-aī, do not become old; else: **زَر شَه** zar-āh šah, masc., **زَر شَه** zar-āh šah, fem., become old; Plur. **زَر شَتَّى** zārah šaī, **زَرِي شَتَّى** zarē šaī, fem., become ye old.

According to §. 124 the use of the Imperative prefix **و**, vö is not allowed in these cases.

It is understood, that the adjective, with which the derivative verb is compounded, must agree with its subject, as implied by the auxiliary verb, in gender and number. But also substantives, when ending in a consonant, are often treated as adjectives (especially in poetry) and may assume a feminine termination (āh), as:

لَه دِي كُوتِي شَه مَعْلُوم جِه شَاهَزَادَه دَو

Bahrām, V. 389. دَر زَر خَال ئِي كَبِرَ مَعْلُوم تَر شَه خَبِرَ

From this finger-ring it became known, that he is a prince;  
Make known the state of his heart, become acquainted therewith!

Many derivatives, especially those, which are compounded with a substantive, only use the termination -ēž-ah in the Imperiative, i. e. they are quite treated as primitive verbs, as: **وَرِيَدَل** vēr-ēd-ā, to be afraid (from **وَرِيَه** vērāh, fear); **خَارِيَتِيَدَل** xāriēt-ēd-ā, to itch (from **خَارِيَت**, the itch); **پَوِيَدَل** pōhēd-ā, to be informed, to understand (from **پَوِيَه**, knowing, adj.), but the Imperative **پَوِيَه شَه** is also in use. Usage alone is herein a sure guide.

§. 123.

3) Defective verbs.

There is a number of defective verbs, which substitute a different root in the Imperative (and partly also in the other tenses), whereby the conjugation of the verb is rendered somewhat complicate. These are:

تَلَّ tl-ā } to go. Imp. هَلَّ ḥ-ah, which is to be referred to the  
تَارَّ tā-ā } Hindī जाना, to go. From the (obsolete) theme  
لَآرَّ lā-ā comes the Imperative لَارَّ شَه lār šah, be gone (لَآرَّ participle  
praeterite, gone). The Imperative of شَوَّ with the prefixed pro-  
noun وَر var is also substituted for any of these roots, as: وَرَّ شَه  
var šah, go (to him etc.), Plur. وَرَّ شَعَى var šai.

The compounds of تَلَّ are treated in the same way, as:  
رَا هَلَّ rā-ḥah, come, وَرَّ هَلَّ go (to him etc.), or رَا شَه\* rā-šah, come,  
var-šah, go; دَرَّ هَلَّ dar ḥ-am, I come to thee, or دَرَّ شَه  
dar šam.

خَمَلَّستَلَّ ḫamlāst-ā }  
خَمَلَّ ḫaml-ā } to repose, Imp. خَمَلَّ ḫaml-ah.  
مَلَّستَلَّ mlāst-ā }

رَاغَلَّ rā-ḡl-ā } to come (to go to me), Imp. رَا هَلَّ rā-ḥ-ah or  
وَرَّغَلَّ vō-rayl-ā } رَا شَه rā-šah.

رَاغَبَدَلَّ ryaḡ-ēd-ā }  
رَاغَبَدَلَّ ryaḡāt-ā } to wallow, Imp. رَاغَبَّ ryaḡ-ah.

\* Instead of رَا شَه we find often رَا عَشَه rā-ešah, with euphonic inserted e.

زَغَاسْتَلْ zγāst-al	} to run, Imp. زَغَلْ zγal-ab.
زَغَايْتَلْ zγāṭt-al	
زَغَالِدَلْ zγal-ēd-al	
زَوَلْ zōv-al	} to be born, Imp. زَهْ zēh-ab.
زَوِيْدَلْ zōž-ēd-al	
كَبِيْنَاْسْتِيْدَلْ kṣē-nāst-ēd-al	} to sit down, Imp. كَبِيْنْ kṣē-n-ab.
كَبِيْنَاْسَلْ kṣē-nāst-al	
لَوِيْدَلْ lvar-ēd-al	} to be severed, Imp. لَوْ lvar-ab.
لَوِيْتَلْ lvaṭt-al	
نَشَاتَلْ nṣat-al	} to stick to, Imp. نَشَالْ nṣal-al
نَشَالْ nṣal-al (obsolete)	
نَشَالِدَلْ nṣal-ēd-al	
	نَشَالِيْزْ nṣal-ēz-ab

§. 124.

The Imperative prefix , vō.

The prefix , vō, ,\*) voh is usually (but not necessarily) put before the Imperative, as in Persian ب, which, though short,

---

\*) It is difficult to say, what the etymology of this prefix is. We believe, that the prefix of the Imperative is not identical with the prefix of the Imperfect and Aorist, though it outwardly quite coincides with it (as also in Persian). The prefix of the Imperative seems to have sprung from the Sanskrit भाव्य, Pers. بایستن. The Pārsi from is ba, with which the Paṣtō is closely connected; ه is a later pronunciation, which, according to the sequence of the vowels, is often pronounced bu (بُو bu-gū, say, not بُو bi-gū), Cf. §. 133, note.

attracts the accent, wherever possible \*), as: كَرَّ vó kr-ah, do, كَوَّ vó kav-ah, make, but تَبَّه vó tášt-ah, flee! When a verb commences with long a, the prefix ا coalesces with it to v-ā, as: اَلْوَزَّ v-ālvaz-ah, fly, from اَلْوَتَّل āl-vat-āl; before the other initial vowels ا is preserved, as: اَخْبَرَّ eš axēr-ah, plaster, from اَخْبَرَل أَخْبِرَل to plaster.

With some verbs however the prefix ا is never used; these are: اَوْسَيْدَل ōs-ēd-āl, to remain, exist, Imp. اَوْسَّ ōs-ah. اَمَلَل ʔaml-āl, to lie down, Imp. اَمَلَّ ʔaml-ah.

All verbs, which are compounded with a prefix \*\*) (§. 119), do not take the prefix ا, as: كَبَّيَنَ sit, نَنَوَزَّ nana-vaz-ah, come in. The verbs compounded with the prefixes اَلْ, اَلْ and اَلْ are alone excepted, as the language no longer treats them as prefixes, but as an integral part of the verbal root. When the pronouns اَلْ, اَلْ and اَلْ retain strictly their pronominal signification, they do not affect the verb in any way and the prefix ا may be used as with any other primitive verb, but when اَلْ and اَلْ have given up their strict pronominal signification, they are considered as (separable) prefixes and the use of the prefix ا is prohibited, as: اَلْ كَرَّ rā-kr-ah, give, اَلْ رَ rā-q-ah, come (رَ اَلْ).

\*) When the verb contains two short syllables, the accent is drawn on ا, but when a syllable of the verb is long (by nature or position), the accent is laid upon that.

\*\*) When اَلْ, lest, is used with the Imperative, the prefix ا is strictly excluded, as two prefixes cannot be admitted in the Imperative; the Imperative of the Passive makes an exception from this rule, see §. 171.

Derivative verbs, when forming the Imperative by *ēž-ah*, do generally not take the prefix *ʔ*, but those, which are already treated as primitives (especially those compounded with substantives) may take it, as they are no longer considered as derivatives in this case.

§. 125.

**B. The Imperative of Transitive verbs.**

We may here distinguish the following classes:

1) This class, which comprises the greatest number of the regular trans. verbs, forms the Imperative by adding the personal terminations to the last radical, which is either a consonant or a semivowel, verbs ending in *t* or *d* alone being excepted. As:

شَبَلَ *šā-āl*, to drink, Imp. شَبِّهْ *vō-šā-ah*.

كُنْدَلَ *tkūnd-āl*, to pinch, Imp. كُنْدَنْهْ *vō tkūnd-ah*.

زَعَمَلَ *zyam-āl*, to bear, Imp. زَعَمَّهْ *vō zyam-ah*.

An exception from this rule makes:

خَوَّرَلَ *xvar-āl*, to eat, Imp. خَوَّرْهْ *vō xūr-ah*.

2) This class differs from the preceding by lengthening short *a* in the Imperative. They are all monosyllabic verbs, the number of which is fixed. The most common are:

خَنْدَلَ *xand-āl*, to laugh, Imp. خَانْدَهْ *vō xānd-ah*.

زَنْكَلَ *zang-āl*, to swing, Imp. زَانَكَهْ *vō zāng-ah*.

يَاپَلَ *yap-āl*, to bark, Imp. يَغَاپَهْ *vō yāp-ah*.

زَارَلَ *žar-āl*, to lament, Imp. زَارَهْ *vō žār-ah*.

لَايْبَلَ *lamb-āl*, to wash, Imp. لَانَبَهْ *vō lāmb-ah*.

وَايَلَ *vay-āl*, to speak, Imp. وَايَهْ *vō vāy-ah*.

3) This class comprises those verbs, the last (single) radical of which is *ت*. This is changed in the Imperative partly to *ʔ*, partly to *خ*, partly to *ز* and partly to *ج*; usage alone can guide

as to the change of the final letter but is not quite fixed, as in some verbs the orthography is vacillant.

(بَوْتَل) see بَوْتَل §. 127, to lead, Imp. بَوِّزْ bōz-ah (§. 128).

بَرَّانَتَل prā-nat-āḷ, to open, Imp. بَرَّانَحْ prā-naḥ-ah.

مِيتَل mīt-āḷ, to piss, Imp. مِیَوْ vō mīz-ah.

نَیَوَاتَل nyvat-āḷ, to attend to, Imp. نَیَوِزْ vō nyvaž-ah.

Exceptions from this rule are:

سَاتَل sāt-āḷ, to preserve, Imp. سَاتْ vō sāt-ah.

نَاتَل nat-āḷ, to pillage, Imp. نَاتْ vō nat-ah.

Both these verbs preserve final t in the Imperative.

Irregular is:

نَجَاتَل njaṭ-āḷ, to stick in, Imp. نَجَانْ vō njan-ah, which changes final t to n.

4) This class comprises those verbs, the final radical of which is d; this is altogether dropped in the Imperative. The three trans. verbs, ending in -ēd-āḷ, drop likewise the whole termination -ēd in the Imperative.

آوَرِیَدَل āvr-ed-āḷ, to hear, Imp. آوَرِ v-āvr-ah.

بَلَوَسِیَدَل blōs-ēd-āḷ, to afflict, Imp. بَلَوَسْ vō blōs-ah.

پُئَتِیَدَل puēt-ēd-āḷ, to ask, Imp. پُئَتْ vō puēt-ah.

اَوَدَل ād-āḷ, to weave, Imp. اَوَرِ vō ā-v-ah \*).

پِژَندَل pēžand-āḷ, to recognise, Imp. پِژَندْ vō pēžan-ah.

رَوَدَل rand-āḷ, to reap, Imp. رَوَرِ vō rav-ah.

نَیَرَدَل nyar-d-āḷ, to swallow, Imp. نَیَرْ vō nyar-ah.

\*) With euphonic inserted v.

Some verbs however retain final d, as:

خَندَل xand-āl, to laugh, Imp. «خَاَنْد» vō xānd-ah.

بَندَل šand-āl, to give, Imp. «بَند» vō šand-ah.

بلَوَدَل blōd-āl, to abrade, Imp. «بَلَوَد» vō blōd-ah.

Irregular is:

مُونَدَل mūnd-āl, to obtain, Imp. «مُوم» vō mūm-ah.

It is a curious phenomenon, that the verbs ending in final d drop it, as a rule, in the Imperative. But on nearer investigating the verbs in question we find, that this final d is originally not a constituent part of the verbal root, but that dāl, ēdāl is a verbal affix similar to the Persian Infinitive termination dan (tan) I-dan\*), which in Paštō has come into use with a small number of verbs.

For instance آَوَرِيَدَل āvr-ēd-āl (properly آَوَرِيَدَل ārv-ēd-āl) to hear, corresponds to the Sansk. आ + श्रु ā-śru (ś being first changed

\*) Vullers (Institutiones Linguae Persicae, §. 219) identifies the Persian termination tan, dan, with the affix of the Sansk. Infinitive तुम्. But it would be really wonderful, if this Sansk. Infinitive affix, which has been dropped as well in Paštō as in all the Prākṛit tongues of India (the old Infinitive ending in तुम् being now replaced by the verbal noun ending in ana, Sindhī ānu, Marāṭhī aṇē, Hindī nā, Paštō āl), would have been preserved in Persian. The fact, that the Paštō, the oldest intermediate language between the Indian and Irānian family of languages, no longer knows the Infinitive affix तुम्, speaks very strongly against such a supposition. It would be further a very curious and inexplicable phenomenon, that the Persian should form its Preterite from the Infinitive, by dropping of the Infinitive termination only an (and not the whole affix). How should in this wise a Preterite be formed in an Ārian language, the general laws of which have been laid down by the Sanskrit? But we believe, that this difficulty is easily solved. The Persian Infinitive termination dan (tan) Idan does not correspond to the Sansk. Infinitive affix तुम्, but is the affix of the Preterite passive, which in the neuter (tam, ते) forms verbal nouns, like the affix झन (see, Benfey, Sansk. Gr. §. 393. I, 1. a). This will easily explain, why in the Preterite of the Persian the termination an is dropped and d (t), Id is or must be retained.

to h and then elided); بلوئيدن (commonly بلوئد) to touch, abrade, is identical with the Hindhī बिलोना (Sindhī more original बिलोडण, Sansk. विलोडन); s is a euphonic insertion and -ēd-ḡl = Persian Idan (whereas in the form بلوئد d is preserved in the Imperative, because d is radical there); पुष्ट-ēd-ḡl, to ask (Sindhī पुछण, Sansk. पृच्छ, Persian پرسیدن purs-Idan. Similarly اَوَدَن, to weave, Pers. آویدن, Sansk. जय (Sindhī उणण, Hindī बुनना); رَوَدَن, to reap (Pāṣṭō رَو, Sansk. लू (l = r); لَوَدَن laud-ḡl, to utter, Sindhī लवण, Sansk. लप् (p = b = v). پيوندَن, to recognise, Hindī पहचाना (pahcān-nā), Sansk. प्रतिज्ञान; نغردَن, to swallow, Hindī निगलना, Sansk. नि + गृ.

5) This class comprises those verbs, the last two radicals of which are ست st. But these consonants are dropped and l substituted in their lieu.

آخستَل āxist-ḡl, to take, Imp. وَاخَل v-āxl-ah.

رَاوستَل rā-vust-ḡl, to convey (to me), Imp. رَاوَل rā-val-ah.

سکستَل skust-ḡl, to shear, Imp. وُسکَل vō skul-ah.

لواستَل lvast-ḡl, to read, Imp. وَلَوَل vō lval-ah.

Irregular are:

آغستَل āḡust-ḡl, to dress, Imp. وَاغُنَد v-āḡund-ah, which points to the Persian آغندن, whereas the form آغستَل corresponds to the Persian آغستن.

لواستَل lavast-ḡl, to disperse, Imp. وَلَوَل vō lávan-ah.

The formation of this Imperative is difficult to explain, the more so, as the etymology of most of the verbs alleged is more or less obscure.

But the termination of the Infinitive seems also in this case to be *stā*, corresponding to the Persian *stan*; *s* would thus be a euphonic insertion, as in Persian, with the only difference, that in the Paṣtō Imperative *t* has been retained, whereas it is dropped in Persian. In Paṣtō final *t* is changed to *l*, as shown in §. 5, sub l.

6) This class contains a small number of verbs, which end in *st*; in the Imperative both consonants are dropped and *r* (partly also *ṣ*) substituted in their place.

اَوښتل *ā-vušt-al*, to change, Imp. وَاړ *v-āvar-ah*.

سکاښتل *skašt-al*, to cut out, Imp. و سکاړ *vō skanr-ah*.

غاښتل *yašt-al*, to twist, Imp. و غاړ *vō-γar-ah*.

Irregular is:

غوښتل *γōšt-al*, to ask, to desire, Imp. و غواړ *vō γvār-ah*.

This formation is to be explained in the same way as the preceding; the reason, why *ین* (cerebral) is here euphonicly inserted, seems to be this, that final *t* was originally cerebral\*\*); thence also the change of *t* (instead of that to *l*) to *r* (or *nr*).

#### §. 126.

##### Irregular verbs.

The following transit. verbs cannot be brought under any fixed rule:

بال *bal-al*, to call, Imp. و بول *vō bōl-ah* (Hindī बोलना).

\*) Besides *غوښتل* there is also a theme *غَر*, the Imperative of which is regular *و غاړ*; *غوښتل* might therefore be also considered as a defective verb.

\*\*) *سکاښتل* is very likely to be referred to the Sindhi कटणु to cut (Sansk. कर्त्तन) and *غاښتل* to वटणु; that *v* may pass into *g* (γ), is well known from the Persian. *اَوښتل* *ā + vušt-al* points to the same root.

بیرل bīv-āl, to lead, Imp. بیایه biāy-ah.

مُهل muḥ-āl, to rub, Imp. وُمِه vō muḥ-ah (but وُمْنِه vō

muḥ-ah is also in use); Persian مُشیدن = مُشْتَن = مَسیدن,

Sansk. मृण्.

وَرَزَل varž-āl, to chop, to mince, Imp. either regularly وُورَزَّ

vō varž-ah, or وُورَزَن vō varžan-ah.

رَاوَسْتَل rā-vast-āl\*) } to convey, to bring (here or there)  
وَرَوَسْتَل var-vast-āl }

Impr. رَاوَل rā-val-ah, وَرَوَل var-val-ah.

وِشْتَل vīšt-āl to throw, Imp. وُوَل vō vul-ah.

#### §. 127.

##### Defective verbs.

There is a number of synonymous defective verbs in Paṣtō, of which one or the other is made use of in the Imperative. Some substitute in the Imperative another root, which is not found in the Infinitive. The most common of them are:

آخَبَل āḫḫ-āl }  
آبَل āḫ-āl } to knead, Imp. وَاغَر v-āy-ah.  
اَغَر āy-āl }

\*) The verbal theme وِسْتَل is never used by itself, but always with the prefixes رَا or وُر.

اَيَسَل ēṣ-ḡal	}	to put, to place; Imp. دَس dš-ah (from دَنَد).
يَسَل yaṣ-ḡal		
يَسَل yēṣ-ḡal		
اَيَسَوَد ēṣōd-ḡal		
يَسَوَد yaṣōd-ḡal		

In the same way the Imperative of the compounds of اَيَسَل etc. is formed, as: پَرِيَسَل prē-yaṣ-ḡal, to give up, Imp. پَرِيَسَد prē-žd-ah; similarly the Imperative of پَرِيَسَوَد prē-ṣv-ḡal to give up (which is not found without the prefix), پَرِيَسَد prē-žd-ah.

بَاسَل bās-ḡal	}	to cast out, Imp. وَبَاسَ vō bās-ah.
يَسَل yast-ḡal		

The same method follow the compounds of يَسَل, as: جَارِيسَل jār-yast-ḡal, to turn back, Imp. وَجَارِيسَ vō jār-bās-ah; نَنِيَسَل nana-yast-ḡal, to bring in, Imp. نَنِيَسَ nana-bās-ah; پَرِيَسَل prē-yast-ḡal or پَرِيَسَوَد prē-vast-ḡal, to throw, Imp. پَرِيَسَ.

بَوَتَل bōt-ḡal (obsolete)	}	to take along, Imp. بَوَزَ bōz-ah.
بَوَتَل bōtl-ḡal		

پَوَرَل pōv-ḡal	}	to graze, Imp. وَپِيَايَ vō piāy-ah.
پِيَايَل piāy-ḡal		

پِيرَل pīr-ḡal	}	to purchase, Imp. وَپِيرَ vō pīr-ah.
پِيرَوَد pīrand-ḡal		

يُؤَدِّلُ ʔōv-ʔl	}	to show, Imp. وُيَّيْه ʔō ʔay-ah.
يُؤَيِّلُ ʔay-ʔl		
يُؤَوِّلُ ʔōv-ʔl	}	to copulate, Imp. وُغَبَّه ʔō ʔay-ah.
يُؤَيِّلُ ʔay-ʔl		
يُؤَاوِّلُ kāʔ-ʔl	}	to draw, to write, Imp. وُكَاوَّه ʔō kāʔ-ah.
يُؤَيِّلُ kē-ʔl		
يُؤَتِّلُ kat-ʔl	}	to see, Imp. وُكَوَّرَّه ʔō gōr-ah.
يُؤَوِّلُ gōr-ʔl		
يُؤَدِّلُ kan-ʔl	}	to dig, Imp. وُكَدَّه ʔō kan-ah.
يُؤَوِّدِّلُ kanaud-ʔl		
يُؤَيِّنُّ līd-ʔl	}	to see, Imp. وُؤَيِّنَّه ʔō vīn-ah.
(يُؤَيِّنُّ vīn-ʔl, obsolete)		
يُؤَيِّدُّ lēʔd-ʔl	}	to load, to set out, Imp. وُؤَيِّدَّه ʔō lēʔd-ah.
يُؤَيِّدُّ lēʔ-ʔl		
يُؤَاوِّلُ nyār-ʔl	}	to fold up, Imp. وُؤَاوَّرَّه ʔō nyār-ah.
يُؤَفِّدُّ nyāʔt-ʔl		
يُؤَيِّوِّلُ nīv-ʔl	}	to take, to seize, Imp. وُؤَيِّسَّه ʔō nis-ah.
(يُؤَيِّوِّلُ nis-ʔl, obsolete)		

§. 128.

The Imperative prefix ʔ.

We have seen already (§. 124), that the prefix ʔ is usually put before the Imperative, except the verb be compounded with a verbal prefix. With the following trans. verbs the use of the prefix ʔ is prohibited:

بَاتِلَ bāel-āl, to lose (at play), to forfeit, Imp. بَاتِلْ bāel-ah.

بَوِّتِلْ bōtl-āl, to take along, Imp. بَوِّتْ bōz-ah.

بِيَوِّلْ bīv-āl, to lead, Imp. بِيَايْ bīy-ah.

بَوِّلْ ʔd-āl, to put, Imp. بَوِّ ʔd-ah.

وَرِّلْ vr-āl, to carry, Imp. وَرِّ vr-ah.

يَوِّسِّلْ yōs-āl, to bear, to carry, Imp. يَوِّسْ yōs-ah.

§. 129.

C. The Imperative of causal verbs.

1) The Imperative of those cansals, which are derived from a primitive verb, is formed quite regularly by dropping the infinitive affix āl and adding the personal terminations of the Imperative:

چِنَجَوِّلْ činj-av-āl, to detest, Imp. وُ چِنَجَوِّ vō činj-av-ah.

رَپَوِّلْ rap-av-āl, to shake, Imp. وُ رَپَوِّ vō rap-av-ah.

2) The Imperative of the derivative cansals is formed by dissolving the verb into its constituent parts and by adding to the substantive or adjective the Imperative of كَرِّلْ, i. e. كَرِّ or of كَوِّلْ, i. e. كَم, but without the prefix وُ, the verb being composite; e. g.

بَدَلَوِّلْ badal-av-āl, to change, Imp.	$\left\{ \begin{array}{l} \text{بَدِّلْ كَرِّ badal kr-ah.} \\ \text{بَدِّلْ كَم badal k-ah.} \end{array} \right.$
لَنَدَوِّلْ land-av-āl, to shorten, Imp.	$\left\{ \begin{array}{l} \text{لَنَدْ كَرِّ land kr-ah.} \\ \text{لَنَدْ كَم land k-ah.} \end{array} \right.$

The adjective must agree with the object referred to in gender and number; substantives ending in a consonant, are also often (but not necessarily) treated like adjectives and can take a feminine termination (cf. §. 122).

When the prohibitive particle *مَ* is used with the Imperative, the derivative causals form their Imperative in the usual way without being dissolved into their component parts, as: *مَ بَدَلَوْ* do not make a change! *مَ لَنَدَوْ* do not shorten!

But also in the absence of the prohibitive particle *مَ* the regular Imperative is often used, especially in the modern language, but always without the prefix *و*, the language still being conscious, that the verb is composite. Those derivative causals, which are compounded with a substantive, are already frequently treated as primitives and may then even take the prefix *و*.

تاسی مُور لَه عِلْم غِیْب خَبر کَانوئِی چِه دَ اَلَس بَه کَه حَال شِی

Inform us out of the occult science, what the condition of the Uluş (tribe, clan) will be. *Tārīḫ-e murassas* (Gulsh. I, p. 7).

بَنَاحُوئَه مِی وَوَل چِه سَنَدِی آغَازِی کَوِی

They said to their women: commence ye songs!  
(ibid. Gulsh. I, p. 11).

یَو شِه رَا کَخَه نِیرَه کَوَه بَهْرَام

بَا نَصِیب چِه بَه مُو بَیَا شِی دِهْدَنُوئَه

Spend a night with us, o Bahram! otherwise it will be a chance, that we shall see you again. *Bahrām*, V. 182.

قَر صَبَا بَیْگَه زَارِی کَوَه وَخُدَايِ تَه

اَوِشِی دِیْنِی تَوْبَه دَ رَرَه لَه خُوشِ\*)

Every morning and evening sigh to God! shed tears and blood from the depth of the heart! *Xavājah Muḥammad*.

(Gulsh. II, p. 112. 2).

---

\*) خُوش = arab. خَوْش, the hypochondria, the loins.

§. 130.

III. The formation of the tenses and moods.

The tenses and moods of the Paṣṭō verb are of three kinds:

- 1) such, as are derived from the root of the verb, as exhibited in the Imperative.
- 2) such, as are formed by means of the participle preterite.
- 3) such, as are formed by means of the participle perfect and the auxiliary verb to be or to become.

A. Tenses and moods derived from the Imperative.

From the verbal root, as coming forth in the Imperative two tenses and one mood are derived, the Present, the Subjunctive Present and the Future.

§. 131.

1) The Present.

The Present of intrans., trans. and causal verbs is derived from the root of the verb by adding to it the flexional terminations of the Present. These are:

Sing.	I pers. am, amah, as:	أَمْ د-ام, I go (أَمْ د-amah).
II	" ē	as: اَمْ د-ē, thou goest.
III	" I (īna)	as: اَمْ د-ī, he, she goes.
Plur.	I pers. ū (ūnah, ūna)	أَمْ د-ū, we go.
II	" aī	أَمْ د-ai, you go.
III	" ī (īna)	أَمْ د-ī, they go.

The personal pronouns may be put before the verb, when a stress is laid upon them, otherwise they are not required, the person being expressed already by the verbal termination.

The flexional termination of the I pers. Sing. am (amah, ama is only used in the eastern dialect and in the modern language) corresponds to the Persian am (Sansk. and Prākṛit āmi), Sindhi ā, Hindī ā; the termination of the II pers. Sing. ē corresponds to

the Persian *I*, Hindī and Sindhī ē (ē nasalised), Sansk. and Prāk. asi. In Paṣtō, Persian, Hindī and Sindhī *s* is elided and *a-i* contracted to ē, *I*. The termination of the III pers. *I* corresponds to the Hindī-Sindhī ē (Sansk. *ati*, Prākṛit *adi* or with elision of *d* = *a-i* = ē), whereas the Persian termination *ad* is more original.

The termination of the *I* pers. Plur. ā (now and then the termination *ūnah*, *ūna* is also found in older writings or in poetry), corresponds to the Sindhī ū (Hindī ē), Sansk. *āmah*, Prāk. *āma*, Persian *īm*; the termination of the *II* pers. Plur. corresponds to the Sindhī-Hindī ō, Sansk. *athah*, Prāk. *aka*, Persian *Id*; the termination of the III pers. Plur. *I* corresponds to the Sindhī *īne* (*ane*), Sansk.-Prākṛit *anti*, Persian *and*, Hindī ē. Besides *I* the Paṣtō has preserved also the termination *īna*, which approaches very closely the Sindhī; but this is now considered antiquated and only met with in poetry or older compositions. It is a curious phenomenon, that this termination *īna* has been also transferred to the III pers. Sing., very likely from no other reason but that both terminations end now in *I*.

The primitive verbs ending in *ēd-al* have in the Present either the full termination *-ēž-am* (*ēg-am*) or they may drop *-ēž* (*ēg*) and affix the flexional terminations to the root of the verb (see §. 122, a).

The derivative verbs ending in *ēd-al* have in the Present always the full termination *-ēž-am* etc. (see the paradigms, Appendix II.). The derivative causals have likewise in the Present always the termination *-av-am* etc.

زَوَ وَرَحْمَ نَكَ تَنَهَا فَغَه دُيَمَن تَه  
كَه حَاجَت تَوِي چَه مُوَر دَاوَرَه وَر لَه لَوَلَه

I go alone to that enemy; what need we go all to him?  
Bahrām V. 205.

تَهی لَاس پَوَر بَد وَهَمِن تَهی خَرَج کَا تَهی پَوَری

Sometimes they strike one hand upon the other, sometimes they wheel about, sometimes they move backwards and forwards.  
Maxzan-i paṣtō (Gulsh. I, p. 137).

§. 132. •

2) The Subjunctive Present \*).

The Subjunctive is formed, after the analogy of the Persian, by putting the prefix <sup>و</sup> (و) before the Present. If a verb commence with a long a, the prefix <sup>و</sup> coalesces with it to v-ā, as <sup>و</sup>واچوم v-āč-av-am, that I may throw.

Those verbs, which do not take the prefix <sup>و</sup> in the Imperative, refuse it also in the Subjunctive Present.

The derivatives, the intransitive as well as the causal, are dissolved in the Subjunctive Present into their component parts \*\*) and add to the substantive or adjective the Subjunctive Present of the auxiliary verb شول and کړل or کول respectively, i. e. شَم and کَم or کوم (cf. §. 163; 165; 166), but without the prefix <sup>و</sup>, these verbs being composite. In the case of intrans. verbs the adjective must agree with the subject implied by the auxiliary, and in the case of causal derivatives, with the object. Substantives ending in a consonant may, after the manner of adjectives, take a feminine termination (cf. §. 129).

The III. pers. Sing. and Plur. of the Subjunctive Present may also take the prefix <sup>و</sup> de \*\*\*), whereby a sort of Jussive or

\*) About the use of the Subjunctive see §. 194.

\*\*) Not unfrequently the undissolved form of the Subjunctive (i. e. ēž-am and -av-am) is used, when the prefix <sup>و</sup> precedes it, but always without the prefix <sup>و</sup>, which is not admissible in such verbs.

\*\*\*) The prefix <sup>و</sup> is apparently the Imperative of an obsolete root dā, to give (Pers. د, Sindhi د). In a similar way the Persian uses گُو, say, with the Subjunctive (but without the prefix <sup>و</sup>), as: گُو رَوند, say, they should go = they should go.

Precative is formed, as: *قَهْ دِ اَوِسی*, he should be, *وَدِ تَبِی*, they should flee.

As regards the position of this prefix *دِ*, it is to be noticed, that it may precede or follow the prefix *وِ*. As a rule *دِ* precedes *وِ* (separated from it occasionally by one, two or more words), if a demonstrative pronoun is connected with the verb, as: *قَهْ دِ وَاوِری* he (or they) should hear; but *دِ* follows *وِ*, if the verb is not accompanied by a demonstrative pronoun, as: *وَدِ وِی* they should see. When the use of the prefix *وِ* is prohibited in the Imperative, *دِ* precedes the verb either immediately or is separated from it by one or more nouns, as:

*کَدِ دَوَهْ بَهْخِی وِی دَ کَه یَوَهْ غَنِی بَلَهْ فَلَیِرَه پَه قَر خَف کِی دِ دِی سَمَوِی*

If he have two wives, one rich and the other poor, he shall make them equal in every right. *Favāid us-sarīrah* (Gulsh. I, p. 74).

It is to be noticed, that when *دِ* precedes the Subjunctive, the prefix *وِ* is frequently dropped as superfluous, especially in poetry; this is also the case in common prose, when a substantive with a verb forms a sort of compound verb, as: *نَظَر لَرَل*, to look to, etc.

*بَادِشَاهان دِ نَظَر پَه خَیَل کَار آو پَه خَیَل بَد وِ بَسْت لَوِی*

Kings should look after their own business and their own administration. *Kalīlah ʿ Damanah* (Gulsh. I, p. 83).

§. 183.

3) The Future.

The Future is derived from the Subjunctive Present by the addition of the prefix *بَه bah* \*). If the Subjunctive is not preceded

\*) The etymology of this Future prefix is obscure. We suppose, that it is connected with the Persian *باید*, it is necessary (Sansk. *भाष्य*);

by the prefix <sup>و</sup>, the prefix <sup>ا</sup> is either immediately put before the verb or may precede it, separated (from the verb) by some intervening words. But when the Subjunctive is preceded by the prefix <sup>و</sup>, the following is to be noticed with reference to the position of the prefix <sup>ا</sup>.

When a personal pronoun or demonstrative is connected with the verb, <sup>ا</sup> usually precedes the prefix <sup>و</sup>, as: <sup>ا</sup> <sup>و</sup> <sup>ا</sup> <sup>ا</sup> I shall arrive; if no personal pronoun or demonstrative be connected with the verb, <sup>ا</sup> usually follows the prefix <sup>و</sup>, as: <sup>و</sup> <sup>ا</sup> <sup>ا</sup> I shall arrive. But the prefix <sup>ا</sup> very frequently precedes the verb, separated from it by some intervening words, be the verb connected with a personal pronoun (demonstrative) or not \*).

Sometimes only <sup>ا</sup> is used with the Future and <sup>و</sup> dropped even in such cases, where its use is fully admitted; this is done chiefly in poetry, but also sometimes in prose, the use of the prefix <sup>و</sup> not being considered as absolutely essential for the formation of the Future.

---

to this root points also the Paṣṭō adjective <sup>ا</sup>, necessary. This would sufficiently explain, why the Future prefix <sup>ا</sup> requires the Subjunctive and not the Present tense. The Persian Subjunctive prefix <sup>ا</sup> is apparently identical with the Paṣṭō <sup>ا</sup> and would be fully explained by our supposition, The Imperative prefix <sup>و</sup> and the Future prefix <sup>ا</sup>, though now somewhat differing in form, are no doubt identical.

\*) Only in poetry <sup>ا</sup> is now and then put after the verb (§. 195 d).

دَاوَرَنَك ِهَ بَادشَاهِي كَبِي مِي نِيَار نَه شِي  
زَه خَوَاجَه مُحَمَّد ِهَ دَوَزَم وَ بَل لَوَر تَه

Under the reign of Aurang (zēb) justice is not meted out to me;  
I, Xavājah Muḥammad shall go to another quarter.

Xavājah Muḥammad (Gulsh. II, p. 106, 2).

If a verb is compounded with a separable prefix (cf. §. 119) or commences with a long syllable, the Future prefix ِهَ is very frequently (but not necessarily) inserted between the verbal prefix or the long initial syllable and the verb (or the rest of the verb); but when the verb commences with long a, only ā is cut off, which with the prefix ُ coalesces to v-ā, and the prefix ِهَ is put after it. Those verbs, which cut off the initial long syllable and put the prefix ِهَ between it and the rest of the verbal root, do not take the Subjunctive prefix ُ (\*), as little as those, which are compounded with separable prefixes; only those verbs, which commence with long a and which cut it off from the rest of the root in the Future, may take the prefix ُ, if its use be not otherwise prohibited. E. g. ِهَ نَم kšē bah n-am, I shall sit down (but also: ِهَ كَبِينَم); ِهَ پَا پَا pā bah t-am, (instead of: ِهَ پَاهَم) I shall rise; ِهَ بَو بَو bō bah z-am, I shall convey (instead of: ِهَ بَوَزَم); ِهَ پَر پَر prē bah k-am, (instead of: ِهَ پَرِيَكَم) I shall lop off; ِهَ وَ وَ v-ā bah lvaz-ī, he will fly (instead of: ِهَ وَ لَوَزِي); ِهَ وَ وَ v-ā bah čav-am (instead of: ِهَ وَ آجَوَم) I shall throw (\*\*).

The derivatives, intransitive and causal, are dissolved in the Future as in the Subjunctive Present, into their component

\*) When the first syllable is not cut off, they may well take the Subjunctive prefix, as: ِهَ جَار ِهَ وَزَم, I shall return, and ِهَ وَ جَار وَزَم.

\*\*) Like ِهَ the negation نَه is also inserted, see §. 121.

parts and add to the substantive or adjective the Future of the auxiliary verbs *شَوَل* and *كَرَل* or *كَوَل* respectively, but always without the prefix *و*, *ه*, usually preceding the noun and the auxiliary, as: *زَهْ هَ زَوَرِ شَم* I shall be old; *هَ مَاتِ كَرَم*, I shall break. The full (undissolved) form however is often met with in the Future, but without the Subjunctive prefix *و*, as: *هَ حَاضِرِ يَم*, I shall be present, instead of: *هَ حَاضِرِ شَم*; *هَ حَاضِرِ يَم*, I shall present, instead of: *هَ حَاضِرِ كَرَم* (see Appendix II; IV).

§. 184.

**B) Tenses and moods formed by means of the participle preterite.**

By means of the participle preterite four tenses and one mood are formed, viz: 1) The Imperfect 2) The habitual Imperfect 3) The Conditional or Optative of the Imperfect. 4) The Aorist (or Preterite) 5) The habitual Aorist.

The *Paṣṭō* has gone its own way in forming an Imperfect. All the modern Indian vernaculars of Sanskrit origin have had recourse to compositions and the Persian forms the Imperfect from the Aorist by prefixing the adverb *هَمی*, or shortened *می*, which in *Pārsī* still retains its original signification 'always', so that the Persian Imperfect is originally only a habitual Aorist. The *Paṣṭō* has made use of the original participle preterite in order to form an Imperfect. But thus it was compelled to find a different form for the proper participle preterite, which it has made up by adding a different termination to it, which we call, in contradistinction to the participle preterite, the participle perfect (§. 18), as it is now only used in the Perfect, though, as regards its origin, identical with the participle preterite, as will be seen in the formation of the passive voice\*).

But as in these tenses formed by means of the participle preterite there is an essential difference between the intransitive

\* The Persian has done the same, as: *رَفْتَنَ* (رَفْتَا) and *رَفْتِ*.

verbs on the one hand and the transitive and causal on the other, the former being constructed actively and the latter passively, we must, for the sake of a more easy survey, treat of the two classes separately.

### a) Intransitive verbs.

#### §. 135.

##### 1) The Imperfect.

The Imperfect is formed by adding to the verbal theme, as exhibited by the Infinitive, the substantive verb **يَم** *yam* \*), I am, etc. for the I. and II. pers. Sing. and Plural, euphonic initial *y* of *yam* however being dropped in these compositions; e. g. **تَبَلَّ** *tā-l*, to flee, I. pers. Sing. **تَبَلَّام** *tā-al-am* \*\*), I fled, **تَبَلَّيَ** *tā-al-ē*, thou fledst; I. pers. Plur. **تَبَلَّوْا** *tā-al-ū*, we fled, **تَبَلَّيْتُمْ** *tā-al-aī*, you fled.

So also: I. pers. Sing. **فُهِدْتُمْ** *pōh-ēd-al-am*, I understood, **فُهِدْتُمْ** *pōh-ēd-al-ē*, thou understoodst; I. pers. Plur. **فُهِدْتُمْ** *pōh-ēd-al-ū*, we understood, **فُهِدْتُمْ** *pōh-ēd-al-aī*, you understood.

This **al** however, to which the substantive verb is added, cannot be the affix of the verbal noun or Infinitive (= **अन**), though it outwardly quite coincides with it, as this would be quite contrary to the analogy of the Arian idioms. How should it be possible, to form an Imperfect or Aorist by affixing the Present of the substantive verb 'to be' to the verbal noun? We have therefore every reason to conclude, that this termination **al** is not identical with the Infinitive affix **al**, but that it is the Sansk. affix **त**, by means of which the participle past is formed in Sanskrit. That **t** frequently passes into **l** in Paṣtō, we have seen already §. 5,

\*) See §. 162, I.

\*\*) As soon as final **g** is followed by another syllable, it is naturally changed to **a**, to give some support to the following syllable.

sub l; a (a) is only a conjunctive vowel. It is well known, that also in Marāṭhī t has been changed to l in the participle past.

In a number of verbs this affix *al* has been dissolved to *ah*, i. e. the affix *त* (= a-l) has been, after the analogy of the Prākṛit, elided, so that only a (*ah*) has remained, as in the modern Prākṛit tongues of India (Hindī: अ, Sindhī: ऽ). This affix *ah* is, in order to avoid the hiatus, dropped altogether before the substantive verb\*), though for the I. and II. pers. Sing. and Plur. the full form -*al-am* etc. is also in use. E. g. *پوهيدآه* *pōh-éd-ah*, participle past of *پوهيدل*, I. pers. Sing. *پوهيدآم* *pōh-éd-am* (instead of: *pohéd-ah-am*) or *پوهيدآلم* *pōh-éd-al-am*, II. pers. *پوهيدى* *pōhéd-ē* (instead of: *pōh-éd-ah-ē*) or *پوهيدلى* *pōh-éd-al-ē*; I. pers. Plur. *پوهيدو* *pōh-éd-ū* (instead of: *pōh-éd-ah-ū*) or *پوهيدولو* *pōh-éd-al-ū*; II. pers. *پوهيدئى* *pōh-éd-al* (instead of: *pohéd-ah-al*) or *پوهيدئى* *pōh-éd-al-al*.

Some verbs have gone even so far, that they have also dropped the affix *ah* in the participle past; but in the I. and II. pers. Sing. and Plur. the full termination -*al-am* may be optionally used\*\*).

In the III. pers. Sing., to which the substantive verb (*دے، دى*) could not well be added, as little as in Persian, the affix *al* is never used for the masculine, but either *ah* is substituted for it or the affix *ah* is dropped altogether. In the Feminine *ah* is changed to *āh*, and where the affix *ah* has been dropped already in the Masculine, either the feminine termination *āh* is added or the original affix *al* is restored before the feminine termination in

---

\*) For this very reason, that the substantive verb quite coalesces with the participle past, the Pāṣṭō cannot distinguish the gender or the number in the participle itself; in Sindhī this is still the case, the substantive verb acceding to the masculine or feminine of the participle past (Sing. and Plur.).

\*\*) It may therefore happen, that the Imperfect quite coincides as regards the form, with the Present (which, for instance, is often the case with *کرم*, which, according to circumstances, may signify: I do and: I was made).

both cases; e. g. *دَرِيدَـاھ* *darēd-ah*, part. past of *دَرِيدَنَد*, stood, fem. *دَرِيدَـاھ* *darēd-āh* or *دَرِيدَنَدَـاھ* *darēd-al-āh*; *چَاوَد* *čāvd*, split, part. past of *چَاوَدَنَد*, fem. *چَاوَدَـاھ* *čāvd-āh* or *چَاوَدَنَدَـاھ* *čāvd-al-āh*. But when in the participle past, after the rejection of the affix *ah* for the Masculine, a vowel-change also taken has place, the Feminine is not formed from this form but from the verbal theme itself; e. g. *تَبَن* *tiṣ* (\*), fled, part. past of *تَبَل* *tē-ā*, fem. *تَبَـاھ* *tē-āh* or *تَبَلَـاھ* *tē-al-āh*; *وَت* *vōt*, part. past of *وَتَل*, fem. *وَتَـاھ* *vat-āh* or *وَتَلَـاھ* *vat-al-āh*.

In the III. pers. Plur. the participle past either ends in *al*\*\*) or in *ah*, the latter especially, when *ah* is already used in the Singular, e. g. *تَبَن* *tiṣ*, he fled, Plur. masc. *تَبَـاھ* *tē-ah* or *تَبَل* *tē-ā*, they fled; *وَت* *vōt*, he came out, Plur. masc. *وَتَـاھ* *vat-ah* or *وَتَل* *vat-ā*, they came out, recourse being had in such like formations to the verbal theme itself, as shown in the derivation of the Feminine. The Feminine Plural is always derived from the Feminine Singular, as: *تَبَـاھ* or *تَبَلَـاھ*, Singular, *تَبَي* *tē-ē* or *تَبَلَي* *tē-al-ē*, Plural, they fled.

The Persian differs from the Paštō in the III. pers. Plural, adding, as it does, the substantive verb to the participle past and forming thereby a flexional termination (*رفتند*, *raft-and*, they went). A similar flexional termination we meet also in Paštō in older compositions, viz: *ana* or *anah* (= and) which however is only affixed to such participles as end in *ah*\*\*\*), and which is used, like

\*) In *تَبَن* *i* is a euphonic insertion, as *tē* (after the rejection of *ah*) could not be pronounced; but for the Feminine no such euphonic insertion of a vowel is required. See §. 136, 1, a.

\*\*) The affix *al*, like that of the Infinitive, is always considered and treated as implying a Plural; cf. §. 42, f; §. 46.

\*\*\*) In the Plur. masc. (which ends in *al* or *ah*) *ana* may therefore always be added, as it is originally a Plural termination.

anah, for the Masculine Singular and Plural; e. g. يُفِيدُنْ  
 yūfīd-unā, he or they understood.

The flexional terminations of the Imperfect are therefore:

Sing. I. pers. -al-am, am.

II. „ -al-e, ē.

III. „ The participle past masc. and fem.

Plur. I. pers. -al-ū, ū.

II. „ -al-aī, aī.

III. „ The participle past masc. and fem.  
 (-ana, -anah, masc.).

Paradigm. Infin. سَوَّلَ sv-al, to burn.

Sing.

I. pers. سَوَّلْتُ sv-al-am or سَوِّمُ sv-am, I burnt.

II. „ سَوَّلْتِي sv-al-ē or سَوِّي sv-ē, thou burntest.

III. „ masc. سَأَ s-āh (instead of: سَوَّ sv-āh) } he } burnt.  
 fem. سَوَّ sv-āh or سَوَّلَ sv-al-āh } she }

Plur.

I. pers. سَوَّلُوْا sv-al-ū or سَوِّرُ sv-ū, we burnt.

II. „ سَوَّلْتِي sv-al-aī or سَوِّيْ sv-aī, you burnt.

III. „ masc. سَوَّلَ sv-al or سَوَّ sv-āh } they burnt.  
 fem. سَوَّلِي sv-al-ē or سَوِّي sv-ē }

But as the formation of the participle preterite, as used in the Masculine Sing. (for the Masculine Plur. always ends in ا or āh) admits of some variations, we must treat of the several classes of verbs separately.

# Formation of the participle preterite.

We have to distinguish three classes:

## 1) Verbs ending in *al*.

a) Those verbs, the theme of which ends in a consonant, drop in the Masculine Sing. the participial affix *ah* altogether (after the analogy of the Persian). If the verbal theme has no inherent vowel, i. e. if it consists of two conjunct consonants, euphonic *i* is inserted between the two, to facilitate the pronunciation, and if the latter of the conjunct consonants be *r*, a *i* is inserted for the same purpose.

جَارِدَ *čāvd-al*, to split; part. past masc. جَارِدَ *čāvd*, fem. جَارِدَةٌ

*čāvd-āh* or جَارِدَةٌ *čāvd-al-āh*; Plur. masc. جَارِدُونَ

*čāvd-al* or جَارِدَةٌ *čāvd-ah*; fem. جَارِدِي *čāvd-ē* or جَارِدِي

*čāvd-al-ē*.

مَرَّ *mr-al*, to die, p. p. مَرَّ *mar*\*) (with euphonic *a*), fem. مَرَّةٌ

*mr-āh* or مَرَّةٌ *mr-al-āh*; Plur. masc. مَرَّ *mr-al* or مَرَّةٌ

*mr-ah*, fem. مَرِّي *mr-ē* or مَرِّي *mr-al-ē*.

Exceptions from this rule are:

وَتَلَ *vat-al*, to come out, and its compounds, as: أَلَوْتَلَ to fly,

هَرَدَوْتَلَ to fall down etc., p. p. وُتَلَ *vōt* (instead of وَتَلَ),

fem. وَتَلَةٌ *vat-āh* or وَتَلَةٌ *vat-al-āh*; Plur. masc. وَاتَلَةٌ *vātah*

(وُتَلَ being treated like an adjective §. 86) or وَتَلَ *vat-al*;

fem. وَتَلِي *vat-ē* or وَتَلِي *vat-al-ē*.

خَتَلَ *χat-al*, to ascend, p. p. خُتَلَ *χōt* (quite like وُتَلَ).

b) A few verbs with radical short *a* lengthen the same in the participle past and add at the same time the affix *ah*, as:

\*) Or مَرَّ شَه *mar ē-ah*.

سَهَلَ sah-āḡ, to endure, p. p. سَاهَ sāh-āḡ, fem. سَاهَتْ sah-al-āḡh (سَاهَ sah-āḡh); Plur. masc. سَهَلْ sah-āḡ (سَاهَ sah-āḡh), fem. سَاهَلِي sah-al-ē (سَاهِي sah-ē).

c) The verbs سَوَلَ sv-āḡ, to burn and شَوَلَ šv-āḡ, to become, drop the radical semivowel in the part. past and add the affix āḡ, as: سَا s-āḡ (= سَوَا sv-āḡ), fem. سَوَا sv-āḡh or سَوَلَتْ sv-al-āḡh; Plur. masc. سَوَلَ sv-āḡ or سَوَا sv-āḡh, fem. سَوِي sv-ē or سَوَلِي sv-al-ē. In the same manner is formed شَا š-āḡ (= شَوَا šv-āḡ), fem. شَوَا šv-āḡh or شَوَلَتْ šv-al-āḡh; Plur. masc. شَوَلَ šv-āḡ or شَوَا šv-āḡh, fem. شَوِي šv-ē or شَوَلِي šv-al-ē.

Irregular is زَوَلَ zōv-āḡ, to be born; p. p. (only used in the Aorist with the prefix وُ) وَزَرُ vō zōv-u, (fem. وَزَوَلَتْ vō-zōv-al-āḡh, Plur. masc. وَزَوَلَ vō zōv-āḡ, fem. وَزَوَلِي vō zōv-al-ē.

## 2) Verbs ending in -ēd-āḡ.

The primitive as well as the derivative verbs ending in ēd-āḡ, add in the part. past the affix āḡ, as:

دَرَبَدَلْ dar-ēd-āḡ, to stand, p. p. دَرَبَدَ darēd-āḡ, fem. دَرَبَدَتْ

darēd-āḡh or دَرَبَدَلْ darēd-al-āḡh; Plur. masc. دَرَبَدَلْ

darēd-āḡ or دَرَبَدَ darēd-āḡ, fem. دَرَبَدِي darēd-ē or دَرَبَدَلِي

darēd-al-ē.

زَرَبَدَلْ zar-ēd-āḡ, to become old; p. p. زَرَبَدَ zar-ēd-āḡh etc.

About the form of the derivatives in the Aorist, see §. 139.

## 3) Defective verbs.

These derive the participle past regularly from the verbal theme (the Infinitive), though they may be irregular or defective in the Present.

تَلَّه tl-āḥ, to go, p. p. تَه tḥ\* (also written تَت), fem. تَلَّه  
tl-āh or تَلَّه tl-al-āh; Plur. masc. تَلَّه tl-āḥ or تَلَّه tl-āh,  
fem. تَلَّه tl-ē or تَلَّه tl-al-ē.

In the I. and II. pers. Sing. and Plur. both forms are in use,  
تَلَّه tl-al-am and تَلَّه tl-am. In the Aorist the form تَه, as might  
be expected, is not used but a new root is substituted (وَلَّه, لَّه\*)  
from which is formed the part. past لَّه lār or وَلَّه volār (besides  
وَلَّه and وَلَّه). The compounds رَلَّه, رَلَّه, رَلَّه follow  
the same rule. (See Appendix VI).

خَمَّاسْتَل {amlāst-āḥ} to lie down, p. p. خَمَّاسْت {amlāst.  
خَمَّاسْت {aml-āḥ}

دَرُومَل drūm-āḥ } to go, p. p. دَرُومَيْد drūmēd-āḥ.  
دَرُومَيْد drūmēd-āḥ }

رَاغَل rā-yl-āḥ, to come, p. p. رَاغَل rā-tḥ (like تَه); I. pers. Sing.  
رَاغَل rā-tl-am or رَاغَل rā-tl-al-am.

From the compound verb رَاغَل vōrayl-āḥ (= vōrā-yl-āḥ) to  
come, no participial form is used for the Imperfect. In the  
Aorist the part. past. رَاغَل rā-yl-ai is used and from رَاغَل  
likewise رَاغَل vōray-ai, fem. رَاغَل rā-yl-āh, رَاغَل rā-yl-al-āh and  
رَاغَل vorayl-āh, رَاغَل vōrayl-al-āh; Plur. masc. رَاغَل rā-yl-āḥ or  
رَاغَل rā-yl-āh, رَاغَل vorayl-āḥ, رَاغَل vōrayl-āḥ; fem. رَاغَل

\*) Instead of تَلَّه tl-āḥ.

\*\*) In وَلَّه volār-āḥ vō is a verbal prefix (not the prefix of the  
Aorist), see §. 119.

rā-yl-ē etc. In the I. and II. pers. both forms are in use رَاغَلَمَ  
rā-yl-am and رَاغَلَمَ, rā-yl-al-am etc. (See Appendix VII).

رَاغَرَدَ رَاغَرَدَ-اَل }  
رَاغَرَدَ رَاغَرَدَ-اَل } to wallow, p. p. رَاغَرَدَ, ryağt.

خَه وَآتَى وَمَا تَه حَالِ دِ خَه وَ تَه هَجَرَانِ كَه  
نُورِ خَبَرَنَارِ تَه وَ تَه زَرِ سَوَمِ سَوَمِ سَوَمِ

What doest thou say to me? what was thy state in separation?  
I did not heed any thing else, I burnt, I burnt, I burnt in my  
heart. Xušh'āl (Gulsh. II, p. 51, 2).

نُوحِ زَوِیِ چِه تَه بَدَانُو سَرِه کِنَاسَتِ نَ بَدَانُو تَه فَحَبَتِ نَاخَلَفِ شَه

The son of Nūh' (Noah), who sat together with wicked people,  
became degenerate by the society of the wicked. Xušh'āl (Gulsh.  
I, p. 158).

#### §. 137.

#### 2) The habitual Imperfect.

From the simple Imperfect the Pağtō forms a habitual  
Imperfect, denoting repeated lasting action\*), by means  
of the particle به bah\*\*), which may either precede (separated by

\*) On the use of the habitual Imperfect in conditional sentences  
see §. 216, 2.

\*\*) It is difficult to say, what the origin of this particle is (for  
it cannot be properly called a prefix, as it may also follow the verb).  
Very likely bah is shortened from अभवत् (bhavat), it happened  
that, and the prefix of the Aorist , , may be similarly shortened  
from अभूत् (Sindhi हो, Hindi हुआ, Prāk. हुआ), cf. §. 162, 4.  
That the Sansk. root भू is employed in the formation of tenses is  
clearly proved by Bopp, Compar. Gram. §. 526; compare the Latin  
am-a-bam, am-a-vi, am-a-bo. — The Persian Aorist prefix به sounds  
in Pārsi still ba and is apparently identical with the Pağtō به.

one or more words) the verb or follow it, as: خَتَلَمَ بِهِ or خَتَلَمَ  
I ascended repeatedly or I used to ascend.

فَمَسَا تِلْكَ بِدَ بِهِ غُرُونُو بِهِ سِينْدُونُو بَرَابَرِ

The staff used to go straight on mountains and rivers. Bābī  
Jān (Gulsh. I, p. 126).

بِسْ لَهْ قَعَهْ بِهِ يَبْتَنَانَهْ لَهْ قَعَهْ غَرَّ رَاتَلَلْ رِعَايَا بِهِ مِي تَاخْت تَارَاجْ كَوَلْ

After that time the Afghāns used to come down from that  
mountain and to pillage the peasantry.

§. 138.

8) The Conditional (Optative) of the Imperfect.

From the Imperfect the Paštō derives a Conditional mood,  
which may also stand for an Optative, if preceded by a par-  
ticle denoting a wish or desire, as: کاشکې kāškē, would that!  
The Conditional is formed by adding to the Imperfect, instead of  
the flexional terminations, the termination ai, ē, ēē, which remains  
the same for all persons and number\*), as: پوهیدلې pōhēd-al-ai,  
پوهیدلې pōh-ēd-al-ē, پوهیدلې pōh-ēd-al-ēē, or with rejection of  
the participial affix al: پوهیدې pōh-ēd-ai, پوهیدې pōh-ēd-ē,  
پوهیدې pōh-ēd-ēē, I, thou etc. would understand. But in order  
to point out the person and number the personal pronouns must  
be always added, if they be not otherwise indicated.

The derivative verbs are usually (but not necessarily)  
dissolved into their component parts and the Conditional of the

\*) The cognate idioms offers no analogy to this Paštō mood, we  
do therefore not venture any conjecture on its formation for the present.  
In form it coincides with the participle past conjunctive, as  
used in connexion with شول, to be able (see §. 169), which also has  
the three terminations ai, e and ēe. But in spite of this outward  
uniformity both forms can hardly be the same.

auxiliary شَوَل i. e. شَوَى, شَوِي, شَوَاي (or شَوَلَى etc., see §. 163, 6) is added tho the noun.

Sometimes also a Conditional of the Aorist it met with, i. e. the prefix of the Aorist ' is put before it, especially in optative sentences. (See §. 198).

The Conditional or Optative of the Imperfect is in common use through all persons only with intransitive verbs; it is also found in transitive verbs (§. 145), but far more rarely and only in the third person Sing. and Plural. On the syntactical use of the Conditional of the Imperfect, see §. 198; 216, 2.

كَمْ هَمْ تَبَيَّنَتْ خَلَاصِيْدِي جَلِي بِهْ خَلَاصْ شَوْم  
نَ قَضَا لَهْ لَاسْ كَوْمْ لَوَزِي تَهْ حَمْ

If I would be freed by flight, I would have been freed from it;  
From the hand of destiny whither shall I go?

Xuṣṣ'āl (Gulsh. II, p. 50, 1)

سَتَرَكِي بُيْ صَبَا تَهْ دُخْتِي جِهْ تَوْ حَلْ صَبَا شَوَلِي زَهْ لَهْ دِي كَوْرْ دَوْتِي

His eyes rose towards the morning (saying): that it once would become morning, that I would get out of this house!

#### §. 139.

#### 4) The Aorist.

The Aorist is formed by putting the prefix ' vō (و, vōh) before the Imperfect, as: تَبَلَمَ ' vō tē-al-am, I fled, وَتَبَسَ ' vō tiq, he fled. But all verbs, which in the Imperative do not admit the prefix ' (cf. §. 124), refuse it also in the Aorist.

Some verbs optionally take or drop ' in the Aorist, as: پَاښِدَل pāṣēd-al, to rise, شَوَل šv-al, to become (see §. 163, 7).

Derivative verbs are always dissolved into their component parts in the Aorist and the Aorist of شَوَل is joined to the ad-

jective, which in gender and number must agree with the subject implied by the auxiliary, as: *تېرېدل* *tēr-ēd-aḡ*, to pass by, Aorist *تېر شه* *tēr ā-ah*, he passed, fem. *تېره شه* *tēr-āh ēvāh*, she passed.

*يادېدل* *yād-ēd-aḡ*, to be remembered, Aorist *ياد ېام* *yād ēv-am*, I was remembered, fem. *ياده شه* *yād-āh ēv-am* (from *ياد* s. m. memory), substantives ending in a consonant, also being optionally treated like adjectives.

Many derivatives however (especially those compounded with a substantive) form their Aorist like primitives, without being dissolved into their component parts.

زه څو وارو جنګ ته ورغلم صاحب  
ما پر هېڅ کي و نه کړه هه جنګونه

I came different times to the battle, Sir, (but) I could not at all defeat him in the battles (Bahrām V. 199).

وږېږېدم چه نه خپلي ږېږي به قصد حما ډ فلاکت وکا

I was afraid, that they will make a design to kill me out of their own fear. *Gulistān* (Gulsh. I, p. 162).

ډ چړم نه څو پاڅېده هه طبل و زغاسنه چړم مخ هه کړېږ ز ښو نه  
تهلکي ډ ترورۍ خلاص شه

He (the fox) rose from the ambush of the cock and rushed on the drum; the cock took to flight and escaped from the perdition of the fox. *Kalīlah ō Damanah* (Gulsh. I, p. 105).

الفصه چه هېښانه فرار شول ډ کابل ډ غرونو هه ډرو ډموتل

To be short, when the Afghāns fled, they entered the valleys of the mountains of Kābul. *Tārīx-i-murassas* (Gulsh. I, p. 7).

§. 140.

5) The habitual Aorist\*).

In the same manner as from the Imperfect, so also from the Aorist a habitual Aorist is derived by means of the particle به, which may either precede the verb (separated by one or more words) or follow it. When the verb does not admit the prefix و in the Aorist, the habitual Aorist outwardly coincides with the habitual Imperfect and only the context can decide, which tense is intended. The habitual Aorist denotes a repeated action in past time (§. 200), as: زه به و وېرېدم, I was (often) afraid; وېرېدتم به I used to fall (or: I fell repeatedly at a certain time).

نقل دى چه ده عقه آوان ده بېټمنو كېنى دا رسم هم وه چه زغمى به  
بى ده حد ن بلاغت و رسېدل ن پلار ن مور مال ده بى بو تر بله  
قسمت كړ و پلار مور ته ده بى هم بڅړه براهه وركړه

It is told, that at that time there was also this custom amongst the Afghāns, that when their sons arrived at the age of puberty, they used to divide the property of father and mother amongst each other and that also to father and mother an adequate portion was given by them. Tārīḫ-i-muraggaḡ (Gulsh. I, p. 4).

چه به ن بو سغېږو مال مېوېشى و مېړى ته ده چراگاه وړغى تاخت  
و تاراج به بى كړ

When the cattle of the Yusufzais used to come to the plain to pasture, they pillaged it (every time). Ibid. (Gulsh. I, p. 11).

\*) The Sindhi also has a habitual Aorist, formed by the particle به. In Persian too we find some remnants of a habitual Aorist, as occasionally همى is put before the prefix به of the Aorist.

**§. 141.**

## b) Transitive and causal verbs.

As the participle past of transitive and causal verbs has necessarily a passive signification, as in Sanskrit and the modern Prākṛit tongues of India, the tenses formed by means of this participle are constructed passively, the proper subject (or agent) being put in the Instrumental and the object in the Nominative\*. These tenses can therefore only then be employed, when the agent (in the Instrumental) is expressed by a noun or by a pronominal suffix; if the agent is not known or expressed, the proper Passive must be resorted to (§. 170). The flexional terminations are the same as those of intransitive verbs (§. 135).

§. 142.

### 1) The Imperfect.

In reference to the formation of the Imperfect the same rules hold good, which we have already laid down in §. 135. In the first and second person Sing. and Plural the flexional terminations always accede to the participial affix -al, in the third person Sing. and Plural the participle past alone is used, as mentioned already. For the elucidation of the rules given the following paradigm may serve.

Inf. شَرَلَ *šar-la*, to expel; p. p. شَارَّ *šār-ah*, expelled.

## Sing.

I. pers. زَاہِی شَرَلَمْ zah ē šar-al-am, I was expelled by him (them).

II. „ تَه مَي شَرَلِي tah ē šar-al-ē thou wast expelled by him.

III. " *hayah ē sār-ah, m., he*  
*hayah ē sār-al-ah, f., she* } was expelled by him.

\*). The Sindhi forms from active verbs the same tense, implying a passive signification, as the Paštō does; compare my Sindhi Gram. §. 48. 2. b. In Hindi, Marāṭhi, etc. the formation of this tense is not known.

Plur.

- I. pers. مُو بِی شَرُو mūz ē šar-al-ū, we were expelled by him.  
 II. " تَاسِی بِی شَرُو tāsē ē šar-al-āI you were expelled by him.  
 III. " هَا یَهِ شَرُو hayah ē šar-āI, m. }  
                   هَا یَهِ شَرُو hayah ē šar-al-ē, f. } they were expelled by him.

But as the formation of the participle past of transitive verbs (the causals are regular) offers many varieties and partly irregularities, we must enter into particulars.

§. 143.

The formation of the participle past.

We have to consider here the following classes:

1) Those verbs, which end in a consonant or semi-vowel (single t and to a certain degree d excepted), add to the verbal theme the affix *āh* (= t-ah, see §. 135), lengthening at the same time short radical a (but only in the Singular masc.). E. g.

بَلَّ bal-āI, to call, p. p. بَلَّه bāl-āh, fem. بَلَّه bal-al-āh; Plur.

masc. بَلَّ bal-āI, fem. بَلَّی bal-al-ē.

زَغَرَزَ zyūr-āI, to preserve, p. p. زَغَرَزَ zyūr-āh.

نِیَوَل nīv-āI, to take, p. p. نِیَوَ nīv-āh\*).

آجَوَل āč-av-āI (causal), to throw, p. p. آجَاوَ āč-āv-āh, āč-āv-ōh.

مَاتَوَل māt-av-āI (causal) to break, p. p. مَاتَاوَ māt-āv-āh,

\*) Verbs, which end in v, as well as all causals, change the termination *āh* commonly to v-uh, v-ōh, vō or vū in the eastern part of Afghanistan, as: آجَاوُ āč-āv-uh or āč-āv-ōh, or lengthened آجَاوُ āč-āv-ū and آجَاوُ āč-āv-ō; in the west the termination *āh* is prevalent.

māt-āv-ōh, fem. مَاتَوَہ māt-av-al-āh; Plur. masc. مَاتَوَل  
māt-av-āl, fem. مَاتَوَلِي māt-av-al-ē.

Those verbs, the radical short a of which is long by position, may or may not lengthen it, according to usage, as:

بَہندل bānd-āl, to bestow, p. p. بَہاند bānd-āh.

وَرَزَل varž-āl, to mince, p. p. وَرَز varž-āh.

Those verbs, the theme of which consists only of one single consonant or of two conjunct consonants, simply add the termination āh, as:

لَل l-āl, to utter, p. p. لَل l-āh\*) (fem. لَل l-āh or لَل l-al-āh).

کَرَل kr-āl, to do, p. p. کَر kr-āh.

وَل vl-āl, to wash, p. p. وَل vl-āh\*).

But a number of verbs of this kind drops already the termination āh, especially if the verbal theme consists of two conjunct consonants. In this case a euphonic i is inserted between the two consonants, and a, if the latter consonant be r (cf. §. 136, 1, a).

کَہل kē-āl, to write, p. p. کَہ kiē (besides کَہ kē-āh).

کَرَل kr-āl, to do, p. p. کَر kar (کَر).

لَہل lē-āl, to load, p. p. لَہ lē.

خَوَرَل xvar-āl, to eat, p. p. خَوَر xōr, original خَوَر xvar being contracted to xōr, fem. خَوَرَل xvar-al-āh.

It is to be noticed, that those verbs, which lengthen short a in the Imperative (cf. §. 125, 2), commonly have the participle past in the Plural, as they imply a plurality of action, as:

\*) لَل l-āl is shortened from lv-āl, Sindhi लवण, Sansk. लप्.

\*\*) وََل is derived from the Sansk. साव् (caus.), root सु, by transition of p to v.

غَيَلَ yap-āl, to bark, (Imper. وَغَاهِ), p. p. غَيَّلَ yap-āl.

خَنَدَلَ xand-āl, to laugh, p. p. خَنَدَلَ xand-āl.

نَرَلَ nar-āl, to cry out, p. p. نَرَلَ nar-āl.

وَيَلَ vay-āl, to speak, وَيَلَ vay-āl\*).

Besides these verbs, which lengthen short a in the Imperative, many other verbs, when not referred to a special object, take the Plural of the participle past (masc.), as a plurality of action is implied in them; such are:

آبَىَّ āb-āl, to knead, p. p. آبَىَّ āb-āl.

تَوَكَّلَ tūk-āl, to spit, p. p. تَوَكَّلَ tūk-āl.

شَبَىَّ šib-āl, to drink, p. p. شَبَىَّ šib-āl.

فَرَمَايَ farmāy-āl, to command, p. p. فَرَمَايَ farmāy-āl.

كَتَلَ kat-āl, to see, p. p. كَتَلَ kat-āl.

لَنَبَلَ lamb-āl, to wash, p. p. لَنَبَلَ lamb-āl.

مَنَلَ man-āl, to mind, p. p. مَنَلَ man-āl.

مَيَّتَلَ mīt-āl, to piss, p. p. مَيَّتَلَ mīt-āl.

وَلَلَ vl-āl, to wash, p. p. وَلَلَ vl-āl.

وَيَارَلَ viār-āl, to boast, p. p. وَيَارَلَ viār-āl.

The following three verbs form their participle past irregularly:

بَايَلَلَ bāel-āl, to lose at play, p. p. بَايَلَوُ bāelō, fem. بَايَلَلَّة  
bāel-al-āb.

---

\*) The p. p. وَى ve or وَىَّ vāy-āh is also in use.

تَرَبَّلَ trapl-ā, to jump, p. p. تَرَبَّلُو trapl-ō (but also تَرَبَّلَ trapl-āh).

وَيَلَّ vay-ā, to speak, p. p. وَيَ ve (besides وَيَلَّ).

2) Those verbs, which end in ت and د, drop the termination āh, as:

a) اِنْتَلَّ prā-nat-ā, to open, p. p. اِنْتَلَّ prā-nat.

بَوَّلَ bōt-ā }  
بَوَّلُوا bōt-ā } to take along, p. p. بَوَّلَ bōt.

نَوَّاتَ nyvat-ā, to attend to, p. p. نَوَّاتَ nyvat.

Excepted from this rule are:

نَاتَ nat-ā, to carry off, p. p. نَاتَ nāt-āh.

سَاتَ sāt-ā, to preserve, p. p. سَاتَ sāt-āh.

كَتَلَ kat-ā, to see, p. p. كَوَّتَ, fem. كَتَلَتْ kat-al-āh.

b) رَوَّلَ rand-ā, to reap, p. p. رَوَّدَ raud.

أَوَّلَ ūd-ā, to weave, p. p. أَوَّدَ ūd.

مَوَّنَدَ mūnd-ā, to obtain, p. p. مَوَّنَدَ mūnd or مَوَّنَدَ mūnd-āh.

The termination āh is however often added to verbs ending in d, so that it is more or less optional to add or to drop it. Those verbs ending in d, which have radical short a, usually lengthen it, as:

يَاوَدَ yand-ā, to dislike, p. p. يَاوَدَ yānd-āh.

3) Those verbs, which end in شت, ست and بشت, drop the termination āh altogether in the participle past, as:

لَوَّسَتَ lvast-ā, to read, p. p. لَوَّسَتَ lvast.

وَيَّسَتَ višt-ā, to throw, p. p. وَيَّسَتَ višt.

غَوَّيَّتَ γōt-ā, to wish for, p. p. غَوَّيَّتَ γōt.

# The participle past of defective verbs.

The participle past is sometimes derived from several defective themes at the same time, sometimes only from one. We let here follow a survey of the most common defective synonymous verbs, to show thereby, from which verbal theme a participle past may be formed and from which not.

ایبیل ēḡ-ḡl	} to put; p. p. ییبش yēḡ-ḡl	} Both are only used in the Imperfect; in the Aorist the compounds (with کبی) are employed.
یبیل yēḡ-ḡl		
یاḡ-ḡl		

ایبوتل ēḡōd-ḡl	} to put; p. p.	ایبوتل ēḡōd	} Only used in the Imperfect; in the Aorist the compound verb (کبی) is employed.
یبوتل yaḡōd-ḡl		یبوتل yaḡōd	

ایبوتل ēḡav-ḡl	} to put; p. p. یبوتل yaḡav-ḡ. Only used in the Imperfect; in the Aorist the compound verb (کبی) is employed.
یبوتل yaḡav-ḡl	
ژدل ḡd-ḡl *)	

Compound verbs (with the prefixes کبی and یری).

پریردل prē-ḡd-ḡl	} to give up;
پریروتل prē-ḡōd-ḡl	
پریروتل prē-ḡōd-ḡl	} to give up; p. p. پریروتل prē-ḡōd.
پریروتل prē-ḡv-ḡl	
پریروتل prē-yaḡ-ḡl	} to discontinue; p. p. پریروتل prē-ḡō.
کبیردل ksē-ḡd-ḡl	
کبیروتل ksē-ḡv-ḡl	} to put down; p. p. کبیروتل ksē-ḡō, fem.
کبیروتل ksē-ḡv-ḡl	

\*) Those verbs, which have no participle past, usually also want the participle perfect.

بَاسَل bās-ā	{	to expel, p. p. یَوسَت yōst (from an obsolete theme یَوسَتَل yōst-ā).
یَاسَتَل yast-ā		

But the compounds of یَاسَتَل may form the p. p. regularly, as:

پَرِیَوسَتَل prē-vast-ā *	{	پَرِیَوسَت prē-vast
پَرِیَاسَتَل prē-yast-ā		پَرِیَاسَت prē-yast

to throw, p. p.

کَیَبِیَسَتَل kâē-yast-ā, to insert, p. p. کَیَبِیَوسَت kâē-yōst.

بَوَتَل bōt-ā	{	to convey; for the Imperfect بَیَو biv-āh or بَوَتَل bōt-ā (fem. بَوَتَلَة bōt-ā) is in use, for the Aorist only بَوَت.
بَوَتَلَل bōtl-ā		
بَیَوَل biv-ā		

پَوَدَل pōv-ā	{	to pasture; p. p. پَوَوَد pōvū (fem. پَوَوَدَة pōvū-ā).
پِیَایَل piāy-ā		

پَشَوَل pšv-ā	{	to show; p. p. پَشَوَو pšvū.
پَیَایَل pāy-ā		

غَرَل ʾar-ā	{	to twist, p. p. غَیَاسَت ʾašt.
غَیَاسَتَل ʾašt-ā		

غَوَدَل ʾōv-ā	{	coitum facere, p. p. غَوَوَد ʾōvū (in the west غَای ʾāy-āh).
غَایَل ʾay-ā		

کَتَل kat-ā	{	to see, p. p. کَوَت kōt.
کَوَرَل gōr-ā		

\*) In پَرِیَوسَتَل ِ stands euphonically for ی, both verbal themes being the same.

کشد kē-āl	} to draw, to write; p. p. کشیده kē-āh or کشید kīd (also written کشید kōē).
کشید ēk-āl	
کشاید kaš-āl	
کنددل kand-āl	} to dig; p. p. کند kand.
کندل kan-āl	
وَرَد vr-āl	} to carry, p. p. (for the Imperfect) وَرَد var, in the Aorist وَرَدَ yōvar or وَرَدُ yōvōr (from an obsolete theme وَرَدَ).
وَرَسَد yōs-āl	
وَزَل važ-āl	} to kill, p. p. وَزَد vāž-āh or وَزَی važ-ai.
وَزَلد važl-āl	

بِیَوَنَتِی کِه چَا بَلَم زِه بَه خَوَنِدِه کِرَزِیدَنَم

Though I was called by some one mad, (yet) I wandered about happy. Yusuf and Zulaiḡā (Dorn, Chr. p. 214).

زُلیحَا نَ رَرِه تَخَنده رَا زَن مِیَنی هَم سَاتَنده

Zulaiḡā kept the secret of her love concealed in her heart.

Yusuf and Zulaiḡa (Dorn, Chr. p. 181).

سَرَا سِیمَه اَو هَر پِشَانِ هِه تَالِ نَ فِکَر مِی نَ شَتُرَبَه نَ کَار زَنکَل

Amazed and perplexed he swang in the swing of reflection on the action of Shuturbah. Kalīlah ō Damanah (Gulsh. I, 110).

تَا دُوسْتَانِ زَهِیرَوَلِ نَ تِه دَوَارِه

Thou didst aggrieve thy friends for his sake.

Bābū Jān (Gulsh. I, p. 131).

قَعَه بَا قِی غَلَه مِی هِه بَل حَا قِی کَهِیَبَوَه \*

He put that remaining corn in another place.

Kalīlah ō Damanah (Gulsh. I, p. 90).

---

\* کَهِیَبَوَه is here the Aorist (in form identical with the Imperfect).

§. 144.

2) The habitual Imperfect.

The habitual Imperfect is formed, as shown already, by putting before or after the verb the particle به.

دَ كَابُلِ عَالَمَ به بِي دِهَرِ دِهَرِ آزارَوَهْ مَالَوَنَهْ به بِي رَانِيَوَلِ نَا مَنَاسِبِ  
كَارَوَنَهْ به بِي كَوَلِ

The people of Kābul were very much oppressed by them; they used to seize their cattle and to do unbecoming things.

Tārīḫ-i muraggaḥ (Gulsh. I, p. 7).

مَالَوَنَهْ به بِي سَرَهْ پَتَوَلِ خَوَرَلِ به بِي

They concealed their cattle before each other and ate them.

ibid. (Gulsh. I, p. 17).

§. 145.

3) The Conditional (Optative) of the Imperfect.

As noticed already in §. 138, the Conditional (and Optative) of the Imperfect is in regular use only with intrans. verbs, from trans. verbs it is seldom formed and only in the III. pers. Sing. and Plural, the habitual Imperfect being commonly substituted in its place (cf. §. 46, 2), as the terminations of the Conditional of trans. verbs are liable to be mistaken. It is understood, that the Conditional (and Optative) of the Imperfect of trans. verbs must be constructed passively and that the agent must accompany the verb in the Instrumental. The terminations are the same as those of intrans. verbs (cf. §. 138) and do not undergo any change for gender and number.

In Optative sentences the Aorist prefix دَ also may be put before the Optative of the Imperfect, if the action is to be represented either as past already or as passing quickly.

كَهْ مَا قَوَسَ دَ مَرِيْدَانَوِ دَ نِيَوُ نَهْ كَوَلِي هَهْ خَوَرَوِ خَبَرَوِ دَ غَلَهْ نَهْ  
غَلِيْدَقِ چِهْ هَهْ وَقْتِ دَ فَرَصَتِ بِي حَلْمَا جَامَهْ دَهْتَوَلِي اَوْتَرَوَرِي

حِرْصَ نَه كُپِ خُوْلَه بُی هَه خُونَخَارِی نَه كُكُورَلِی چَا هَه دَ دِی  
كِبْدَه نَه خِیرَكَه

If I had not been ambitious to get disciples, I would not have been deceived by the sweet words of the thief, who concealed my clothes when he found an opportunity; and if the fox had not been greedy and had not polluted his mouth by blood-eating, nobody would have torn up his belly.

Kalīlah ō Damanah (Gulsh. I, p. 114).

دَه وَوَه لَبْدَايِ هَه سَتَرَكُو كَلِ اَنْدَامَه  
مَا هَه دِی هَسِی جَامِی كُپِی رَنَكِبِی

He said: Would that (once) the rosy-bodied would be seen (by me) with the eyes!

I have coloured my clothes for her sake.

Bahrām, V. 350.

§. 146.

4) The Aorist.

The Aorist is formed by putting the prefix <sup>و</sup> vō before the Imperfect. When in the Aorist the agent is expressed by the pronominal suffix <sup>بِی</sup> bi, by him (her), them, it is frequently inserted between the prefix <sup>و</sup> vō and the verb, as: <sup>و</sup> vō <sup>بِی</sup> bi <sup>و</sup> vō ē ve, he said. Further it is to be noticed, that when a verb commencing with a long syllable has the agent expressed by the pronominal suffix <sup>بِی</sup> bi, the first syllable may be separated from the verbal theme and the pronominal suffix <sup>بِی</sup> bi inserted between it and the remainder of the verb, but only when preceded by the prefix <sup>و</sup> vō and followed by the negation <sup>نَه</sup> neh, as: <sup>و</sup> vō <sup>بِی</sup> bi <sup>نَه</sup> neh <sup>و</sup> vō ē nah vrēdāh, he did not hear (from <sup>و</sup> vō <sup>بِی</sup> bi <sup>نَه</sup> neh <sup>و</sup> vō ē nah vrēdāh), cf. §. 171.

Those verbs, which do not take the prefix **و** in the Imperative, forego it also in the Aorist. In the Aorist of **و** (p. p. of **وَيَلَّ**) and **مَرَّ** (p. p. of **مَرَّ**) the prefix **و** may be optionally dropped.

The causal derivatives are usually dissolved in the Aorist into their component parts and join with the noun in question the Aorist of **كَرَّلَ** (cf. §. 165, 6), as: **زَهْ ثِي جَوْرَ كَرَّمْ** *zah ē jōr kr-am*, I was made whole by him. The prefix **و** is never used with them, the verb being considered composite. The adjective must agree with its subject in gender and number, but also substantives, ending in a consonant, usually take the fem. termination.

Some defective verbs have a separate form for the Aorist, as shown in §. 143.

نَوْرِ ثِي زِرْ خِيَمَهْ هَارَهْ كَرَمَ  
قَعْدَ كَايَ وَ دَرَوَهْ

Then she made a slit in the tent and said: come, look!  
She called Zulaiyā and placed her there.

Yusuf and Zulaiyā (Dorn, Chr. p. 209).

تَا سُوْنَهْ دِي وَاقَعِي چِهْ تَبِيْرَهْ شَوَهْ وَ لِيْ مُوْ خَبَرَهْ كَرَمَ

Why were we not informed by you of this accident, that happened?  
Tārīḫ-i murassas (Gulsh. I, p. 7).

كَشَرِ دَرْدَرِ ثِي فِكْرِ دَكْرِ چِهْ دَوْلَتِ خَوْمَنَچْ هَهْ زَوَالِ كَرِ آسْمَانِ وَ بِشَهْ نَ  
بِي وَ فَاثِيْ آغَا زَهْ كَرَمَ

His younger brother thought: wealth has directed its face towards the end (i. e. will cease) and heaven has commenced the practice of unfaithfulness. *Kalīlah ō Damanah* (Gulsh. I, p. 86).

لَارِ بَارِيَكَهْ شَبَهْ تَارِيَكَهْ مُقَدْلِ نَابُومَهْ لَارِ ثِي غَلَطَهْ كَرَمَ هَهْ خَلَاكَتِ وَ رَسِيْدَلِ

The road (was) narrow, the night dark and the Mughals without guide; they missed the road and ran into perdition.

§. 147.

5) The habitual Aorist.

This tense is formed by adding to the Aorist the particle *به*, which may precede or follow it. The habitual Aorist of those verbs, which do not take the prefix *و* in the Aorist, outwardly coincides with the habitual Imperfect, so that the proper tense must be gathered from the context.

عِفِّي بِنَجْیِ چِه دِه بَد کَارِی اَو دِه نَافَنجَارِی مَشْهُورَه اَو مَعْرُوفَه نَ  
عَالَم وَه دِیَنجِی بَه مِی نَ بَد کَارِی دِنَارَه وَ اَخِیستی

That woman, who was well known amongst the people by her wickedness and villany, used to take slave-girls for the sake of prostitution.

Kalilah o Damanah (Gulsh. I, p. 111).

شَیخ بَه کَلَه عَاشِقِی کِه سَرَه دِرِیَنِیَوَه

لَاس وَ کَسَت مِی نَه رَسِیَوِی بَارَسَائِی کِه

When did ever the Sheikh discontinue love from his head?

His hand does not reach it and (so) there is abstinence.

Xush'āl (Gulsh. II, p. 56, 2).

C. Tenses and moods, which are formed by means of the participle perfect and the auxiliary „to be“.

By means of the participle perfect and the auxiliary „to be“ three tenses and three moods are formed, viz: 1) The Perfect 2) The Subjunctive of the Perfect 3) The Pluperfect 4) The Subjunctive of the Pluperfect 5) The Conditional (Optative) of the Pluperfect 6) The Future past.

But as the intrans. and trans. verbs follow a different construction in these tenses (and moods), we must treat of both classes separately.

# I. Intransitive verbs.

## 1) The Perfect.

The Perfect is formed by the participle perfect (see §. 18) and the auxiliary verb *yam*\*, I am etc. (cf. §. 162, 1), the participle agreeing with its subject in gender and number, as: *tə́l-ai yam*, masc., *tə́l-al-e yam*, fem, I have fled; Plur. com. *tə́l-al-I yā*, we have fled (cf. §. 87, d).

Some verbs connect a synonymous adjective with the auxiliary *yam* etc. instead of the participle perfect, as *mər də́*, he has died (instead of: *mər-ə́ də́*, which is not in use), *nāsət yam*, I am seated (instead of the heavy *kə́yənāsət-ə́ yam*, which is not used), *də́dət də́* he has fallen (instead of: *də́dət-ə́ də́*).

The intrans. derivatives are dissolved into their component parts in the Perfect and add to the noun the auxiliary *yam* *šə́* etc. (cf. §. 163, 9). The adjective must agree with its subject in gender and number, but the substantive also, if it end in a consonant, may be treated like an adjective. Many derivatives are already treated like primitives, without being dissolved into their component parts; with some both forms are in use, as *zə́ də́dət-ə́ yam* or *zə́ də́dət-ə́ yam*, I have understood.

دَا وَبَا دَا لَكِيدَلِي دَا هَر كُورَه هَر دَرَك

This pestilence has stuck to every house, to every abode.

H'amid (Gulsh. II, p. 94).

خُور دَا زَمَانَه كِهِي اِهِيَّت دِير شَه دَا عَالَمُو دُورِي دَا شُورِي دِي

لَه بُورِي دَر غَه بُورِي نَه دُورِي

\* ) The auxiliary may follow or precede the participle.

In our time calumny has become much, the noses of the people have been filled of smell, they do not understand that smell.  
Favāid uš-šarīṣāh (Gulsh. I, p. 59).

دوستى ده دښمنى ده وپل د بد گوښانو بدنه شوى ده

Friendship has been changed to enmity by the words of evil-speaking people.  
Kalīlah 5 Damanah (Gulsh. I, p. 84).

§. 149.

2) The Subjunctive of the Perfect.

This mood is only used in the III. pers. Sing. and Plur. and is formed in the same way as the Indicative of the Perfect, only *وى* or *شوى* *وى*, the Subjunctive of the auxiliary (see §. 162, 2; §. 163, 10), being substituted. About the use of this mood see §. 202.

خوب صورت شاهزاده بهرام ټى نوم دى

نښد وى دلته راغلى ټا ليدلى

He is a beautiful prince, Bahrām is his name,  
Perhaps he has come here and was seen by thee.  
Bahrām, V. 535.

§. 150.

3) The Pluperfect.

The Pluperfect is formed in the same way as the Perfect, only the auxiliary *وم* etc. (§. 162, 4) or *شوى* *وم* (§. 163, 11) being substituted, as: *ومتلى* *وم* I had ascended; *ومتلى* *وم*, it had become level.

قغه درخ چه ده بهرام ده ښکار وتلى

نور هوسى ټى ده مخ کښى ټاخيذلى

On that day, when Bahrām was gone out for hunting,  
Another deer had risen before his face. Bahrām, V. 514.

§. 151.

4) The Subjunctive of the Pluperfect.

The Paṣṭ forms also a Subjunctive of the Pluperfect by means of the prefix *بَ*, which is either inserted between the participle perfect and the auxiliary, as: *نَبْتَلَى بَ وَ*, I would have been entangled, or which may precede the participle (separated by one or more words), the auxiliary following it, as: *بَ نَبْتَلَى وَ*. On the use of this mood see §. 216, 3; 204.

دَتَن كُورَمِي بَ لَوْعُون دِه مِينِي سَوِي  
كَه مِي نَه رَانَلِي زَوَا بَ حِمَايَت

Ere now the house of my body would have been burnt by love,  
If wailing had not come to my assistance. Abd-ul-H'amid.

§. 152.

5) The Conditional (Optative) of the Pluperfect.

The Conditional of the Pluperfect is formed by the participle perfect and the auxiliary *وَی* vai, (*وای* or *وی*), which remains uninflected (§. 162, 6). The derivatives add to the noun *شَوَى* etc. (§. 163, 13); the adjective (and the participle *شَوَى*) must agree with its subject in gender and number; substantives also, ending in a consonant, may take the fem. termination, as noticed already (§. 149).

This mood is also used in optative sentences, with or without an optative particle. On the use of the Conditional of the Pluperfect see §. 205; 216, 3.

نَشَكِي زِه زَوَدَلِي نَه وَی بَ جَهَان رَاغَلِي نَه وَی

Would, that I had not been born, that I had not come into the world!  
Yusuf and Zulaikha (Dorn, Chrest. p. 198).

§. 154.

6) The past Future.

This tense is formed by the participle perfect and the auxiliary به یم (§. 162, 8). The derivatives add to the noun به شوی etc. (§. 163, 14). The prefix به generally precedes the verb, separated by one or more words.

On the use of this tense see §. 206.

بی له خدای نور هر عیش و خور خبر نه دی به دنیا کنی به نه هیچا به  
خاطر تیر شوی نه دی

Besides God not one knows them; on earth they will not have come into the heart of anybody.

Favāid us-šarīḥ (Gulsh. I, p. 75).

§. 155.

II. Transitive (and causal) verbs.

Transitive and causal verbs have in all the past tenses a passive signification and must therefore be constructed accordingly, the agent being put in the Instrumental. Where the agent is not expressed the (proper) passive voice must be resorted to. But in the Perfect, Pluperfect and past Future (i. e. in the tenses made up by means of the participle perfect) the agent is often not mentioned, as: رادی دی, it has been said (Pers. (آورد) آند), so that the construction of these tenses approaches to some extent that of the Passive.

The causal derivatives are usually dissolved in the Perfect etc. into their component parts (cf. §. 18, c) and connect with the adjective or substantive the participle perfect of کرد, to which the auxiliary verb is added in the same way as to the intrans. verbs, as: مات بی کړی دی, it has been broken by him.

In the modern language however they are frequently treated like primitive causals. It is understood, that the participle perfect must agree with its subject in gender and number. In the case of the derivative causals the adjective also (and partly the substantive) must conform to the gender and number of the subject.

§. 156.

1) The Perfect.

This tense is formed by the participle perfect and the auxiliary *بَم* etc. and *کَرِی بَم* (§. 165, 9) respectively. Those verbs, which take the Plural in the Imperfect (cf. §. 143, 1), are also constructed with the Plural in the Perfect (Pluperfect etc.), as: *خَنْدَلِی بُی دِی* he has laughed, *بُی قَرَمَایِلِی دِی*, he has commanded. The auxiliary may follow or precede the participle.

وَر تَه وَایَه کُلْ اَنَدَامِی بَم لِبِیَلِی  
تَه خِیَلْ حَال رَا تَه مَعْلُوم کِرِه قَلَنْدَرِه

Say to him: I have been sent by Gul-andāmah; disclose to my thy circumstances, o Qalandar! Bahrām, V. 890.

هِيئِخْ خِرَمَتْد نَقْد هِه رَاحِتِ نَسِيَه بَدَلْ کَرِی تَه دَوِی

No sensible man has changed ready money for the repose of credit. Kalilah & Damanah (Gulsh. I, p. 96).

§. 157.

2) The Subjunctive of the Perfect.

This mood, which is only used in the III. pers. Sing. and Plural, is formed in the same way as the Perfect Indicative, only *کَرِی دِی* etc. being substituted as auxiliary.

شاید دَا خَطّ به مَسْخَرَه کی چَا کَبَلِی وی

Perhaps this letter is written by some one as a joke.  
Kalīlah ō Damanah (Gulsh. I, p. 97).

§. 158.

### 3) The Pluperfect.

This tense is formed by substituting *دُم* and *دُم* respectively as auxiliary.

لَا جَنْگَوَنَه تَمِ لَیْدَلِی تَه دُر دِیَرَه تَمِ پَه مَخ تَه وَ

He had not yet seen battles, no beard was on his face.  
Tārīḫ-i murāssaʿ ((Gulsh. I, p. 46).

بَازِندَه وَ وِ آردِیْدَلِی مِی دُر چِه پَه سَفَر کَبَلِی تَاجِرَه حَاصِلَه شِی

Bāzindah said: I had heard, that in travelling experience is gained.  
Kalīlah ō Damanah (Dorn, Chrest. p. 13).

بَادشَاه وَتَدَبِیْر چِه تَمِ پَه زَرَه کَبَلِی جَوَر کَرِی دَه بَیَان کَر

The king explained a scheme, which he had prepared in his heart.  
Gulistān (Gulsh. I, p. 182).

§. 159.

### 4) The Subjunctive of the Pluperfect.

This mood is formed by substituting the auxiliary *دُم به* etc. The prefix *به* usually precedes the participle, the auxiliary following it, as: *به مَا لَیْدَلِی وَ*, he would have been seen by me, but the auxiliary may also precede the participle, as: *دُم لَیْدَلِی*. When the auxiliary follows the participle, the prefix *به* may also follow it, as: *مِی لَیْدَلِی به وَ*.

كَهْ نَ دُوسِیْنُو غُرْبِیْ هَهْ مَخْ كَبِیْ دِیْ قَمْ هَهْ مِیْ لَوَزَوَكِیْ دِهْ

If a mountain of iron had been before him, he would also have severed it. Gulistān (Gulsh. I, p. 180).

كَهْ مَهَارْ حَمَّا هَهْ نَسْتِ وَقِ خِیْلَهْ شَا مِیْ هَهْ لَهْ بَارَهْ سَتَا پَنَهْ مِیْ هَهْ  
لَهْ رُفْتَا رَهْ خَلَاَصْ كَرِیْ دِهْ

If the rein would be in my hand, I would have freed my back from the burden and thy foot from going. Kalilah 5 Damanah (Dorn, Chrest. p. 12).

§. 160.

5) The Conditional (Optative) of the Pluperfect

This mood is formed by substituting the auxiliary دَوِیْ (دَوِیْ). دَوِیْ

On its use see §. 205; 216, 3.

كَهْ تَا قَمْ دَا قَبِیْ لِبِدَلِیْ دَوِیْ لَكَهْ مَا لِبِدَلِیْ دِیْ شَايِدْ چِهْ صَاكِرَا دِ  
قَمْ دَ دَجُوْ لَهْ عَمْ هِرِیْمِیْ دَوِیْ

If thou also hadst seen such (things), as I have seen, perhaps you also would have left the desert out of grief about them. Kalilah 5 Damanah (Dorn, Chrest. p. 16).

§. 161.

The past Future.

This tense is formed by substituting the auxiliary هَمْ هَهْ etc.

The prefix هَهْ usually precedes the participle, the auxiliary following it, as: زَهْ هَهْ مِیْ لِبِدَلِیْ هَمْ I shall have been seen by him, but the auxiliary may also precede the participle, as: زَهْ هَهْ مِیْ لِبِدَلِیْ

On the use of this tense see §. 206.

نَوَّهْ جَمَاعَتِ وَوَيْلَ چِه خَه طَلِسْمَ به وَی دَ پَارَه دَ مَحَافِظَتِ کُنَجِ به  
بُی خَه کُنَبِلِی وَی

Some assembly of men said: it will be some talisman; for the sake of the preservation of the treasure something will (= may) have been written by him.

Kalilah & Damanah (Dorn, Chrest. p. 4.

دَا به چَا وَبِلِی نَدِ وَی چِه به جُذَائِی زَرَتِی قَرَارِ نَوِ

This nobody will have said, that in separation the heart is quiet. Ahmad Shāh (Gulsh. II, p. 212).

§. 162.

#### IV. The auxiliary verbs,

In order to complete the conjugational process, the Paṣtō requires different auxiliary verbs, which have been partly pointed out already. As they offer many irregularities in their conjugation, they must here be treated separately.

##### I. The auxiliary verb „to be“.

This verb has no infinitive; in its lieu is substituted, whenever necessary, the verbal theme اَوَسِدَل ṓs-ēd-al, to exist, to remain (Sansk. **आस**). Thence also is taken:

##### The Imperative.

Sing. اَوَسَه ṓs-ah (cf. §. 122, a), be thou.

Plur. اَوَسَتِی ṓs-aI, be ye.

The Imperative does not admit the prefix و; see §. 124.

1) The Present.

Sing.

ہم zah yam, I am.

تو tah yē, ē, thou art.

ہو masc. hayah dai, ṣtah, he	} is.
ہو fem. hayah dah, ṣtah, she	

Plur.

ہم mūḥ yū, we are.

تو tāse yaī, aī, yāstai, yāst,  
you are.

ہو hayah dī, (dī-nah) ṣtah, they are.

The forms yam, yē or ē quite agree with the Persian substantive verb; in Paṣtō enphonic y is added, which however disappears again, when it is enclitically joined to another verb (cf. §. 135). The III. pers. Sing. تو (fem. ۛ) is rather curious. The Sindhī uses अय (Prāk. अयि and enclitically यि), which in Paṣtō has been changed to ۛ (fem. ۛ) and in the Plural دی dī, as if ۛ was an adjective. To the Plural دی the termination -nah\*\*) is also added, but only in the older language and in poetry.

\*) In some Mss. this ۛ is only expressed by Kasr, which must well be noticed, as: شکر کرۃ چہ داخل د مَحَمَد ۛی ہر دین: be thankful, that thou belongest to the religion of the prophet Muh'ammad. Gulsh. II, p. 116, 2.

\*\*) Raverty in his Grammar, §. 283, quotes an example from the Tavallud nāmah, in which the termination nah is also added to the

Besides *دَى* (دَ) and *دِی* the Paṭṭō also uses the form *شَتَه* for the Sing. and the Plural (com.), which is identical with the Persian *هَسْت* (Sansk. root *अस्*, to be), initial *h* being only a euphonic addition, which is already found in the Pārsī (Pārsī *هَم* = *آم*, *هَند* = *آند*). But though *دَى*, *دِی* is identical with *شَتَه* as regards its etymology, there is now this difference in signification, that *دَى*, *دِی* only expresses the copula, whereas *شَتَه* always refers to something existing. Occasionally both are used together, as: *شَتَه دَى* etc. In the II. pers. Plur. we find also, besides *یَا*, the form *یَاسْتِ* *yāsta* (or only *یَاسْت* *yāst* in the west), in which initial *ya* has been lengthened. The negative form *نِشَتَه*\*) *ništah*, (it) is not, coincides with the Persian *نیست*.

## 2) The Subjunctive.

The Paṭṭō forms the Subjunctive from the root *هَ*, like the Persian (*بوم*), but it is only employed in the III. pers. Sing. and Plural, as:

Sing. and Plural.

*وِی* (*وِیَنَه* *vī-nah*), he, she, they may be.

*دِی* (*دِیَنَه* *de vī*), he, she, they should be.

---

II. pers. Sing., the only instance I have ever met with; the words are: *هَ خُب دَ حُصْرَتِ هَ*, if thou art in the love of the Highness (= prophet). For the present this point must be left in abeyance, as I have no means of comparing the quotation from the Tavallud-Nāmah with a Mes.

\*) But the pronunciation *nahštah* is also in use. In poetry also *نِشَتَه دَى* is met with.

If a Subjunctive should be absolutely necessary for the other persons, the Subjunctive of *اَرَسِيْدَل* must be used, as: *زَهْ اَوَسَم* etc. (without the prefix *و*, cf. §. 124).

خَوْ خَيْرَهْ مَرْد تَر خُوْلِي يَحْتَلِي نَهْ دِي  
نَهْ كَنْبِي هَمْت دِي دَه نَهْ عَر عَيْب وَ هَنْتَر

As long as a man may not have let out a word from his mouth, every vice and virtue is \*) hidden in him. *Gulistān* (Gulsh. I, p. 155).

مَدَد اَر مَدَد عَم نَا رَتَك دَر تَه وَر اَمَّا دَه يِيَانَعَرُو سَرْتَار دَه نَهْ مَوْرَه  
يُو دِي

*Madād* and *Madad* also spoke thus to them: but the chief of the foot-soldiers should be one from us. *Tārīḫ-i murāssa* (Gulsh. I, p. 8).

### 3) The Future.

As the Subjunctive is not used in the I. and II. pers. Sing. and Plural, the corresponding persons of the Present are employed, but in the III. pers. Sing. and Plural the Subjunctive is replaced.

#### Sing.

*زَهْ بَه يَم* *zah bah yam*, I shall be.

*تَه بَه يَمِي* *tah bah yē, ē*, thou wilt be.

*هَاهْ بَه وَي* *hayah ba vī (vīnah)*, he, she will be.

#### Plur.

*مُو بَه يُو* *mū bah yū*, we shall be.

\*) Literally: may be hidden, the whole tenor of the sentence being kept hypothetical.

تَاسِي بَه يَتِي، تِي، بَه يَاسْت tāse bah yaī, aī, bah yāst  
(west.), you will be.

هَآه بَه وِي (وِينَه) hayah bah vī (vīnah), they will be.

#### 4) The Aorist.

The Paṣtō possesses no Imperfect of the auxiliary verb „to be“, but only an Aorist, like the Persian, which is derived from the Sansk. root भू. In Prākṛit भू is changed to hō (hava, Varar. VIII, 1), and this form is made use of in the modern Prākṛit idioms of India, but the Paṣtō (like the Persian) has preserved initial (but unaspirated) b = v (vu-m, Pers. بُودَم bū-dam\*).

##### Sing.

زَہ zah vum, I was.

تَہ tah vē, thou wast.

(وُ) هَہ masc. hayah vuh, he	} was.
هَہ fem. hayah vāh, she	

##### Plur.

مُؤ وُ mü vū, we were.

تَاسِي وَاī tāse; vāī, you were.

---

\*) The Paṣtō vu-m corresponds to the Sindhī होसि, I was, see my Sindhī Gram. p. 304, Annot. The Persian بُودَم is to be referred to the Sansk. past part. भूत.

(دونه) masc. hayah vū (vū-nah) |  
 قَدْ دى (و)\*) fem. hayah vē (ve) | they were.

قَمِ بِي قَوْنِيَرِه دِهَر مَرْدُونَه چِه قَمِه بَيَاسْتَه دُونَه  
 قَمِكِي زَرَهَن كَمَر دُو دَر مَخ كَنبَلِي تَرَقَمَر دُو

He had also so many slaves, who were all beautiful;  
 All had golden girdles, in their face they were fairer than  
 the moon. Yusuf and Zulaikā (Dorn, Chrest. p. 205).

### 5) The habitual Aorist.

This tense is formed by means of the particle بَ, which is  
 added to the Aorist, as: زَبَ بَ دُم, I was or I used to be. This  
 tense is also used to express the Subjunctive of the Im-  
 perfect in the main part of a conditional sentence. It  
 has been shown already, that, joined as auxiliary to a participle  
 perfect, it serves to express the Subjunctive of the Pluperfect.

It is to be noticed, that بَ etc., when used in the main  
 part of a conditional sentence, the dependent part of which contains  
 the Conditional or the Subjunctive of the Pluperfect (with the  
 conjunction كَ), is to be likewise translated as a Subjunctive of  
 the Pluperfect.

چِه لَه كَرْدِيوِي رَاغِي وَ سُونِيَالِي وَ تَه بَرَه جَمَاهَت بَه دَر سَرَه وَ هَمِيَشَه  
 بَه بِي تَاخْت بَاخْت كَاوَه

\*) The form دُم vum is properly a contraction from vu-am, the  
 initial a of the flexional termination (am) being dropped; in دِي, دِي وَ  
 on the other hand the radical u has been ejected, as before all the  
 person had to be fixed; the Plural دُو (instead of vu-al) is a curious  
 euphonic change, which is only found in دُو and شَرُو (= شَوْل).

When he came from Karbūyah to Sūniālah, a company used to be with him, he always made predatory inroads. *Tārīḫ-i murassas* (Gulsh. I, p. 42).

سَتَا دِه دَرْدِ كِهْیِ طَیِّبِ وَأَیِ رَحْمَانِ تَهْ

لَا بَهْ بَهْ وَهْ كِهْ دِ حَالِ تَر دَا بَتَرِ دِی

Respecting the pain about thee the physician says to Rah'mān: It would be still better, if thy state were worse than it is.

Rah'mān (*Gulsh. II, p. 27, 2*).

كِهْ تَهْ قَمِ اُودَهْ شَوِی دِی لَهْ دِ كِهْ دِهَرِ بَهْ دِهْ دُو چِهْ دِ وَكِرِی دِهْ هَمِیَبْ

جَوْنِی كِهْیِ هِرِدَوَتِی

If thou also hadst been asleep, it would have been much better than that thou didst fall into the criticism of others. *Gulistān*.

#### 6) The Conditional (Optative) of the Aorist.

As this auxiliary is not possessed of an Imperfect, the Conditional is derived from the Aorist, which is not the case with any other verb. This mood is used in the dependent part of a conditional sentence\*) (with the conjunction كِهْ), in optative sentences and not unfrequently also in final sentences, governed by the final conjunction چِهْ (in order that), see §. 198, 3.

#### Sing.

دَايِ (كِهْ) زَهْ, تَهْ, هَغْدِ وَیِ, دِی, دَايِ (kah) zah, tah, hayah vai, vë, vāe,

(If) I, thou, he, she were, or: would that I etc. were!

#### Plur.

دَايِ (كِهْ) مَوْرِ, تَاَسِی, هَغْدِ وَیِ, دِی, دَايِ (kah) mūr, tāse, hayah vai, vë, vāe,

(If) we, you, they, were, or: would that we etc. were!

---

\*) If in the main part of a conditional sentence the Pluperfect (Conditional or Subjunctive) be employed, the Conditional وَیِ etc. must likewise be translated as a Pluperfect: would have been.

بیا کنجور و بهرام نشته ده دا خای کبی  
که بهرام وای خو به قر چا ته تشهیر و

Then said Kanjur: Bahrām is not here;  
If he were, every body would surely know it.  
Bahrām, V. 564.

که چری ده زمانه ن دلارونو خیلو کبی موری ده وینو ن نییانو له  
دودو سره شرکت به مو ته و کیری

If we had been in the time of our fathers, we would not  
have taken part with them in the blood of the prophets.  
Matth. 23, 30.

کشکی ره خاوری ابری ن تا ن دردی  
چه قدم د قبیسه خما ده سردی

Would that I were the dust and ashes of thy door,  
that thy foot might be always on my head!  
Rah'mān (Gulsh. II, p. 27, 2.)

It is remarkable, that the Paṣtō, like the Sindhī, has not  
formed a Perfect and Pluperfect from this root (م);  
in most cases the Aorist is substituted in their stead or some  
other circumscription of these tenses is resorted to, when necessary.

#### §. 163.

#### II. The auxiliary verb شول ēv-al, to become\*).

شول is not only used as auxiliary with derivative verbs,  
but is also employed in the formation of the Passive §. 170.

\*) The original signification of شول 'to go' (Sansk. सु),  
is still found in Paṣtō; also the Persian auxiliary signifies originally  
'to go'. It is very interesting, that in Hindī, Panjābī etc. the  
passive voice is likewise made up by means of an auxiliary, which  
signifies 'to go' (جانا).

Many adjectives and substantives, when connected w  
express the idea of a verb, without being moulded into  
derivative verb, as: رَوَّانَ شَوْلَ ravān šv-āl, to depart  
irār šv-āl, to flee etc.

### The Imperative.

#### Sing.

شَهْ š-ah or وَشَهْ vō-š-ah, become.

#### Plur.

شَتَّى š-aī or وَشَتَّى vō š-aī, become ye.

### 1) The Present.

#### Sing.

زَهْ zah š-am I become.

تَهْ tah š-ē thou becomest.

هَاهْ hayah š-i, he, she becomes.

#### Plur.

مُوْشُو mūš š-ū, we become.

تَاسِي شَتَّى tāse š-aī you become.

هَاهْ هَاهْ hayah š-i they become.

### 2) The Subjunctive of the Present.

This mood may be formed with or without the  
out when شَمْ etc. forms the Subjunctive of a deriv

§. 132), the prefix **و** is prohibited; the same is generally the case, when a noun with **شَوَل** expresses the idea of a verb.

Sing.

**زَ شَم وُ شَم** zah šam, vŭ šam, I may become, that I become.

**تَ شِی وُ شِی** tah šē, vŭ šē, thou mayst become.

**هَ شِی وُ شِی** hayah šī, vŭ šī, he, she may become.

**دَ شِی وُ شِی** hayah de šī, de vŭ šī, he, she should become.

Plur.

**مُورُ شُو وُ شُو** mūr šū, vŭ šū, we may become.

**تَاسِی شِی وُ شِی** tāse šāī, vŭ šāī, you may become.

**هَ شِی وُ شِی** hayah šī, vŭ šī, they may become.

**دَ شِی وُ شِی** hayah de šī, de vŭ šī, they should become.

مَنَاسِبَ نَی چِه بُی وُ وُزَنِم دِلِی  
چِه دَا لَار هِه اَمَن شِی لِه دِی جَنَاجَالِه

It is becoming, that I should kill them, o beloved!  
That this way may become safe from this trouble.  
Bahrām, V. 171.

مَن فِلِبِل هِه بَوَه مَنج سَرَه بَد بُوی شِی  
بَد دِ نَه شِی یَوُ زَمَان هَمَرَاه دَ چَا

A maund of scented oil becomes fetid by one fly:  
The bad should not become for one time the companion of any one.  
Kalilah & Damanah (Gulsh. I, p. 84).

### 3) The Future.

This tense is formed from the Subjunctive by means of the prefix **به**.

#### Sing.

ز به شَم, zah bah šam, zah bah vő šam, I shall become.

ت به شِی, tah bah šē, tah bah vő šē, thou wilt become.

ه به شِی, hayah bah šī, hayah bah vő šī, he, she will become.

#### Plur.

م به شو, mūš bah šū, mūš bah vő šū, we shall become.

ت به شِی, tāse bah šāī, tāse bah vő šāī, you will become.

ه به شِی, hayah bah šī, hayah bah vő šī, they will become.

ستاسو به له میرزا سره عظیم جنک و شی اما فتح به ستاسو وی

A great war of yours will take place with Mīrzā, but the victory will be yours. *Tāriḫ-i murassas* (Gulsh. I, p. 8).

پس له مرگ به همه سره یکسان شی

که کدای که مهاجن وی که مهاج

After death all will be alike together, if it be a beggar, a banker or a king. *Xavājah Muḥammad* (Gulsh. II, p. 107, 3).

### 4) The Imperfect.

#### Sing.

ز شوکم, zah šv-al-am, šv-am, I became.

تَه شَوَلِی tah šv-al-ē, šv-ē, thou becamest.

هَه شَه hayah š-ah, he

هَه شَه hayah šv-al-ah, šv-ah, she

} became.

Plur.

مُور شُولو, شُور (شُور) mūr šv-al-ū, šv-ū (švu), we became.

تَاسِی شُولِی, شُولِی tāse šv-al-ai, šv-ai, you became.

هَه شُول, شُور (شُورَنَه) hayah šv-al, šv-ah,

švū (švūnah), m.

} they became.

هَه شُولِی, شُولِی (شُور) hayah šv-al-ē, šv-ē (šve), f.

شَیَه وَ دَرِخ دَ دِی خَالِی هَه صَلَب شَوِی

وَ بَاقِی وَتَه دِ شَا کَرَه بَی تَمِیَر

Day and night thou wentst in search of this transitory (world), thou turnedst thy back on eternity, o indiscreet one! Xavājah Muh'ammad (Gulsh. II, 111, 1).

### 5) The habitual Imperfect.

This tense is derived from the Imperfect, by means of the particle هَه, which may precede or follow the verb.

- Sing.

زَه بَه شُولَم, هَه شُولَم zah bah šv-al-am, bah šv-am, I used to become etc. etc. (quite like the Imperfect).

عَمَلُونَه خَمُور دَا دُو جِهَه هَه مَسَاجِدَ هَه مُور هَه قَسِی وَتَت حَاضِر شُور

جِهَه اِذَا نُوتَه هَه فَلَنَه وَارِبَدَه شُور

Our works were these, that we used to be present in the mosque at such a time, when the summons to prayer were heard there.  
Favā'id uš-šarīḥ (Gulsh. I, 70).

# 6) The Conditional (Optative) of the Imperfect.

Sing.

شَوَايَ, شَوِي, شَوِي	زَ zab	{ švai, švĕ, švāĕ.
or	تَ tah	{ or.
شَوَلَايَ, شَوَلِي, شَوَلِي	هَ hayah	{ švalai, švalĕ, švalāe.

I, thou, he, she should become, or: would, I, thou, he, she would become!

Plur.

شَوَايَ, شَوِي, شَوِي	مُور mūr	{ švai, švĕ, švāĕ.
etc.	تَاسِي tāse	{ etc.
	هَ hayah	{

We, you, they should become, or: would, we, you, they would become!

يَسْ لَه مَرْتَمِه مِي وَه قَبِي مَكَان كُور شَوِي  
چِه ږير تل د كښليو لار وي څه به به دُو

Would that after death my grave would be in such a place, that there would be on it always the way of the fair ones, how beautiful would it be! Xušh'āl (Gulsh. II, p. 54, 3).

# 7) The Aorist.

The Aorist may or may not take the prefix 'vō; with a derivative verb the prefix ' is prohibited (§. 139).

Sing.

زَہْ وُشَوَلَم, دُشَوَم	zah vō šv-al-am, vō šv-am	} I became.
or:		
زَہْ شَوَلَم, شَوَم	zah šv-al-am, šv-am	

etc. etc. (like the Imperfect).

### 8) The habitual Aorist.

The habitual Aorist is formed from the simple Aorist by means of the particle *بَہْ*. When the Aorist is not preceded by the prefix *وُ*, the habitual Aorist and the habitual Imperfect outwardly coincide and only the context can decide the tense.

Sing.

زَہْ بَہْ وُشَوَلَم, بَہْ دُشَوَم	zah bah vō švalam, bah vō švam	}
or:		
زَہْ بَہْ شَوَلَم, بَہْ شَوَم	zah bah švalam, bah švam	

I used to become; etc. etc.

اَرشَان مِی بَہ دَ کَلِمَی دَر تَہ وُکَر کَہ بَہ مُسَلْمَان شَہ اَمَان مِی بَہ دَر کَر  
کَنَد مِی بَہ کَر

I used to teach him the kalimah; if he became a Musalmān,  
I used to give him quarter, if not, I killed him.

Tārīḫ-i murassaḡas (Gulsh. I, p. 42).

9) The Perfect.

Sing.

م	{	شَوَى šavai, masc. *)	{	yam, I have become.
ی, یی		شَوَى (شَوِ) šave, fem.		yē, ē, thou hast become.
دِی				dai, he has become.
دِه				dah, she has become.

Plur.

یو	{	شَوَى šavī	{	yū, we have become.
یاسْت, یئی, یئی				yaī, aī, yāst, you have become.
دی				dī, they have become.

زِه دِه خَیَلِه دِه تَا نَه بِم مَیْن شَوَى سَتَا لَه لَوَرِه دِه مَا شَوِ وَه نَدَا

I have not become enamoured with thee from my own account, from thy side the call had been made on me. Rahīmān. (Gulsh. II, p. 5, 3).

10) The Subjunctive Perfect.

Sing.

دِی	{	شَوَى masc. šavai	{	he	}	may have become.
		شَوَى fem. šave		vī, she		

Plur.

شَوَى (com.) šavī vī, they may have become.

---

\*) The other form شَوَلَى šavalai (fem. شَوَلَى šavale) is not much in use.

# 11) Pluperfect.

Sing.

وَمَ	{	شَوَى šavai, masc.	{	vum, I had become.
دِی				vē, thou hadst become.
وَمَ	{	شَوَى šave, fem.	{	vuh, he
دِی				vāh, she

Plur.

وَمَ	{	شَوَى šavī	{	vū, we had become.
دِی				vāī, you had become.
وَمَ	{	شَوَى šavī	{	vū, masc.
دِی				vē, fem.

# 12) The Subjunctive of the Pluperfect.

Sing.

*) وَمَ	{	شَوَى masc. šavai	{	bah vum, I should have be
دِی				bah vē, thou wouldst have be
وَمَ	{	شَوَى fem. šave	{	bah vuh, he
دِی				bah vāh, she

\*) Or: وَمَ شَوَى šavī; the particle وَمَ very follows the auxiliary, as: وَمَ شَوَى šavī.

Plur.

بِهَ دُر	شَوِي šavī.	{	bah vū, we should have become.
بِهَ دُئِي			bah vaī, you would have become.
بِهَ دُر m.			bah vū, m.
بِهَ دِي f.			bah vē, f. } they would have become

### 13) The Conditional (Optative) of the Pluperfect.

Sing.

{ دِي, دِي, دَاي	شَوِي m.	ز zah	{ šavai m. } vai, vē, vāe.
	شَوِي f.	ت tah	
		هَاه hayah	

(If) I, thou, he, she had become; or: would, that I etc. had become!

Plur.

{ شَوِي دِي, دِي, دَاي	مُو mūž	{ šavī vai, vē, vāe.
	تَاسِي tāse	
	هَاه hayah	

(If) we, you, they had become; or: would that we etc. had become!

### 14) The past Future.

Sing.

{ بِهَ دَم *)	شَوِي šavai, m.	{	bah yam, I shall have become.
	شَوِي šavai, f.		bah ē, thou wilt have become.
			bah vī, he, she will have become.

\*) Or بِهَ دَم شَوِي, or: بِهَ دَم شَوِي.

Plur.

بَهْ دُو	} شَوِي savi	{	bah yū, we shall have become.
بَهْ تِي			bah aī, you will have become.
بَهْ دِي			bah vī, they will have become.

§. 164.

### III. The auxiliary كَيْدَل kēd-əl, to be made.

This auxiliary is chiefly used in the formation of the Passive voice. It is regular but defective, being only used in the Present, Future and Imperfect; for the other tenses and moods شَوْل is substituted. This auxiliary is important also for this reason, that it furnishes the terminations for the intrans. verbs ending in ēd-əl, initial k only being dropped (cf. §. 116, c).

#### 1) The Present.

Sing.

زَهْ كِيَوْمَ zah kēž-am, I am made.

تَهْ كِيَوْمِي tah kēž-ē, thou art made.

هَاهْ كِيَوْمِي hayah kēž-ī, he, she is made.

Plur.

مُوْزْ كِيَوْمِي mūž kēž-ū, we are made.

تَاهْ كِيَوْمِي tāse kēž-aī, you are made.

هَاهْ كِيَوْمِي hayah kēž-ī, they are made.

2) The Future.

Sing.

زَ به کَیَم zah bah kēz-am, I shall be made\*).

etc. etc. (like the Present).

3) The Imperfect.

Sing.

زَ کَیَدَم, کَیَدَم zah kēd-al-am, kēd-am, I was made.

تَ کَیَدِی, کَیَدِی tah kēd-al-ē, kēd-ē, thou wast made.

هَ کَیَدَ masc., hayah kēd-aḥ, he was made.

هَ کَیَدَ fem., hayah kēd-al-āḥ, kēd-āḥ, she was made.

Plur.

مُور کَیَدَلَر, کَیَدَلَر mūr kēd-al-ū, kēd-ū, we were made.

تَاسِی کَیَدَلِی, کَیَدَلِی tāse kēd-al-aī, kēd-aī, you were made.

هَ کَیَدَل, کَیَدَل masc., hayah kēd-al, kēd-aḥ	} they were made.
هَ کَیَدِی, کَیَدِی fem., hayah kēd-al-ē, kēd-ē	

4) The habitual Imperfect.

Sing.

زَ به کَیَدَم, به کَیَدَم zah bah kēd-al-am, bah kēd-am, I used to be made, etc. etc. (like the Imperfect).

\*) The prefix زَ is never used with the Future, there being no subjunctive of the Present in use.

\*\*) The particle به bah may also follow the verb, as: به کَیَدَم etc.

§. 165.

IV. The auxiliary كَرَّ kr-al, to make, to do.

This auxiliary is regular and complete.

Imperative.

Sing. وَ كَرَّ vō kr-ah, do.

Plur. وَ كَرِّي vō kr-aī, do ye.

When كَرَّ is used as an auxiliary (with causal derivatives), the prefix وَ is not used in the Imperative (§. 129).

1) The Present.

Sing.

زَهْ كَرَّم zah kr-am, I do.

تَهْ كَرِّي tah kr-ē, thou doest.

هَيَّاهْ كَرِّي hayah kr-I, he, she does.

Plur.

مُوْزْ كَرَّد mūz kr-ā, we do.

تَاْسِيْ كَرِّي tāse kr-aī, you do.

هَيَّاهْ كَرِّي hayah kr-I, they do.

2) The Subjunctive of the Present.

Sing.

زَهْ وَ كَرَّم zah vō kr-am, I may do.

تَهْ وَ كَرِّي tah vō kr-ē, thou mayst do.

هَيَاهُ وَ كَرِي hayah vö kr-I, he, she may do.

\* هَيَاهُ دِ وَ كَرِي hayah de vö kr-I, he, she should d.

Plur.

مُوْرُوْ وَ كَرُوْ mü' vö kr-ü, we may do.

تَاسِيْ وَ كَرِي tase vo kr-ai, you may do.

هَيَاهُ وَ كَرِي hayah vö kr-I, they may do.

هَيَاهُ دِ وَ كَرِي hayah de vö kr-I, they should do.

3) The Future.

Sing.

\*\* زَ بَ وَ كَرَمَ zah bah vö kr-am, I shall do.

تَ بَ وَ كَرِي tah bah vö kr-ē, thou wilt do.

هَيَاهُ بَ وَ كَرِي hayah bah vö kr-I, he, she will do.

Plur.

مُوْرُوْ بَ وَ كَرُوْ mü' bah vö kr-ü, we shall do.

تَاسِيْ بَ وَ كَرِي tase bah vö kr-ai, you will do.

هَيَاهُ بَ وَ كَرِي hayah bah vö kr-I, they will do.

---

) Or, in the absence of the demonstr. pronoun, وَ دِ كَرِي vö de

) Without the personal pronoun زَ etc.: وَ بَ كَرَمَ. In the F  
bjunctive prefix is frequently dropped, especially in poëtr;  
زَ, etc.

#### 4) The Imperfect.

(Passive construction).

Sing.

\* ز به بی کرم zah ē kr-am, I was made by him.

تاه به بی کپی tah ē kr-ē, thou wast made by him.

م., hayah ē kar, kr-ah, he was made by him.

ف., hayah ē kr-al-āh, kr-āh, she was made by him.

Plur.

مؤ به بی کرم mü ē kr-ā, we were made by him.

تاسی به بی کرم tāse ē kr-al, you were made by him.

م., hayah ē kr-al, kr-ah	} they were made by him.
ف., hayah ē kr-al-ē, kr-ē	

#### 5) The habitual Imperfect.

Sing.

ز به بی کرم zah bah ē kr-am, I used to be made by him, etc. etc.

(like the Imperfect).

---

\*) The fuller form کرم al-am, is not so much in use as کرم. It is understood, that the pronoun بی does not belong to the conjugation itself, but is only added, to show the construction of these senses. Any other agent (be it a noun, a personal pronoun, demonstrative etc.) in the Instrumental may take its place.

6) The Conditional (Optative) of the Imperfect\*).

كَرَلَيْ , كَرَلَيْ , كَرَلَيْ or: كَرَيْ , كَرَيْ , كَرَيْ	$\left\{ \begin{array}{l} مَ mā \\ تَ tā \\ هَ hayah \\ مُ mū \\ تَ tāsu \\ هَ hayō \end{array} \right.$	$\left\{ \begin{array}{l} kṛ-al-ai, kṛ-al-ē, kṛ-al-āē \\ or: \\ kṛ-ai, kṛ-ē, kṛ-āē \end{array} \right.$

(If) by me, thee, him, her, us, you, them (he, she, they) would be made; or: would, that by me etc. would be made!

7) The Aorist.

Sing.

زَهْ وَهْ كَرَامْ zah vō ē kṛ-am, I was made by him, etc. etc.  
(like the Imperfect).

8) The habitual Aorist.

Sing.

زَهْ بَاهْ كَرَامْ zah bah ē vō kṛ-am, I used to be made by him, etc. etc. (like the Imperfect).

قَمْ هِيْ كَرَهْ جِكَايْتُونَهْ دَنْ قَرْمَلِكْ رَوَايْتُونَهْ

كَهْ بَهْ دَوِيْ مَذْكُورَنْ رُومْ كَرَهْ دِيْ بَهْ يَادْ مِصْرْ دُومْ (\*\*)

They also told stories (and) narratives of every country.

If those used to mention Rūm, she called to mind the name of Egypt. Yusuf and Zulaiḫā (Dorn, Chrest. p. 190).

\*). This mood however is seldom used; كَرَلَيْ etc. may be referred to the Sing. and Plur. masc. and fem., as it remains unchanged.

\*\*). مِصْرْ دُومْ is, properly speaking, a grammatical mistake; we should expect either دَنْ مِصْرْ دُومْ or: دُومْ مِصْرْ.

نَه مَا بُی یَو فَنَرِ هِت کَرِی دِه زِه بُی نِن دِرِجِه فَغَه فَنَرِ لَانِدِ کَرِم

One artifice he had concealed from me; by that artifice I was put down to-day by him. Gulistān (Gulsh. I, p. 180).

مَا خَطَا دُکَرِه چِه نَه مِی بِی کُتَاهِ آزَرْتِه کَرِی

I have done wrong, that thou wast oppressed by me without a fault (innocently). Gulistān (Gulsh. I, p. 178).

#### 9) The Perfect.

Sing.

زِه بُی کَرِی (کَرِی) \* یَم zah ē karai (kare f.) yam, I have been made by him.

تِه بُی تِه بُی tah ē karai (kare f.) ē, thou hast been made by him.

هَیاه بُی کَرِی دَی hayah ē karai dai, he has been made by him.

هَیاه بُی کَرِه دَی hayah ē kare dah, she has been made by him.

Plur.

مُزِ بُی کَرِی دِی muž ē karī yū, we have been made by him.

تَاسِه بُی کَرِی دِی tase ē karī ai, you have been made by him.

هَیاه بُی کَرِی دِی hayah ē karī di, they have been made by him.

#### 10) The Subjunctive of the Perfect.

Sing.

هَیاه بُی کَرِی دِی hayah ē karai (kare) vī, he (she) may have been made by him.

---

\*) The other participial form کَرِکَتِی kṛ-al-ai is not much in use.

Plur.

هَيَاهَ ٻِي ڪَري وِي hayah ē karī vī, they may have been made  
by him.

11) The Pluperfect.

Sing.

زَ ٻِي ڪَري (ڪَري) دُم zah ē karai (kare f.) vum, I had been  
made by him.

تَ ٻِي ڪَري (ڪَري) دِي tah ē karai (kare f.) vē, thou hadst been  
made by him.

هَ ٻِي ڪَري وُه hayah ē karai vuh, he had been made  
by him.

هَ ٻِي ڪَري وَا hayah ē kare vāh, she had been made  
by him.

Plur.

مُو ٻِي ڪَري دُو mū ē karī vū, we had been made by him.

تَاسِي ٻِي ڪَري دِي tāse ē karī vaī, you had been made by him.

مَ ٻِي ڪَري دُو m. hayah ē karī vū,	} they had been made by him.
فَ ٻِي ڪَري دِي f. hayah ē karī vō.	

12) The Subjunctive of the Pluperfect.

Sing.

زَ ٻِي ڪَري (ڪَري) دُم zah bah ē karai (kare f.) vum,  
would have been made by him, etc. etc. (like the Pluperfect).

### 13) The Conditional (Optative) of the Pluperfect

Sing.

ز به ئی کړی (کړی) دی، دی زه zah ē karai (kare f.) vai, vē, vē.

” ” ” ” ” ” tah ” ” ” ” ”

” ” ” ” ” ” hayah ” ” ” ” ”

(If) I, thou, he, she would have been made by him, or:  
would that I, thou, he, she would have been made by him!

Plur.

موږ به ئی کړی دی، دی موږ muž ē karī vai, vē, vē.

” ” ” ” ” ” tase ” ” ” ” ”

” ” ” ” ” ” hayah ” ” ” ” ”

(If) we, you, they would have been made by him, or: would  
that we, you, they would have been made by him!

### 14) The past Future.

Sing.

ز به ئی کړی (کړی) به zah bah ē karai (kare) yam.

” ” ” ” ” به tah bah ” ” ” ē.

” ” ” ” ” به hayah bah ” ” ” vī.

I, thou, he, she will have been made by him.

Plur.

مُو بَه بُی کَرِی یُو mūz bah ē karī yū.

تَاسِی بَه „ „ تَی tāse bah „ „ aī.

هَیاه بَه „ „ هَی hayah bah „ „ vī.

We, you, they will have been made by him.

§. 166.

V. The auxiliary کَوَل kav-āl, to do, to make.

This auxiliary is partly irregular and defective.

Imperative.

Sing. وُ کَوُ vō kav-ah }  
وُ کَ vō k-ah } do.

Plur. وُ کَوِی vō kav-aī }  
وُ کَ vō k-aī } do ye.  
وُ کَانِی vō k-ānī }

The prefix وُ is prohibited, when کَوَل, in connexion with an adjective or substantive forms a causal derivative (§. 129), otherwise it may be optionally used or dropped.

1) The Present.

Sing.

زَ zah kav-am, I do.

تَه tah kav-ē, thou doest.

هَیاه kav-ī, kā, ka, kānde, he, she does.

---

\* وُ کَانِی is more a Precative; see §. 120.

Plur.

مُورِ مَوْرِ mūr kav-ū, we do.

تَاسِیِ تَاسِیِ tāse kav-aī, you do.

هَیَاهِ هَیَاهِ hayah kav-ī, kā, ka, kānde, they do.

2) The Subjunctive of the Present.

Sing.

زَهْ زَهْ zah vō kav-am, vō k-am, (that) I do, I may do.

تَهْ تَهْ tah vō kav-ē, vō k-ē (that) thou do.

هَیَاهِ هَیَاهِ hayah vō kav-ī, vō kā, vō ka, vō k-ī, vō kānde, (that) he, she do.

هَیَاهِ هَیَاهِ hayah de vō kavī, etc., he, she, should do.

Plur.

مُورِ مَوْرِ mūr vō kav-ū, vō k-ū, (that) we do.

تَاسِیِ تَاسِیِ tāse vō kav-aī, vō k-aī, that you do.

هَیَاهِ هَیَاهِ hayah vō kav-ī, vō kā, vō ka, vō k-ī, vō kānde, that they do.

\*) In the form kānde the old Sansk. flexional termination of the plural anti (Pers. and) seems to be contained; the forms kā, ka are quite anomalous.

\*\*) Or without the demonstr. pronoun: هَیَاهِ هَیَاهِ hayah de kavī, vō de kavī, etc. But when هَیَاهِ is used, the prefix هَیَاهِ is frequently omitted, as: هَیَاهِ هَیَاهِ hayah de kavī, etc.

دوست لرو غونډه قوت مه ورکوه چه که احيانا غليم شي برابري  
 د سره وکا  
 bayah de vō kav-ī, etc., they should do.

Don't give so much power to a friend, that, if by chance he become an enemy, he may compete with thee.  
 Gulistān (Gulsh. I, p. 181).

هرهيزو د هر څوک وکا که دى هسي کترهيتي دل واره افغانان د  
 هم ياد کا  
 Every one should refrain from such an aberration, all the other Afghāns too should remember (this). Maḡzan-i Paḡtō.  
 (Gulsh. I, 136 and 137).

### 3) The Future.

Sing.

زه به وکړم, زه به وکم \*) zah bah vō kav-am, zah bah vō k-am,  
 I shall do, etc. etc. (like the Subjunctive)

### 4) The Imperfect \*\*).

(Passive construction).

Sing.

هغه ټي کاوه, کا, که, ک hayah ē kāv-ōh, kā, kah, ka, he (it)  
 was done by him.

هغه ټي کوله, که, کا hayah ē kav-al-ah, k-āh, kā, she was  
 done by him.

Plur.

هغه ټي کول hayah ē kav-al, m. } they were done by him.  
 ټي کولي hayah ē kav-al-ē, f. }

\*) The prefix و is often dropped.

\*\*) Of کول the personal passive form is not used in the I. and II. person Sing. and Plural, instead of them the Imperfect of کړل is substituted.

5) The habitual Imperfect.

هَيَّاهُ بَاهُ ٻِي كَاوُ، كَا، كَه، كَ hayah bah ē kāv-ōh, kā, k-āh, k-ā,

he (it) used to be done by him etc.  
(like the Imperfect).

شَاهَزَادَهٗ ٻِي كُذَّارَ تَبِيرَهٗ بَنَهٗ هُنَرِ كَرِ

مَرَنَتِي جِئَمَتِ كَاوُ هَهٗ خُورِ قِسْمُونَهٗ

The prince warded off his stroke with fine art, in different manners he practised manly skill. Babrām, V. 240.

هَقَّهٗ طَالِمَ لَهٗ خِيلُو يَارَانُو سَرَهٗ خَبَرِي كَوَلِي چِهٖ نَهٗ دَوَهِيَوْمَ دَا اُورِ حَمَا هَهٗ

نُورَلَهٗ كَمَهٗ لُورَهٗ وَلَكِيئَهٗ

That oppressor was talking with his friends (saying): I do not comprehend, from whence this fire came upon my house.

Gulistān (Gulsh. I, p. 179).

دَ هَقَّوَهٗ حَاصِلَ بَهٗ ٻِي آوَاتِ كُذَّارِي كَوَلَهٗ

By the gain of those she used to get her subsistence.

Kalīlah ē Damanah (Gulsh. I, p. 111).

6) The Conditional (Optative) of the Imperfect\*).

کَوَلِي، کَوَلِي، کَوَلِي	{	مَا mā	kavalai, kavalē, kavalēē.
		تَا tā	
		هَقَّهٗ hayah	
		مُوَرِ mūr	
		تَلَسِي tāse	
		هَقَّوُ hayū	

(If) by me, thee, him, her, us, you, them, he, she, they would be done, or: would that by me etc. would be done!

\*) This mood is seldom used; کَوَلِي etc. undergoes no change for gender or number.

7) The Aorist.

Sing.

هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ  
hayah ē vō k-āh, vō k-ā, vō  
kā, vō k-ā, he (it) was done by him.

هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ  
hayah ē vō k-āh, vō k-ā, vō k-ā, she  
was done by him.

Plur.

هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ	m. hayah ē vō k-āh,	} they were done by him.
	vō k-ā, vō k-ā,	
هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ هَيَّاهُ بِى وَكَمْ وَكَمْ وَكَمْ	f. hayah ē vō kav-al-ē	
	(vō k-ā-ē)	

رَوَّاهُ نَبِيَّ شَوَى چِه خُدَايَ رَجِى وَ مَوْسَى نَبِيَّ تَه وَكَمْ

It has been narrated, that God made a revelation to the prophet Musā. Favā'id uš-šarīḥ (Gulsh. I, 58).

مَا هَرِ هَيْشِجْ كَمِى وَ تَه كَا هَرِ جَنْكُونَه

I did not inflict upon him any defeat in the battles.

Bahrām, V. 190.

هَه دَار دَار تَارَانُو تَبِير كَا خَيْل دَارُونَه

The friends passed their turns in succession.

ʿAbd-ul-Qādir (Gulsh. II, p. 197, 8).

\*) In the Aorist the forms وَكَاوَمْ, وَكَاوَمْ, وَكَاوَمْ are also used, but not so much as the short ones. In the fem. Plural وَكَاوَمْ is frequently substituted for وَكَاوَمْ.

8) The habitual Aorist.

هَيَّاهُ بَاهُ عَ وَكُ كُكُ وَكَ وَكَ وَكَ وَكَ hayah bah ē vō k-ah, vō k-ā,  
vō kā, vō kai, he (it) used to be done by him.  
etc. etc. (like the Aorist).

Of كَوَّلَ a participle perfect is, as a rule, not formed, instead of it the participle perfect of كَرَلَ is substituted, but a conjunctive participle past (in connexion with شَوَلَ, to be able) is derived from it (كَوَلَّى). In poetry a participle perfect is occasionally met with, as:

كَهْ خَيْرٌ دَنَ بَهْرَامِ رَأَاهُ رَأَاهُ وَوَرُ  
أَنَّى شَبْرَنَكَ سَرَّهَ سَتَا شَى غَوَّعَ كَوَلَّى

If no information about Bahrām is (was) brought by thee to me,  
O Shabrang, thy head will be cut off! Bahrām, V. 530.

But in a personal passive construction (I. II. pers. Sing. and Plur.) only كَوَّى is used.

§. 169.

V. The compound verb.

The Paṣṭō has not quite lost the power to form two verbs into one by putting the first in the conjunctive participle past, as it is so frequently done in the modern Indian Prākṛit idioms. But this junction of two verbs is no longer in general use in Paṣṭō, but restricted to compositions with the verb شَوَلَ (\*), to be able, whereas even the Persian has retained the power to join the participle past of a verb with شَائِسْتَن, بَائِسْتَن and تَوَائِسْتَن to one (grammatical) whole (\*\*).

\*) بَوَّيَه būyeh, it is necessary, may also take to itself a participle past conjunctive.

\*\*) In Persian the rule is generally put down thus, that with the verbs quoted the final ـن of the Infinitive is rejected. But this is

The signification of شَوَل in such connexions is rather curious. We have seen already, that شَوَل signifies 'to go', 'to become', like the Persian شَدَن, but in a compound verb, which denotes 'to be able', this meaning is inadmissible. As this whole formation points to the Sindhī, so also very likely the etymology of شَوَل must be sought in Sindhī. The Sindhī uses for this purpose सघणु sagh-ṇu, to be able, Hindī सकना sak-nā (Sansk. शक्); from this root sagh first sag has sprung, thence, owing to the predilection of the Paṣtō for conjunct consonants, sg, and with transition of g to v (which is not uncommon even in Persian) sv-ṇal (or šv-ṇal, initial s passing at the same time into š). For this etymology speaks also this peculiar circumstance, that شَوَل, when signifying 'to be able', is constructed as a transitive verb in the past tense, when compounded with a transitive verb, just like सघणु in Sindhī. Both verbs, شَوَل to go, to become and شَوَل to be able, though identical in outward form, must therefore be well distinguished from each other.

As in Sindhī so also in Paṣtō another verb is joined with شَوَل, to be able, by being put in the past conjunctive participle. The termination of the past conj. participle is in Sindhī yō (Sansk. य and Prākṛit इय) and analogously in Paṣtō ai or lengthened āē, or al-ai, al-āē\*). As regards the formation of the past conjunctive participle it coincides with that

---

strictly speaking, not the case. The verbal root forms, after the rejection of final an, the participle past (cf. §. 125, 4, note) and this is compounded with the finite verb, as proved by the Indian Prākṛit idioms and the Paṣtō. That also the Infinitive may be joined with those verbs, does not speak against it.

\*) The termination al-ai, al-āē has its precedent already in Sanskrit, as: निर्गत्य (निर्गम्) etc.

of the participle perfect, with the only but natural difference, that the past conjunctive participle does not undergo any change for gender or number, as little as in Sindhi.

Any verb may thus be joined in the past conj. participle with شول, except the derivatives, which cannot form a simple participle perfect. In the case of the intrans. derivatives a circumscription must be resorted to, where necessary, by such like expressions as: طَاقَتَ لَرَل to have power, تَوَان لَرَل to have power or تَوَانِيَدَل, to be able. But verbs compounded with كَرَل may form a past conj. participle or the causal derivatives may form a regular participle perfect. E. g. خُوكِ شَيِ يَمِيَدَا كَوَلِي, who can create? (Gulsh. II, p. 29, 2). زَرَعُونَوَلِي شَيِ, he can make green.

The Paṣtō uses this compound verb only in the Present, the Future, the Imperfect and Aorist; the other tenses and moods, if absolutely required, must be circumscribed, as pointed out. In the Present and Future there is no difference between intrans. and transitive (causal) verbs, both being formed in the same way.

### 1) The Present.

Sing.

نَم	رَسِيَدَلِي, رَسِيَدَلَاي	زَ zah	rasēd-alai, rasēd-alāe	šam
شَيِ	or	تَا tah	or	š-ē
شَيِ	رَسِيَدِي, رَسِيَدَاي	هَيَه hayah	rasēd-ai, rasēd-āe	šī

I, thou, he (she) can arrive.

Plur.

شو	} or {	رسیدلای, رسیدلای	مور	mūz	} or {	راسعد-الای, راسعد-الای	س
شبی		تاسی	tāse	راسعد-ای, راسعد-ای		سای	
شی		رسیدو, رسیدای	هغه	hayah		س	

We, you, they can arrive.

2) The Future.

Sing.

\* زه به رسیدلای (etc.) zah bah rasēd-alai (etc.) šam, I shall  
be able to arrive etc. (like the Present).

خوک نه زمې و آسمان و ته ختی شی  
نه غیسی لره وړکړی دا مکان تې  
خوک نه خدای سره خبری شی کولی  
نه موسی مشرف کړی ده دا شان دوی

Who can ascend from earth to heaven? this place he has given to Jesus.

Who can speak with God? with this dignity he has honoured Moses. Rah'mān (Gulsh. II, p. 29, 2).

نه څه و خوړی لکه زهر په خوړې  
نه خوړای شی نه څه څنای شی په پیری کې

If thou eatest anything, thou art pained as by poison; thou canst not eat, thou canst not drink anything in old age. Rah'mān. (Gulsh. II, p. 20, 2.)

\*) In the Future the Subjunctive prefix و is not used, the verb being composite.

حَنَ اِيْمَانِ سَيَّارَلَايِ بُوِيَه وَ عَقَدَ تَه  
چِه بِي حُكْم جَارِي شَوِي دَر هَرَجَا تَقِي

Soul and faith must be entrusted to him, whose order has become binding on every one. *Rah'mān* (*Gulsh.* II, p. 20, 2).

دَ مُرْدَانُوِه مِعْرَاجَ بَه وَرَتَلِي نَه شِي  
كَه دَ سَعِيي كُوتَاهِي لَرِي بَه زَرِه كَبِي

At the ascension of the dead he will not be able to go, if he have littleness of effort in his heart. *Xuš'hāl* (*Gulsh.* II, p. 69, 3).

### 3) The Imperfect.

#### 4) The Aorist.

Both tenses coincide, the prefix ' not being used with the Aorist. Intransitive verbs are constructed personally, but transitive (causal), as noticed already, passively, the agent being put in the Instrumental; we must therefore consider both separately.

#### a) Intransitive verbs.

##### Sing.

شَوَم	$\left\{ \begin{array}{l} \text{رَسِيْدَلَايِ, رَسِيْدَلَايِ} \\ \text{or} \\ \text{رَسِيْدَلَايِ, رَسِيْدَلَايِ} \end{array} \right.$	زَه	zah	$\left\{ \begin{array}{l} \text{rasēdalai, rasēdalāe} \\ \text{or} \\ \text{rasēdai, rasēdāe} \end{array} \right.$	švam
شَوِي		تَه	tah		švê
شَد		مَ	m. hayah		šah
شَوَه		فَه	f. hayah		švāh

I, thou, he, she could arrive.

##### Plur.

مُو رَسِيْدَلَايِ (etc.) شَوَر mūž rasēdalai (etc.) švñ

شَوِی	تَاسِی	tāse	„	švaI
شَوَل	فَعَه	m. hayah	„	švaI
شَوِی	فَعَه	f. hayah	„	šval-ē

We, you, they could arrive.

نَر بَلَر دَوَرِی وَرَفَسِی لِر لِر رَاتَلَل نِیوَدِی وَرَتَلِی نَه شَوَل

Up to Balar they came after him at some distance, near him they could not come. Tārīḫ-i murassas (Gulsh. I, p. 49).

## b) Transitive and causal verbs.

It is to be noticed, that in this tense (Imperfect and Aorist) only the third person Sing. and Plural can be employed, according to the following paradigm:

### Sing.

مِی شَه	لِیْدَلِی, لِیْدَلِی	فَعَه m. hayah	līdalai, līdalāe	me šah
	or		or	
مِی شَوَه	لِیْدِی, لِیْدِی	فَعَه f. hayah	līdai, līdāe	me švāh.

He, she could be seen by me etc.

### Plur.

مِی شَوَل	فَعَه لِیْدَلِی (etc.)	m. hayah līdalai (etc.)	me švaI
شَوِی	فَعَه	f. hayah	švalē

They could be seen by me etc.

\*) Instead of مِی or مَا all the pronouns (by thee, him etc.) or any agent may of course be used.

بِه مَبْنُوحٌ ذَ قَبْرُولُو كِبِي اَوْسِيْدَه اَوْ حِيْجَا هَفَه هِه زَنْخِيْرُ قَم نَه  
شَد تَرَلِيْ

He remained within the tombs and by nobody he could be bound even with chains. Mark. 5, 3.

اَوْ هِه هَفَه حَايِ كِبِي دَه حِيْجُ مُعْجِرَه كَرِيْ نَه شَوَه\*)

And in that place a miracle could not be done by him.  
Mark 6, 5.

هَفَه فَنَرُ مِيْ چِه نَسْتِ كَرِيْ دَه وَر تَه وَاچَاوَه شَاكِرْدُ مِيْ نَفْعِ كُوْلِيْ  
نَه شَوَه

That artifice, which he had concealed, he brought upon him, by (his) disciple it could not be warded off\*\*). Gulistān (Gulsh. I, p. 180).

## VL. The Passive Voice.

### §. 170.

The Paštō is not possessed of a proper Passive voice as the Sindhī and partly the Panjābī, but it must resort to a composition in order to form a Passive. For this purpose the participle preterite and the participle perfect is employed, which are connected with the auxiliary شَوَل and (more rarely) with كِيْدَل, the participle agreeing with its subject in gender and number. The participle preterite (cf. §. 143) is only used in the simple tenses, i. e. in the Present, the Subjunctive Present, the Future, the Imperfect and Aorist, in the compound tenses only the participle perfect is used, which however may be equally used in the simple tenses also.

\*) The difference between this and a regular passive construction is easily seen.

\*\*) Literally: its repulsion (نَفْعِ s. f.) could not be made by the disciple.

The Passive is distinguished from the passive construction of active and causal verbs (in the past tenses) by the absence of an agent; as soon as the agent is added, the (proper) Passive can no longer be used\*). It is understood, that a Passive can only be formed from active and causal verbs.

### The Imperative.

The Imperative is formed with the participle perfect or preterite and the Imperative of شَوَّل, as the Imperative of كَيْدَل is not in use. The prefix ' is put before the participle (as also in the Subjunctive present and in the Aorist) or it may be omitted. In the Imperative of causal derivatives the prefix ' is not admitted, if the participle perfect (compound) be used, but also when the participle preterite is used, the prefix ' is rarely added. See the paradigm of the Passive, II. Appendix, V.

وَنِيوُ (\*\*) مَهْ شَهْ هَهْ دُوسْتِي دَ دُنْيَا خَلَفَ دَا فِي شَرِّمِ فِي وَفَا فِي حَيَا خَلَفَ

Be not caught in the friendship of the world, of the people, these shameless, faithless, impudent people. H'amîd (Gulsh. II, p. 91, 1).

چِه سَوَدَن هَهْ أَشْنَايِي دَ أَشْنََا نَهْ شِي

وَكْرَهْ مَهْ شَهْ (\*\*\*) دَا فِي سَوَنَهْ سَوَدَا هُوَجْ

\*) The instrumentality may be expressed in the Passive by the preposition هَهْ (see §. 174, 6), which is also referred to animate beings, but it must not be lost sight of, that in this case the stress is laid on the instrument, by means of which any thing is done, not on the agent proper. The preposition لَهْ, when used with a passive verb in the Present, Subjunctive present and Future, denotes properly the agent, else it implies: from the part, from the side of; cf. §. 174, 17.

\*\*) About the prefix ' in connexion with مَهْ, see §. 171.

\*\*\*) On the use of the Imperative, see §. 192.

When thou art not profited by the acquaintance of a friend, this useless, foolish bargain should not be made. H'amīd (Gulsh. II, p. 81, 1).

### 1) The Present.

This tense is formed by the participle perfect or preterite and the Present of the auxiliary شَوْل or کَبَدَل, but with the participle perfect of causal derivatives only شَوْل is connected, as: شَوْل کَرَوِ شَم, I am collected.

چِه خَوک زَنَرَا کَا مَسَاجِد هَه چِرَاغَوَنه وَر بَخَبَل شِی هَمِيشَه کُتَاغَوَنه  
نَ اَرِنَا زَرَه کَلَوَنه

If one illuminate mosques with lamps, to him are always forgiven the sins of seventy thousand years. Favāid us̄-šarīḥ (Gulsh. I, p. 71).

قَرَمَوِ چِه هَه حِصَاب کَبِی تَبِر وَ بَیْرِشِی  
مَلَانَت پِر وَايد کَبِی لَوَر هَه لَوَر

Every man, who in the account is unscrupulous, on him blame is pronounced in every direction. Rah'māu (Gulsh. II, p. 17, 3).

زَهَرَمَه نَ قِيَامَت کَرَه بَابُو جَان نَ دُنْيَا سَاعَت هَه هَر خَال تَبِرَاوَه شِی

Make provision for the resurrection, o Bābū Jān! the hour (time) of the world is passed in every state (a man may be in).

Bābū Jān, (Gulsh. I, p. 121).

### 2) The Subjunctive of the Present.

In this mood only the auxiliary شَوْل is employed, as there is no Subjunctive of کَبَدَل (§. 164). The prefix وَ is put before the participle, but when the participle perfect of causal derivatives is used, the prefix وَ is prohibited.

هه خروا تر دَا هم کاهي دَا قسي مُعامَلَه شوي تِه چه هِنْد لَهي  
وَ اَخِست شي

Also before this now and then such an event took place, in order that advice should be taken from it. *Kalīlah ō Damanah* (Gulsh. I, p. 84).

### 3) The Future.

In this tense *شول* and *کيدل* may be used with the participle perfect and preterite, but with the participle perfect of causal derivatives only *شول* is connected. The prefix *و* may be optionally used or omitted (cf. 163, 3) in the Future. (About *کيدل* see §. 164).

چه دَا لار ستا د تلو هه سر و رسي کدل د مراد به ستا هه سر  
کيپينو شي

When this way may arrive at the end of thy travelling, the flower of (thy) desire will be put on thy head. *Kalīlah ō Damanah* (Gulsh. I, p. 96).

لر هه به بي له انساب هه دي محل کبي و کيدل شي

Some little (Pl.) will be written in this place on their genealogy. *Tārīḫ-i murassas* (Gulsh. I, p. 36).

هر څوک چه نه دي قاي نفس واپستگي کا

نه به شي ترې هه زنجير سره هوا

Every one, who puts dependance on this transitory breath, (he shall know): not is the wind bound with a chain. *Rah'mān*. (Gulsh. II, p. 5, 2).

### 4) The Imperfect.

This tense is formed with the participle perfect or preterite and with the auxiliaries *شول* or *کيدل*; with the participle perfect of causal derivatives only *شول* is connected.

دَ لَیْلَی هِه حِشَف کِهَنی قِسی مُبْتَلَا شَه  
چِه هِه رَه نِی نِوم کِجَل دَ لَیْلَی شَه

In the love of Lailā he was so much captivated, that on his tongue the name of Lailā was written. Bahrām V. 471.

### 5) The habitual Imperfect.

This tense is formed in the same way as the Imperfect, only the particle *bə* bah being added, which usually precedes the participle, but may also follow it (or even the auxiliary).

مَلَمَت بَه هِه مَا خَه لَرَه وَاهِه شَه کِه دَ تَا دَ دِلِیَرِی خُورِ خَبَرِ دِی

Why would a blame be pronounced on me, if any one would know thy heart-ravishing? Rah'mān (Gulsh. II, p. 27, 2).

### 6) The Conditional (Optative) of the Imperfect.

In this mood only *šowl* is used, as from *kēdāl* no Conditional is formed; e. g. *rə šowlī šow* or: *rə šarə šow*, (if) I would be repulsed.

### 7) The Aorist.

In this tense the prefix *ʔ* is put before the participle perfect or preterite. As from *kēdāl* *kēd-āl* no Aorist is formed, only *šowl* can be used as auxiliary. The causal derivatives generally use in the Aorist the participle perfect, with which the prefix *ʔ* cannot be connected, the verb being composite\*), but the primitive causals may optionally employ the participle perfect or preterite, with the prefix *ʔ*.

\*) The Aorist may therefore outwardly coincide with the imperfect.

أَحْدَادَ هَذِهِ اِهْتِمَامَ نَ مَوْجِهَ بَنْدَتِي لَه يَوِي مَوْجِي بَلِي وَتَه تَه هَذِهِ بَرْهَكَ  
وُ وِبِشْت شَه وَ مَرِي

Ah'dād went at the inspection of the erection of batteries from one battery to another; he was hit by a musket (ball) and died. *Tārīḫ-i muraggaṯ* (Gulsh. I, p. 33).

هَمَه چَه هَذِهِ آغَزُو وَ كَرَل شَوَه دَا دِي چَه كَلَام دَاوَرِي آر وَ سَوَاسَ نَ دُنْيَا  
أَوْ فَرِهَبَ نَ دَوْلَتِ ثِي لَانْدِي كَرِي

Those who were sown amongst the thorns, are these, who hear the word and the temptation of the world and the deceit of wealth puts them down. *Matth.* 13, 22.

دَا جَوَاقِصِي چَه بِيَان شَرِي هَذِهِ دَا كِتَاب كُنْهِي قَم وَ كُنْهِي شَرِي

These few stories, which were related, were also written in this book. *Kalilah ō Damanah* (Gulsh. I, p. 91).

### 8) The habitual Aorist.

This tense is formed by adding to the Aorist the particle *هَذِهِ*, which may either be put before the prefix *وُ* (separated also by one or more words from it), or after the participle, preceding (and occasionally following) the auxiliary.

### 9) The Perfect.

In the Perfect and the following tenses and moods only the participle perfect is employed in connexion with the auxiliary *شَوِي* (م شَوِي etc.). In the Perfect (and also in the Pluperfect) however *شَوِي* is often omitted, so that it outwardly coincides with the Perfect of trans. verbs (§. 155); this is the case, when the Perfect is to be represented as continuing in its action to the Present.

وَيَلِي شَوَى نَى چِه سَر دَ حَيَوَانَانَو مَرَوَى نَى آو كَمَتَرِين دَ جَانَوَرَانَو خَر

It has been said, that the head of the animals is the lion and that the lowest of the beasts is the ass. *Gulistān* (*Gulsh.* I, p. 174).

دَا جِيَرِنَى دَ عَمَلُونُ حَمَا نَه دَه چِه دَه كِنَبَى كِنَبِلَى عَمَلُونَه حَمَا نَه دِي

This is not the scrip of our actions, as our actions are not written on it. *Favā'id us-sārīfāh* (*Gulsh.* I, p. 58).

#### 10) The Subjunctive of the Perfect.

This mood is only used in the third person Sing. and Plur., as in the Active.

#### 11) The Pluperfect.

This tense is formed by the participle perfect and the Pluperfect of شَوَى, i. e. دَم شَوَى etc.

حَكَمَه چِه دَمَر حَلَه دَه زَوَلَنَو آو دَه زَنَخِير تَرَلَى شَوَى دَه آو زَنَخِير دَه  
بِي شَلَوَه آو زَوَلَنَى دَه بِي مَاتِي كَهِي

For he had often been bound with fetters and with a chain, and the chain used be torn asunder by him and the fetters used to be broken by him. *Mark* 5, 4.

#### 12) The Subjunctive of the Pluperfect.

This mood is formed by adding the prefix دَه to the Pluperfect, which either precedes the participle or follows the same, preceding immediately the auxiliary دَم, as: دَه شَرَلَى شَوَى دَم or: زَه شَرَلَى زَه شَرَلَى, I would have been repulsed.

### 13) The Conditional (Optative) of the Pluperfect.

This mood is formed by the participle perfect and the Conditional of the Pluperfect of شَوَّل, as: زِه شَرَكَلِي شَوِّي دَوِّي, (If) I had been repulsed, or: would that I had been repulsed!

### 14) The past Future.

This tense is formed by the participle perfect and the past future of شَوَّل, i. e. بَه شَوِّي دَم etc.; the prefix بَه generally precedes the participle but may also follow it, preceding immediately the auxiliary دَم, as: زِه بَه شَرَكَلِي شَوِّي دَم or: زِه شَرَكَلِي شَوِّي بَه دَم, I will (= may) have been repulsed.

دَا عَطَرَه زِهَات لَه دَرِي سَوَه دِينَارُو بَه خَرَج شَوِّي دِي أَو غَرِبَانُو تَه  
بَه دَر كِرِي شَوِّي دُو

This perfume will (may) have been sold for more than three hundred Dīnārs and they (the Dīnārs) would (then) have been given to the poor. Mark, 14, 5.

### §. 171.

The position of the negative adverbs نِه and مَه with the verb.

As the position of these two negative adverbs is very important for the conjugation of the verb, we must attend to it more closely. With the Imperative only the prohibitive negative مَه is used, which must always precede the verb; the prefix نِه is in this case usually omitted, but مَه may also (though rarely) follow it. With the Imperative of the Passive مَه always precedes the

auxiliary\*) and the prefix **و**, which always precedes the participle, may therefore be retained. Else **مَ** is only employed before the Subjunctive of the Present, and before the Optative (Conditional) of the Imperfect and Pluperfect, mostly in connexion with the interjection **کاشکی**, would that!

نَارُوا آواز مَ آوَرَه فِي حُوتَه پَه خَلَه مَه وَايَه بَابُو جَان فَه قَدِيم آشنا  
و مَ بَاسَه نَه وَايَه

Do not hear an improper voice, do not talk with the mouth useless (things); o Bābū Jān, do not eject that old friend from (thy) thought! Bābū Jān (Gulsh. I, p. 122).

When the negative adverb **نَه** 'not' is connected with the Present, it always follows the personal pronoun or demonstrative, as: **زَه نَه كَرِم**, I do not; but when **نَه**—**نَه**, neither — nor, is used in coordinate sentences, it is put at the beginning of the sentence, as:

نَه بَه زَه دَ نَاخَلَف مُنَاہ مُعَاف كَرِم  
نَه بَه خُدَايَ دَ عَزَّوَجَلَّ مُنَاہ مُعَاف نَا

Neither shall I forgive the sin of the degenerate, nor will God forgive the sin of **!Azāzīl** (the devil).

When the verb is compounded with a separable prefix (§. 119), the negation **نَه** is placed between the prefix and the verbal root, as: **رَا نَه كَم**, I do not come; but this is not a strict rule, for it may be said: **كَبِي نَه نَم**, I do not sit, and: **نَه كَبِي نَم**. In the Passive the negation **نَه** must always be put before the auxiliary (finite verb), as: **لِيَدَه نَه شَي**, he is not seen.

\*) This is throughout the case with every compound verb, as: **غَلَط مَه شَه** (from **مَانُول**), **مَات مَه كَرَم** (from **غَلَطِيدَل**).

In the Subjunctive of the Present the negation **نَهْ** (مَهْ) always follows the prefix **وْ**, as: **وْ نَهْ وَاثِي**, he may not speak. But if the verb be compounded with a prefix (or noun), **نَهْ** is placed between the prefix (or noun) and the verbal root, as in the Present (Indicative), because in these cases the prefix **وْ** is not admitted in the Subjunctive, as: **مَات نَهْ شِي**, he may not come, **رَا نَهْ شِي**, it may not be broken.

When **نَهْ** — **نَهْ** signifies neither — nor, it is put before the prefix **وْ** (or the compound verb), because not a single member of the sentence, but the whole sentence is negated. When in the III. pers. Sing. or Plural the prefix **دْ** be used (with or without the prefix **وْ**), the negation **نَهْ** always follows it (or both, **دْ** and **وْ**), as: **دْ نَهْ كَا**, he should not do, **دَا دْ وْ نَهْ شِي**, this should not be (or be done).

چه نَهْ وْخوری نَهْ بی درگیری مَهْ بی ویدی  
 که به گنج باندِ به خیر دْ مار کبیبی

Who does not eat it nor give it, do not look at him, though he sit like a snake upon a treasure. H'amīd (Gulsh. II, p. 102, 3).

In the Future the negation **نَهْ** precedes likewise the verb and the prefixes **بَهْ** or **وْ بَهْ** (**بَهْ وْ**) are placed before it. When the verb is compounded with a separable prefix (or noun), the negation **نَهْ** is placed between the prefix (or the long syllable cut off from the root, §. 133) or the noun and the verbal root, as in the Present, as: **بَهْ کببی**, (آخستل) **بَهْ وَا نَهْ خَلَمْ**, I shall not take, **بَهْ نَهْ سَم**, I shall not sit, **بَهْ مَات نَهْ کَرَمْ**, I shall not break.

هغه وگت چه تنستنه دْ ساه دُوکَه شِي ذور ماکو به هر وَا نَهْ چوری جولا

At that time, when the web (of the loom) of the breath turns rotten, the weaver will not throw upon it his shuttle. Bābū Jān (Gulsh. I, p. 124).

In the Imperfect, the habitual Imperfect, the Aorist and the habitual Aorist the negation **نَه** is placed immediately before the verb or between the verbal root and the separable prefix or the particle **بِه** and the prefix **وَر**, as: **كَبَنِي نَه نَاسَت**, he did not sit down, **وَرَا بِي نَه وَرَر**, he did not bring it; **وَرَبِي نَه كَر**, he did not do it; **بِه رَا نَه غَي**, he did not use to come.

In the tenses compounded with an auxiliary (Perfect etc.) the negation **نَه** is always immediately put before the auxiliary, may the participle precede or follow it, as: **رَاغَي نَه يَم**, I am not come or: **نَه يَم رَاغَلَي**. The same is to be remarked of the Passive, where the negation **نَه** must always precede the finite verb, as: **لَيَدَلَي**, I have not been seen, **بِه لَيَدَلَي شَوَي نَه رِي**, he will (may) not have been seen.

## VII. Section.

### Adverbs, Prepositions, Postpositions, Conjunctions, Interjections.

§. 172.

#### 1) The Adverb.

The Paštū forms no proper adverb, but the adjective is at the same time used in an adverbial sense; it remains either in the Sing. masc., if not referred to a particular subject or object, or, if the subject or object be mentioned, it agrees with them in gender and number. When an adjective nearer defines another adjective in an adverbial sense, it must agree with it in gender, number and case.

همیشه لکه لاله ویدی د زره خورم زه خواجه محمد خرنکند ورتی نه شم

I always eat the blood of the heart, like the tulip; I Xavājah Muḥammad cannot openly wail. Xavājah Muḥammad (Gulsh. II, p. 115, 1).

به لاس می بپرئی ککله و نیوه به کوشه کیناست آرام می و نیوه

He seized the boat firmly with his hand, sat in a corner and was quiet. Gulistān (Gulsh. I, p. 162).

دا به حسن بهره بهره بنایسته ده زره می خکله خکله کاند پی ترایب

By her beauty she is very, very graceful; therefore she distracts my heart and confuses it. Ah'mad Shāh (Gulsh. II, p. 203, 2).

خکله یکه یکه و پیری سر مفرن ولی نه غواپی له خدایه آمرزن

What talkest thou without restraint, o babbler! why doest thou not ask forgiveness from God? H'amīd (Gulsh. II, p. 97, 3).

The sense of an adverb is now and then expressed by the Feminine Sing. of the adjective with the preposition به, in, by, as: به پنه, secretly (in secret); in the same sense the Masculine Sing. of the adjective is also used, as: ستا به خیر, alike to (ستایه خیر, like thou), به لغت, quickly; a similar adverbial formation is سره سم or سم سم, equally, in the same manner.

خو له نس سره و نه دری ده ککله

به نرمی به کله خلاص شی له اوزبک

How long wilt thou not stand hardly\*) with thy belly? with mildness wilt thou ever get away from the Uzbek? H'amīd (Gulsh. II, p. 95, 2).

به پیوره می درته و درست عمل به دا تدبیر کم

I have told thee plainly: do the whole work after this scheme. Mīrzā Xān Angārī (Gulsh. II, p. 123, 2).

\*) The sense is: how long doest thou not stand on severe terms with thy belly?

Substantives also with postpositions or prepositions are used adverbially, as: *لَهْ خَرْمِي* (from *خَرْمَه*), altogether, throughout, *لَهْ خَايَه*, throughout, *لَهْ سَرَه* or *تَرَسَر* throughout, wholly; *بِهْ خَوَا*, before, especially in such compositions, as: *وَاَرِهْ وَاَر*, continually, in succession, *شَا بِهْ شَا*, back on back; *تَخَامِخ* (Pers.), face to face. But also without prepositions or postpositions many substantives, especially those denoting place, time, manner, when accompanied by a demonstrative or adjective, are employed with an adverbial signification, as: *دَا شَان*, here (this side), *تَغَهْ خَوَا*, thus, is this manner, *قَهْدَهْ وَقْت*, then (at that time), *قَهْرَهْ وَرَخ*, daily (every day).

§. 173.

The Paštō possesses only a small number of proper adverbs, as: *بِيدُو* *bēdū*, exactly, *تَرَتِي* *tarāi*, secretly, *تَل* *tal*, always, ever *زَر* *zar* (or *زِر* *zir*), quickly, *سَرَه* *sarah*, together, *گُنْدِه* *gunde*, perhaps, *لَاكَه* *lakah*, like, *نَاخَايَه* *nāṭāpah*, suddenly, unawares, *وَلِي* *valē*, why? *وَرَو* *vrō*, slowly, *هَادَو* *hadō*, at all, *قَسِي* *qasi*, thus, in this manner.

The adverbs may also take to themselves prepositions and postpositions, like other nouns, e. g. *بِهْ وَرَو*, slowly. This is especially the case, when the adverb is repeated with a preposition, as: *زَر تَر زَرَه*, quicker than quick = all at once; *تَل تَر تَلَه*, ever to ever = continually; some adverbs may even be put in the Plural, as: *تَل تَر تَلَو*, continually.

We let here follow a survey of the most common adverbs of place and time:

a) Adverbs of place.

بَانْدِ bānde, on, upon.

بَہَرِ bahar, outside.

بِیَا رَتَہِ biārtah, back, backwards, again.

پُورِ pōre, up to, till, over.

پُورِ اُورِ pōre ūre, right through.

پُورِ تَہِ pōrtah, above, on, upon.

چَا پَہَرِہِ čāpērah, round about.

چَرِ čare	} , where?
چَرِ تَہِ čartah	

بَلِ چَرِ تَہِ bal čartah, somewhere else.

ہَرِ چَرِ تَہِ har čartah, every where.

ہِی چَرِ تَہِ hičartah, no where.

دَلِ dale,	} here.
دَلِ تَہِ daltah	

دَلِ تَہِ — دَلِ تَہِ daltah — haltah, here and there.

دَنانَہِ dananah, within.

نِکَ تَہِ ñkatah, below.

لَآندِ lānde, below.

لَآندِ بَانْدِ lande bānde, topsy turvy.

لِـ lire, far.

نِزْدِی nižde, near.

نَنَن nanab, within.

وَرَّـ varā	}	far.
وَرَّـیَه varāyah		

وَرِّسْتَو vrustō, behind, after.

وَرَّـنَدِ vřānde,	}	before, ahead, in front.
دَوَرَّـنَدِ davřānde		

هَلَّتَه haltah, there.

هَوْرِه hūre	}	there.
هَوْرْتَه hōrtah		

هَیْسْتَه hīstah, here.

b) Adverbs of time.

آخِر āḫir, at last, finally. (Arab.)

اَوَس ōs, now.

تَرَّ اَوَس تَر tār ōsa pōre, until now.

بَارَّـیَه bārāyah, last night.

بَرَّـبَر barbar, often, repeatedly.

بِیَ biā, again.

پَرَّوَن parūn, yesterday.

پس pas, after.

تَل tal	}	always; continually.
تَر تَل tar talah		
تَل تَر تَل tal tar talah		
تَل تَل تَل tal tah talah		

چَر čare, at any time; ever.

چَر چَر čare čare, now and then.

هِيچَر hičare, never.

صَبَا gabā, to-morrow.

بَل صَبَا baḷ gabā, after to-morrow.

كَلَه kalah, when? ever, any time.

كَلَه كَلَه kalah kalah, now and then.

تَر كَلَه پُور tar kalah pōre, till how long?

هَر كَلَه har kalah, at any time; ever.

هِيچ كَلَه hič kalah, never.

نَن nan, to-day.

هَالَه hālah, then.

هميشه hamēšah always (Pers.).

§. 174.

2) Prepositions and Postpositions.

The Paṣtō has only a few proper prepositions and postpositions; the most important of them, which are employed in making up the cases, have already been mentioned in §. 65, so

that we may pass them here. But besides those the Paṣṭō uses also a number of adverbs, which take the place of prepositions and postpositions and participate in their construction. Other adverbs again may take to themselves a preposition or postposition, according to their signification, as: *هَه وَرْسَتُونِ كَوَر*, behind the house, *هَه نَوْدِي نَ كَوَر*, near the house or: *كَوَر تَه نَوْدِي*, far from the house, *نَوْرَانْدِ تَر هَغَو وَرْخَو*, round the loins, *چَپِيرَه تَر مَلَا*, before those days.

Substantives (and partly also adjectives), which, in connexion with a preposition or postposition, are used adverbially, are generally constructed with the prefix of the Genitive, as: *هَه نَوْدِ نَ*, *هَه غِيرِ نَ*, 'after the manner of', 'like', though, when the sense requires it, other prefixes or postfixes may also be used, as: *هَه خَوَا تَر مَلَامَتَ*, before the blame.

We let here follow a survey of the most common prepositions and postpositions, most of which are originally adverbs.

# 1) *بی* bē, without (Pers. *بی*, Sansk. *वि*).

When a noun ends in a consonant, a (or ab) is added to it (cf. §. 65, 6) a) as: *بی شَرَمَ* be šarma, without shame. Other nouns in the Sing. or Plural are put in the Formative\*).

*خَوْبَرُونِی بی دِلْبَرِی هَه کَار نَه نَه* *لَنَد وَتَه بی مَبِوَه هَه هَانِیَرُو کُور*

Beauty without the beloved is of no use, like a tree not having fruits, (but) thick with leaves. Rah'mān (Gulsh. II, p. 16, 2).

\*) When *بی* with a substantive forms a so-called Babuvrlihi or possessive adjective (cf. §. 38, 4 d), it does not influence the termination of the noun, because it is no longer a preposition, e. g. *بی غَمَ* be yama, without care, but *بی غَمَ* be yam, adjective, not having care, free from care.

(بی — نہ be lah — nah, except, without (or only بی — نہ).

زہ رَحْمَانِ بِي لَه خِيَلَه بَارِ لَوْرُ خَه نَه غَوَارِم

نَه قَبُولَه شِي دَ خُدَايِ هَه دَر دَمَا حَلِمَا

I Rah'mān desire nothing else except my friend,

If my prayer be accepted at the gate of God.

Rah'mān (Gulsh. II, p. 4, 1).

Instead of بِي — نہ now and then also بِي — نہ is met with (نَه the postfix of the Ablative), as:

بِي طُوطِي نَه قَفَسِ هِيخِ نَه دَقِ بَادَرِ كَرِه

رُوحِ هَه مِثْلِ دَ طُوطِي دَقِ تَنِ قَفَسِ

Without the parrot the cage is nothing, be sure of it,

The spirit is like the parrot, the body the cage.

Instead of بِي — نہ the Xataks use frequently also بِي — دَ (or بِي — دَ) or دَ being used and constructed in the same way as بِي — نہ, e. g.

بِي دَ بَارِ دَ رَنِيَا مَحَه كُتَانِ مَه كَرِه

چِه خُوشَحَالِ هَه هَه بَلِ مَخِ شِي شَكِييَا

Do not fancy, that Xušh'āl will be patient with another face, except the bright face of the friend. Xušh'āl (Gulsh. II, 33, 1).

2) بَانِدِ bānde, on, upon (adv.).

By itself بَانِدِ is only used with the pronominal Formatives بِي, دَر, دَر, otherwise it usually takes to itself the preposition هَه (see — بَانِدِ).

چِه آشِنَا دَر بَانِدِ پِيوَنِ شِي لَوِي هِمَتِ كَرِه

چِه دَ جَوَرِ دَقِ دَا يَنْجَه وَرَجِ مَزَاجِ

When a friend calls on thee, show great magnanimity, as thy constitution is vigorous these five days. *Xavājah Muh'ammad* (*Gulsh.* II, p. 108, 1).

3) *پَر* par, on, upon (Pers. *پَر*, Sansk. उपरि)

As regards its signification and construction it quite agrees with *پَه*, but is not so much in use as this latter preposition.

تَه دَرَبَابِ تِی پَر مَرَجُونُو بَهِیدَلِی  
حِیچَا وَ تَه خَکَه پَوَه نَمُوَدَه لَه دَرَبَابِ

Thou art an ocean flowing upon waves, (but) nobody has drunk a mouthful from the ocean. *Xavājah Muh'ammad* (*Gulsh.* II, p. 105, 2).

4) *پَس* pas, *پَسِ* pase, after (adv.).

The form *پَس* by itself is only used in the phrase: *خَفَه پَس* or *دَغَه پَس*, after that (this), otherwise *پَس* takes to itself the Ablative prefix *لَه*, *لَه پَس* or *پَس — لَه*, as: *لَه خَفَه پَس* or *لَه پَس لَه*, after that.

With the pronominal Formatives *وَر*, *دَر*, *رَا* always the form *پَسِ* pase is used, as: *رَا پَسِ* after me\*). *پَسِ* may also take to itself the Genitive prefix *دَ*, as: *دَ پَسِ* after this. To be noticed is the expression *پَسِ شَا* behind (one's) back. *پَسِ* is frequently connected with the prefix *پَه* — *پَه پَسِ*, see under *پَه*.

---

\*) *پَسِ* may also be compounded with the pronominal suffix *تِی*, so that *پَسِ تِی* may signify: after him, her, them.

هَس لَه دَوَه دَرِی وِرْخَو نِهْکَر تَه رَوَان شَه

After two (or) three days he went out to hunt.

Tarīḡ-i murāssas (Gulsh. I, p. 48).

5) هَوِر pōre, up to; on; over, beyond, across. (adv.).

هَوِر by itself is only used with the pronominal Formatives هَوِر, هَوِر, هَوِر. When هَوِر is used as an adverb (on this side), it is usually followed by the preposition هَوِر (literally: on this side on). With the Genitive prefix هَوِر signifies: beyond, as: هَوِر نَ لَنَدِی, beyond (on the other side) of the Kābul river. هَوِر is frequently connected with the preposition هَوِر — هَوِر, see under هَوِر.

نَ هَوِسْتِی هَوِر نِهْکَر هَرَات نَ وَصَل وَه شَه

چَه رَا هَوِر هَوِر نَدِی نَ نَرَبَدَا شَوَم

The assignment of meeting was put on the horn\*) of an antelope, when I had gone on this side of the river Narbadā. Ašraf ḡān (Gulsh. II, p. 159).

بِیَا لَه پِهْهَوِرَه نَ دُشْمَنَانَو آندِیْتَنَه وَکَرَم چَه رَا هَوِر بَه خَنَدَا کَا

Further I would dread the taunting of my enemies, that they will laugh at (on) me. Gulistān (Gulsh. I, p. 168).

6) هَه pah, in, on, upon; by, with, on account of (Pers.

هَه, Pārsī pa).

This preposition has a variety of meanings; on its construction see §. 65, 7. The usual signification of هَه is: in, at, on, as:

\*) I e ad calendae graecas.

دَبَّهْتَرُو ِهَ ڪَهاِي مَه ڪَهيَنَه ڪَهْتَرَه َن رِبَنِمُو ِهَ لِرَخ مَه ڊَلُوَرَه ڌَرَنِي

O inferior one, do not sit in the place of the better ones! do not sell wool at the rate of silk! H'am'Id (Gulsh. II, p. 102, 2).

هَ further signifies: by, with (denoting the thing or instrument, with or by which any thing is done), as:

جَنڪِيَاڻِي ِهَ خِيَلُو ڍِنُو بَارِي ڪَانِدِ  
تَا مِي ڦَنجَ تَا ِهَ نُوَرُو ِهَ ڌَوَرُو شَم

The hero plays with his own blood; either I am victorious or I shall be cut to pieces by the swords. Gulistān (Gulsh. I, p. 155).

رُونَدِ بَهْتَرِ ڌِي ڇَه ڪَه َنه ڍِي ِهَ سَتَرُڪُو  
نَه ڇَه سَتَرُڪِي ِهَ هَرِڌِي حَرَمِ ڪَا ڌَا

A blind one is better, who sees nothing with his eyes, not he who (= than he, who) opens his eyes on another harem. Rah'mān (Gulsh. II, p. 6).

ڇَه ٿِي ڍِي زَرُغُونِي شِي سَتَه لَوَه  
ِهَ ڪُو ڪَس ِهَ ڍِيڪِي شِي رَا تَه ڌَا ِهَ

When its roots grow strong, its trunk great, by how many men will it (the tree) be pulled out? tell me! Gulistān (Gulsh. I, p. 157).

هَ may denote the direction, as: ِهَ غَرَه ڇَنَل, to ascend on a mountain, ِهَ ڪُوَرِ نَمَوَتَل, to enter a house, ِهَ ڪَلِي رَاكَل, to come to a village.

With the verbs: to consider, to take for, to exchange for, هَ must be variously translated by: as, for etc., as: خَوَارِي ِهَ خَوَارِي ڪَنَرَل, to consider wretchedness as wretchedness; ِهَ ڪَلِ نِهِيَل, to take for a rose; ِهَ مَنَتِ ڌَرُڪَوَل, to give as a favour.

نَ حَمِيدٍ نَ نِیْسَتِی وَبَارِ مَهْ کَرِهَ زَرْدَارَه  
تَر به نه کَرَم دَا شَرْمِی به دَغَه شَال

O money-man, do not pride thyself on the nullity of H'amīd!  
I shall not give thee this blanket for that shawl. H'amīd (Gulsh.  
II, p. 97, 2).

In a similar way به must be translated in the following verse:

کَه سَمِی به أَصْل دَوْدِی قَرَوِ بُی دِیِر نَوِ  
دَو به تَوَه نَوِ یَو به سَلَه تَو به زَر

Though men are by origin one, their difference is great: one  
goes for one, one for hundreds, one for thousands. ʿAbd-ul-qādir  
ḡān (Gulsh. II, p. 191, 2).

به must also be translated by: for, on account of, as:

به بَد بَدَن بَادِی

The wicked are remembered on account of the wicked (thing,  
they have done). (Gulsh. II, 53, 3).

به حَیَا شَجَاعَت و کَرِه شَاپَاش

On account of their modesty and bravery applaud (them)!  
(Gulsh. II, p. 46, 3).

به signifies also: about, round, as: خَلَفَ به نه هَوَل شَوَل,  
the people assembled round him (Gulsh. I, p. 161), or with (on),  
as: به آشَنَا پِیَش شَوَل, to meet with a friend.

It is a poetical license, if به is now and then used absolutely  
(without a following noun), as:

چَه دَ مَخِ خَالِ بُی به وَرَانِی  
بِهَر مَخِ دَ نه بَشِی دَ اَوِیْنِیَو تَل بَارَانِ مَکَد

As the mole of his face is spoiled thereby, may not always  
on his face a rain of tears be collected! Ah'mad Shāh (Gulsh. II,  
p. 206, 1).

The verbs *دَوَجِیدَل*, to understand, *فَهَم کَرَل*, to comprehend, are usually constructed with *دِه*, as: *دِه دَا نِه دَوَجِیَرِی*, he does not understand this.

Very frequently *دِه* takes to itself another postposition or adverb, as: *دِه — بَانَد*, on, upon, among, used in the same sense as simple *دِه*, e. g. *دِه تَا بَانَد مَیْنِ نَم*, I am in love with thee (Gulsh. II, p. 5, 3), *دِه کَلِی بَانَد رَاغَلَم*, when I came to the village; *دِه مُرْعُو بَانَد بُی بیاموند شَرَف*, he acquired eminence among the birds (Gulsh. I, p. 167).

*دِه سَوَزَانُو لَنَبُو هَاس*, on, upon, as: *دِه — هَاس*, on burning flames (Gulsh. II, p. 52, 2).

*دِه — دِهَسِی* after, to (including the direction to a place), as: *شَوِه دِه بَار دِهَسِی زَرَا حَمَا*, my wailing was made after my friend. *دِه کُوم لَوَرِی دِهَسِی حَم*, to which direction shall I go? (Gulsh. II, p. 51, 3); *دِه غَم دِهَسِی نَبَادِی کِه*, after grief comes joy (Gulsh. II, p. 208, 2).

*دِه — دَوِر*, on, upon, over, as: *دِه خَیَل نَبَاخ*, on, upon, over, as: *دِه خَیَل نَبَاخ*, this fruit, which was ripened upon its own bough; *دِه خَیَل عَالَم دِه نِیَلَاب بُی دَوِر کَر*, he brought his own people over the Indus.

*دِه — دِهَاس*, on, upon, as: *دِه سَنَاجَاب دِهَاس*, to sleep on ermine.

*دِه — سَرِه*, with, as: *دِه زَرَا سَرِه*, with wailing.

*دِه — کِهِنِی* in, on, upon, during, on account of, as: *دِه جَهَان کِهِنِی*, in the world; *دِه کُوم نَوُر نَظَر دِه جَام دَ جَم کِهِنِی*, I shall not cast another glance on the cup of Jamšīd (Gulsh. II,

p. 20, 1); *هَمْ يَنْخُدْ دَرْجِي كُل تَارَه دِي*, during five days the rose is blooming (Gulsh. II, p. 53, 2); *هَمْ مَآ بَانِدِ پِیغُورِ گَا سَتَا هَمْ عِشَق*; *هَمْ كَنِی*, they abuse me on account of thy love (= my love to thee) Gulsh. II, 54, 3.

7) *تَر* tar, from, out, up to, on, about, as: *تَر زَوَه دَرْجِي تَر خُولَه*, to enter from (= by) the gate; *هَمْ دَبَاسِي*, whatever comes into his mind, he ejects from the mouth (Gulsh. I, 153).

*تَر* as Ablative prefix is frequently used not only in comparative sentences, to denote the distance of one object from another, but also, where only a relative comparison is alluded to (= against, in comparison to), as:

*نَرْتِي تَر دِیْنَتَه تَه هَغَه مَلَا*

That waist is more slender than a hair.

*چَه تَر سَرَو دَبِي هِیْخ دِي هَمْ هَغَه قَد وَ بَالَا رُو*

Against which (lit. before, from which) cypress trees are nothing, by that stature and tallness I swear. *Xuśh'āl* (Gulsh. II, p. 56, 1).

*هَمِي يَار لَرَم شَيَايَسْت هِي تَر دَا قِيَاَس كَرَه*

*چَه دَ مَشَك هُوِي هِي هِیْخ تِي تَر گَاكَلَر*

I have such a friend, guess his beauty from this, that scent of musk is nothing in comparison with his side-lock. *Xuśh'āl* (Gulsh. II, 49, 1).

*تَر نِیْمِي دَرْجِي تَر اَوَس*, till now, *تَر* up to, till, as: mid-day.

*تَر* on, about, at, as:

مَانِه مَلَا يَه مَشَقَّت يَه مَخْنَت يَه دَه

نَه حَرَامَه فِيمَانِي نَ چَا تَر مَلَا

A waist, broken by toil and labour is good, not \*) a stolen purse about one's waist. *Rah'mān* (*Gulsh.* II, p. 6).

دَلَر حُضُورَتَه وَ بَلَلَه تَر خَهْلَ خَنَك بِي كَبِينَوَكَه

The father called her to his presence, he seated her at his side. *Yusuf and Zulaiyā* (*Dorn, Chrest.* p. 197).

A similar signification has تَر in the expressions: تَر غَايَه نَبُول, to seize by (on) the throat, تَر وَبِشْتَو نَبُول, to seize by the hairs.

تَر is also used in such expressions: to become a sacrifice for, to, (on) any one, to devote oneself to (on) any one etc. (just like the *Sindhī* तर्), as:

حَار شَه نَ قَوَا نَ حِرْصَ خِيَال تَر قِنَاعَت

چَرَتَه مُلْك نَ مِصْرَ چَرَتَه يَه غُلَامَان

The thought of lust and covetousness be sacrificed to contentment! where is the kingdom of Egypt, where the village of the slaves? *Rah'mān* (*Gulsh.* II, 24, 1).

دَا قَمَه وَآرَه تَر سِيَمِي قَهْرُونِي جَارِي

All these together are a sacrifice to the white mantle. *Xush'āl* (*Gulsh.* II, p. 64, 3).

Similar expressions are: تَر سَر جَارِيَدَل, to become a sacrifice with the head, i. e. to sacrifice one's head; تَر شَا كَرَل, to throw on the back, i. e. to throw behind; تَر وَبِشَو هَرِيَوَتَل, to fall on (at) the feet.

تَر is very frequently connected with other postpositions and adverbs, as: تَر — تَرِي tar — pōre, up to, until, against (in comparions), before, as:

\*) The words: — 'is good, not', imply a comparison: better than.

تَر خَنَدَا دُورِی دِ هِیَخ دِی لال وَ دُر سَتَا هَ خَنَدَا دُو

Against (in comparison with) thy laughing are nothing the ruby and the pearl; by thy laughing I swear.

Xuśh'āl (Gulsh. II, p. 53, 2).

قَغَه بَه آس بُی حَلَال کَر چَه زَه نَه شَم تَر مِهْلَمَه دُورِی بُی هَت

He slaughtered that beautiful horse „that I may not become without honour before the guest“. Bābū Jān (Gulsh. I, p. 131).

چاپیر تَر — tar-čāpēr, round about.

تَر — تَلَانِدِ or تَر — تَلَانِدِ, below, beneath, as:

چَه نَ مَزْکِی مَخ بُی لَانِدِ وَ تَر حُکَم

رَاشَه وَ کُورَه قَغَه تَر مَزْکِی لَانِدِ

Under whose order the surface of the earth was, come, behold, they are under the earth. Rah'mān (Gulsh. II, 38, 3).

دِرِیْکُوی تَر خِیْلُو دِیْنُو لَانِدِ بِنَاخُونَه

He cuts off the branches beneath his own feet.

H'amīd (Gulsh. II, p. 94, 3).

تَر — وِرَآنِدِ tar — vrānde, before, beyond, as:

تَر اُولَس وِرَآنِدِ هِسی دِرِغِی

He came behind them, before the Ulus (clan).

Tārīx-i muraggas (Gulsh. I, p. 5).

چَه تَر خِیْلَه حَدَه بَه غَزَوِی وِرَآنِدِ

Who puts his foot beyond his own boundary.

H'amīd (Gulsh. II, p. 95, 1).

8) خَاخَه taxah, near to, with, from (postposition governing the Formative).

وَ طَن بُی هِنَایِ هَت خَاخَه دَر کَر

Pānīpat (Gulsh. I, p. 35); هَ تَا خَاخَه دِی, it will be with thee;

شیرین کان در خاکه درومی, sweet life departs from him  
(Gulsh. II, 24, 2).

خاکه is also connected with the Genitive prefix د, as:

چه د ما نه رزق زبات د ما خاکه دی  
آمانت غنډ بی بل لره ساتم

What may be with me more than my daily bread, I keep  
like a deposit for another. Xush'al (Gulsh. II, p. 49, 3).

خاکه may also be connected with the Ablative prefix نه and  
may then signify 'with or from', according to the context.

د مسند لیاقت نه لرم کمین م  
نه کمینو خاکه ناست نه زمین یم

I am not worthy to sit on the cushion, I am low; with the  
low ones I sit on the ground. Gulistān (Gulsh. I, 172).

نه ضعیف رعیت باند رحمت کو  
چه نه غلیم قوی خاکه رحمت و نه وېنی

Be merciful to the weak subjects, that thou mayst not see  
affliction from a powerful enemy. Gulistān (Gulsh. I, p. 163).

### 9) دین ځین ځین, from.

ځین is only used with the pronominal Formatives را, د, څو  
or with the pronominal suffix بی, which coalesces with it. Its  
usual signification is 'from', 'out', as:

ستا نه تللو می ارواح درومی له تن  
تو زمان را ځینی مه که د نار خیال

By thy going my spirit goes from my body; do not go one  
moment from me, o thought of my friend!

ʿAbd-ul-qādir (Gulsh. II, p. 195, 2).

حَنِ is also used, like تَر, with such like expressions, as: to sacrifice oneself to or for any, to devote oneself to or for, as:

سَوُوْ مَا لَ بَه هَمِيْ حَنِ قُرْبَانِ كَرَمِ  
رَه خَوَاجَه مُحَمَّد مَرِيْد نَ نَبَايَسْتَنَدُوْ

Head and property, all I shall sacrifice for him, I, Xavājah Muh'ammad, disciple of the beautiful ones.

Xavājah Muh'ammad (Gulsh. II, p. 117, 1).

10) دَپَارَه dapārah, on account of, for the sake of.

دَپَارَه is always constructed with the Genitive prefix دَ, as:

زِر رَا حَلَه طَيِّبَبْ كَه نَه مَرَم دَ خُدَايِ دَپَارَه

Come quick, o physician, for God's sake, otherwise I die.

Xush'āl (Gulsh. II, p. 40, 2).

11) دَپَاسَه dapāsah, on, upon, above.

دَپَاسَه is usually connected with دِه or دَ, دَپَاسَه — دِه or دَپَاسَه — دَپَاسَه, تَر دَپَاسَه, تَر دَپَاسَه, تَر دَپَاسَه; also with تَر, تَر دَپَاسَه.

كَه هِي بَارَه دِه بَسْتَرِ دَپَاسَه هِرُوْت دَم

نَار و خَار و كِه بَسْتَرِ دِري وَاړَه دِري

If I lie on the bed without my friend,  
fire and thorn and this bed, all three are one.

Rah'mān (Gulsh. II, 27, 3).

12) دَنَنَه dananah, within (adv.)

دَنَنَه always requires the prefix دَ, as:

دِه هَوَس كَبِي شَوَه غَمَاجَنَه غَم بِي دِه دَ دَنَنَه

By desire she became afflicted, (but) her affliction was within her heart. Xusuf and Zulaikā (Dorn, Chrest. p. 179).

13) سرّ sarah, with, together (adv.).

سرّ by itself is seldom used, except with the pronominal Formatives در, سرّ and سرّ, as:

دَ نَلِیَا دَوَلَتِ چِه مَخْ گَا وَ سَرِّ تَه  
خَلَقِی وَر سَرّ گَالِدِ بَارِئِ دِهْرِی

When the wealth of the world turns its face to a man, the people make many friendships with him.

Gulistan (Gulsh. I, p. 171).

سرّ is usually connected with other prepositions, as:

سرّ په — pah — sarah, with, by.

سرّ له — or سرّ with.

دَ شَمَشَتِی دَ نَوَه لَیم سَرّ دُوسَتِی وَ بَوُ دَ بَلَه بَی سَرّ نَم دَ  
نَکَانَتِی وَافَه

A tortoise had a friendship with a scorpion, both breathed together the breath of unanimity.

Kalilah o Damanaḥ (Dorn, Chrest. p. 13).

لَه اَوَبَاشَو سَرّ بَی مُوَافَقَتِ دُ کَر په وَقَتِ دَ فُرَصَتِ بَی وَزِیر سَرّ لَه دَوَو  
زَقَمَنُو وَوَزُو

He entered into friendship with debauchees and at a given opportunity he killed the Vazir with his two sons.

Gulistan (Gulsh. I, p. 158).

14) غُنْدِ (غوند) yunde, like, as (Adv.).

غُنْد either requires the Formative of a noun or the Genitive prefix دَ, as:

ذَا فَلَكِ كَلَالٌ دَقِ سَاوُولَ أَوْ مَاتُولَ كَا  
دِرُئِي مَا وَ تَا غُنْدِ هَيِّدَا كِرْلَ قَمِ قَنَا

This destiny is a potter, it practises forming and breaking;  
many, like me and thee, it has made and destroyed.

Rah'mān (Gulsh. II, p. 5, 2).

زَهْ دَ تَرَوِيَزَهْ غُنْدِ اِدْمَانِ خَنِيمِ وَ دَهْ كَهْ  
دَقِ دَ پِيرِ رَوَّشَانِ غُنْدِ دَ كُفَرِ كَا تَلْفِينِ

Like Darvēzah I show to it (the belly) the faith, this one,  
like PIR-i Rauṣhān, teaches infidelity. Xūsh'al (Gulsh. II, p. 52, 3).

15) *karah*, with (in the house of), along with.

*karah* either requires the Formative or the Genitive prefix *da*, as:

هَغَه وَقْتِ بُزْرُكَانِ دَ كَهَنَعَوْ أَوْ سَيِيمِ وَيَرِي دَ قَوْمِ بُزْرُكِ كَاهِنِ كَرَهْ چَه  
كَيَا فَا نَوْمِيَدَهْ هَوَلِ شَوْ

At that time the chiefs of the priests and the elders of the  
people assembled in the house of the High-priest, who was called  
Kayāfā. Matth. 26, 3.

هَهْ مَهْمَنْدَوْ كَهَنِي دَ مَلِكِ سُلْطَانِ أَحْمَدِ كَرَهْ بِي مَسْكَنِ رُنِيُوْ

He took up his abode among the Mohmands, with (in the  
house of) Malik Sultān Ah'mad. Tārīḫ-i murassas (Gulsh. I, p. 13).

16) *lānde*, below, beneath (adv.), or *da lānde*.

*lānde*, which by itself is not much in use, requires the Form-  
ative, as: *ra lānde*, below me.

چَه آخِرِ دَ حَايِ دَقِ قَوْرُوْ خَاوَرُوْ لَانْدِ  
دَ دُنْيَا هَهْ چَارِ مَهْ كَرَهْ اِبْتِهَاجِ

As at last thy place will be under the black earth, do not show alacrity in the business of the world!

Ḫavājah Muḥammad (Gulsh. II, p. 108, 1).

تَر — لَآئِدِ, تَر is frequently connected with the preposition لَآئِدِ, see under تَر.

17) لَه, lah, from, out.

This preposition, which is chiefly used to make up the Ablative-case, has a variety of significations.

Its most common signification is 'from', 'out', as: لَه کَوَر, from the house, لَه دَرِیچِی لَیْدَل, to look out of the window.

کَه تَه وَمَرِی تَه بَه لَه کُنَاوَرُو خَلَاص شِی

If thou diest, thou wilt become free from sin.

Gulistān (Gulsh. I, p. 164).

Similar are the expressions: لَه حَق وَبَلَوُ چِ شَوَل (Gulsh. I, 171), to be silent from telling the truth = to abstain from telling the truth; لَه اُمید تَه وَنَدَن دَرِیگَوَل, to cut off hope from life = to give up the hope of life; لَه وَبَرِیْدَل, to be afraid of; لَه کَانِیِی هَه وَبَرِی دَنی, he is afraid of a stone; لَه بَیْهَوَل, to hide from.

لَه signifies 'of' 'about', in such like expressions as:

کَه خَه وَایَم لَه هِجِرَان وَایَم خَه لَه دِ دَرَدِی دَرْمَان وَایَم خَه

If I say any thing, what shall I say of separation? what shall I say about that incurable pain?

Rah'mān (Gulsh. II, p. 19, 4).

لَه یَوَ مَرْدَمِ آزارَ حَسَبِیتِ شَوِی دَنی

A story has been told of one oppressor.

Gulistān (Gulsh. I, p. 175).

لَه denotes also the ground or reason of an action (on account of, out of), as:

بِشَوْعَمَ دَ حَلَانِ لَه دِیږی دِه بِهَرانک زَغلی

Also the cat, out of fear for her life, dashes upon the tiger.  
Gulistān\* (Gulsh. I, 162).

بِیَا لَه نَاقَارَتی سِتَم کَر لَرَه وَر دِرُوَم

Out of helplessness I run again to the oppressor.  
Xush'al (Gulsh. II, p. 51).

لَه when used with a neuter or passive verb, signifies:  
from the part of, from the side of, from, by, as:

لَه نَه شَی لَه لِیَوَانَو شِیَانِی هَسِی نَه شَی لَه ظَالِم سُلْطَانِی

As from the part of wolves sheep-pasturing cannot be made,  
so from the side of a tyrant government cannot be administered \*).  
Gulistān (Gulsh. I, 161).

لَه رِیَاكَارَان کَوِی چِه لَه خَلْقَوَنَه سَتَائِلِی شِی

As the hypocrites do, in order that they may be praised  
by men. Matth. 6, 2.

لَه\*\*) is also used in the sense of 'with' (without following  
سَرَه), as:

دِه ظَاهِر لَه خَلَقَه نَاسَتَه دِه بَاطِن لَه بَارَه نَاسَتَه

Publicly she sat together with the people, (but) inwardly she  
was reclining with her friend.

Yusuf and Zulaiḫā (Dorn, Chrest. p. 179).

From this signification of لَه are to be explained such  
expressions, as: لَه دَک full of (literally: with), موَافَق لَه, conformable  
to or with, etc. (cf. §, 184, 5).

\*) The Hindī and Hindūstānī constructs هَوَنَا in the same  
way as the Paṣṭō شَوَل هَوَتَا, e. g. هَم سِی نَهین هَوَتَا, I cannot do it,  
literally: from my part it is not done.

\*\*) دَ, which is often used instead of لَه, may be used also in  
the sense of 'with', without following سَرَه, but only in poetry.

§. 175.

### III. Conjunctions.

The conjunctions are either coordinating or subordinating; amongst them there are few proper conjunctions, the rest are adverbs supplying the place of conjunctions.

#### A. Coordinating conjunctions.

These are of four kinds:

##### 1) Copulative.

اَوْ au,	} and.
وَ va	
وَ ð	

There is this difference between اَوْ, وَ and وَ ð, that اَوْ and وَ connect words and sentences, وَ ð only single nouns.

هَمْ ham, also.

هَمْ — هَمْ ham — ham, as well — as.

كَالَه — كَالَه kalah-kalah	} sometimes — sometimes.
كَاهِي — كَاهِي gāhe — gāhe	

نَه — نَه nah — nah, neither — nor.

دُ دُنْيَا لَه سَوَد وَ زِهَانِ خَبَر نَه دُم  
 پَه دِيكُن سَوَد دِ مَسْت كِرِم بِي شَرَاب

I was not aware of the profit and loss of the world; by looking on I was made drunk by thee without wine.

Xavājah Muḥammad (Gulsh. II, p. 105, 2).

2) Disjunctive.

$\left. \begin{array}{l} \text{کَ kah} \\ \text{یا yā} \end{array} \right\} \text{or.}$

کَ — kah — kah, whether — or; either — or; the first  
کَ is frequently dropped.

یا — yā — yā, whether — or; either — or.

قَمَّکِی یَغْنَبَرَان کَه اَرَلِیَا دُو

دُو یِی مَر کَه شَوْل ذَهَان دَ مَر کَه لَه لَاس

All, whether they were prophets or saints, were hidden in the earth from the hand of death. *Xuṣṣ'hāl* (Gulsh. II, p. 45, 2).

3) Adversative.

$\left. \begin{array}{l} \text{وَلِی valē} \\ \text{بَلْکَه balkeh} \\ \text{لَکِن lēkin} \\ \text{اَمَّا ammā} \end{array} \right\} \text{but.}$

مَکَر magar, but (when preceded by a negation), perhaps  
(interrogatively); except (that).

بَاد تَنَد دَرُو بُوَلِیَو تَه زَهَان تَه رَسُو ی

مَکَر لَوِی وَلِی کَه یَبِخَ لَوِی

A sharp wind causes no damage to small shrubs, but it breaks away great trees with the root. *Kalilah ō Damanah* (Gulsh. I, p. 107).

4) Conclusive.

تَرُو trō, therefore.

$\left. \begin{array}{l} \text{کَه kah} \\ \text{سَکَه skah} \\ \text{وَسَکَه vaskah} \end{array} \right\} \text{therefore; then.}$

چِه قَرَار آرام مِی وَارَه لَه مَا دَوَر  
خَنگه مِی دَر مَخ اَوِی بَهِیوی لَر لَر

As he has taken from me all quiet and rest, therefore flow on my face tears in many paths.

Xavājah Mub'ammad (Gulsh. II, p. 109, 2).

§. 176.

B. Subordinating conjunctions.

These are:

1) Temporal.

چِه čeh, when, as.

خَو ʔō, as long as.

خَو پُورِ چِه ʔō pōre čeh, until.

لَه عَرِاق چِه تَرَبَاقِ وَر تَه رَا دَرُومِی  
مَار چِمِیچَلِی بَه دَ مَرکِ دِیَالَه وَ شُومِی

When the taryāq from ʔl-rāq comes to him, the snake-bitten will drink the cup of death. Gulistān (Gulsh. I, p. 170).

خَو لَبِیت دَ بَه عَمَل سَرَه جُور تَه شِی  
مِیَانَت طَاعَتِ مِی وَارَه دِی خِلَافِ

As long as the will does not fall together with good actions, all his worship and obedience is falsehood.

Xuṣṣ'āl (Gulsh. II, p. 47, 3).

هَس لَه دِی بَه مِی تَه دِیَنَتِی خَو دَوَرِی چِه دَ وَاقِی مَبَارک دِی رَاتِلُونَنکِی  
بَه نَوْم دَ خَدَاوَدِ

After this ye will not see me, until ye say: blessed is he that is coming in the name of the Lord! Matth. 23, 39.

2) Comparative.

لَکَہ چَہ lakah, lakah čeh, like, like as (corresponding to قَسِی, so).

گَنَرَہ ganrah, as if (properly Imper.).

جُذائِی دَ مَا ہَہ زَرَّہ کَا قَسِی چَار  
لَکَہ بَارِ بَی ہَہ تَارو مَا ہَہ دُرَاج کَا

Separation treats my heart so, as the falcon treats the black partridge or wood-cock. *Xuṣṣ'āl* (Gulsh. II, p. 34, 2).

خَہ کَرَم لَاس وُ تَسْت مِی نِشْتہ قَلَنَدَر ہَم  
کَنَرہ مَا ہَہ دُنِیَا وُ بَارَہ کُرَّ

What shall I do? I have no hands, I am a Qalandar, as if I had lost the whole world at play. *Xuṣṣ'āl* (Gulsh. II, p. 49, 1).

3) Conditional.

کَہ kah, if.

مَکَر magar, if not, except.

کَہ دَ سِکَلِیو دَ بَدَن مِیَنہ کُنَاہ دَہ

سَکَہ خُوشحَال خُتَک دَرَسْت عَمَر جَنَانَت کَا

If love of meeting with the fair ones is sin, then *Xuṣṣ'āl*, the *Xataḳ*, commits sin all his life-long.

*Xuṣṣ'āl* (Gulsh. II, p. 35, 2).

رَہ خَوَاجَہ مُحَمَّد تَمَام ہَہ کُنَاہ دُرَب ہَم  
مَکَر وُ مِی کَاوِی خُدَای لَہ دِی دُرِیَاب

I *Xavājah Muh'ammad* am quite drowned in sin, if God do not draw me out from this ocean.

*Xavājah Muh'ammad* (Gulsh. II, p. 106, 1).

4) Concessive.

که kah, although.

که هَرخَو kah harṭō  
 هَرخَو harṭō

} as much as; though.

اگرچه agarčeh, (اگرکه agarkeh) though (Pers.).

دَ خَتَکُو سِیِّیِ بَہْتَر تَر یُوسُفِ زِہُو

کَہ خَتَک دِی قَم یَہ خَوِی تَر سِیِّیِ بَی کَار

The dogs of the Xataks are better than the Yusufzāis, though the Xataks also are in temper more lazy than dogs.

Xuṣṣ'āl (Gulsh. II, 71).

کَہ قَرخَو یَہ خَنَدِیدَنَه قَم کَہ شَرَم مَوسِیدَنَه

یَہ خَنَدَا کِنَبِی عَاجَب وِیَر شِی کَہ دَانَا سَوِی دِر خِیَر شِی

Though she used to laugh and also to smile out of modesty, In her laughter a wonderful grief is expressed, if a wise man looks upon her. Yusuf and Zulaikā (Dorn, Chrest. p. 217).

5) Final and Consecutive.

چه čeh\*), that, so that, in order that.

چه نہ čeh nah, so that not, lest.

وَر شَد مَالِکَد یَہ بَہَا رَاوَر چه بَدَرَسَمِی وَ نَہ شِی

Go, bring salt for money, lest it become a bad custom.

Gullistān (Gulsh. I, p. 174).

---

\*) Instead of چه the Persian که (which is etymologically identical with چه) is also sometimes used, especially in poetry.

6) Causal.

چہ čeh, (because), as (Lat. quum, quoniam).

تَر اَوَس کُورِی ہَم سَتَرکُو تَوَرُو چہ مُلک تَمی وُنیو شَاقَانُو نَوَرُو

Until now he looks with his black eyes, because (as) his kingdom was taken by other kings. Gulistān (Gulsh. I, p. 164).

IV. Interjections.

§. 177.

Besides the proper interjections the Paštō uses also some adverbs and substantives as interjections. The most common of them are:

آخ آخ } well! well done!  
آخ آخ }

آری ārē, yes.

آفرین āfarīn, well done! bravo!

اَلْغِيَاث al-ghīāth, alas!

اُ اُ } oh! hollo!  
اُ اُ }  
آيا āyā }

تَوْبَه tōbah, for shame! fy! تَوْبَه تَه fy upon!

جِگِی جِگِی jigī jigī, o dear!

چِخ čix }  
چِخَه čixah } begone! away!  
چِخِی čixē }

خَوُ xū, certainly.

خَیْرَ xair, well (but always with a certain restriction and therefore often in the sense of a polite negation).

دَرَبَغ darēya (or drēya), alas! lack-a-day!

سَخ sax, blessed! happy! (سَخ happiness of).

شَابَاس šābās, well done! bravo!

زَوُ zō, (oath) by, as: خُدَايِ زَوُ, by God; دِه تَا زَوُ, by thee (I swear by thee), or: زَوُ دِه تَا زَوُ, I swear by thee.

کَاشِی kāske (or کَشِی), would to God that!

نَه nah, no.

وَاه وَاه vāh vāh, very well! excellent!

وَايِ vāe, alas!

قَايِ hāe	} alas! woe!
قَايِ هَوِی hāe hūe	

هَوُ hū, yes.

هَه hah, indeed, really!

هَی هَی hai hai, alas! dear!

زَه خَوَاجَه مُحَمَّد مَرَم غِلَاج مِی گَانَدَنِی

جِکِی جِکِی طَبِیبَانِ اَلَدِیَاث

I Xavājah Muh'ammad die, give me a medicine, o ye dear physicians! alas! Xavājah Muh'ammad (Gulsh. II, p. 107, 2).

سَخ دَ عَارِفَانِ چِه دَ تَار دِه تَاد مَشْغُول دِی

Happy are the knowing ones (= Sūfis), who are occupied with the remembrance of their friend. Idem. (Gulsh. II, p. 118, 2).

چه تر خان به تا مین دم زه خوشحال ختک ور

That I love thee more than myself, I Xušh'āl, the Xaṭak, swear it.

## The Syntax.

We divide the Syntax into two parts, the analytical and synthetical. The analytical part describes the use and construction of the several members of a sentence, the synthetical their conjunction to a sentence or sentences.

### I. The Analytical part.

#### I. The noun.

##### §. 178.

##### 1) On the noun generally.

The Paštō is possessed neither of a definite nor indefinite article and the noun may therefore be, according to its position in the sentence, definite or indefinite; only proper names or such specific nouns, as sun, moon etc. are definite by themselves. If a generic noun is to be rendered indefinite, the numeral adjective 'one' is put before it, as: *mo sūq* a man (who is not nearer described or mentioned before).

mo bādšāh be kēbē kēbē nāst o mo mēri eajmī qm dōr sere be  
xōdmet ḥāzr o

One king sat in a boat, a Persian slave also was present with him in his service.

§. 179.

2) On the use of the gender.

The Paṣṭō uses only two genders, the masculine and feminine. With reference to the use of these genders it is to be noticed:

1) Substantives, which denote inanimate objects, often use both genders; in this case the masculine implies the idea of greatness, the feminine that of smallness of the object, as: *ḍand* m., a (large) pond, *ḍandh*, f., a (somewhat smaller) pond.

2) With reference to the lower species of animals the feminine is often used to express the generic idea, as: *pišō* s. f., cat (generally), *kantarh*, s. f., pigeon, *bisō*, s. f., monkey.

3) The masculine of adjectives and participles is often used in the sense of a neuter (or impersonally).

نَا حَوَالِی تَه چَه خَه آروى نَا ئِی وِیہِی  
نَه لَیئَه نَه آروئَه شِی نَه پِیرو کِہِی

It is youth, where thou hearest and seeest something, it is not heard nor seen (= one cannot hear etc.) in old age.

Rah'mān (Gulsh. II, p. 20, 2).

The adjective in the masculine (= neuter) may therefore, like a substantive, subordinate another noun, as:

آمَدُ شُد ئِی تَر صَبَا عَم کَرَنَدَقِ نَوِ  
تَاخِرَه مِی کَرِ نَوِ کَرَم وَ سَرَدِ

Their coming and going is swifter than the morning breeze; I have experienced the warm and cold of the time. *Aṣraf ḫān* (Gulsh. II, p. 155, 2).

Also the Plural of masc. adjectives is now and then used in the sense of a neuter, especially when a plurality is implied, as:

مُهَيَّا دَر تَه فَرْخَه دُو چِه دَکِه دُو دَ بَل تَه دُو

All was prepared for him, what he had, another had not.  
Yusuf and Zulaiḫā (Dorn, p. 174).

تَر صُورَتِ بُیِ دَ سِیَرَتِ خُوبِی أَفْضَل تَه

تَر ظَاهِرِ بُیِ دَ بَاطِنِ خَوَاوَه بِسِیَارِ بُیِ

The beauty of her conduct is more excellent than that of her body, the sweet (things) of (her) heart are more than those of (her) appearance (= body). *Xuṣṣ'āl* (Gulsh. II, p. 84, 3).

4) Also the feminine of adjectives and participles, as well in the Singular as in the Plural, is used in the sense of a neuter, in which case چار (or Plur. چَارِ), thing, affair is to be supplied.

وَبُیِ وَتِل هَه مَا لَازِمَه تَه چِه لَه تَا تَه بَیْتَسَمَا مُوَمَمِ اَو تَه مَا لَه رَا حِی

He said, it is necessary for me, that I obtain baptism from thee, and thou comest to me. *Matth. 3, 14.*

نَادَانَانِ بُیِ غَمَه خُوبِ هَه فَرَاغَتِ کَا

هَه هَوِشِیَارُو بَانِدِ رَاشِی صِلِ دُشْوَارِ

The ignorant sleep without grief in rest, on the intelligent come hundred difficult (affairs). *Xuṣṣ'āl* (Gulsh. II, p. 43, 1).

دَ خَانَ سَرَه بُیِ غَمِ کِرِ دَ بَهْرَامِ سَرَه بُیِ غَمِ کِرِ\*)

He had connexion with the *Xān* and also with *Bahrām*.  
*Tārīḫ-i murāssa* (Gulsh. I, p. 50).

§. 180.

3) On the use of number.

1) Nouns, which are borrowed from the Arabic and which are in the so-called broken Plural, may in *Pāstō* be constructed

\*) Supply: چَارِ, he had dealings with. —

as Singulars or Plurals. The broken Plural *مَلَائِك*, angels, (Sing. *مَلَكَة*) retains the fem. gender, though the fem. termination be dropped.

خَو كَالِ خَشِي هِه فَرَاغَتِ هِه كَاهِلِ تِيرِ كِرِه دَوْلَتَمَنَدِ شَوْلِ مَالِ بِي دِهَرِ  
شِه اولادِ بِي دِهَرِ شِه

The *Xasīs* passed some years in rest in Kābul, they grew wealthy, their property increased much and their children became numerous. *Tārīḫ-i muraggas* (Gulsh. I, p. 6).

When the broken Plurals are put in the Formative, they usually take the Plural Formative affix *و*, as:

بَيْتُ الْمَالِ لُقْمَه دَ مَسَاكِينُو تَه نَه طَعْمَه دَ أَخَوَانُو شَيَاطِينُو

The treasury is the morsel of the poor and not the food of the devil's brothers. *Gulistān* (Gulsh. I, p. 166).

2) The Plural *جَانَان* has, as in Persian, a Singular signification, friend, from which even a feminine *جَانَانَه*, female friend, sweetheart, is again derived, as if it were a Singular.

3) A number of nouns imply a plurality and are therefore constructed as Plurals, without taking a Plural termination in the Nominative, but in the Formative they always take the Formative affix *و*, as: زَهْرُو poison, زَهْرُو. Some proper names of nations, tribes etc. are also treated as Singulars and Plurals, as: خَتَاك: *Xatak*, a *Xatak* and *Xataks*, مُوَالِ, a *Muyal* and *Muyals*, etc.

#### §. 181.

#### 4) On the use of the cases.

##### a) The Nominative.

1) The Nominative is used, instead of the Genitive, as apposition, if a part of a whole is to be designated, as: نَرِ خَاخَتِي  
اَوْبَه, a drop (of) water. Similarly to nouns, which denote a

number, measure, weight, kind, species etc., the nearer definition is coordinated in the same case as apposition; e. g.

چِه دَوَه کَسَه اَوَه چَمَچِه شَوَبَلِی دِی

دَ فَعِیر کَرَه قَلَه اَکَرَه شِی سِیْمَنَه

When there is a cup of water and a spoonful of buttermilk, it becomes in the house of the poor a white pap. *Gulistān* (Gulsh. I, p. 183).

دِتَوَل دَ حَآن ضَرُور دِی کَرِی بَوَنَه

کَه دَوَه دِیر کَوَه شَرِئِی دِی بَا کِرَبَاس

Thou must needs cover thyself, though it be (only) two or three yards of a blanket or of linen. *Xavājah Muḥ'ammad* (Gulsh. II, p. 111, 2).

دَه شِکَنَجَه کَبِی بُی رَا بَنَکَه دَه اَنَوَاعُو عِدَابُونُو بُی مَر کَر

He stretched him on the rack and killed him by different kinds of tortures. *Gulistān* (Gulsh. I, p. 174).

2) The Nominative (or absolute case) is also used to express duration of time (how long?) as well as the point of time (when?). In a similar sense *حَای* place, with a demonstrative pronoun is used (without a preposition), as: *دِی حَای*, in this place, here (Persian likewise *ایندجا*); so also: *دَوَاړَه لَوړَه*, on both sides.

سِیو اَوَه پِیْرَتِی قِسی بَادشاهِی دَه

چِه دَه نَوِی هَوِری نَرَسْت خَلَف دَه حِیرَان

Six (or) seven generations endured their kingly rule, that all the people were amazed at them. *Xuṣh'āl* (Gulsh. II, p. 51, 8).

قَضَا قَعَد کَال بَارَان دَ هَشکَال دَ شَه

By chance that year rain fell in July—August\*).

*Tārīx-i murassas* (Gulsh. I, p. 5).

\*) On *هَشکَال* see App. I.

وَقَتَ نَ خَابَتِ اَتَمَهُ دَرَجَ بَنَکَرِ تَه رَوَلِ شَه

At the time of the forenoon, on the eighth day, he went out for hunting. Bahrām, V. 55.

3) The Paṣṭō uses the Nominative absolute in the same sense as the Latin uses the Ablative absolute.

a) With the Nominative a participle perfect\*) is connected and the sentence thus formed loosely subordinated to the main sentence. E. g.

تَه مَحْنَتِ مِی بَوِ رِیاضِ جَوَرِ کَا تَه دَقَرِ

لَا مِی نَمَلِ بَوِی کَرَمِ تَه حَیثِی سِوَا شَوَمِ

With labour I had laid out a garden in the world; the rose not yet having been smelled by me, I was separated from it.

Xuṣṣ'āl (Gulsh. II, p. 159, 3).

زَه بَمِ غَمِ خُوبِ کَرَمِ تَه هَاسَتَه بَالِیْنِ سَرِ یَنَبِیْ

هَرِیَوَاتَه تَه کُورِ کَبِی چِه حَمَا دَرِ قَمِ بَالِیْنِ

Shall I sleep without grief, the head being placed on a soft cushion, after my bed-fellows have fallen into the grave?

Xuṣṣ'āl (Gulsh. II, p. 52, 3).

کَلَه رَوِی کَلِمِی ذَهَبِی کَلَه مَوَرِ تَرِ حَلَقَه دَکِ

Sometimes he is hungry, the entrails being fastened together, sometimes he is satiated full up to the throat. H'amīd (Gulsh. II, p. 93, 3).

b) An adjective also may be joined with the Nominative absolute and the subordinate sentence thus formed may be translated by: „with“. E. g.

نَ تَهَمَتِ تَه غَمِ هَرِوَتِ دَمِ سَتَرِکِی هَبِی

زَه تَه شَرَمِ چَا تَه غَمِ کَنْدَلِ تَه شَمِ

Out of grief at the calumny I am prostrate, the eyes shut (= with closed eyes); out of shame I cannot openly look at any one. Xavājah Muḥammad (Gulsh. II, p. 114, 4).

\*) The participle preterite (in the Aorist, with the prefix دَ) is also now and then used.

اوس قَمَه ڀَر تَوَرُو خَارُو ڪَڀِي ڀَرَاتِه ڊِي  
چِه ڪَڀِي ڀَڪَرِي سَوَارِه وُو ڀَر آسُونِه

Now all are prostrate on the black dust, who (with) crooked turbans were riding upon horses. Idem (Gulsh. II, p. 116, 8).

c) A substantive (without an accompanying participle or adjective) may be put in the Nominative absolute, but this is rather to be considered as an elliptical sentence.

قَر سَئِم چِه ڏِه مَآ ڪَا قَمَه رَوَا ڏِي  
خَو تَو ڪُل ڊِ مَسْتِه وُو ڏِي مَنِي رَات

Every oppression, which she inflicts upon me, is proper, certainly, once the drunken one should stand, the face (turned) towards me. Aāraf ḡān (Gulsh. II, p. 154, 2).

بِهَڪِه ڏِ خَڄَام ڀَوَرِه ڏِه لَاس مَنِي وَ ڪَوَر تِه رَوَانِه شَوِه

The wife of the barber, the nose in her hand, the face towards her house, went away. Kalilah & Damanah (Gulsh. I, p. 113).

#### §. 182.

##### b) The Accusative.

The Accusative is outwardly not differing from the Nominative and can only be known from the signification of the verb. Verbs signifying: to make, to choose etc. may govern a double Accusative, one referring to the object and the other to the predicate, as:

زَوَر ڊِ خَوَانِه بَهَڪِه تِه ڪَا تِه ڀِي ڪَانِڊِ  
ڀَڪَر ڀَوِيه چِه تِه ڀِنِه خَاڻِه ڊِي ڀَارِ

An old man should not make a young woman his wife, and if he make her (his wife), he must take care, that she be from a good house at least. Xush'āl (Gulsh. II, p. 41, 2).

c) The Instrumental.

1) The Instrumental is referred to persons and things, by which an action is done. It is usually connected with the past tenses of transitive and causal verbs, but also with intransitive verbs (of a passive signification) through all tenses.

فِرَاقِ عَوْرَتِه لَتَبِي دِي نَكِيدَلِي  
لَنَكِه لَوْنِد لَرَكَتِي هِه اَوْرَتِي شَو زَاپ

By separation everywhere flames are applied; how long wilt thou wail like damp wood thrown into the fire? *Xuṣṣ'āl* (*Gulsh.* II, p. 48, 2).

كِه دَن بَار غَنِد مِي تَكَبِت هِه غُرُونِ كِيوِي  
شِكَار مِي قَم شَوِي بَيَايَسْتِه زَرَكِي تَمِين

Now and then I wander about in the hills like a hawk, beautiful and precious partridges were also made my prey. *Xuṣṣ'āl* (*Gulsh.* II, p. 54, 2).

2) The Instrumental is also now and then used to express time generally, as: وَرَخَوُ شِيَوُ, by days and nights.

تَر دَا غَسِي عُمَرَكِه عُمَرِ بَهْتَر نَوِي  
چِه تَبِيرِيوِي وَرَخَوُ شِيَوُ هِه جِكِر خُونِ

Better is death than such a life, which is passed, days and nights blood (being) in the liver. *Xuṣṣ'āl* (*Gulsh.* II, p. 52, 2).

d) The Genitive.

1) As regards the position of the Genitive, it is usually placed before the governing noun, though it may also follow it.

چِه اَمِيد هِه عِمَارَتِ دَدِ دُنْيَا كَا دَا كَاغَدِ هِه كِهِي سِيرِ دَدَرِيَا كَا

He who puts his hope on the fabric of this world, makes a journey of the sea in a boat of paper. *Rah'mān* (*Gulsh.* II, p. 20, 4).

2) The Genitive expresses possession, ownership.

چَا بُیَ نَوْمَ رَا تَه وَآ نَه خِسْت چِه دَ چَا دِی

مَنَارِی مِی بَیَرِی دُ لَیْدِی وَلاَی

Many towers I have seen standing, nobody has mentioned their name to me, whose they are. *Xuśh'āl* (*Gulsh.* II, p. 43, 2).

تَا وَ چِه غَم مَه کَرِه نَوَر زَه سَنَآ دَم تَه دَ مَا

Thou saidst: do not grieve any more, I am thine and thou art mine. *Xuśh'āl* (*Gulsh.* II, p. 34, 4).

3) The substantive verb joined with the Genitive expresses different relations:

a) a quality may thereby be expressed, سَرِّی a man, being supplied as governing noun to the Genitive; e. g.

قُرَآئِی خَوَدَ جَنَجَالِ دِی دَ هَوَاش

دَرُوغَوَن سَرُوکَنَد خَوَارَه بُهَتَان قَرَاش

The *Turānīs* are indeed (men) of strife and war, lying, swearers, slanderers. *Xuśh'āl* (*Gulsh.* II, p. 46, 3).

کُنَآه کَار خَوَاجَه نُحَمَد لَه خِیَلَه مِیَنَه دَر کَرِه

چِه قِمِیشِ رِی سَنَآ دَ دِکَر دَ تَنَآ حَافِظ

Give to the sinful *Xavājah Muh'ammad* thy own love, that he may always be (a man) of thy remembrance and praise\*), o preserver! *Xavājah Muh'ammad* (*Gulsh.* II, p. 113, 2).

b) According to the context کَار, work, business or عَمَل, thing, may also be supplied as governing noun, if the Genitive refer to inanimate objects.

شُدَنِی دَر بَآنَدِ رُ شَوُ کَه دَ کَک وَ کَه دَ لَک

What was to happen has happened to thee, whether it was (a matter) of a straw or of a hundred thousand. *H'amīd* (*Gulsh.* II, p. 93, 3).

\*) I. e.: that he may always be occupied with.

قَوِّهِ حَقَّارَ لَهْ خَيْلَهْ وَقَتِّ سَرِّهِ زَيْبِ كَا  
سِيمِنِ وَدِهَتَهْ نَهْ دِي نَ خَلْبِي نَ خَلْبِي

Every thing agrees well with its own time, white hair is not (the thing of — does not agree with) a side-lock and a top-knot. H'amId (Gulsh. II, p. 142, 2).

4) The Genitive expresses the material, of which any thing consists or is made; e. g.

ذِكْ نَ زَهْرُوْ بِمَرِّزُوْ نَ زَرُوْ طَاسْ

She passes round a golden cup full of poison.

Xavājah Muh'ammad (Gulsh. II, p. 111, 2).

5) The Genitive may be either a subjective or objective Genitive, that is, it may either express the object, that is acting or to which any thing belongs, or it may express the passive object, to which the action is referring.

تَوِيْ فَلَكْ نَ مِصْرَ دَاوِيْ وَلاَ رُوْ نَ يَمِيْلُ هَهْ غَاوِيْ

All, the great and little of Egypt stood on the bank of the Nile.  
Yusuf and Zulaiẓā (Dorn, Chrest. p. 214).

نَهْ لَهْ مَا نَ مِيْهِيْ خَوِيْ جِي نَ هَتَانُوْ  
نَهْ نَ جَوْر نَ جَفَا رَسْمْ لَهْ دُوِيْ لَارْ

Neither passes from me the disposition of love to the idols (= fair ones), nor has the habit of tyranny and oppression gone from them (left them). Xush'al (Gulsh. II, p. 84, 3).

6) A number of adjectives is constructed with the Genitive (or, according to §. 174, 17, with the Ablative), such as: نَ كَدْ, full of, مَخِيْ نَ, equal to, مُنَاسِبْ نَ, becoming, conformable to, مُوَافِقْ نَ, according to, هَسَنَدْ نَ, agreeable to, هَوَاوِيْ نَ, equal to, etc.

§. 185.

e) The Dative.

1) The idea of the Dative is expressed by different prefixes and postfixes, as shown already in §. 65, 5\*). The prefix وُ, without following تَه or وَتَه, is now-a-day antiquated and only found in poetry.

چِه سَرِی وَ بِلَ حَه وَرَکَه بِیَا بُیِ آخِلِی  
تَه خَوُخْدَايِ بُیِ بِیَرَتَه نَه آخِلِی دَانَه

If a man gives any thing to another, he takes it again; thou indeed art God and doest not take back (thy) gift. Xavājah Muh'ammad (Gulsh. II, p. 118, 1).

Besides the usual signification of the Dative the following special applications of it are to be noticed:

2) The Dative expresses a relation to the remote object, which may be translated by: to, for, at; e. g.

حَاجَتِ نَه لَرِی دَ نَوَرِ چَا وَ بَارِئِی تَه  
لَه قَهو سَرَه چِه بَارِئِی رَبِ حَمَا

Those, with whom my Lord is friend, do not stand in need of (have no necessity for) the friendship of others. Rah'mān (Gulsh. II, p. 3, 1).

زَه وَ زَاهِدَانَوُ حَیْرَانِ بِمِ نُبُوِی وَ مَا تَه

I am amazed at the hermits and they at me. Rah'mān.

دَ دِیشتِلِی وَ صِبْحَتِ وَتَه اُمِیدِ شِی  
دَ نَرَقَارِ چِه حَه کِمِی وَشِی لَه رِدمَ

---

\*) When the Dative is immediately followed by a Genitive, the Dative postfixes may be placed after the Genitive, as: مَرغَانَوُ دَ قَوَا: مَرغَانَوُ دَ قَوَا, the birds of the air have nests (Matth. 8, 20).

There is hope for the recovery of a wounded, if the matter flows a little less from the wound\*). *Xuṣṣ'āl* (Gulsh. II, p. 50, 2).

The Dative expresses therefore the direction to a place, as:

آدم خیلو سره زه نه تیراه راغلم  
نور رخصت در کمری و خور نه زه خوریم

With the *Ādam-xēlls* I came to the *Tirāh*; then they (the *Ādam xēllī* maids) were dismissed (by me)\*\*) to *Xvaṛāh*, hurt in the heart. *Xuṣṣ'āl* (Gulsh. II, p. 54, 2).

3) The Dative is often to be taken as *Dativus commodi*: for, for the sake of, on account of.

بادشاه د فقه له خون تیر شه  
وزیر ته می مغاف کړ

The king spared his blood and pardoned him for the sake of the *Vazīr*. *Gulistān* (Gulsh. I, p. 158).

توره چا وته ترم چه زه ملنک شوم

For whose sake should I gird on the sword, as I have become a *faqīr*? *Xuṣṣ'āl* (Gulsh. II, p. 68, 2).

4) The Dative is now and then used to express a point of time, as: شپې ته, towards night, at nightfall (*Hindūstānī* likewise (رات کو).

زاهد وړاند روان شه شپې ته یوه بهر ته ورسیده

The hermit went on; towards night he came to a town.

*Kalīlah ō Damanah* (Gulsh. I, p. 111).

Note. On the use of the Ablative, which is expressed by the prefixes *له*, *تر*, and *د*, see §. 174, 17. 7. On the Locative, which is circumscribed by the prefix *په*, *کې*, etc., see §. 174, 6.

\*) Literally: if a diminution is made from the matter of the wound.

\*\*) The text is no doubt defective; it should be read: etc. نور می.

§. 186.

f) The Vocative.

When a noun is compounded with another (either by means of the Pers. *یَا* *إِصَافَت* or by the copula *وَ* final *a* or *ah* (the sign of the Vocative) is only added to the latter noun, as:

اَی جَان مَن دَ خُود کَرَنَه خَه تَدبیر دَنی

O my soul, what advice is there for what one has done himself?  
Kalilah *وَ* Damanah (Gulsh. I, p. 110).

§. 187.

II. Comparison of (adjectives and of) whole sentences.

The way, in which the comparison of adjectives is circumscribed, has been already shown in §. 93. Here we have to add, how the comparison is expressed, which does not refer to a single object in the sentence, but to the whole sentence. This is done in a twofold way: the sentence, which is to be compared with another, is either subordinated to the main sentence by means of the conjunction *چَه*, that, the comparison itself being already

expressed in the main sentence by *تَر قَهَه*, before that, that —;

or the comparison is expressed by coordinating the sentence to be compared to the other sentence, the difference between both sentences being pointed out by rendering the second (coordinate) sentence negative. E. g.

تَر قَهَه چَه خُشکَه طَینَت دَ سَاحِل وَیَنَم

لَکَه مَوَج آوَارَه وَه دَرِیَا خَوَش یم

I like it better wandering about the ocean like a wave than that I see the dry ground of the shore\*). Kāzīm ḫān šaidā (Gulsh. II, p. 141, 3).

\*) Literally: Wandering on the ocean, like a wave, I am happy before that (*تَر قَهَه*), that I see etc.

تَوْنَفَسَ دَ خُدَايَ هَهْ يَادَ كِهِي اُولِي تَر دَقِ  
هَهْ دَ دَرَسَتِ جَهَانَ دَرَوَتِ هَهْ دَا دُنْيَا

One breath in remembrance of God is better — not the wealth of the whole world in this world (i. e. is better than —). *Rah'mān* (*Gulsh.* II, p. 7, 2).

زَهَرِ هَهْ دِي چِهْ هَهْ صِلَاحِ هَهْ صِلَاحِ دِي  
هَهْ شَكْرِي هَهْ فِتْنَه وَ هَهْ غَوَا

Good is poison, which may be (joined) with peace and concord — not sugar with sedition and uproar. (i. e. Better is poison — than). *Rah'mān* (*Gulsh.* II, p. 6).

§. 188.

### III. Construction of the Numerals.

1) When a numeral (above one) is joined with a masc. noun denoting an animate object, the noun is usually put in the Plural, but it may also remain in the Singular.

هَهْ خِيَلِ كَوَرِ كِهِي هَهْ دَوَهْ وَرَوَهْ سَرَهْ هَهْ دِي  
چِهْ هَهْ رَوَهْ كِهِي فِتْنِي هَهْ كَوِي هَرَارِ\*)

In their own house there will not be two brothers together, who have not in their hearts a thousand quarrels. *Xuš'al* (*Gulsh.* II, p. 43, 1).

دَ عِيَسَى مَرَوَنَسَ رَوِي رَوِ

*ālsā* had eleven sons. *Tārīx-i murassas* (*Gulsh.* I, p. 5).

Such nouns, as are collective, remain unchanged in the Nom. Plural.

---

\*) هَرَارِ, for the sake of the rhyme, instead of هَرَارِ.

خَلَوِیَسِت زَرَّهٗ مُقَلَّ شَوَّل تَارَهٗ تَار

Forty thousand Muzals were scattered to the wind.

Xuśh'al (Gulsh. II, p. 71).

Other masc. nouns, which denote inanimate objects, are either put in the Plural or they take the Plural termination ah (a), when ending in a consonant, or they remain in the Singular, as: کَالَوَنَهٗ or: لَس کَال: ten years, هَزَار مَنَهٗ, a thousand maunds.

هٗهٗ هِیْخَ رَنَکَ هٗهٗ خَلَاَصَ هٗهٗ شِی لَهٗ مَرَوِی

کَهٗ چَاهِیِرَ قَر خَانَ اَوِنَا زَرَّهٗ حِجَابِ کِر

In no wise wilt thou escape from death, though thou make round about thee seventy thousand screens.

Xavājah Muḥammad (Gulsh. II, p. 110).

2) Fem. nouns, denote they animate or inanimate objects, are, as a rule, put in the Plural; they may remain in the Nominative, even when preceded by a preposition, though it is more according to rule, that after a preposition the Formative (Plural) follow, e. g. هٗهٗ هِنَاکَهٗ وَرَجَلِی, five days, هٗهٗ هِنَاکُو وَرَجَلُو, in five days. It is seldom the case (and chiefly in poetry), that the Singular of a fem. noun is used with a numeral.

هٗهٗ هَغَّهٗ آوَانِ کَهٗی زَر رَوِیَمِی وَاجِبِی نَ مُوسَف زِدَوِی هِنَاکَهٗ تَوِی شِیِر  
تَوِی هٗهٗ نَ کَالَهٗ هٗهٗ سَر هَا نَ قَلْبِی هٗهٗ سَر هٗهٗ مُوَانِفَ نَ قِسْمَتِ هٗهٗ  
هٗهٗ نَوِی وَر تَلِی

In that time a thousand Rupees were incumbent (as taxes) on the Yusufzais, five Tōrah (or) six Tōrah \*) on the head of a family or on the head of a plough used to come on them, according to the share. Tārīḫ-i muraggaṣ (Gulsh. I, p. 18).

نَ قَر کُل تَنَّا صِفَتِ کَا هٗهٗ زَر رَهٗ

هٗهٗ نَا بَاغِ کَهٗی چِه غَوَّعَا هٗهٗ نَ بُلْبُلُو

\*) The تَوِی is a copper coin worth about one penny.

With a thousand tongues they praise every rose in this garden, when the noise of the nightingales is (raised).

Xuāh'āl (Gulsh. II, p. 55, 3).

3) As regards the use of the ordinals it is to be observed, that in mentioning the years of an æra the cardinals are employed, as in English, but in fixing the month or day the ordinals are made use of.

مَسْ نَ هِجْرَتِ اَتَّصُو پِنَجَه وَبِشْت وَهُ خَوَرَسَمِ کَالِ نَ بَابِرِ نَ کَابُلِ نَ  
فَتَحِ وَهُ پَه تَسَخِيرِ نَ بَاجَوَرِ رَاغِي

It was the year of the Hijrah eight hundred and twenty five, the fourteenth year since the conquest of Kābul by Bābar, that he came to the subjugation of Bājaūr.

Tārīḫ-i murāssaī (Gulsh. I, p. 19).

§. 189.

#### IV. Use of the Pronouns.

##### 1) The personal pronouns.

In connexion with a verb the personal pronouns are only used, when a person is to be rendered pronominent or when a contrast to another person is to be pointed out. But also in the absence of either of these two cases the personal pronoun is put at the beginning of the sentence, when the verb is not immediately following, in order to point out the subject.

تَه حَمَا هَه زَوَا نَرَمِ تَرَمِ نَه بُی  
زَه شَوَمِ سَتَا هَه غَمِ کَبِی وَرِیَتِ لَکَه نِیَنَه

Thou art not soft nor warm by my wailing, I became roasted by thy grief like roasted grain. H'amīd (Gulsh. II, p. 101, 2).

کَه لَه غَمِ هَه اَمَانِ لَه یَمِ قَرِکِرِ  
زَه نَ هِشَقِ هَه کَارِ یَبِیْمَانِ لَه دَمِ قَرِکِرِ

Though I am never safe from grief, yet I never repent of a love-affair. H'amīd (Gulsh. II, p. 86, 2).

## 2) Demonstrative pronouns.

Their signification and use has already been generally treated in §. 103; here it is to be added, that the demonstrative pronouns may also be used in a local sense, e. g.

هَاتُو سِرِي نَه شُول چه دَا كِرْزِي دَام وَ دَدِي

Men were not left, those who walk here about, are wild beasts. *Xuṣṣ'āl* (*Gulsh. II, p. 40, 2*).

چه زِه كِرْم قَعَد دَه شِي قَعَد مُلْك قَعَد عَالَم دَقِي

What I do, that does not come to pass, (and yet) there is the country, there is the people (i. e. country and people are the same). *Idem* (*Gulsh. II, p. 68, 4*).

## 3) Interrogative pronouns.

These are employed not only in direct but also in indirect questions, as:

خَو قَوْت دِ دَ عَذَابِ دَقِي رَا تَه وَايَه

Tell me, how much strength thou hast to endure torment?

*Xavājah Muḥammad* (*Gulsh. II, p. 111*).

When *خَه* what? is repeated in an interrogatory sentence, it is implied thereby, that there is no real difference between the two questions, as:

خَه وَ بُت وَ تَه سَجْدَه خَه وَ دُنْيَا تَه

بُت هَرَسْت دَقِي هَرَسْتَار دِ دِ دُنْيَا

What is bowing down to an idol, what to the world? the worshipper of this world is an idol-worshipper.

*Rah'mān* (*Gulsh. II, p. 9, 2*).

## 4) The relative pronoun.

The relative pronoun only indicates the relation and the number and case, in which the relative should logically stand, must be taken up by a following personal pronoun (usually the pronominal suffix *دِي*), except when the relative is in the Nominative.

چه وَا وَرَحْمَتِهِ نَه دِی سَرِی نِشْتَه  
تَر قَعَه نَه هِه وَنَا کِنِی بَهْتَر سِی دِی

With whom there is not fidelity\*), he is no man, better than he is a dog by his fidelity. *Xuśh'āl* (Gulsh. II, p. 66, 2).

چه ئی عِلْم فَنَر نَه دِی حِلْمِی تَنِیْتَه

Flee from him who has no science nor skill. Ibidem.

More rarely the relative is taken up by a following demonstrative, as:

هِه شِیَه دَ مِعْرَاج رُ رَغْلَم هِر فِصِی قَوْم بَانِدِ چِه مَخُونَه دِرِی شُکُول  
هِه نُوکُونُ

In the night of the ascent I came to such a people, who scratched their faces with (their) nails.

*Favā'id uš-šarīṣāh* (Gulsh. I, p. 58).

As regards the position of the relative it is to be observed, that it occasionally precedes the noun, to which it refers (like in Latin), instead of following it; e. g.

دَ خُوشْکَال چِه سَرَايِ اَوْتَاک وَه دَارَو تَبِیر شَه

Hear, (that) which was the residence and abode of *Xuśh'āl*, has passed away. *Xuśh'āl* (Gulsh. II, p. 57, 1).

An attraction of the preceding noun or pronoun by the relative is occasionally met with in *Paḡtō*, the noun or pronoun being put in the same case, in which the relative is or ought to be, as:

هِه شِیرِیْنُو اَوَبُو جَمَع دِیْر عَالَم شِی

نَه فَعَه اَوَبَه چِه تَلِخ دِی یَا شَوِی

At sweet waters much people collect, not (at) those waters, which are bitter or brackish. *Gulistān* (Gulsh. I, p. 166).

عَلَمَاوُو چِه هِه چَا تَه نَصِیْبِکَت کَاوَه دَدِ هِه مَدِی

The *Ulamā*, who used to admonish any, were ill attended to by them. *Tārīḫ-i murāṣṣaṣ* (Gulsh. I, p. 19).

\*) I. e. Who is not faithful.

# 5) The Reflexive.

a) The Paštū is not possessed of a reflexive pronoun, but circumscribes it by خان dān, soul. It always refers to the subject of the sentence and remains in the Singular, though the subject may be in the Plural.

خان تہ بڼه وائی بڼه نه کړ

Thou speakest well to thyself, (but) doest not act well.  
Xush'al (Gulsh. II, 85, 2).

لکه دوی کا خپله قصد د خان ه وینو

تو ه بدل کله آخته قسی لیوان دی

As those seek amongst themselves their own blood, so not (even) wolves are rushing at each other.

Ašraf xān (Gulsh. II, p. 162).

In a sentence with an active or causal verb in the past tense خان may also be referred to the agent (the logical subject) in the Instrumental, as:

دی ه غمړن آواز سره و خان تہ و بلله

By her (دی) she was called to herself with a pitiful voice,  
i. e. she called her to herself etc.

Kalīlah ō Damanah (Gulsh. I, p. 112).

b) The Paštū is on the other hand possessed of a reflexive adjective, خپل xpal, self, own, which may be joined with خان, as: خان خپل one's own soul or person, or in person, personally, but with a personal pronoun the adverbial expression ه خپله is generally used, as: زه ه خپله, I by myself (= I myself). خپل when connected with a substantive is usually translated by the corresponding possessive pronoun; like خان it always refers to the subject of the sentence.

بِهَ دَا وَقَت چِه مَزَرَقِي هِه غَم هِه آندَوِه مِرْفَتَار دَقِ خَپِلَ حَانَ بِه وَ دِه  
تِه عَرَضِ كَرَمَ

At this time, when the lion is sunk in grief and anxiety,  
I shall personally speak to him.

Kalilah o Damanah (Gulsh. I, p. 98).

سَاقِلَ آوِ خَرَّخُولِ مِي رَا تِه وَ دَانِه خِه رَنَكِ بَوِيه چِه سَتَا وَبِلَ دَ خَپِلَ  
رُوزِگَارِ تَسْتَوِرِ الْعَمَلِ كَرَمَ

Tell me, how the keeping and spending of it must be made,  
that I may make thy words the rule of my livelihood.

Kalilah o Damanah (Gulsh. I, p. 88).

When the accent is laid on خَپِلَ, it may be intensified by  
the addition of a possessive pronoun or a pronominal suffix; in  
this case خَپِلَ must be translated by 'own'.

کِه دِ نِه دِه دَ خَپِلَ مَخِ خِهَرِه چِرَكِينِ  
آيَنِه حَمَا دَ رِه دِه دِه رَنَكِينِ

If the look of thy own face is not dirty, the mirror of my  
heart is not rusty either. ʿAbd-ul-qādir ḡān (Gulsh. II, p. 198, 1).

Now and then خَپِلَ is not referred to the subject of the  
sentence but to the remote object (Dative) of it.

فَرِ خَوَكِ چِه خُدَايِ تَعَالَى آزارَوِي دَ مَخْلُوعِي دَ رِه بَه كَوَلُو دَهَارِه  
حَقِ تَعَالَى قَمِ قَعِه مَخْلُوعِي هِرِ وَ كَمَارِي چِه مُكَافَاتِ دَ خَپِلَ بَرَنَارِ  
وَرِ بِنَكَارِه كَا

Every one, who offends God the most high, in order to please  
the heart of a creature, God the most high commissions that very  
creature on him, that it should manifest to him the retribution  
for his own deed. Gulistān (Gulsh. I, p. 174).

خَپِلَ is also used in general, without being referred to a special  
subject or object, as:

تَاہ د نورو رَضا ہوئے کبھی خپلہ ۛہ کار نہ نہ ہمیشہ خپلہ رَضا

Sometimes the will of others must be attended to, sometimes one's own; one's own will is not always of use.

Rah'mān (Gulsh. II, p. 7, 1).

In the Plural خپل signifies 'one's own people'.

عَاقِبَتِ قَعْدِ سَرْدَارِ شِی مُرْتَدَارِ پَآیِ

چہ بی نَس د خیلو بدو تہ لیوال کا

At last that chieftain will remain a carcass, whose belly is hankering after the injuries of his own people.

H'amīd (Gulsh. II, p. 94, 3).

## V. The Verb.

### §. 190.

#### 1) The Infinitive and its construction.

a) The Infinitive is always constructed as a Plural; as regards its signification it coincides with the verbal noun ending in *ah* (§. 12)\*) and partly with that ending in *anāh* (§. 13), being originally itself a verbal noun (§. 14), as: لیدَل *lid-ah*, the seeing (sight), to see, تلَل *tl-ah*, the going, to go.

خوشامدونه بی د نہ کول برآمد و دل هرگز نہ کول

They told him flatteries and did never tell him any thing disagreeable\*\*). Kalīlah o Damanah (Gulsh. I, p. 90).

تند ۛہ وقت د ترؤولو سُست ۛہ وقت د سوربدلو

Sharp (were the horses) at the time of making (them) jump, slow at the time of riding.

Yusuf and Zulaiḡā (Dorn, Chrest. p. 205).

\*) In the Formative both nouns may be alike, as the termination *ah* may be dropped in the Formative; see §. 14.

\*\*) Literally: disagreeable speaking they never made.

b) To the Infinitive the object (and with intrans. verbs the predicate) is subordinated in the same way, as this is the case with the finite verb, provided the Infinitive stand in the Nominative\*). E. g.

يَهْ هِغِه لَارِ قَدَمِ كِهِيَتَبُولِ چِه حَدْ اَوْ يَانَانِ بِي مَعْلُومِ نَهْ نَتِي اَوْ يَهْ  
قَسِي دَرَقَابِ كِهِي حَانَ آجُولِ چِه نِيَكِي اَوْ بَدِي بِي بِنَاَرَهْ نَهْ نَهْ  
كَارِ دَ مَافِلَانَو نَهْ نَتِي

To put (= the putting of) the step on that road, the limit and end of which is not known, and to throw oneself on such a sea, the goodness and badness of which is not manifest, is not the work of the wise. *Kalilah o Damanah* (Gulsh. I, p. 96).

هَم قَسِي اَوَلِيَا كِنْدَه\*\* يَه كَشَفِ كَرَامَاتِ سَرَهْ نَهْ دِي

The being made such saints is not done by revelation and miracles. *Favā'id uš-šarībah* (Gulsh. I, p. 77).

When the Infinitive is in the Formative (Plural), the object (with active and causal verbs) and the predicate (with intrans. verbs) is put in the same case, which the preposition or postposition requires, but the object may also remain in the Accusative, as with the finite trans. verb.

دَهَارَهْ دَ تَبْرِي غَوَرَزُولُو رَاغَلِي نَهْ

I am come to swing the sword. *Matth.* 10, 34.

هِيَشِخْ دَ سَتَرَكُو غَمَرُولُو خَوْنَدِ بِي نَهْ دِي

چِه رَحْمَانِ هَهْ سَتَرَكُو نَهْ وَيَنِي بَارَانِ خِيَلِ

He (= I) has no liking for opening the eyes, when Rah'mān does not see with his eyes his friends.

*Rah'mān* (Gulsh. II, p. 22, 2).

\*) The same rule holds good with reference to the construction of the verbal nouns ending in *gh* and *anāh*, as: مَخِ كَنْتَه, seeing the face, غَوِيَنِي خَوَارَهْ, eating flesh, etc.

\*\*) كِهِنْدَه is quite the same as كِهِنْدَل.

هَدَ نَا حَوْنَبَرَه مَالَكِه رَا دِرْلُو بُد خَه خَرَابِي كِبِي

By the bringing (fetching) of so much salt what mischief will be done? *Gulistān* (*Gulsh.* I, p. 174).

But the object may also be subordinated to the Infinitive (as to a substantive) in the Genitive. This is absolutely necessary, when the object is a pronoun, as otherwise an ambiguity would arise.

هَسَ نَ قَعَدَ نَ دُوسُفَزَيْدُو قَصْدَ نَ سَوَاتَ نَ آخِسْتُو رَشَه

After that the Yusufzais made the design to take Svāt (of the taking of Svāt). *Tārīḫ-i murassas* (*Gulsh.* I, p. 11).

نَ دَهَ نَ وَرْلُو بُي سَيَّعَه بِي قَايِدَه وَكِرَه

They attempted in vain to kill him.

*Gulistān* (*Gulsh.* I, p. 159).

c) The Genitive of the Infinitive with the negation نَه may also express the idea of a Gerundive. When the substantive verb is constructed with the Genitive of the Infinitive, it expresses either a necessity or obligation (the active and causal verbs taking at the same a passive signification) or an ability. The following examples will illustrate this.

نَه نَ شَرَمَ نَه حَيَا شِي كَه فَرْخُو دَه كِرُو كِرَه كِرَه

Thou art not ashamed nor abashed, though thou practisest that which is not to be done. *H'amīd* (*Gulsh.* II, p. 86, 1).

حَالِ نَ سَوِي طَالَعِ خَه بَيَانِ كِرَمَ چَا تَه

لَكَه نَمَرُ حَمَا جَمِينِ دَقِي نَ دَاغَلُو

What shall I explain to any one the state of my burned destiny? like the sun my forehead is to be branded \*).

*Kāzim ḫān* (*Gulsh.* II, p. 143, 2).

---

\*) This refers to the practice of the Afghāns to put a spot on the forehead of those children, who were born in an inauspicious hour, in order to preserve them from evil.

چه بی مینه د بیه مخ هه زرمی نه وی  
د عمو مخونه نه وی د کتر

Who have no love in their heart for a fair face, their faces should not be looked at. ʿAbd-ul-Qādir (Gulsh. II, p. 198, 2).

نه بی کلبله ته زبه د ولووه نه دا راز د نه نه د سائلووه

His tongue was neither able to speak to Kalilah nor was it able to keep this secret from him.

Kalilah ʾ Damanah (Gulsh. I, p. 110).

But the Infinitive by itself (without د) is also used as a Gerundive, as: حَلَالٌ حَلَالَ كُنْزِلَ نَى, the lawful must be considered as lawful. بویه (adj.) bōyāh, it is necessary, is thus often constructed with the Infinitive.

چه لا تازه وی زور قوت بی نیولی نه دى دفع کول بی بویه

Whilst they are yet green and have not (yet) gained strength, they must be removed. Gulistān (Gulsh. I, p. 156).

Annotation. The verbal noun ending in āh (§. 12), which is, as a rule, only used in the Plural, is now and then also constructed as a Singular, as: دَنَفَسٍ وَجَلْبَدَه تَه نَظَارَه كَه, they look at the parting of the breath (Mīrsā ẖān Anṣārī, Gulsh. II, p. 129, 1); كَه خَبْنَتَن د نه نه كَسَب كَرِه عَاجِزِ دى, if her husband be unable to follow his occupation (Favā'id uš-šarīṣāh Gulsh. I, p. 68).

#### §. 191.

#### 2) Use of the Participles.

a) The participle present, be it transitive or causal, either subordinates the object in the Accusative or it governs, as a substantive, the Genitive.

شَرَمِ سَانَوَنی زَرِ غَوَرَزَوَنی شَه  
 کِه سِیاهِی نِه سَرِ بَوَه لِه تَا نِه زَرِ بَوَه

Be preserving (thy) honor, be scattering gold! from the soldier the head is required, from thee gold is required.

Gulistān (Gulsh. I, p. 167).

آرِدِندُونی دَ عِیْبِتِ بَه لِه کُنَاهِ هَلِه خَلَاصِ شی چِه دَرِ رَیَه دِ اِنکَارِ  
 دَرِ هَفَه وَه کَا

The hearer of slander will then become free from guilt, when he upon the tongue (= immediately) denies it.

Favāid us-sarīḥ (Gulsh. I, p. 59).

b) The participle perfect is now and then used substantively, as:

چِه خُبْتَنِ کَنری حَاضِرِ بَدِ کَری حَمیدَه  
 نِشْتَه تَا غُنَدِ بی شَرَمِ بی اَنَب

As the Lord considers the bad deed as present, o H'amīd, there is no shameless and impudent like thee.

H'amīd (Gulsh. II, p. 79, 1).

سَتَا وِشْتَلِی بَه رَوَغِ نِه شی بی وِضَالَ  
 کِه دَارُو لَرَه بی رَایِشی سِینَا

Thy wounded ones will not recover without meeting (with thee), though Sīnā come to administer them medicine.

Xavājah Muḥammad (Gulsh. II, p. 105, 1).

#### §. 192.

#### 3) The Imperative.

The Imperative is used as a command and injunction not only to the II. person Singular and Plural, but also to the III. person Singular, when not so much a command, but a wish and ardent desire (chiefly an imprecation) be intended.

بَد كِرْدَارِ خَوِي هَمْدَا مَه شَه نَه مَوَر

خَبَطَه كَانِد نَامُوس دَه هَلَاَر وَ مَوَر

May not be born a wicked son from a mother! the renown of father and mother he renders abortive.

Rah'mān (Gulsh. II, p. 18, 1).

چِه هِرْت خِرَصَت بُي نَه وَي هَه جَهَان كَهِي

دَغَه فَسِي وَرَنْدُون وَسُوخَه هَه اَوَر

May such a life be consumed in fire, which has no honor nor dignity in the world! Rah'mān (Gulsh. II, p. 17, 3).

§. 193.

4) The Present.

The Present is used to express an action that is going in the present time. When the action is to be represented as lasting or repeating itself or as a general fact, the participle present is joined with the substantive verb.

دَ خَوَاجَه مُحَمَّد اُمِيد سَتَا هَه كَرَم دَو

دَ خَوَاب طَاقَت نَه لَوِي كَه عِتَاب كَر

The hope of Xavājah Muh'ammad rests on thy benevolence, he cannot answer if thou blamest him.

Xavājah Muh'ammad (Gulsh. II, p. 110, 2).

نَه حَلْمَا نَه نَه دَ سَتَا نَه دَا دُنْيَا

يَاتَر شوونی لَه قَر جَا نَه دَا دُنْيَا

This world is neither mine nor thine; this world is left behind by every one. H'amīd (Gulsh. II, p. 76, 2).

Like in Persian the Present is also used in Paštō, when the words of another person are mentioned, though a past tense precede them and a historical tense should follow according to the consecutive temporum, the Afghān with his lively phantasy giving the words of the speaker, as if spoken in the presense (cf. §. 220).

خارون رشید آرکان دولت و پستیده چه سرا ن قسی سری خه نه

Hārūn Rašīd asked the pillars of the state: what is the punishment for such a man? Gulistān (Gulsh. I, p. 183).

§. 194.

5) The Subjunctive of the Present.

a) The Subjunctive of the Present serves to express a thing subjectively and therefore in a certain respect as uncertain, doubtful or indefinite, as: *خه وکرم*, what shall I do? It is therefore often employed to express an opinion, a general experience or fact (with some politeness); the repetition of an action may also be indicated thereby.

چه ده عقل خلک پیر دی و دانا و ته کبیر دی

When the youth is in intelligence an aged man, he is great (= old) to (= in the eyes of) the wise one.

Gulistān (Gulsh. I, p. 159).

ن مر داور کرده پیر ویل بی لیر دی

ن نامردو عمل لیر دی پیر بی لاف

The work of men is much and few their words; the work of the unmanly is little and much their boasting.

Xuṣṣ'āl (Gulsh. II, p. 47, 3).

خو خلک می ده خاطر کهنی و کیزی چه بل ملک لره لار شم خان  
نه وطن و هاسم

Sometimes it goes about in my heart (= I consider in my heart), that I should go to another country and banish myself from (my) native land. Gulistān (Gulsh. I, p. 168).

b) The Subjunctive is also used (chiefly in the II. person Sing. and Plural) to express a wish or desire (Precative). When the third person Sing. and Plur. implies more an Imperative (or Jussive), the prefix *و* is added, to intensify the Subjunctive. In poetry the prefix *و* is in this case often dropped.

رَبِّ زَوْءِ نَزَقِيبَ لَرَمَ هَ إِحْسَانِ كِرِ

نَا هِنْدُرَا بَانِدِ عَضُرُ مُسْلَمَانِ كِرِ

O Lord, would that thou wouldst make soft by beneficence  
the heart of (my) rival! make to me this Hindū a little a Musalmān!  
H'amīd (Gulsh. II, 84, 4).

نَدِ دِ چَرِ نَ آشَنَا هَ لَوُرُ مُکْدَرِ شِی

نَ صَبَا بَانَدِ حَلَمَا سَلَامِ هِرِ دِرِ\*

If thou ever pass in the direction of my friend, o morning  
breeze, bring him my salutation! Xush'ā (Gulsh. II, p. 44, 2).

بِلَاشَنَا دِ هَ لَسَ مُکْرَوَ اِعْتِمَادِ نَهَ کَا

The king should not put his trust on ten sorts of people.  
Kalīlah ō Damanah (Gulsh. I, p. 105).

The Subjunctive is therefore used in optative and prohibitive  
sentences after the interjectional adverb کَشَبِکِ (کَشَبِکِ), would  
that, and the prohibitive particle مَهَ, lest, that not (Lat. ne).

چِهَ حَمِيدِ اُورِدَوِی لَاسَ نَ قَارِ زَنَخِ نَهَ

کَشَبِکِ شَاخِ نَ وُلِی وُنِسی مَنَهَ

When H'amīd stretches out his hand to the chin of the  
friend, would to God that the bough of the willow would bear  
an apple! (H'amīd (Gulsh. II, p. 101, 1).

چِهَ قَرِ لَالِ سِرِ سَکَرَوِی هَ کَبِی سَوَحَمِ

مَدِ بِي وَبَدَمِ مَنَ حَهَ کَوَمِ بِي نَا

As every tulip becomes red burning coals, in which I burn,  
may I (rather) not see it! what shall I do with Yaman without  
thee? H'amīd (Gulsh. II, 77, 4).

\*) دِرِ vrē, instead of دِرِ vrē, on account of the rhyme.

بِه مَجْلِسِ دَر سَرِه عِيَجَرِي كِي مِه نِي  
دَا بِي زِيَانِه بِي نَعَصَانِه غَمَجِن خَلَف

Never sit together with them in society, (with) these people, who without loss and injury are sad.

H'amId (Gulsh. II, p. 91, 2).

c) The Subjunctive is used in subordinate sentences after a final or consecutive conjunction (§. 176, 5), as: **چه**, that, in order that, so that, **چه نِه دِي چه**, may it never be that = lest, or only: **چه نِه چه**, and such like expressions, as: **چه بَوَدِه چه** or **چه بَايَكِه دِي چه**, it is necessary, that. The conjunction **چه** may also be dropped, as in Persian, so that only the Subjunctive remains; in poetry even the prefix **و** is frequently omitted. If a past tense precede, the Subjunctive present assumes the signification of a Subjunctive of the Imperfect.

حُكْمِ دِكْرِه چه زِه دَزِيرِ دُ وَرَنَمِ

Give order, that I may (or should) kill the vazIr.

Gulistān (Gulsh. I, p. 177).

خُوكِ چه تَوَانِيوِي چه نَفَعِ شِي وَ بَدَلِ نِه دُرِسِي حَيْفِ دَقِ چه  
كَاهِلِي كَا

For any one who is able to do it, that his profit may come to another, it is a pity, that he should be lazy.

Kalilah 3 Damanah (Gulsh. I, p. 87).

چِرِ نِه دِي دَارِ خَطَا كَرِي مِه مِخْنَتِ كِنِي  
دَ دُنْيَا مِخْنَتِ كُوتاهِ دَقِ زَرِ بَه تِيرِ شِي

May it never be, that thou mayst lose (thy) opportunity in labour; the labour of the world is short, it will soon be over.

Gulistān (Gulsh. I, p. 171).

نَالَاتِفَ چِه لَابَقَت هِه فَنَدِه غَوَارِي

د بېرېننا هِه رَنړَا سَتَن ډېمِي جَنَجَال کا

The unworthy man, who seeks ambitiously worthiness, gives himself the trouble, (that) he thread (= to thread) a needle in the light of a flash of lightening. H'amīd (Gulsh. II, p. 95, 1).

§. 195.

# 6) The Future.

a) The Future expresses not only an action, that will take place in future time, but also an intention, purpose or desire.

لِه جَاعِلَ سَرِه چِه جَنک کړي هُونِيَاړِه

خَوَه مَات کړي خپل تَنَدَقِي هِه نَادَانِه ټي

When thou makest war with an ignorant man, o clever one, certainly thou wilt break thy forehead on his ignorance! Gulistān (Gulsh. I, p. 177).

مَا وَرِه لِه لَ دِيَدَن کړم د مَارَانَو

خَبَر هِه دَم چِه مَارَان هِه کَوچ تَعِين شو

I said, I will yet have an interview with (my) friends; I did not know, that (my) friends were appointed for departure. Rah'mān (Gulsh. II, p. 25, 3).

b) The Future may also imply a covert Imperative, the order or admonition being put down as a matter of course.

هِه نَاحَقَف هِه کَرَم مَانِه لِه هِيچَا نِه کَا

د بَدَانَو غَلِيم وَاړِه خپل اَفْعَال دَوِي

He who is censured with injustice should not (will not) complain of anybody: the enemy of the wicked are all their own actions. Xušh'āl (Gulsh. II, p. 65, 3).

c) As regards the consecutio temporum, it is to be noticed, that the Future may also follow after a historical (past) tense, the Afghān representing the words of a speaker in the same way, as he uttered them at the time being. E. g.

وُورِیْدَم چِه لِه خِیَلِی وِیْرِی بَه قَصْد حَمَا دَ هَلَاکَت وُکَا

I was afraid, that they will (= they would) design my death out of their own fear. Gulistān (Gulsh. I, p. 162).

d) It has been noticed already, that in the Future the Subjunctive prefix *ʔ* is often dropped, especially in poetry, the prefix *ʔ* being considered sufficient for the designation of the Future. *ʔ* itself is used always as prefix, only in poetry it is (though very rarely) also put after the verb.

د جَهَانِ غَمُونَه دِيرِدَنه نَوْر به خَه زَاړی حُان زَاړه

Give up the grief about the world, why wilt thou bewail others, bewail thyself! Xuš'hāl (Gulsh. II, p. 59, 3).

وَر جَارَوزی بَه وَ دَه تَه کَرْدی خِیلی بِه سَره سِینَه تَسِر وَاوَه دَمَار

His own deeds will revert to him; with cold breast pull out from him the (his) root. Gulistān (Gulsh. I, p. 175).

§. 196.

### 7) The Imperfect.

The Imperfect denotes an action not yet completed but still going on in time past. It has therefore commonly reference to another past tense and recalls the time, in which an action besides another or in opposition to it, was progressing.

فَرَحُوا مَهْرَبَانِي دِلَاسَا بُی کَوَلَه آرَام بُی نَه کیدَه

How much soever he comforted and consoled him, he did not keep quiet. Gulistān (Gulsh. I, p. 161).

It has been remarked already (§. 141), that transitive and causal verbs are constructed in the Imperfect (as in all past tenses) passively, the agent (or the logical subject) being put in the Instrumental.

چه خنداد کند کوفی به زناخندان کبشی

مَا قَالَ لَهُ كُنْزِي لَيْتَهُ خَيْلٌ يَرُدُّوهُ

When by thy laughter a pit was dug in (thy) chin, by me then was seen my own falling into it. H'amīd (Gulsh. II, p. 101, 3).

§. 197.

8) The habitual Imperfect.

a) This tense denotes a continuation or repetition of the simple Imperfect. It is therefore chiefly used, when a habit or repeated lasting action is to be described.

چِه دِه مَخ بَه دَ قَر نِکَلِی شَه زِر زِر

خُود بَه تَلَه دِه نَحَبَت پِیرِی دَ پِیر

As glance upon glance used to be cast on the face of every fair one, the Pīrship itself of the Pīr went off (gradually) by (his) love. H'amīd (Gulsh. II, p. 83, 3).

b) With the final conjunction چِه, that, the habitual Imperfect is sometimes used in the sense of a Subjunctive of the Imperfect, where in Persian the Conditional or the Subjunctive of the Present would be used, which is also admitted in Paṭṭā.

تَقْدِیر دَ حَق عَزَّ آسَمَه دِه دَا مُقَدَّر شَوِی وَ چِه دَا مِجَنَّت بَه مَا  
دِه رَسِیدَه

The decree of God, whose name be exalted, had been fixed on this, that this calamity should befall me. Gulistān (Gulsh. I, p. 198).

On the use of the habitual Imperfect in conditional sentences see §. 216, 2. 4.

§. 198.

9) The Conditional or Optative of the Imperfect\*).

The regular Conditional (through all persons) is only used with intrans. verbs, of the Conditional of transitive and

---

\*) Now and then the prefix of the Aorist ر is put before the Conditional, so that the Conditional approaches the form of an Aorist; this is chiefly the case, when the Conditional is to be turned into the Pluperfect tense.

causal verbs only the third person (Sing. or Plur.) is in use. This mood is employed:

a) In conditional sentences, on which see §. 216, 2. 3. 4.

b) In Optative sentences, with or without an optative interjection.

آوِ هَجْرِی کَشْکِی هَجْرَانِ ځِه دَوْرَانِ نَه دِی  
نَه تَاخْتُونَو تِی ځِه ځَانِ اَهْلِ زَمِیْنِ شَوَل

O exiled one, would that there were no separation in the world! on account of its ravages the people of the world have become distressed. *Ašraf xān* (Gulsh. II, p. 159, 2).

چِه ځِه وِرُونِدَو کُښِی نَفَای کَا تَالَايِفِ دِی  
يَا تِی ځِه کُږی يَا تِی مَه کُږی زڼه ځِه دَوْر

Those who produce enmity amongst brothers, are wretches; would that they would either act well or that they would not learn anything else! *Xuš'al* (Gulsh. II, p. 110, 1).

c) After the final conjunction چِه the Conditional is used in the sense of a Subjunctive of the Imperfect, as in Persian, when in the sentence an Optative precedes, on which it is dependent.

کَشْکِی زَه ځَاوَرِی اِبَرِی دَ تَا دَ دَرِ دِی  
چِه قَدَمِ دِ هَمِيشَه ځَمَا ځِه سَرِ دِی

Would that I were the dust and ashes of thy door, that thy foot would always be on my head! *Rah'mān* (Gulsh. II, p. 27, 2).

يَا مِی مَرُکِه ځِه هَلْکَوَالِی رَوِی چِه ځَلَاصِ رَوِی  
رَوِ مِی نَه لِيدَتِی دَا هُونِږوَرَه اَلَم

Or that I would have died in childhood, that I would be free, that I would not have seen so much grief! *ʿAbd-ul-Qādir* (Gulsh. II, p. 196).

§. 199.

10) The Aorist.

a) The Paštō Aorist is a simple preterite tense, like the Greek Aorist, and denotes a past action without any reference to its duration.

مَا خَطَا وَكَرَّ چِه تَه می بی کُناه آرتِه کِری

I have done wrong, that I oppressed thee without a fault. Gulistān (Gulsh. I, p. 178).

b) Like in Persian the Aorist is in Paštō also used, when an action, which is going on or is to be done, is to be represented as done already and therefore as certain.

بَادشاه و فرمایِل و می باخِبه آکرچِه مصلَحَت تَه رُ

The king said: he is pardoned by me (= I pardon him), although it was (= is) not advisable. Gulistān (Gulsh. I, p. 158).

c) Similarly the Aorist is used in conditional sentences, when the consequence of the condition is represented as realized already, though it is only intended to remove every doubt, that it will come to pass. (cf. §. 216, 1).

کِه رَا وَرَتَمِی خَلَص شَوَمِی کِه تَه وَتِی مِ شَوِی

If ye come out to me, you are saved (were saved), if ye do not come out, you are dead (were dead). Tārīx-i muraggas (Gulsh. I, p. 80).

d) In the course of a narration, when one or more Aorists are preceding, the story is continued with the Aorist, though strictly a Perfect or a Pluperfect, as the case may be, should be employed. E. g.

هَه هَفَه مُدَّت کِش بَادشاه تَه سَخَت عَلِیم مَخ بَنکارَه تَر چِه دَوَارَه لَوَرِنَه  
لَبَکَرِی خَبَلَه وَرَغَلِی اَوَّل چِه مَیدان تَه وَرَوَت هَم هَفَه هَلَدَک رُ

At that time one hard enemy showed his face to the king; when on both sides the armies had come together (Aorist), the first, who went forth to the battle-field, was that very youth. Gulistān (Gulsh. I, p. 155).

e) It is very seldom the case (and only in poetry), that the Aorist in connexion with an optative or prohibitive particle is used instead of the Conditional.

اِمَلْ خَانِ دَرِيَا خَانِ دَوَارِ مَرَكِ بِي مَه وَ  
هَيْشِ تَقْصِيرِ دَوَارِ وَ نَه كَمِ وَارِ مَه وَارِ

Both Ēmal xān and Daryā xān, would that they had not died! both have never committed any fault. Xušh'al (Gulsh. II, p. 70, 2).

§. 200.

11) The habitual Aorist.

The habitual Aorist expresses a repeated action in time past, without any reference to its duration. The habitual Aorist مَه وَ is also used instead of the habitual Imperfect, as from this auxiliary no Imperfect is formed (see §. 162, 4; §. 216, 2).

كَه خُوكِ بَه بِي مَه سَوْدِ مَه سَوْدَا وَرَغِي بَه بِي آزارِ مَه مَيْشَه بَه دِ  
دِلَازِ كُودِ لَاسَه مَه تَنَكِ مَه

If any one came to them for the purpose of trade, he used to be oppressed by them, he was constantly in trouble from the hand of the Dilāzaks. Tārīx-i murassas (Gulsh. I, p. 11).

§. 201.

12) The Perfect

The Perfect denotes an action, that is completed in time past, without reference to another tense.

مَه سِپِيَن لَاسِ بِي دَوَرِ كَرِي دِي حِنَا  
كَه سَوَه كَرِي دِي مَه وَبَنُو دِ آشِنَا

He has either put Hennā on his white hands or he has made them red with the blood of the friend. Xavājah Muh'ammad (Gulsh. II, p. 105, 1).

§. 202.

13) The Subjunctive of the Perfect.

The Subjunctive of the Perfect expresses the idea of the Perfect subjectively. It is therefore frequently used, when a fact is to be stated mildly or politely, especially in mentioning opinions, maxims etc., which, by being put in the Subjunctive, get a more general colouring. Its signification often coincides therefore with that of the past Future; see §. 266.

عَاقِبَتِ بِهٖ دَ پَسَرَلِی ۛهٖ بَارَانِ نُونَدِ شِی

چِه جَامِی دِ وِی آغُوسَتِی دَ قَرطَاسِ

At last thou wilt become wet by the rain of spring, as thou hast put on (according to my opinion) clothes of paper. *Xavājah Muh'ammad* (Gulsh. II, p. 111, 2).

قَرِهٖ وَنَهٖ چِه تَازِهٖ وِی نِهَالِ شِوِی

بِهٖ قُرَتِ دَ سَرِی دُخِیوِی لَهٖ خَایِهٖ

Every tree, that has been newly planted, may be pulled out from its place by the force of a man.

*Gulistān* (Gulsh. I, p. 156).

§. 203.

14) The Pluperfect.

a) The Pluperfect denotes an action, which must be completed in past time, before another past action could occur. As regards the *consecutio temporum*, the Pluperfect is usually followed in *Pāštō* by the Aorist. That the Aorist is often used, where we would expect a Pluperfect, has been pointed out already §. 199, d.

قَهٗ قَوْمِ چِه دَ نَهٖ لَهٖ ظَلَمَ دِرِیْشَانِ شِوِی وَرِیَهٖ دُرُیِ جَمَعِ شَوْلِ

Those people, who had become distressed by his tyranny, assembled round them. *Gulistān* (Gulsh. I, p. 161).

b) The Pluperfect is also used idiomatically, without any reference to another past tense, when a remote past action is mentioned, the consequence or connexion of which with another action the speaker does not like to point out.

دَا چِه خَلَاص شَه دِر وَقْت هَه بِيَايَان سَتَرِي شَوَم دَ تَلُو قَوْت مِي نَه وَه  
هَه اَوِيں بِي سَوَر كَرِيَم تَر مَنَزِلَ بِي وَ رَسَوَلَم اَو دَ بِي بِل لَه لَاس مِي  
تَا زِيَاَنَه خَوَرِي بِي وَه

As to him who was saved: One time I became fatigued in the desert and could no (more) go; he seated me on his camel and brought me to the station — and from the hand of this other one I had received (eaten) a lashing. *Gulistān* (*Gulsh.* I, p. 184).

c) In the Pluperfect of the Passive (as in the Perfect) the participle perfect شَوِي is often left out; e. g.

دَا لَطِيْفَه دَر تَاج دَ كَيَّخَسَرُو بَادشَاه لِيَكَلِي وَه\*)

This witty word was written on the crown of the king Kaiḡasrū. *Gulistān* (*Gulsh.* I, p. 180).

#### §. 204.

#### 15) The Subjunctive of the Pluperfect.

a) This mood is used in conditional sentences, as well in the main as in the dependent part of them; see §. 216, 3.

b) It is also used with the final and consecutive conjunction چِه, that, in order that, so that, where we likewise employ the Subjunctive of the Pluperfect.

زَرَه بِي كَرِي نَه شَه چِه لَاس بِي دَ بَدَنِي اَوِيں كَرِي بَه وَه

Their heart could not do it, that they should have stretched out (against him) the hand of wickedness. *Tārīḡ-i murassas* (*Gulsh.* I, p. 80).

#### §. 205.

#### 16) The Conditional (Optative) of the Pluperfect.

a) This mood is used in the main and dependent part of a conditional sentence, see §. 216, 3; further in an optative

لِيَكَلِي شَوِي وَه = لِيَكَلِي وَه\*)

sentence, with or without an optative particle (see an example §. 153).

b) The Conditional of the Pluperfect is also used, after a final and consecutive conjunction (چې that, in order that, so that) in the same sense, as the Subjunctive of the Pluperfect (§. 204, b).

دَا بِي كُنَاءَ وَقَلَّ دَنْ يَبْخُجِي أَوْ تَمَلَّ لَهُ أَنْ يَمِيتَ لِي رِي دِي بُوَيَهْ چِه شَفَاعَتِ  
مِي بِي كَرِي دِي

This beating of the woman without reason (fault) and the binding (of her) is inhuman, it was necessary, that I should have interceded for her. *Kalīlah ō Damanah* (Gulsh. I, p. 112).

شَرْطِ دَنْ قَمَاجِنَسْتِي هَه حَلَايِ نَه كَرِ چِه زَه دِه دَا بِلَا آخْتَه نَه وَی

Thou hast not performed the duty of brotherhood, that I would not have been involved in this calamity. *Kalīlah ō Damanah* (Dorn, Chrest. p. 11).

§. 206.

#### 17) The Past Future.

By the past Future a future action is described as already accomplished. In the *Paštō* however this signification is rarely found, the past Future usually expressing possibility or probability of an action, which might have been done. It corresponds therefore in most cases to the Subjunctive of the Perfect, the proper past Future being in *Paštō* usually expressed by the Aorist; see §. 216, 1.

دَا دِه بېر خَه بَه خَرُخ شَوِي دِي أَوْ غَرَبِيو تَه بَه دَر كَرِي شَوِي دِه

This may have been sold for much and it might (then) have been given to the poor. *Matth. 26, 9.*

دِه خِيَلْ عُمَرِ بَه هِيَتَا لِي دِلِي نَه دِي

قَعَه چَارِي چِه دَارِ قَرِ سَاعَتِ دِه مَا كَا

None will have seen in his life those things, which my friend inflicts on me every hour. *Rah'mān* (Gulsh. II, p. 21, 1).

## II. The Synthetical part.

### §. 207.

#### I. The simple sentence.

Every sentence must consist of a subject and predicate. The subject may be either a substantive or pronoun or adjective (participle) or numeral; it is usually not expressed, when it consists of a pronoun and its predicate is a verb, as: **وَأَنبَأْتُ**, I say, except a particular stress be laid upon it, as: **أَنبَأْتُ وَأَنبَأْتُ**, I say (not you). The subject must always be in the Nominative and may be nearer defined again by an attribute.

The predicate is commonly a verb, but it may also be a substantive, pronoun, adjective (participle) or numeral, in the last four cases a copula (viz, the auxiliary verb 'to be' and 'to become') is required, by means of which the predicate is connected with the subject, as: **جَارٌ كَلَكَةٌ دَهْ**, the work is hard. The predicate may also take an attribute like the subject.

As regards the position of the subject and predicate in a Paṣṭō sentence, it is to be observed, that the subject, as a rule, precedes the predicate. When the predicate is an adjective etc. (not a verb), it follows immediately the subject and the copula is put last, just as in Latin, as: **دَهْ خَبَرٌ مُنَاسِبَةٌ دَهْ**, the word is not becoming; but the copula may also immediately follow the subject and the predicate may be put last, as: **خَبَرٌ دَهْ مُنَاسِبَةٌ**. The predicate is only then put first in a sentence, when a particular stress is laid upon it, as: **مُنَاسِبَةٌ دَهْ وَخَبَرٌ**, unbecoming was the word.

## Concord of the subject and predicate.

1) If the predicate be a simple verb, it must agree with its subject in number and if the verb be compounded (with a participle), also in gender, as: سَیْ رَاشِی, the men come; دُنْیَا یَاتُو, the world is being left behind; جَنْبِی رَاغَلَه, the girl came. But when the subject is a collective noun, the verb as predicate may follow in the Plural, as: هَهِ دَوْتِی جَمْع شَوَل, those people assembled round them (Gulsh. I, 161).

When the subject is a feminine but contains masculine individuals, the predicate may be put in the Plural masculine, as: قَبِیلَه بَی هَهِ حَای تَه وَخْتَل, his family went up to that place (Gulsh. I, p. 34).

When the predicate precedes the subject in the sentence (especially, when the predicate consists of the substantive verb 'to be'), it may be put, without any reference being had to the following (not yet mentioned) subject, in the III. person (masc.) Singular; e. g.

نِشْتَه دَو تَه زَوَر تَه هَهِ زَارِی خَلَصِی لَه مَرَمِ

There is not by force nor by wailing an escape from death.  
Xavājah Muḥammad (Gulsh. II, 117, 3).

رَا تَه هَس دَو تَه بَلْبَلُو تَرَانَه

To me is sufficient the melody of the nightingales. ʿAbd-al-Qādir ḡān (Gulsh. II, p. 199, 2).

دَه عَمَلُون هَهِ خَیْرِتِی کَبِی تَه وَکَبِه شِی پَخُوس زَرَه نِیْکَتِی

On the scrip of actions will be written fifty thousand good actions. Favāid uš-šarīḡh (Gulsh. I, p. 71).

2) When the predicate is an adjective (participle etc.), it must agree with its subject in gender and number; but the

constructio ad sensum is also admissible, e. g. یار friend, may also denote a female friend, and in this case the adjective as predicate may be put in the Feminine.

آدم خپلی آفریدنی دی سړی و سپین

The Āfrīdī girls of the Ādam xēl are red and white. Xush'āl (Gulsh. II, p. 54, 2).

It is an anomaly, if the adjective as predicate, referred to a subject in the feminine Plural, remains in the feminine Singular (as in Hindī).

واړکونه شو همکې د نړیا چار

Upside down were put all the affairs of the world. Xush'āl (Gulsh. II, p. 42, 4).

قی قی ده غو چه ده غو ورکو بارداره او دی ورکوونکی دی

Woe, woe to those, who in those days may be pregnant and giving suck. Matth. 24, 19.

3) When the predicate is a substantive (with a copula), a twofold connexion between subject and predicate is possible:

a) The copula (i. e. the auxiliary verbs 'to be', 'to become') may agree with the subject in gender and number, though the substantive as predicate may be of another gender and number; e. g.

که سینه می سړه چاک کړی و به وږې

چه می ستا له غم وږې درست چکر دی

If thou tearest asunder my breast, thou wilt see, that all my heart is blood (Pl.) out of grief for thee. Xush'āl (Gulsh. II, p. 64, 1).

b) The copula may agree with the predicate in gender and number (and not with the subject); this is generally the case in Paštō; e. g.

یار د تل اوسې خندان خاموشی د یار خزان دی

The (fem.) friend should always be laughing; the silence of the friend is (like) autumn. Ah'mad Shāh (Gulsh. II, p. 210, 3).

چِه کُوی نَکَرِی بُی نَبِی دِ لَه خِیَالَ

اؤس لَه خَارَرِ سَرَه خَارِی شِرِ کَمِین

They, who had put on out of fancy crooked turbans, have now become mean dust with dust. *Xavājah Muhammad* (Gulsh. II, p. 116, 2).

بَنُکُوی بَشَرِی بُی حُمو دِ رَه آرمانِ شو

Their fair faces became the objects of desire of our heart.  
Idem (Gulsh. II, p. 117, 3).

§. 209.

Enlargement of the simple sentence by a  
near and remote object.

1) When the predicate is a verb, it may according to its signification subordinate a near (Accusative) or remote object (Dative) or both at the same time. Intransitive verbs can only subordinate a remote object, transitive and causal a near and remote object. Some transitive and causal verbs may subordinate a double Accusative, one denoting the near object and the other the predicate, but only in the Imperative, the Present, the Subjunctive of the Present and the Future; e. g.

تَمَاشَا دِ کُلُشِنِ خَه کَوَمِ بِي تَا بِاسْمِینِ وَ سَمَنِ خَه کَوَمِ بِي تَا

What shall I make\*) the sight of the rose-garden without thee? the jasmin and lily what shall I make without thee? *H'amīd* (Gulsh. II, p. 77, 4).

Such verbs, which govern a double Accusative, are: to make, to create, to elect, to call, etc.

As regards the position of the near and remote object in the sentence, it is to be observed, that the subject (when expressed by a substantive or pronoun) is usually followed by the near object (Accusative), to which the remote object (Dative) succeeds, the verb as predicate closing the sentence. But in this respect much liberty prevails, one or the other member of the sentence being placed before or after the other, as it may be considered of greater importance. — The near and remote object may of course be again nearer defined by an attribute.

\*) I. e. what shall I do with,

بَادِشَاهُ خَيْلِ رَاژ دِ وَر تَه نَه وَآئِي .

The king should not tell his secret to them. *Kalilah & Damanah* (Gulsh. I, p. 105).

دِ نَذِيَا دَرْتِ چِه مَخْ گَا رِ سِرِي تَه خَلَقِي وَر سَرِه گَانِدِ يَارَتِي بَهَرِي

When the wealth of the world turns its face to a man, the people make many friendships with him. *Gulistān* (Gulsh. I, p. 171).

2) In transitive and causal verbs the active construction is exchanged for the passive in the Imperfect, Aorist, Perfect, Pluperfect and Past Future, the participle, with which these tenses are compounded, having a passive signification. The remote object (Dative) is thereby not affected, but the near object (Accusative) is made the subject of the sentence and the proper subject must be put in the Instrumental (as the agent) being thus made a nearer definition of the verb as predicate. It is understood, that the verb (participle) must agree in number and gender with the subject.

رَاحَتِ بِي زَحْمَتِ تَه دَقِي چَا مُونَدَلِي

By none tranquillity has been found without pain = none has found tranquillity without pain. *Rah'mān* (Gulsh. II, p. 26, 2).

But now and then the impersonal construction of the Hindī is imitated, the verb remaining in the masculine Singular (as in the neuter) and the Nominative (properly the subject) being put in the Dative (with the postfix تَه etc.).

خَوَاهِيَشِ تَبِي وَر سَرِه نِ صُحْبَتِ وَشَه دِه هَغِه حَالِ كَبِي چِه دِي مَسْتِ وَ

وِينَجِي حَانَ تَه تَه پَرِيئُونِ مَنَعِ تَبِي وَ كَرِه

He wished to cohabit with her in that state, when he was drunk; the slave-girl did not give herself up (and) refused (him)\*. *Gulistān* (Gulsh. I, p. 185).

Also intransitive verbs are now and then constructed passively in the past tenses, if their signification borders on the Passive.

---

\*) The Hindī would be: उस ने आप् को नहीं छोड़ दिया.

وَسَه دِيرِ حَلَه خَیَلِ حَانَ مَرَوَانَه شَمِعِ

هَيْتِجِ بُیِ زَدَه نَه کَمَه حَمِيدَه سَوَلِ حَمَا

Many times its own self was burnt by the moth by means of the candle; it did not at all take to heart, o H'amid, my burning\*). H'amid (Gulsh. II, p. 77, 2).

§. 210.

Enlargement of the simple sentence by a nearer definition of the verb as predicate.

The verb also may in Paştō be nearer defined in different ways: by cases (Nominative of time, place, Instrumental of means, etc.), by prepositions and postpositions with nouns, by adverbs of time, place etc., just as in any Latin or Greek sentence.

بِیَوَه وَرَخِ اَحَمَفِ خَارَبَه نَه يَه جَدَلِ کَبِي

وَنَکِرِ دَا رَنَکَه دَنَکِرِ هَوِشَبَارِ مَقَالِ

One day a clever lean (man) addressed in a dispute in this way a speech to a fat fool. Gulistān (Gulsh. I, p. 155).

In this sentence the verb as predicate (وَنَکِرِ) is nearer defined by: بِيَوَه وَرَخِ, one day (Nominative of time), further by: نَه جَدَلِ, in a dispute (noun with a preposition), by the adverbial expression دَا رَنَکَه, in this manner, thus, and by: دَنَکِرِ هَوِشَبَارِ, by a clever lean (man), the agent and logically the subject of the sentence.

§. 211.

## II. The compound sentence.

Two or more sentences may so be joined together that a compound sentence is thereby made up. This is done either by way of coordination or of subordination.

\*) The proper translation would run thus: the moth has burnt itself—by the candle. — مَرَوَانَه is masc.

### A. Coordination of sentences.

Two or more sentences may be so joined together, that every sentence remains independent of the other. The coordination may be either loose or be made up by coordinative conjunctions (cf. §. 175).

د مغل زر بی خورل هه طرف د سپاهي ور سره در

They ate the gold of the Mughals, they were with them in the form of non-combatants\*). Tārīḫ-i murassas (Gulsh. I, p. 52).

جنگونه بی و کړل اما په هر جنگه شنواری بری وگر

They fought battles, but in every battle the Shinvāris got the victory. Ibid. (Gulsh. I, p. 52).

یا هغه بختانه نور و د هغه نور شول

یا د خدای دق اوس هسی فرمان

Either those were other Afghāns (and) these (present) have become others, or such is now the order of God. Xushāl (Gulsh. II, p. 51, 3).

#### §. 212.

### Contraction of coordinate sentences into one.

When two or more sentences have either the same subject or the same predicate or the same near or remote object, or have any other member of the sentence in common, they are usually contracted into one sentence with or without coordinative conjunctions.

خلعت او نعمت بی ور ته عنایت کړه.

He bestowed on him a dress of honour and wealth. Gulistān (Gulsh. I, p. 178).

---

\*) سپاهی, the shade (scil. د لښکر, of the army) = non-combatants.

نَهْ مُدَامَ يَهْ سَرِي غَمِ وَيِ نَهْ بَهَادِي يَهْ قَرَنَمَكِه

Man has neither always grief nor in every moment joy.  
H'amid (Gulsh. II, p. 93, 3).

§. 213.

Concord of the subject and predicate in a contracted sentence.

1) When in a contracted sentence the subject consists of several nouns, the predicate is usually put in the Plural, but it may also remain in the Singular, when the nouns are in the Singular. When the subject consists of nouns partly in the Singular, partly in the Plural, the predicate is only rarely put in the Singular. When the several nouns constituting the subject have the same gender, the predicate agrees with it, but when they differ in gender, the Masculine has, as a rule, the preference; but the predicate may also agree with the gender of the last noun, especially when the several nouns are in the Singular, or it may follow the gender of the most important noun or nouns.

اَمَانَتِ دِيَانَتِ بِي وَرَ مَعْلُومِ شَوْل

His faithfulness (and) conscientiousness became known to him. Gulistān (Gulsh. I, p. 170).

مَالِ وَ مِلْكِه مَانَرِي بِي وَ سِيَارِلِ يَهْ نَوْرِ

Wealth and property (and) houses they intrusted to others.  
Āraf ḡān (Gulsh. II, p. 158, 3).

لَاسِ (\*) پَهِي كِرِي زَرَكِي سَرِي يَهْ قَهَقِه خَانِدِي

Hands and feet were made red by the partridge; it laughs with loud laughter. Xūsh'āl (Gulsh. II, p. 76, 8).

تَنْجِ اَوْ خَرَانِه مِي دَا حَايِ تَنْنِ كَرِي تَهْ

The hoard and treasure has been buried by me in this place.  
Kalīlah o Damanah (Gulsh. I, p. 86).

---

\*) لَاسِ وَ — لَاسِ, the conjunction وَ being occasionally shortened to u; لَاسِ is also used as a collective noun.

يَوَّهْ شَخْصْ تَوْرَهْ أَوْ جَارَهْ أَوْ كُتَيِّ دَ أَحْدَادِ مُظْفَرِ خَانَ تَهْ رَاوَرَهْ\*)

One man brought the sword and knife and rings of Al'dād to Muḍaffar ḡān. Tārīḡ-i murassas (Gulsh. I, p. 33).

2) When in a contracted sentence the subject consists of a pronoun of the I., II. and III. person, the verb as predicate is put in the I. person Plural; but when the subject is a pronoun of the II. and III. person, the verb is put in the II. person Plural.

عَاشِقِي لَا زَهْ تَهْ دُرُ جِهْ يَبْدَا وَهْ

Love was created, when I and thou were not yet. Xush'āl (Gulsh. II, p. 64, 1).

جِهْ دِ زَهْ أَوْ رَقِيبِ سَمِ كُورُو وَ مَنَحْ تَهْ

When I and the rival look straight into thy face. H'amīd (Gulsh. II, p. 101, 2).

#### §. 214.

### B. Subordination of sentences.

Two or more sentences may so be joined together, that one becomes subordinate to the other. A dependent sentence may be subordinated to the main sentence in two ways:

1) by subordinative conjunctions (§. 176).

2) by the relative چه and relative particles.

It is not to be lost sight of, that also dependent sentences may in their turn be either coordinated or subordinated to each other. The main and dependent sentence may also be contracted into a simple sentence by omitting the predicate in the dependent sentence, as: خُدَايِ دِ هِيَخْوُوكِ خَوَارِ تَهْ كَا لَكَهْ مَا, may God not make any one wretched like me (= as he makes me wretched).

---

\*) In this sentence تَوْرَهْ and جَارَهْ are considered the most important subjects and the predicate (رَاوَرَهْ) therefore agrees with their gender.

§. 215.

1) Subordination of a sentence by subordinative conjunctions.

All subordinative conjunctions are in Paṣtō constructed with the Indicative, only the final conjunction چه, in order that, requires the Subjunctive (of the Present, Perfect, Plup.), partly also the Optative (of the Imperfect, Plup.), and more rarely the habitual Imperfect (§. 197, b). Also the consecutive conjunction چه, that, so that, requires the Subjunctive after certain verbs, as: to command, to ask, to require etc., and after بَوَیْدَ, it is necessary, حَایِ لَری, it is becoming, and similar expressions the Subjunctive is also in use. (cf. 194, c).

حَایِ لَری کِه بَوَیْدَتی کَانَ بِدِ خَارَوَرُو خَنِسِ کَرَمِ  
چِه مِی بِس لَه مَرَمِ حَایِ دَقِ یَوِ مَنَکِ

It is becoming, that I bury myself in the dust whilst living, as after death my place is a pit \*). Rah'mān (Gulsh. II, p. 21, 2).

چِه کَرَمِ لَه دِی لَه خُدَایَه فَتَحِ نِشْتَه  
کِه أَفْزُونِ شِی تَرِ مَلَخِ سِپَاهِ دِ چَا

When there is no favour from God, there is no victory, though the army of some one may be more numerous than locusts. Xušh'āl (Gulsh. II, p. 34, 3).

As however the subordination of a sentence by a conditional particle admits of many varieties and is of great importance, we must separately treat of it.

---

\*) In this sentence another sentence is again subordinated to the dependent one by the relative particle چه, 'as'. کَرَمِ is the Subjunctive dependent on: حَایِ لَری.

Conditional sentences\*).

In conditional sentences the dependent part, headed by the conditional conjunction *كَه* *kah*, if, may either precede the main sentence or follow it. As to the formation of a conditional sentence the following particulars are to be observed:

When the condition and that, which is conditioned thereby, is to be represented as positive and certain, the Indicative is used in the main and dependent part of the sentence; but if the condition and its consequence is to be represented as uncertain or doubtful or as a subjective opinion only, the Subjunctive is used in both parts of the sentence; but the mood may vary in the main and dependent part, according to the degree of certainty, which is to be expressed. In the main sentence the Imperative may also occur under certain circumstances.

زَ رَحْمَانَ هِي خَيْلَه يَارَه نَوْرُ كَه نَه غَوَارِم  
كَه قَبُولَه شَيِ (\*\* دَ خُدَايَ هَه دَر نَحَا حَمَا

I Rahmān do not desire any thing else besides my friend, if my prayer be accepted at the gate of God.

Rah'mān (Gulsh. II, p. 4, 1).

كَه تَمَام جَهَانَ هَه خَيْلَه كَيْدَه وَخُورِي  
يَاں هَه نَه شَيِ هَه دَرُوں آو هَه نَحَا

\*) What is said here about conditional sentences refers equally to such sentences, which are not strictly conditional according to their form, but according to their meaning. This is the case, when in the dependent sentence an indefinite pronoun is used (instead of the conditional conjunction *كَه*), e. g.: Whatever I would say, would vex him = if I would say any thing, it would vex him.

\*\*) *قَبُولَه شَيِ* may be, according to its form, the Indicative or Subjunctive; here it is likely the Indicative.

If thou eat up the whole world in thy belly, thou wilt not be remembered with benediction and prayer.

Rahīmān (Gulsh. II, p. 6).

کَمَ دِیدَنِ دَ چَا خَوَنِ وِی دَر تَه کَوَرَه

If the sight of any body be agreeable to thee, look at him!

Ibid. (Gulsh. II, p. 6).

In lively sentences, when the condition and its consequence is represented as accomplished already, the Aorist is used in both parts of the sentence with the sense of the Present. (§. 199, c).

سَرَقِ دَر تَه ځِه تَلَوَارَ وَاسْتَوَه کَه تَن صَبَا رَا دَوَتَل بَهتر کَه نَه مَرِه شَوَل

Send quickly a man to them: if they come out to me (if they have come out) this morning, it is better, if not, they are dead (they have become dead).

Tārīx-i murassai (Gulsh. I, p. 31).

In a similar way the condition is anticipated as accomplished already (in the sense of a Past Future) in such sentences, where the consequence of the condition is predicated as future.

کَه مِی اِنَار وَلِيْدَه چِه دَا دَوِي زَرَه بَه بَهَارِ شِي ځِه زَرِه تَلَوَن

If I have (= will have) seen my friend, that he is here, (my) heart will become a spring with yellow roses.

Ah'mad Shāh (Gulsh. II, p. 208, 2).

نَاغَمَوَارَتِي بَه هَرَكِز دَر ځِيښِي نَه شِي

کَه ځِه خِيَلَه اَنَدِيښَه سَرَقِ قَمَوَارَه

Improprieties will never happen to him, if a man will have been (has been) proper in his own thought.

Xush'al (Gulsh. II, p. 58, 1).

2) When the condition and that which is conditioned thereby, is to be represented as such, that it could happen under certain circumstances, but does not happen in reality, because the condition is not fulfilled, the Conditional of the Imperfect is usually employed in the dependent sentence and in the main sentence the Habitual Imperfect. (See also sub 4).

که بیدا نه رای دیدن بیلتون به مرده\*)

له دیدن خون بهیری دروغ دروغ

If there would be no meeting, separation would be dead; on account of meeting the blood flows, alas, alas!

Ah'mad Shāh (Gulsh. II, p. 207, 1).

In poetry the simple Aorist is sometimes used instead of the Habitual Aorist *بِهَ وَهَ* etc.; e. g.

که د یار د هجر غم را باند نه رو

را ته سهل وه سربو د زندان اور

If the grief about the separation from the friend would not press upon me, the fire of the prison would be easy to me, o men!

Asraf Khān (Gulsh. II, p. 156, 2).

د غنچه خندا محال وه به چمن کبھی

که نسیم هر نگار ند کوی هر صبا

The laughing of the rose-bud would be impossible in the garden, if not every morning the zephyr would pass over it.

Xuśh'āl (Gulsh. II, p. 33, 1).

The Conditional of the Imperfect may also be used as well in the main as in the dependent sentence; e. g.

غم خو ستا د رسوائی کرم نه د سر کرم

که می دا اندهینه نه وی تا کتی

I grieve indeed for thy shame, not about (my) head; if I had not this anxiety, thou wouldst see (what I would do).

Xuśh'āl (Gulsh. II, p. 62, 2).

3) When the condition and that, which is conditioned thereby, is represented as such, that it could have happened under certain circumstances, but has in reality not happened, because the

---

\*) *بِهَ وَهَ* the habitual Aorist, because this auxiliary is not possessed of an Imperfect; see §. 200.

condition has not been fulfilled, the Subjunctive of the Pluperfect or the Habitual Imperfect is used in the main sentence, and the Conditional of the Pluperfect or the Subjunctive of the Pluperfect in the dependent sentence, or the Conditional of the Pluperfect may be used in both parts of the sentence, when the main sentence contains a dependent sentence at the same time, subordinated by the conjunction چه, which in such a conjuncture requires the Conditional mood (§. 205, 6).

نَدَمُوهُ شَبَدِ بِي تَاخِيرِ كَرِي دِي مَا بَه بَهَا نَ وَنَبْخِي دَرَجَنَدَه  
دَر كَرِي دَه

If he had delayed it one night, I would have given him double the price of the slave-girl. Gulistān (Gulsh. I, p. 186).

بِه نَارُو بَه مِي پِيدَارِ كَرِ كِه خُوبِ دَرِي دِي  
بَارِ دِيحِ رَا تَه اَوْتَه شَه دِلْزَا حَمَا

I would have awakened him by my cries, if he had been overcome by sleep; being quite awake my heart-ravisher became sleepy towards me. Rah'mān (Gulsh. II, p. 4, 1).

كِه پَرُوهِدَلِي بَه تَاَسُو رَتِي چِه خَه دِي هَفَه — بَه نَه كَرْمُو بَانِدِ  
بِه تَاَسِي حُكَم نَه كَاوَه

If you had understood, what this is — you would not have passed judgement on the innocent. Matth. 12, 7.

كِه تَا قَم دَا قَهْسِي لِيَدَلِي دِي لَكِه مَا لِيَدَلِي دِي شَايَدِ \*) چِه صَحْرَا  
دِ قَم نَ دِهْوَلَه غَم پَرُوِيَنِي دِي

---

\*) The main sentence is here شَايَدِ, it is possible, which by means of the conjunction چه subordinates the following sentence, in

If thou hadst seen such (things), as I have seen, perhaps you also would have left the desert out of grief about them.

Kalīlah ō Damanah (Dorn, Chrest. p. 10).

4) As in Persian the Conditional of the Imperfect is often used in Paṣtō in the sense of the Conditional of the Pluperfect, which must be gathered from the context. The Conditional of the Imperfect may either be used in both parts of the sentence, or the Habitual Imperfect may be used in the main sentence and the Conditional of the Imperfect in the dependent sentence.

که چه ما دی خه اثر کولی وعظ تا ناصح را نه قاله ویلی وعظ

If thy admonition had made any impression on me, thou, o adviser, wouldst then have told me admonition.

H'amīd (Gulsh. II, p. 90, 2).

چه خه می ویلی مالتبی می د ده نه فرقرار دورویلی

Whatever I would have said, I would have sprinkled salt on his wound. Gulistān (Gulsh. I, p. 171).

د طالب د مطلوب راز به ما در و بنو

که نه نه وای خبردار نه دی وواج

I would have shown to thee the secret of the seeker and the sought, if thou hadst not been aware of this custom.

Rah'mān (Gulsh. II, p. 13, 3).

#### §. 217.

#### Elliptical conditional sentences.

The Paṣtō uses also elliptical conditional sentences, the main sentence of which must be supplied from the context.

1) When the conjunction *که* is connected with the Subjunctive of the Present, an optative sentence is formed,

which the Conditional of the Pluperfect is required, corresponding to the Conditional of the Pluperfect, used in the dependent sentence headed by *که*, if.

to which must be properly supplied: it is good or something like it. By the Subjunctive Present the desire or wish is predicated as possible.

زَهْ خَوَاجَه مُعَمَّد دِ هِرَوْت يَمَ بَه دَرَبَارِ كَبِي  
مِيَّانِ صَاحِبِ كَه مِي وَنِيسِي تَر لَاسَ

I Xavājah Muh'ammad have fallen down at thy court; o Lord, if thou take me by the hand (supply: it is good = please take me by the hand!). Xavājah Muh'ammad (Gulsh. II, p. 112, 1).

2) When the conjunction *که* is connected with the Conditional of the Imperfect, it is hinted thereby, that the desire or wish is looked upon as impossible.

مَرْتَبَه كَه سَتَا دَ عِشَقِ كَرَمِ وَرِ خَرَكَنْدَه  
مَلَائِكِ بَه وَارَهِ وَائِي كَه بَشَرِ دِي

When I make known to them the degree of thy love, all angels will say: if we (only) would be men!

Rah'mān (Gulsh. II, p. 27, 2).

The dependent sentence may also, vice versa, be wanting; in such cases the condition is to be gathered from the context. Or the dependent sentence may be replaced by an Anakoluthon, which contains, logically, the condition. In such (main) sentences the Habitual Imperfect is used, sometimes also the Habitual Aorist.

مَا بَه سَازِ دَ سَرِ قَدَمِ كَرِ سَتَا وَ لُورَتَه مِي بَه يَمِ كَرِ  
مَا بَه سَتَرِ كِي كَرِي نَعْلِي تَلَمَ بَه زَه رَاسِ بَه عَيْنِ

I would (willingly) make of my head the sole of the foot, I would make an ocean to thy daughter.

I would make my eyes shoes, I would go on my head and eye (supply: if it was possible for me to leave my place).

Yusuf and Zulaikā (Dorn, Chrest. p. 202).

دَو زَمَانِ بَه هِجِرِي تِيرِ بَه دَكْنِ تَه كَرِ  
دَوْرَانِ كَلَه بَه وَنَا خِيَلَه رَضَا كَا

The exiled would have never passed a moment in the Dekhan — but when does fate assent to one's word? (= if fate would assent to one's word). *Aṣraf ḡān* (*Gulsh.* II, p. 158, 1).

نَندَارِجِيَانُو بَه بُی شَرَح نَ مَخ وَ کَرِه

تَکْخِير وَر تَه آوَار نَ لَا تَقُل کَا

The spectators would have made a description of (her) face — amazement called out to them: do not speak!

ʿAbd-ul-Qādir ḡān (*Gulsh.* II, p. 190, 1).

§. 218.

2) Subordination of a sentence by the relative pronoun and relative adverbs.

Relatively dependent sentences are formed by the relative pronoun *چه*, which refers to the noun of another sentence, or by relative adverbs, which are usually in correlation with another adverb.

بِت پَرَسْت وَا بُی حَمِيد وَ هَعَه کَس تَه

چه بَمَذِکِي کَوِي نَ خُدَايِ بَه رُوِي رِقَا کَبِي

H'amīd calls him an idolater, who serves God with the face and hypocrisy.. H'amīd (*Gulsh.* II, p. 88, 2).

کَه بَار غَوَاپِي هُنَبَرَه زَارَه غُو چه تَر شِي حَمِيدَه

If thou wilt have (thy) friend, wail so long till he come to thee, o H'amīd! H'amīd (*Gulsh.* II, p. 89, 2).

§. 219.

Abbreviation of subordinate sentences.

A subordinate sentence may be abbreviated by the construction with the Nominative absolute (§. 181, 2, sqq.). In this case the subordinative conjunction is left out and the sentence is loosely

subordinated to the main sentence, the subject (or agent, who may be expressed in the Instrumental) being always identical with the subject (or agent) of the main sentence.

خَاخَرُ غَوِيَنَه بِي هِه مَنَكِلِ كِهِي نِيوَلِي هِه نِيوَدِي دَ بَوِي دَنِي بِي  
بَرَوَارِ كَاوَه

Having taken a little flesh in its bill it flew about in the vicinity of a tree. *Kalilah o Damanah* (Gulsh. I, p. 87).

§. 220.

The direct oration.

The *Pajtō* knows no *oratio obliqua* and does therefore not subordinate such sentences, as the Latin, but renders with primitive simplicity the words, as they were spoken (in a direct oration). These words are always introduced by the particle چه (like the Greek *ὅτι* and the Persian *که*) without being subordinated thereby to the main sentence, and this چه is therefore in such cases only a sign of a following direct oration and is not to be translated.

هِه عَرَضِ بِي دُرَسَوَلِ چِه كِه مَنَصَبِ زِه يَوَاخِي وَ اَخْلَمِ دَا نَوَرِ قَوْمِ هِه رَا  
سَرَه حَسَدِ وَ تَا

He respectfully rejoined: if I alone take this dignity, these my other countrymen will envy me.

*Tārīx-i murassas* (Gulsh. I, p. 43).

فَرَمُو شَاهَزَادَه چَا وَ بِيَتِيَدِه چِه دَ دِلَارِ دَ وَ زِيَرَانُو خُتَا دَ غِه خُطَا  
وَلِيَدِه چِه دَ وَ تَرَلِ

Somebody asked the Prince Hurmuz: what fault hast thou seen in the *vazīrs* of (thy) father, that thou hast imprisoned them?  
*Gulistān* (Gulsh. I, p. 162).

§. 221.

Interrogatory sentences.

It is evident from the preceding paragraph, that in Paṣtō only direct interrogations are in use. The question itself is generally not pointed out by interrogatory particles, but only by the voice of the speaker; sometimes *خه* is employed as interrogatory particle, after the precedent of the Hindī (*किया*), which need not be translated. The double interrogation (whether — or) is expressed by: *هه, که — که, خه*, but in the first member *خه* or *که* is often dropped.

آر ویدلی د نه دی چه حکیمانؤ وېلی دی

Hast thou not heard, that the wise have said?

Gulistān (Gulsh. I, p. 169).

خه د غم ولؤ نؤی چه حما هه سترکو هرهووت

نه وېتم هه سترکو حقیقت واره مبین

Is it the veil of grief, that has fallen on my eyes? I do not see the whole clear truth. *Xuṣṣ'āl* (Gulsh. II, p. 52, 3).

هه دهن کبې د غاښونه بجله کا

یا عوړې هه غنچه کبې د شبنم دی

Are in thy mouth thy teeth glittering, or are they drops of dew on the rose-bud? *Rah'mān* (Gulsh. II, p. 29, 1).

§. 222.

Ellipsis.

An ellipsis is frequently met with in Paṣtō, especially in poetry. It is very common, that in interjectional sentences (especially in asseverations and imprecations) the verb 'to be' is left out, as: *ستا هه سر* (supply: *هؤ*), by thy head (I swear).

نه بلوچ نه فزاره واره چركين دى

نه بى دين نه بى مذهب ستر بى فاش

Whether Balūch or Hazārah, all are dirty, they have neither faith nor religion; may their privities be disclosed! \*).

Xuṣṣ'āl (Gulsh. II, p. 46, 3).

Besides this we meet with some kinds of Aposiopesis (reticence), the most common of which we will point out in the following quotations.

قر خوك چه نه دى فاي نفس وابستكي كا

نه به شى تېرې به زلخېر سړه قوا

Whoever depends on this transitory breath, (he shall know that) the wind (breath) will not be bound with a chain.

Rah'mān (Gulsh. II, p. 5, 2).

نه دوه پياله نه ميو نه د درست جهان خراج

زه او منى اى محتسب نه مې خونه شى تاراج

Not a cup of wine — not the tribute of the whole world. I and the wine, o censor! though my house be plundered. (I. e. A cup of wine is not to be compared or exchanged for the tribute of the whole world. I and the wine are inseparable etc.).

نه دوه پته لائق فرزند د پلار به خونه

نه د سړو د سپينو گنج نه به كور

Not a good worthy child in the house of the father — not a treasure of gold and silver in his house (= a good child is not to be compared with — or is far superior to —).

د صبا بانكه د ملا وهل د زاهد كه هغه كور وهل به جست و جو د بل

خاي شه

The cry of the morning (= the crowing of the cock), the call of the Mullā (from the minūrah), the issuing of the ascetic from that house (was one and the same), he went in search of another place. Kalīlah o Damanah (Gulsh. I, p. 111).

\* Supply here: دى; this is a common Afghān imprecation.

## Appendix I

### The Calendar of the Afghāns.

The Afghāns reckon by lunar years according to the common muh'ammadan calendar. The names which they give to the months of the year differ from the Arabian nomenclature, wherefore we have put down the Paṣtō and the corresponding Arabic appellations of the months.

Paṣtō.	days.
حَسَن حُسَيْن h'asan h'usain . . . . .	30
صَفَر safarah . . . . .	29
وَرَنْبَتِي خُور*) vrambāī xōr . . . . .	30
دَوَیَمَه خُور dvayamāh xōr . . . . .	30
دِرَیَمَه خُور dreyamāh xōr . . . . .	30
خَلَوَرَمَه خُور ḫalōramāh xōr . . . . .	29
دَ خُدایِ مِیاشَت da xudāe miāšt**) . . . . .	30
شَوِ قَدَر***) šō qadr { . . . . .	29
بَرَات barāt {	
رَوَژ rōžāh . . . . .	30
وَرُکایِ آختر vṛūkai axtar . . . . .	29
مِیَانَه miānāh . . . . .	30
لَوِ آختر lōe axtar . . . . .	29

\*) Literally: the first sister.

\*\*) Literally: the month of God.

\*\*\*) Also: شَوِ دَ بَرَاتِ مِیاشَت or: دَ شَوِ قَدَرِ مِیاشَت is assimilated from شَبِ night, therefore شَوِ قَدَر = Pers. شَبِ قَدَر.

Arabic.	days.
مُحَرَّم muh'arram . . . . .	30
صَفَر safar . . . . .	29
رَبِيعُ الْأَوَّلِ rabī'u-l-avval . . . . .	30
رَبِيعُ الثَّانِي rabī'u-ṭ-ṭhānī . . . . .	30
جُمَادَى الْأَوَّلِ jumāda-l-avval . . . . .	30
جُمَادَى الثَّانِي jumāda-ṭ-ṭhānī . . . . .	29
رَجَب rajab . . . . .	30
شَعْبَان sha'bān . . . . .	29
رَمَضَانَ ramazān . . . . .	30
شَوَّال shawwāl . . . . .	29
ذِي الْقَعْدَةِ ḏī-l-qasḏāh . . . . .	30
ذِي الْحِجَّةِ ḏī-l-h'ijjāh . . . . .	29

In the eastern parts of Afghānistān, which border on India, the Indian appellations of the months are frequently used. These are solar months; their names are:

Pāṣṭō.	Hindī.
بَیْسَک, وِسَک baysāk, visāk, April-May*).	बैसाख baysākḥ.
جَیْت jēt . . . . .	जेठ jēṭh.
هَآر, آر hār, ār . . . . .	असाढ़ asāṛh.

\*) Properly from the middle of April to the middle of May.

سَافَر sāvān.	} July-August.	सावन् sāvān (आवण).
وَشَكَّال pašakāl*)		
بَادِرُو bādrō . . .	August-September.	भादेां bhādō (भाद्र).
آسُو asū . . .	September-October.	आसिन् āsin.
كَتَاكَ katak . . .	October-November.	कातिक kātik.
مَغار magar**) . . .	November-December.	अघन aghan (आयहायण).
پَوَّه pōh . . .	December-January.	पौष paūṣ (पूस्).
مَاه māh . . .	January-February.	माघ māgh.
پَاغَان pagān . . .	February-March.	फागुन phāgun.
چَيْتَر čētār . . .	March-April.	चैत्र čaitr (चैत).

For the days of the week the Persian appellations are in use in Western Afghānistān, as: شنبه šambeh, Saturday, يك شنبه yak šambeh, Sunday etc., but in Eastern Afghānistān the following names, partly taken from the Hindī, are current:

Pāṣṭō:	Persian:
خَالِي xālī, Saturday.	شنبه šambeh.
اِتَبَار, اِتْوَار itbār, itvār, Sunday.	يك شنبه yak šambeh.
گل, پير gul, pīr, Monday.	دو شنبه dō šambeh.
نَه nabāh, Tuesday.	سه شنبه seh šumbeh.
چار شنبه čar šambeh, Wednesday.	چهار شنبه čahār šambeh.

\*) وَشَكَّال = वर्षकाल, the rainy season, rain falling in the Panjāb chiefly in July-August.

\*\*) Sindhī: मंघिरु manghiru, Panjābī: मंघर (मार्गेशिर).

پانښتېه pānšambēh	}	Thursday. پانچ شنبه pañj šambēh.
د زیارت ورځ da ziārat vraḡ		
جمعه Jumšāh, Friday.		جمعه Jumšāh.

The names of the different seasons are: سپرلي sparlai, spring (or پسرلي psarlai), comprising February, March and April; اړی ōrai, summer generally (consisting of دۍرې dūbai, hot weather, May and June, and وشکال pašakāl, rainy season, July-August); منی manai, autumn, (the latter half of August, September, October); زمی žimai, winter (November, December, January). This division of the seasons however can only be applied to the moderate hill-climate of Afghānistān.

## Appendix II.

### Survey of the conjugation of the Paṣto verbs.

#### I. The intransitive verb ending in ځl.

Infinitive: تښل tē-ā, to flee.

Imperative:

Sing. و تښه vó tē-ah, flee.

Plur. و تښئې vó tē-ai, flee ye.

A. From the Imperative are formed:

1) The Present.

Sing.

زَهْ تَهِّمُ zah t̤-am, I flee.

تَهْ تَهِّ-ē tah t̤-ē, thou fleest.

هَهْ تَهِّ-ī hayah t̤-ī, he, she flees.

Plur.

مُورُ تَهِّ-ū mūr t̤-ū, we flee.

تَهِّ-āī تَهِّ-āī tāse t̤-āī, you flee.

هَهْ تَهِّ-ī hayah t̤-ī, they flee.

2) The Subjunctive Present.

Sing.

زَهْ وَتَهِّمُ zah vō t̤-am, I may flee.

تَهْ وَتَهِّ-ē tah ǝ t̤-ē, thou mayst flee.

هَهْ وَتَهِّ-ī hayah vō t̤-ī, he, she may flee.

هَهْ دِ وَتَهِّ-ī hayah de vō t̤-ī, he, she should flee.

Plur.

مُورُ وَتَهِّ-ū mūr vō t̤-ū, we may flee.

تَهِّ-āī وَتَهِّ-āī tāse vō t̤-āī, you may flee.

هَهْ وَتَهِّ-ī hayah vō t̤-ī, they may flee.

هَهْ دِ وَتَهِّ-ī hayah de vō t̤-ī, they should flee.

3) The Future.

Sing.

زَ بَه وَتَجَم zah bah vō tǝ-am, I shall flee.

تَه تَه وَتَبِي tah bah vō tǝ-ē, thou wilt flee.

هَه بَه وَتَبِي hayah bah vō tǝ-l, he, she will flee.

Plur.

مُورَ بَه وَتَجَم mūr bah vō tǝ-ū, we shall flee.

تَاسِي بَه وَتَبِي tāse bah vō tǝ-ā, you will flee.

هَه بَه وَتَبِي hayah bah vō tǝ-l, they will flee.

B. From the participle praeterite are formed :

4) The Imperfect.

Sing.

زَ تَجَلَم zah tǝ-al-am, I fled.

تَه تَجَلَم tah tǝ-al-ē, thou fledst.

هَه تَجَلَم hayah tǝ, he fled.

هَه تَجَلَم hayah tǝ-al-āh, tǝ-āh, she fled.

Plur.

مُورَ تَجَلَم mūr tǝ-al-ū, we fled.

تَاسِي تَجَلَم tāse tǝ-al-ā, you fled.

هَه تَجَلَم hayah tǝ-ā, tǝ-āh, masc.

هَه تَجَلَم hayah tǝ-al-ē, tǝ-ē, fem.

} they fled

### 5) The Habitual Imperfect.

Sing.

زَهْ بَهْ تَبَلَمَ zah bah tǝ-al-am, I used to flee

etc. etc. (like the Imperfect).

### 6) The Conditional (Optative) of the Imperfect.

Sing. and Plur.

(تَبَلَي, تَبَلِي, تَبَلِي) (تَبِي, تَبِي, تَبِي)	{	زَهْ zah	{	tǝ-al-ai, tǝ-al-ē, tǝ-al-āē (tǝ-ai, tǝ-ē, tǝ-āē).
		تَه tah		
		هَاه hayah		
		مُو mu		
		تَاسِي tāse		
		هَاه hayah		

(If) I, thou, he, she, we, you, they would flee; or: would that I, thou, he, she, we, you, they would flee!

### 7) The Aorist.

Sing.

زَهْ وَ تَبَلَمَ zah vǝ tǝ-al-am, I fled.

etc. etc. (like the Imperfect).

### 8) The Habitual Aorist.

Sing.

زَهْ بَهْ وَ تَبَلَمَ zah bah vǝ tǝ-al-am, I used to flee.

etc. etc. (like the Imperfect).

C. With the participle perfect and the auxiliary 'to be' are formed:

9) The Perfect.

Sing.

يَم	تَبَلَى	tā-al-ai (m.), tā-al-e (f.)	yam, I have fled.
ثِي	”	”	” ē, thou hast fled.
دَي	تَبَلَى	tā-al-ai dai	he
دَه	تَبَلَى	tā-al-e dah	she

has fled.

Plur.

دَو	تَبَلَى	tā-al-I yū, we have fled.
ثِي	”	tā-al-I aī, you have fled.
دِي	”	tā-al-I dī, they have fled.

10) The Subjunctive of the Perfect.

Sing.

دَي	تَبَلَى	masc., he	may have fled.
	تَبَلَى	fem., she	

Plur.

دِي	تَبَلَى	tā-al-I vī, they may have fled.
-----	---------	---------------------------------

### 11) The Pluperfect.

Sing.

تَبَلَّى , تَبَلَّى t̤-al-ai (m.), t̤-al-e (f.) vum, I had fled.

دَى " " " " vë, thou hadst fled.

تَبَلَّى	t̤-al-ai	vuh, he	} had fled.
تَبَلَّى	t̤-al-e, vah, she		

Plur.

دَر تَبَلَّى t̤-al-i vū, we had fled.

دَرَى " " vai, you had fled.

دَر	"	"	vū (masc.)	} they had fled.
دَى	"	"	vë (fem.)	

### 12) The Subjunctive of the Pluperfect.

Sing.

بَه تَبَلَّى , تَبَلَّى bah t̤-al-ai (m.), t̤-al-e (f.) vum, I would have fled, etc. etc. (like the Pluperfect).

### 13) The Conditional (Optative) of the Pluperfect.

Sing.

تَبَلَّى , تَبَلَّى دَى , دَاي	{	زَ zah	{ t̤-al-ai, t̤-al-ë vai, vë, vāë
		تَ tah	
		هَ hayah	

(If) I, thou, he, she would have fled; or: would that I, thou, she had fled!

Plur.

تَبِيلِي دِي, دِي, دِي, دِي  $\left\{ \begin{array}{l} مُوُ mū \\ تَاسِي tāse \\ قَهْد hayah \end{array} \right\} t\check{e}-al-i\text{ }vai, v\check{e}, v\check{e}\check{e}.$

(If) we, you, they would have fled; or: would that we, you, they had fled!

#### 14) The Past Future.

Sing.

بِه تَبِيلِي, تَبِيلِي يَم bah t\check{e}-al-ai (m.), t\check{e}-al-e (f.) yam, I shall have fled.

ئِي " " " " " " \check{e}, thou wilt have fled.

دِي " " " " " " vī, he, she will have fled.

Plur.

بِه تَبِيلِي يُو bah t\check{e}-al-i yū, we shall have fled.

ئِي " " " " aī, you will have fled.

دِي " " " " vī, they will have fled.

## II. The intransitive verb ending in -ēd-al.

a) دَرَبَدَل dar-ēd-al, to stand, primit. verb.

b) زَرَبَدَل zar-ēd-al, to become old, derivat. verb. (زَدَر).

Imperative.

Sing.

a) وُ دَرِهَځِه vŏ dar-ēž-ah, stand!

b)  $\left. \begin{array}{l} \text{زځ} \text{ zŏr (masc.)} \\ \text{شه} \text{ zar-äh (fem.)} \end{array} \right\} \text{šah, become old!}$

Plur.

a) وُ دَرِهَځِه اِي vŏ 'dar-ēž-aī, stand ye!

b)  $\left. \begin{array}{l} \text{زاه} \text{ zārah (masc.)} \\ \text{شئي} \text{ zarš (fem.)} \end{array} \right\} \text{šaī, become ye old!}$

With the prohibitive particle مَه mah zar-ēž-ab, Plur.  
مَه زځِه اِي mah zar-ēž-aī, do not become old!

A. From the Imperative are formed:

1) The Present.

Sing.

a) زَه دَرِهَم (نَرَم) zah dar-ēž-am, (dar-am), I stand.

تَه دَرِه\_ه (دَر\_ه) tah dar-ēž-ē (dar-ē), thou standest.

هَه دَرِه\_ي (دَر\_ي) haṛah dar-ēž-ī (dar-ī), he, she stands.

Plur.

مُو دَرِه\_و (دَر\_و) mūž dar-ēž-ū (dar-ū), we stand.

تاسی دَرِی تاسی tāsē dar-ē-āī (dar-āī), you stand.

هَیاه دَرِی هَیاه hayah dar-ē-ī (dar-ī), they stand.

b)

Sing.

زَه زَرِی zah zar-ē-am, I become old.

etc. etc. (quite like زَرِی).

## 2) The Subjunctive Present.

a)

Sing.

زَه وَ دَرِی zah vō dar-ē-an, I may stand.

etc. etc. (like the Present).

b)

Sing.

شَم	{	زَه (m.) zah zōr	}	šam, I may become old.
		زَه (f.) " zar-āh		

شِی	{	تَه (m.) tah	}	šē, thou mayst become old.
		" (f.) " "		

شِی	{	هَیاه (m.) hayah	}	šī, he, she may become old.
		" (f.) " "		

شِی	{	هَیاه دَرِی (m.) hayah de zōr	}	šī, he, she should become old.
		دَرِی (f.) " de zar-āh		

Plur.

شَو	{	مُو زَرِی (m.) muž zārāh	}	šū, we may become old.
		زَرِی (f.) " zar-ē		

شِی	{	تاسی tāsē	}	šaī, you may become old.
		" " " "		

شی { " فَهَ hayah " } šī, they may become old.  
" " " " }

شی { فَهَ د زَارَ hayah de zārah } šī, they should become old.  
فَهَ د زَرَى " de zar-ē }

### 3) The Future.

a)

Sing.

زَ بَه دَرَبَرَم zah bah vō dar-ēž-am, I shall stand.

تَه بَه دَرَبَرَم tah bah vō dar-ēž-ē, thou wilt stand.

فَهَ بَه دَرَبَرَم hayah bah vō dar-ēž-ī, he, she will stand.

Plur.

مُزَ بَه دَرَبَرَم mūž bah vō dar-ēž-ū, we shall stand.

تَاسِی بَه دَرَبَرَم tāse bah vō dar-ēž-aī, you will stand.

فَهَ بَه دَرَبَرَم hayah bah vō dar-ēž-ī, they will stand.

b)

Sing.

شَ { زَ بَه زَر (m.) zah bah zōr } šam, I shall become old.  
زَ " " (f.) " " zar-āh }

شی { " " تَه (m.) tah " " } šē, thou wilt become old.  
" " " (f.) " " " }

شی { " " فَهَ (m.) hayah " " } šī, he, she will become ol  
" " " (f.) " " " }

Plur.

شُر	(m.) mūz bah zārah	} šū, we shall become old.
	(f.) " " zar-ē	
شَی	(m.) tāse " "	} šāī, you will become old.
	(f.) " " "	
شَی	(m.) hayah " "	} šī, they will become old.
	(f.) " " "	

B. From the participle preterite are formed:

4) The Imperfect.

a)

Sing.

زَ دَرِہَدَلَم, دَرِہَدَم	zah dar-ēd-al-am, dar-ēd-am, I stood.	} stood.
تَہ دَرِہَدَلِی, دَرِہَدِی	tah dar-ēd-al-ē, dar-ēd-ē, thou stoodst.	
حَہَ دَرِہَدَہ (m.) hayah dar-ēd-aḥ, he		
حَہَ دَرِہَدَلِہ (f.) hayah dar-ēd-al-āh, dar-ēd-āh, she		

Plur.

مُورَہَ دَرِہَدَلُو, دَرِہَدُو	mūz dar-ēd-al-ū, dar-ēd-ū, we stood.	} they stood.
تَاسَی دَرِہَدَلِی, دَرِہَدِی	tāse dar-ēd-al-āī, dar-ēd-āī, you stood.	
حَہَ دَرِہَدَل, دَرِہَدَہ (m.) hayah dar-ēd-al, dar-ēd-aḥ		
حَہَ دَرِہَدَلِی, دَرِہَدِی (f.) " dar-ēd-al-ē, dar-ēd-ē		

b) Sing.

ز زَہِدَکَم, زَہِدَکَم, زَہِدَکَم zah zar-ēd-al-am, zar-ēd-am, I became old.

etc. etc. (like زَہِدَکَم etc.).

### 5) The Habitual Imperfect.

a) Sing.

زَہِدَکَم, زَہِدَکَم, زَہِدَکَم zah bah dar-ēd-al-am, bah dar-ēd-am,

I used to stand; etc. etc. (like the Imperfect).

b) Sing.

زَہِدَکَم, زَہِدَکَم, زَہِدَکَم zah bah zar-ēd-al-am, bah zar-ēd-am,

I used to become old; etc. etc. (like the Imperfect).

### 6) The Conditional (Optative) of the Imperfect.

a)

زَہِدَکَم, زَہِدَکَم, زَہِدَکَم	$\left\{ \begin{array}{l} \text{زَہِدَکَم, زَہِدَکَم, زَہِدَکَم} \\ \text{hayah} \\ \text{mūz, tāsī, fāz} \\ \text{tāse, hayah} \end{array} \right\}$	dar-ēd-al-ai, dar-ēd-al-ē,
or		dar-ēd-al, dar-ēd-ē
زَہِدَکَم, زَہِدَکَم, زَہِدَکَم		

(If) I, thou, he, she, we, you, they would stand; or: would that I etc. would stand!

b) Sing.

زَہِدَکَم, زَہِدَکَم, زَہِدَکَم	$\left\{ \begin{array}{l} \text{zāh, tah, hayah} \\ \text{zar-āh} \end{array} \right\}$	šv-al-ai, šv-al-ē, šv-al-āē
or		šv-al, šv-ē, šv-āē
زَہِدَکَم, زَہِدَکَم, زَہِدَکَم		

\* Or زَہِدَکَم dar-ēd-al-āē, زَہِدَکَم dar-ēd-āē.

(If) I, thou, he, she would become old; or: would that I, thou, he, she would become old!

Plur.

etc. شَوَّهَ	{	مُور, تَاسِي, قَهَه زَارَه (m.) mūr, tāse, hayah zārah	{	āv-al-ai etc.
or				or
etc. شَوَّى	{	زَهِي " " " (f.) " " " zar-ē	{	āv-ai etc.

(If) we, you, they would become old; or: would that we, you, they would become old!

7) The Aorist

a)

Sing.

زَهِي وَدَرِيْدَم, وَدَرِيْدَم zah vō dar-ēd-al-am, vō dar-ēd-am,  
I stood; etc. etc. (like the Imperfect).

b)

Sing.

*) شَوَّم, شَوَّم	{	زَهِي (m.) zah zōr	{	āv-am, āv-al-am,
		زَهِي (f.) " zar-āh		I became old.
شَوَّى, شَوَّى	{	تَه (m.) tah "	{	āv-ē, āv-al-ē,
		" (f.) " "		thou becamest old.
شَوَّه, شَوَّه	{	هَاه (m.) hayah "	{	āh, he
		" (f.) " "		āh, āv-al-āh, she
				became old.

Plur.

شَوَّو, شَوَّو	{	مُور زَارَه (m.) mūr zārah	{	āv-ū, āv-al-ū,
		زَهِي (f.) " zar-ē		we became old.

\*) شَوَّم is not so much in use as شَوَّم.

شَوَيْتِي, شَوَيْتِي	$\left\{ \begin{array}{l} \text{” تَابَسِي (m.) tāsē ”} \\ \text{” ” (f.) ” ”} \end{array} \right\}$	$\left\{ \begin{array}{l} \text{šv-al, šv-al-al,} \\ \text{you became old.} \end{array} \right\}$
شَوُل, شَوُل, شَوُل		
شَوُل, شَوُل, شَوُل	$\left\{ \begin{array}{l} \text{” فَهَ (m.) hayah ”} \\ \text{” ” (f.) ” ”} \end{array} \right\}$	$\left\{ \begin{array}{l} \text{šv-ū, šv-gh,} \\ \text{šv-al} \\ \text{šv-ē, šv-al-ē} \end{array} \right\}$
شَوُل, شَوُل, شَوُل		

### 8) The Habitual Aorist.

a)

Sing.

زَ بَه وَدَرِيدَم, زَ بَه وَدَرِيدَم, zah bah vō dar-ēd-al-am, bah vō dar-ēd-am,  
I used to stand; etc. etc. (like the Imperfect).

b)

Sing.

زَ بَه زَوُر شَوَم, zah bah zōr šv-am, I used to become old.  
etc. etc. (like the Aorist).

C. With the participle perfect and the auxiliary „to be“  
are formed:

### 9) The Perfect.

a)

Sing.

زَ تَرِيدَتِي (*)	$\left\{ \begin{array}{l} \text{(m.) zah dar-ēd-al-ai} \\ \text{” (f.) ” dar-ēd-al-e} \end{array} \right\}$	$\left\{ \begin{array}{l} \text{yam, I have stood.} \end{array} \right\}$
تَرِيدَتِي		
تَ تَ (m.) tah	$\left\{ \begin{array}{l} \text{” ” (f.) ” ”} \end{array} \right\}$	$\left\{ \begin{array}{l} \text{ē, thou hast stood.} \end{array} \right\}$
تَ تَ (f.)		
دَ فَهَ (m.) hayah	$\left\{ \begin{array}{l} \text{” ” (f.) ” ”} \end{array} \right\}$	$\left\{ \begin{array}{l} \text{dai, he} \\ \text{dah, she} \end{array} \right\}$
دَ فَهَ (f.)		

\*) Or تَرِيدَتِي dar-ēd-ai, fem. تَرِيدَتِي dar-ēd-e, Plur. (com.) تَرِيدَتِي dar-ēd-l.

Plur.

مُور دَرِيدَنِي بُو	mūž dar-ēd-al-i yū,	we have stood.
تَاسِي „ نِي	tāse „ aI,	you have stood.
قَعَه „ دِي	hayah „ dI,	they have stood.

b) Sing.

نَم { زَر زَر شَوِي (m.) zah zōr šavai	yam, I have become old.
„ زَر شَوِي (f.) „ zar-āh šave	
تِي { „ „ تَه (m.) tah „ „	ē, thou hast become old.
„ „ „ (f.) „ „ „	
دِي { „ „ قَعَه (m.) hayah „ „	dai, he has become old.
دِه { „ „ „ (f.) „ „ „	

Plur.

يُر { مُور زَار شَوِي (m.) mūž zārah šavī	yū, we have become old.
„ زَار شَوِي (f.) „ zar-ē šavī	
تِي { „ „ تَاسِي (m.) tāse „ „	aI, you have become old.
„ „ „ (f.) „ „ „	
دِي { „ „ قَعَه (m.) hayah „ „	dI, they have become old.
„ „ „ (f.) „ „ „	

10) The Subjunctive of the Perfect.

a) Sing.

دِي { قَعَه دَرِيدَنِي (m.) hayah dar-ēd-al-ai	vI, he, she may have stood.
دِي { دَرِيدَنِي „ (f.) „ dar-ēd-al-e	

Plur.

هَيَاه دَرِـځـدِـاـلِـيَـيَ (m. f.), hayah dar-ēd-al-ī vī, they may have stood.

b) Sing.

هَيَاه زَوَر شَوِي (m.) hayah zōr šavai } vī, he, she may here  
هَيَاه زَوَر شَوِي (f.) " zar-āh šave } become old.

Plur.

هَيَاه زَوَر شَوِي (m.) hayah zōrah } šavī vī, they may have  
هَيَاه زَوَر شَوِي (f.) " zar-ē } become old.

11) The Pluperfect.

a) Sing.

زَه دَرِـځـدِـاـلِـاـيَ (m.) zah dar-ēd-al-ai } vum, I had stood.  
زَه دَرِـځـدِـاـلِـاـيَ (f.) " dar-ēd-al-e }  
etc. etc.

b) Sing.

زَه زَوَر شَوِي (m.) zah zōr šavai } vum, I had become old.  
زَه زَوَر شَوِي (f.) " zar-āh šave }  
etc. etc.

12) The Subjunctive of the Pluperfect.

a) Sing.

زَه بَه دَرِـځـدِـاـلِـاـيَ (m.) zah bah dar-ēd-al-ai } vum  
زَه دَرِـځـدِـاـلِـاـيَ (f.) " " dar-ēd-al-e }

I should have stood; etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ بَہ زوَر شَوِی} \text{ (m.) zah bah zōr šavai} \\ \text{زَ رَہ شَوِی} \text{ „ „ (f.) „ „ zar-āh šave} \end{array} \right\} \text{vum}$$

I should have become old; etc. etc.

### 13) The Conditional (Optative) of the Pluperfect

a) Sing.

$$\left. \begin{array}{l} \text{زَ دَرِیْدَنِی} \text{ (m.) zah dar-ēd-al-ai} \\ \text{وِی دِی, دَای} \left\{ \begin{array}{l} \text{دَرِیْدَنِی} \text{ „ „ (f.) „ dar-ēd-al-e} \end{array} \right. \end{array} \right\} \text{vai, vē, vāē}$$

(If) I would have stood; or: would that I had stood!  
etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ دَرِیْدَنِی} \text{ (m.) zah zōr šavai} \\ \text{وِی دِی, دَای} \left\{ \begin{array}{l} \text{زَ رَہ شَوِی} \text{ „ „ (f.) „ zar-āh šave} \end{array} \right. \end{array} \right\} \text{vai, vē, vāē,}$$

(If) I would have become old; or: would that I had become old! etc. etc.

### 14) The Past Future.

a) Sing.

$$\left. \begin{array}{l} \text{زَ بَہ دَرِیْدَنِی} \text{ (m.) zah bah dar-ēd-al-ai} \\ \text{یَم} \left\{ \begin{array}{l} \text{دَرِیْدَنِی} \text{ „ „ (f.) „ „ dar-ēd-al-e} \end{array} \right. \end{array} \right\} \text{yam,}$$

I shall have stood; etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ بَہ زوَر شَوِی} \text{ (m.) zah bah zōr šavai} \\ \text{یَم} \left\{ \begin{array}{l} \text{زَ رَہ شَوِی} \text{ „ „ (f.) „ „ zar-āh šave} \end{array} \right. \end{array} \right\} \text{yam, I shall have}$$

become old.

etc. etc.

### III. Transitive verb ending in al.

Infinitiv: شَرَلَ, šar-al, to eject.

Imperative.

Sing.

وَشَرَّهْ vő šar-ah, eject!

Plur.

وَشَرَّاهِ vő šar-aI, eject ye!

A. From the Imperative are formed:

#### 1) The Present.

Sing.

زَهْ شَرَّامْ zah šar-am\*), I eject.

تَهْ شَرَّاهْ tah šar-ē, thou ejectest.

هَاهْ شَرَّاهْ hayah šar-I, he, she ejects.

Plur.

مُوْزْ شَرَّاهْ mūz šar-ū, we eject.

تَاهْ شَرَّاهْ tāse šar-aI, you eject.

هَاهْ شَرَّاهْ hayah šar-I, they eject.

#### 2) The Subjunctive of the Present.

Sing.

زَهْ وَشَرَّامْ zah vő šar-am, I may eject (that I eject).

تَهْ وَشَرَّاهْ tah vő šar-ē, thou mayst eject.

---

\*) Or: شَرَّامَهْ šar-amah, in the eastern (modern) dialect.

هَيَّاهُ وَشَرِي hayah vō šar-I, he, she may eject.

هَيَّاهْ دِ وَشَرِي hayah de vō šar-I, he, she should eject.

Plur.

مُورُ وَشَرُو mūr vō šar-ū, we may eject.

تَاسِي وَشَرِي tāse vō šar-aī, you may eject.

هَيَّاهُ وَشَرِي hayah vō šar-I, they may eject.

هَيَّاهْ دِ وَشَرِي hayah de vō šar-I, they should eject.

3) The Futura

Sing.

زَ بَ وَشَرَم zah bah vō šar-am, I shall eject.

etc. etc. (like the Present).

B. From the participle preterite are formed  
(with passive signification):

4) The Imperfect

Sing.

زَ بِي شَرَلَم zah ē šar-al-am \*), I was ejected by him.

تَ بِي شَرَلِ tah ē šar-al-ē, thou wast ejected by him.

هَيَّاهُ بِي شَرَلْ (m.) hayah ē šar-aḥ, he was ejected by him.

شَرَلْ ,, ,, (f.) ,, ,, šar-al-āh, she was ejected by him.

Plur.

مُورُ بِي شَرَلُو mūr ē šar-al-ū, we were ejected by him.

تَاسِي بِي شَرَلِي tāse ē šar-al-aī, you were ejected by him.

---

\*) The pronominal suffix بِي (by him, her, them) is only added to show the construction and use of these tenses.

هَيَّاهُ هِيَ شَرَّاهُ (m.) hayah ē šar-ah }  
 شَرَّاهُ " " (f.) " " sar-al-ē } they were ejected by him.

### 5) The Habitual Imperfect.

Sing.

زَهْ بَاهُ هِيَ شَرَّاهُ zah bah ē šar-al-am \*), I used to be ejected by him,  
 etc. etc. (like the Imperfect).

### 6) The Conditional (Optative) of the Imperfect.

	$\left\{ \begin{array}{l} مَ mā \\ تَ tā \\ هَيَّاهُ hayah \\ \text{or} \\ شَرَّاهُ sar-ah \\ تَسُو tāsu \\ هَيَّاهُ hāyū \end{array} \right.$	$\left\{ \begin{array}{l} šar-al-ai, šar-al-ē, šar-al-āē \\ \text{or} \\ šar-ai, šar-ē, šar-āē \end{array} \right.$
--	--	---

(If) he, she, they would be ejected, or: would that he, she, they would be ejected (by me, thee, him, her, us you, them \*\*).

### 7) The Aorist.

Sing.

زَهْ وَهْ هِيَ شَرَّاهُ zah vō ē šar-al-am, I was ejected by him.  
 etc. etc. (like the Imperfect).

\*) Or: زَهْ هِيَ شَرَّاهُ zah ē šar-al-am bah.

\*\*) This mood is only used in the third person Sing. and Plur., the first and second person being avoided to prevent confusion with other tenses. شَرَّاهُ, شَرَّاهُ, شَرَّاهُ etc. is not subject to any inflexion.

8) The Habitual Aorist.

Sing.

ز به بی و شرکم zah bah ē vū šar-al-am, I used to be ejected by him.  
etc. etc. (like the Imperfect).

C. With the participle perfect and the auxiliary 'to be' are formed (with passive signification):

9) The Perfect.

Sing.

نم	{	ز به بی شرکی (m.) zah ē šar-al-ai *	{	yam, I have been ejected by him.
		شرکی " " (f.) " ē šar-al-e		
ئی	{	" " تاه (m.) tah " "	{	ē, thou hast been ejected by him.
		" " " (f.) " " "		
دی	{	هغه (m.) hayah " "	{	dai, he has been ejected by him.
		" " " (f.) " " "		

Plur.

مور به بی شرکی نو (com.) mūz ē šar-al-i yū,			we have been ejected by him.
تایی " " ئی tāse " "			aī, you have been ejected by him.
هغه " " دی hayah " "			dī, they have been ejected by him.

10) The Subjunctive of the Perfect.

Sing.

دی	{	هغه بی شرکی (m.) hayah ē šar-al-ai	{	vī, he, she may have been ejected by him.
		شرکی " " (f.) " " šar-al-e		

\* Or شرکی šar-al, fem. شرکی šar-e (شر).

Plur.

هَعْدَ بِي شَرِي وَي (com.) hayah ē šar-al-I vI, they may have been ejected by him.

11) The Pluperfect

Sing.

أَنَا { هَعْدَ بِي شَرِي (m.) zah ē šar-al-ai } vum, I had been ejected  
بِي { هَعْدَ " " (f.) " " šar-al-e } by him.

أَنْتَ { هَعْدَ " " (m.) tah " " } vē, thou hast been ejected  
بِي { هَعْدَ " " (f.) " " " " } by him.

وَهُ { هَعْدَ (m.) hayah " " } vuh, he } had been ejected  
وَهَا { هَعْدَ " " (f.) " " " " } vāh, she } by him.

Plur.

أَنَا { هَعْدَ بِي شَرِي (com.) mūz ē šar-al-I vū, we had been ejected  
بِي { هَعْدَ " " (f.) " " " " } by him.

أَنْتَ { هَعْدَ " " (com.) tāse " " } vāf, you had been ejected  
بِي { هَعْدَ " " (f.) " " " " } by him.

وَهُ { هَعْدَ (m.) hayah " " } vū } they had been ejected  
وَهَا { هَعْدَ " " (f.) " " " " } vē } by him.

12) The Subjunctive of the Pluperfect

Sing.

أَنَا { هَعْدَ بِي شَرِي (m.) zah bah ē šar-al-ai } vum,  
بِي { هَعْدَ " " (f.) " " " " } šar-al-e }

I should have been ejected by him; etc. etc. (like the Pluperfect).

### 13. The Conditional (Optative) of the Pluperfect

Sing.

دِی	{	زَهْ، قَهْدَه بَی شَرِّی (m.) zah, tah, hayah šar-al-ai	{	vai, vĕ,
وَای		شَرِّی " " " " (f.) " " " šar-al-e		vāĕ

(If) I, thou, he, she would have been ejected by him; or: would that I, thou, he, she had been ejected by him!

Plur.

دِی، دِای	{	مُور، تَاسِی، قَهْدَه بَی شَرِّی (com.) mūz, tāse, hayah, šar-al-i	{	vai, vĕ, vāĕ,

(If) we, you, they would have been ejected by him; or: would that we, you, they had been ejected by him!

### 14. The Past Future.

Sing.

نَم	{	زَهْ بَه بَی شَرِّی (m.) zah bah ē šar-al-ai	{	yam, I shall have
		شَرِّی " " " " (f.) " " " šar-al-e		been ejected by him.
تِی	{	تَه (m.) tah " " "	{	ē, thou wilt have
		" " " " (f.) " " " "		been ejected by him.
دِی	{	قَهْدَه (m.) hayah " " "	{	vī, he, she will have
		" " " " (f.) " " " "		been ejected by him.

Plur.

مُور بَه بَی شَرِّی (com.) mūz bah ē šar-al-i yū,	we will have been ejected by him.		
تَاسِی " " " tāse " " "	āī, you will have been ejected by him.		
قَهْدَه " " " hayah " " "	vī, they will have been ejected by him.		

#### IV. The causal verb ending in *al*.

##### Infinitive:

- a) *وڤرول* *vēr-av-al* \*), to frighten, primit. caus. verb.  
 b) *جورول* *jōr-av-al*, to restore, derivat. caus. verb.

##### Imperative:

##### Sing.

- a) *وڤرَو* *vō vēr-av-ab*, frighten!  
 b) *كِرْ*  $\left\{ \begin{array}{l} \text{جور (m.) } jōr \text{ **} \\ \text{جورَه (f.) } jōr-āh \end{array} \right\}$  *krāh*, restore!  
*مَه جورَو* *mah jōr-av-ab*, do not restore!

##### Plur.

- a) *وڤرَوڤي* *vō vēr-av-aī*, do ye frighten!  
 b) *كِرْڤي*  $\left\{ \begin{array}{l} \text{جور (m.) } jōr \\ \text{جورَه (f.) } jōr-ē \end{array} \right\}$  *kr-aī*, restore ye!  
*مَه جورَوڤي* *mah jōr-av-aī*, do ye not restore!

\*) The primitive causal verb is quite regular; here it is put down chiefly in contradistinction to the derivative causal, in order to show the different conjugation of both.

\*\*) The gender of the adjective must agree with the object of the verb. Instead of *كِرْ* the other auxiliary *كول* is also used in the Imperative, the Subjunctive of the Present, the Future and in the III person Sing. and Plural of the Aorist.

A. From the Imperative are formed:

1) The Present.

a)

Sing.

- زه وږوم zah vēr-av-am, I frighten.  
 ته وږوی tah vēr-av-ē, thou frightenest.  
 ښه وږوی hayah vēr-av-ī, he, she frightens.

Plur.

- مو وږوو mūz vēr-av-ū, we frighten.  
 تاسی وږوئیی tāse vēr-av-ai, you frighten.  
 ښه وږوی hayah vēr-av-i, they frighten.

b)

Sing.

- زه جوړوم zah jōr-av-am, I restore.  
 etc. etc. (like وږوم).

2. The Subjunctive of the Present.

a)

Sing.

- زه وږوم zah vō vēr-av-am, I may frighten.  
 etc. etc.

b)

Sing.

- |       |   |                         |   |                            |
|-------|---|-------------------------|---|----------------------------|
| که مې | { | زه جوړم zah jōr (m.)    | { | kr-am, I may restore.      |
| که ښه |   | ته جوړم " " jōr-āh (f.) |   |                            |
| که ښه | { | " ته tah " "            | { | kr-ē, thou mayst restore.  |
| که ښه |   | " " " " " "             |   |                            |
| که ښه | { | " ښه hayah " "          | { | kr-ī, he, she may restore. |
| که ښه |   | " " " " " "             |   |                            |

کړي { هغه د جوړ hayah de jōr (m.) } kr-I, hē, she should  
 جوړ " " " " jōr-āh (f.) } restore.

Plur.

کړو { موږ جوړ mūž jōr (m.) } kr-ū, we may restore.  
 جوړي " " jōr-ē (f.) }

کړئ { تاسې tāsē " " } kr-al, you may restore.  
 " " " " " }

کړي { هغه " " " } kr-I, they may restore.  
 " " " " " }

کړي { هغه د جوړ hayah de jōr } kr-I, they should restore.  
 جوړي " " " " jōr-ē }

### 3. The Future.

a) Sing.

زه به وږروم zah bah vō vēr-av-am, I shall frighten.  
 etc. etc. (like the Present).

b) Sing.

کوم { (m.) زه به جوړ zah bah jōr } kr-am, I shall restore.  
 (f.) جوړ " " " " jōr-āh }  
 etc. etc. (like the Subjunctive).

B. From the participle preterite are formed:  
 (with passive signification)

### 4) The Imperfect.

a) Sing.

زه ټی وږروم zah ē vēr-av-al-am, I was frightened by him.

تَه تَبِي دِيرَوَلِي tah ē vēr-av-al-ē, thou wast frightened by him.

هَغَه تَبِي دِيرَوَلِي (m.) hayah ē vēr-āv-ōh, he	} was frightened by him.
دِيرَوَلِي " " (f.) " " vēr-av-al-āh, she	

Plur.

مُرُو تَبِي دِيرَوَلِي mūrū ē vēr-av-al-ā, we were frightened by him.

تَاسِي تَبِي دِيرَوَلِي tāse ē vēr-av-al-ā, you were frightened by him.

هَغَه تَبِي دِيرَوَلِي (m.) hayah ē vēr-av-al	} they were frightened by him.
دِيرَوَلِي " " (f.) " " vēr-av-al-ē	

b) Sing.

زَه تَبِي جَوَرَوَلَم zah ē jōr-av-al-am, I was restored by him.  
etc. etc. (like دِيرَوَلَم).

### 5) The Habitual Imperfect.

a) Sing.

زَه تَبِي دِيرَوَلَم zah bah ē vēr-av-al-am, I used to be frightened by him; etc. etc. (like the Imperfect).

b) Sing.

زَه تَبِي جَوَرَوَلَم zah bah ē jōr-av-al-am, I used to be restored by him; etc. etc. (like the Imperfect).

6) The Conditional (Optative) of the Imperfect.

a) b)	Sing.	
دېرولای, دېرولې, دېرولې	$\left\{ \begin{array}{l} مآ mā \\ تا tā \\ قعە hayah \\ مور mūr \\ تاسو tāso \\ قهو hayō \end{array} \right.$	$\left\{ \begin{array}{l} vēr-av-al-ai, vēr-av-al-ē, \\ vēr-av-al-āē. \\ jōr-av-al-ai, jōr-av-al-ē, \\ jōr-av-al-āē. \end{array} \right.$
جورولای, جورولې, جورولې		

(If) he, she, they would be frightened (restored) by me, thee, him, her, us, you, them; or: would that he, she, they would be frightened (restored) by me! etc.

7) The Aorist.

a)	Sing.	
زۀ دۀى دېرولم	zah vō ē vēr-av-al-am, I was frightened by him;	
	etc. etc. (like the Imperfect).	
b)	Sing.	
کړم	$\left\{ \begin{array}{l} زۀ بې جور (m.) zah ē jōr \\ جورۀ " " (f.) " " jōr-āh \end{array} \right.$	$\left\{ \begin{array}{l} kr-am, I was restored by \\ him. \end{array} \right.$
کړې	$\left\{ \begin{array}{l} " " تۀ (m.) tah " " \\ " " " (f.) " " " \end{array} \right.$	$\left\{ \begin{array}{l} kr-ē, thou wast restored \\ by him. \end{array} \right.$
کړ, کړۀ	" " قعە (m.) hayah " " kar, kr-ah, he	} was restored by him.
کړۀ, کړۀ	" " " (f.) " " " kr-al-āh, kr-āh, she	

Plur.

کړد	{	مورثی جوړ (m.) mōrθ ē jōr	}	kr-a, we were restored by him.
		جوړی " " (f.) " " jōr-ē		
کړئ	{	" " تاسی (m.) tāse " "	}	kr-aī, you were restored by him.
		" " " (f.) " " "		
کړل, کړه	{	" " خفه (m.) hayah " "	}	kr-aī, kr-aī } they were rest- ored by him.
		کړلې, کړی " " " (f.) " " "		

8) The Habitual Aorist.

a)

Sing.

زه به ټی وږولم zah bah ē vō vōr-av-āī-am, I used to be  
frightened by him; etc. etc. (like the Aorist-Imperf.).

b)

Sing.

کړم { زه به ټی جوړ (m.) zah bah ē jōr } kr-am, I used to be  
          { جوړ " " (f.) " " jōr-āh }  
restored by him; etc. etc. (like the Aorist).

C. With the participle perfect and the auxiliary „to be“  
are formed (with passive signification):

9) The Perfect.

a)

Sing.

میر { زه ټی وږول (m.) zah ē vēr-av-al-ai } yam, I have been  
          { وږول " " (f.) " " vēr-av-al-e } frightened by him.  
etc. etc. (cf. the Perfect of the trans. verb, sub III).

b)

Sing.

یَم	{	زَه نِی جَوَر کَرِی (m.)	zab ē jōr kar-ai	{	yam, I have been restored by him.
یَم	{	جَوَر " " (f.)	" " jōr-āh kar-e		
		etc. etc.			

Plur.

کَرِی یَم	{	مَوَر نِی جَوَر (m.)	mūz ē jōr	{	kar-I yū, we have been restored by him.
کَرِی یَم	{	جَوَر " " (f.)	" " jōr-ē		
		etc. etc.			

# 10) The Subjunctive of the Perfect.

a)

Sing.

دِی	{	هَیَه نِی دِیَوَرِی (m.)	hayah ē vēr-av-al-ai	{	vI, he, she may have been frightened by him.
دِی	{	دِیَوَرِی " " (f.)	" " vēr-av-al-e		

Plur.

دِی	(com.)	هَیَه نِی دِیَوَرِی	hayah ē vēr-av-al-I vI, they may have been frightened by him.
-----	--------	---------------------	--

b)

Sing.

دِی	{	هَیَه نِی جَوَر کَرِی (m.)	hayah ē jōr kar-ai	{	vI, he/she may have been restored by him.
دِی	{	جَوَر " " (f.)	" " jōr-āh kar-e		

Plur.

کَرِی دِی	{	هَیَه نِی جَوَر (m.)	hayah ē jōr	{	kar-IvI, they may have been restored by him.
کَرِی دِی	{	جَوَر " " (f.)	" " jōr-ē		

# 11) The Pluperfect.

a)

Sing.

مَوَر	{	زَه نِی دِیَوَرِی (m.)	zab ē vēr-av-al-ai	{	vum, I had been frightened by him.
مَوَر	{	دِیَوَرِی " " (f.)	" " vēr-av-al-e		

etc. etc. (cf. the Pluperf. of the trans. verb, sub. III.)

- b) Sing.
- |              |   |  |   |          |
|--------------|---|--|---|----------|
| دَوِی، دَوِی | { | زَهْ، تَهْ، هَیْهَیْ جَوْرَ کَرِی (m.) zah, tah, hayah ē jōr | { | vai, vē, |
| وای          |   | kar-ai   |   | vāē,     |
|              |   | جَوْرَ " " " " (f.) " " " " jōr-                             |   | āh kar-e |

(If) I, thou, he, she had been restored by him; or: would that I, etc.

- Plur.
- |            |   |  |   |           |
|------------|---|--|---|-----------|
| کَرِی      | { | مُوْر، تَاسِی، هَیْهَیْ جَوْرَ (m.) mūž, tāse, hayah ē jōr | { | kar-ī     |
| etc. دَوِی |   | جَوْرَ " " " " (f.) " " " " jōr-ē                          |   | vai, etc. |

(If) we, you, they had been restored by him; or: would that we, etc.

#### 14) The Past Future.

- a) Sing.
- |      |   |  |   |      |
|------|---|--|---|------|
| نَمَ | { | زَهْ بَهْ تَی دِرَوْدَ (m.) zah bah ē vēr-av-al-ai | { | yam. |
|      |   | " " " " (f.) " " " vēr-av-al-e                     |   |      |
- I shall have been frightened by him; etc. etc.

- b) Sing.
- |      |   |  |   |      |
|------|---|--|---|------|
| نَمَ | { | زَهْ بَهْ تَی جَوْرَ کَرِی (m.) zah bah ē jōr kar-ai | { | yam, |
|      |   | جَوْرَ کَرِی " " " (f.) " " " jōr-āh kar-e           |   |      |
- I shall have been restored by him; etc. etc.

### V. The Passive.

Infinitive (not in use).

Imperative.

- Sing.
- Primit. trans. verb. a)
- |      |   |  |   |             |
|------|---|--|---|-------------|
| شَهْ | { | وُ شَرَّهْ، وُ شَرَّهْ (m.) vō šarāh, vō šaralal   | { | šah,        |
|      |   | وُ شَرَّهْ، وُ شَرَّهْ (f.) vō šaral-āh, vō šarale |   | be ejected! |

Deriv. causal. verb. b)

شَه { جَوْر كَرِي (m.) jōr karai  
جَوْر كَرِي (f.) jōr-kh karē } šah, be restored!

or:

شَه { جَوْرَاوْ jōrāvōh  
جَوْرَاوْ jōravākh } šah.

Plur.

a) شَهِي { وَشَرِي, وَشَرِي (m.) vō šarai, vō šarai  
وَشَرِي, وَشَرِي (f.) vō šaralē, vō šarai } šai, be ye ejected!

b) كَرِي شَهِي { جَوْر (m.) jōr  
جَوْرِي (f.) jōr-kh } karī šai, be ye restored!

or

شَهِي { جَوْرَاوْ (m.) jōravai  
جَوْرَاوْ (f.) jōravakē } " šai.

### 1) The Present

a)

Sing.

شَم, كَيْمَم { زَاكْ شَارِي, زَاكْ شَارِي (m.) zak šarai, šarai  
شَارِي, شَارِي " (f.) " šaralāh, šaralē } šam, kēšam, I am ejected.  
etc. etc. \*)

Plur.

شَو, كَيْمُو { مُوْ شَارِي, مُوْ شَارِي (m.) muš šarai, šarai  
شَارِي, شَارِي " (f.) " šaralē, šarai } šū, kēšū, we are ejected.

\*) The participles remain the same through all the three persons of the Singular and Plural respectively; we therefore only exhibit the first person.

b)

Sing.

شَم { زَ جَوَرِ كَرِي (m.) zah jōr karai } šam, I am restored.  
 " جَوَرِ كَرِي (f.) " jōrāh karē  
 etc. etc.

Plur.

شَم { مُوَرِ جَوَرِ (m.) mūž jōr } karī šū, we are restored.  
 " جَوَرِ (f.) " jōrē

or:

Sing.

شَم { زَ جَوَرِ وَ (m.) zah jōrāvōh } šam.  
 " جَوَرِ وَ (f.) " jōravalāh  
 etc. etc.

Plur.

شَم { مُوَرِ جَوَرِ وَ (m.) mūž jōravāh } šū,  
 " جَوَرِ وَ (f.) " jōravālē  
 etc. etc.

## 2) The Subjunctive of the Present.

a)

Sing.

شَم { زَ وَ شَرِي, وَ شَرِي (m.) zah vō šārāh, vō šāralai } šam, I may  
 " وَ شَرِي, وَ شَرِي (f.) " vō šārālāh, vō šārale } be ejected.  
 etc. etc. (like the Present).

b)

Sing.

شَم { زَ جَوَرِ كَرِي (m.) zah jōr karai } šam, I may be  
 " جَوَرِ كَرِي (f.) " jōrāh karē } restored.  
 etc. etc. (like the Present).

or:

Sing.

$$\text{شَم} \left\{ \begin{array}{l} \text{زَ بَہ جَوْرَآوُہ (m.) zah jōṛāvōh} \\ \text{جَوْرَآلَہ " (f.) " jōṛavalāh} \end{array} \right\} \text{śam.}$$

etc. etc. (like the Present).

### 3) The Future.

a)

Sing.

$$*) \text{شَم} \left\{ \begin{array}{l} \text{زَ بَہ وُ شَارَہ , شَرَّی (m.) zah bah vō śārāh, śāralai} \\ \text{شَرَّی " " " " (f.) " " śāralāh, śārale} \end{array} \right\} \left. \begin{array}{l} \text{śam, I shall} \\ \text{be ejected.} \end{array} \right\}$$

etc. etc.

b)

Sing.

$$\text{شَم} \left\{ \begin{array}{l} \text{زَ بَہ جَوْرَ کَرَّی (m.) zah bah jōṛ karai} \\ \text{جَوْرَہ " " (f.) " " jōṛāh kare} \end{array} \right\} \left. \begin{array}{l} \text{śam, I shall be rest-} \\ \text{ored.} \end{array} \right\}$$

etc. etc.

or:

Sing.

$$\text{شَم} \left\{ \begin{array}{l} \text{زَ بَہ جَوْرَآوُہ (m.) zah bah jōṛāvōh} \\ \text{جَوْرَآلَہ " " (f.) " " jōṛavalāh} \end{array} \right\} \text{śam.}$$

etc. etc.

### 4) The Imperfect.

a)

Sing.

$$\text{شَوَم , کَیْدَم} \left\{ \begin{array}{l} \text{زَ بَہ شَارَہ , شَرَّی (m.) zah śārāh, śāralai} \\ \text{شَرَّی " " (f.) " śāralāh, śārale} \end{array} \right\} \left. \begin{array}{l} \text{śvam, kēdam,} \\ \text{I was ejected.} \end{array} \right\}$$

etc. etc.

\*) Or:

$$\text{زَ بَہ شَارَہ , شَرَّی m. (without the prefix وُ),}$$

etc. etc.

b)

Sing.

$$\text{شوم} \left\{ \begin{array}{l} \text{زَ جَوَر كَرِي} \text{ (m.) } \text{zah jōṛ karai} \\ \text{جَوَرَه كَرِي} \text{ „ (f.) „ } \text{jōṛāh kaṛe} \end{array} \right\} \text{švam, I was restored.}$$

etc. etc.

or:

Sing.

$$\text{شوم} \left\{ \begin{array}{l} \text{زَ جَوَرَاوَه} \text{ (m.) } \text{zah jōṛāvōh} \\ \text{جَوَرَاوَه} \text{ „ (f.) „ } \text{jōṛavalāh} \end{array} \right\} \text{švam.}$$

etc. etc.

### 5) The Habitual Imperfect.

a)

Sing.

$$\text{شوم كېدم} \left\{ \begin{array}{l} \text{زَ بَه شَارَه شَرِي} \text{ (m.) } \text{zah bah šāṛah, šaralai} \\ \text{شَارَه شَرِي} \text{ „ „ (f.) „ „ } \text{šaralāh, šarale} \end{array} \right\} \text{švam, kē-dam,}$$

I used to be ejected. etc. etc.

b)

Sing.

$$\text{شوم} \left\{ \begin{array}{l} \text{زَ بَه جَوَر كَرِي} \text{ (m.) } \text{zah bah jōṛ karai} \\ \text{جَوَرَه كَرِي} \text{ „ „ (f.) „ „ } \text{jōṛāh kaṛe} \end{array} \right\} \text{švam, I used to be restored.}$$

etc. etc.

or:

Sing.

$$\text{شوم} \left\{ \begin{array}{l} \text{زَ بَه جَوَرَاوَه} \text{ (m.) } \text{zah bah jōṛāvōh} \\ \text{جَوَرَاوَه} \text{ „ „ (f.) „ „ } \text{jōṛavalāh} \end{array} \right\} \text{švam.}$$

etc. etc.

# 6) Conditional (Optative) of the Imperfect.

- a) Sing.
- |                        |   |   |   |            |
|------------------------|---|---|---|------------|
| شَوَّی, شَوَّی, شَوَّی | { | زَ شَارَ, شَرَّی (m.) zah šārāh, šaralai      | { | švai, švė, |
|                        |   | شَرَّی, شَرَّی, شَرَّی (f.) „ šaralāh, šarale |   | švāš,      |

(If) I etc. would be ejected; or: would that I etc. would be ejected! etc. etc.

- b) Sing.
- |                        |   |                                      |   |            |
|------------------------|---|--------------------------------------|---|------------|
| شَوَّی, شَوَّی, شَوَّی | { | زَ جَوَّرَ کَرَّی (m.) zah jōr karai | { | švai, švė, |
|                        |   | جَوَّرَ کَرَّی (f.) „ jōrāh karē     |   | švāš,      |

(If) I etc. would be restored: would that I etc. would be restored!  
etc. etc.

or:

- Sing.
- |             |   |                                    |   |           |
|-------------|---|------------------------------------|---|-----------|
| etc. شَوَّی | { | زَ جَوَّرَ اَوَّی (m.) zah jōrāvōh | { | švai etc. |
|             |   | جَوَّرَ اَوَّی (f.) „ jōravalāh    |   |           |

# 7) The Aorist.

- a) Sing.
- |        |   |  |   |                      |
|--------|---|--|---|----------------------|
| شَوَّی | { | زَ وُ شَارَ, شَرَّی (m.) zah vō šārāh, šaralai   | { | švam, I was ejected. |
|        |   | شَرَّی, شَرَّی, شَرَّی (f.) „ vō šaralāh, šarale |   |                      |
- etc. etc.

- b) Sing.
- |        |   |                                      |   |                       |
|--------|---|--------------------------------------|---|-----------------------|
| شَوَّی | { | زَ جَوَّرَ کَرَّی (m.) zah jōr karai | { | švam, I was restored. |
|        |   | جَوَّرَ کَرَّی (f.) „ jōrāh karē     |   |                       |
- etc. etc.

or:

- Sing.
- |        |   |                                    |   |       |
|--------|---|------------------------------------|---|-------|
| شَوَّی | { | زَ جَوَّرَ اَوَّی (m.) zah jōrāvōh | { | švam. |
|        |   | جَوَّرَ اَوَّی (f.) „ jōravalāh    |   |       |
- etc. etc.

8) The Habitual Aorist.

b)

Sing.

شوم { زَ بَه وَ شَارَی, شَرِی (m.) zah bah vō šārāh, šāralai }  
 { شَرِی, شَرِیْلَه " " (f.) " " " šārālāh, šārale } švam.

I used to be ejected; etc. etc.

b)

Sing.

شوم { زَ بَه جَوَرِ کَرِی (m.) zah bah jōr karai } švam, I used to be  
 { جَوَرِ کَرِی " " (f.) " " jōrāh karē } restored.

etc. etc.

or:

Sing.

شوم { زَ بَه جَوَرِ آوَدَ (m.) zah bah jōrāvōh }  
 { جَوَرِ آوَدَ " " (f.) " " jōravalāh } švam.

etc. etc.

9) The Perfect.

a)

Sing.

یَم { زَ شَرِی شَوِی (m.) zah šāralai šavai } yam, I have been  
 { شَرِی شَوِی " (f.) " šārale šave } ejected.

etc. etc.

Plur.

مُو شَرِی شَوِی یُو (com.) mūš šāralī šavī yū, we have been ejected.

b)

Sing.

یَم { زَ جَوَرِ کَرِی شَوِی (m.) zah jōr karai šavai }  
 { جَوَرِ کَرِی شَوِی " (f.) " jōrāh karē šave } yam,

I have been restored; etc. etc.

Plur.

تکړی شوی یو } مُوړ جوړ (m.) muž jōr } karī šavī yū,  
جوړی " (f.) " jōrē }

we have been restored; etc. etc.

10) The Subjunctive of the Perfect.

a)

Sing.

دی } غځه شړلې شوی (m.) hayah šaralai šavai } vī, he, she may have  
شړلې شوی " (f.) " šarale šave } been ejected.

Plur.

غځه شړلې شوی دی (com.) hayah šaralī šavī vī, they may have been ejected.

b)

Sing.

دی } غځه جوړ کړی شوی (m.) hayah jōr karai šavai } vī, he, she may  
جوړه کړې شوی " (f.) " jōr-āh kare šave } have been  
restored.

Plur.

کړی شوی دی } غځه جوړ (m.) hayah jōr } karī šavī vī, they may  
جوړی " (f.) " jōrē } have been restored.

11) The Pluperfect.

a)

Sing.

ز } زه شړلې شوی (m.) zah šaralai šavai } vum,  
شړلې شوی " (f.) " šarale šave }

I had been ejected; etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ جَوْرَ كَرِي شَوِي} \text{ (m.) zah jōr karai šavai} \\ \text{زَ جَوْرَ كَرِي شَوِي} \text{ (f.) „ jōrāh kare šave} \end{array} \right\} \text{vum,}$$

I had been restored; etc. etc.

## 12) The Subjunctive of the Pluperfect.

a) Sing.

$$\left. \begin{array}{l} \text{زَ بَه شَرَلَاي شَوِي} \text{ (m.) zah bah šaralai šavai} \\ \text{زَ شَرَلَاي شَوِي} \text{ (f.) „ „ šarale šave} \end{array} \right\} \text{vum,}$$

I should have been ejected; etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ بَه جَوْرَ كَرِي شَوِي} \text{ (m.) zah bah jōr karai šavai} \\ \text{زَ جَوْرَ كَرِي شَوِي} \text{ (f.) „ „ jōrāh kare šave} \end{array} \right\} \text{vum,}$$

I should have been restored; etc. etc.

## 13) The Conditional (Optative) of the Pluperfect.

a) Sing.

$$\left. \begin{array}{l} \text{زَ شَرَلَاي شَوِي} \text{ (m.) zah šaralai šavai} \\ \text{زَ شَرَلَاي شَوِي} \text{ (f.) „ „ šarale šave} \end{array} \right\} \text{vai, vē, vāē,}$$

(If) I had been ejected; or: would that I had been ejected!  
etc. etc.

b) Sing.

$$\left. \begin{array}{l} \text{زَ جَوْرَ كَرِي شَوِي} \text{ (m.) zah jōr karai šavai} \\ \text{زَ جَوْرَ كَرِي شَوِي} \text{ (f.) „ „ jōrāh kare šave} \end{array} \right\} \text{vai etc.}$$

(If) I had been restored; or: would that I had been restored!  
etc. etc.

#### 14) The Past Future.

- a) Sing.
- |      |   |  |   |      |
|------|---|--|---|------|
| نَمَ | { | زَهْ بَه شَرَلای شَوی (m.) zah bah šaralai šavai | } | yam, |
|      |   | شَرَلای شَوی " " (f.) " " šarale šave            |   |      |
- I shall have been ejected; etc. etc.
- b) Sing.
- |      |   |  |   |      |
|------|---|--|---|------|
| نَمَ | { | زَهْ بَه جَوَر کَرای شَوی (m.) zah bah jōr karai šavai | } | yam, |
|      |   | جَوَر کَرای شَوی " " (f.) " " jōrāh karē šave          |   |      |
- I shall have been restored; etc. etc.

#### VI. The defective verb تَنَل tl-al, to go.

Infinitive: تَنَل tl-al, to go.

Imperative.

Sing.

دَر شَه, لَا رَ شَه, کَه, q-ab, lār šah, var šah, go!

Plur.

دَر شَمی, لَا رَ شَمی, کَی, q-aī, lār saī, var saī, go ye!

#### 1) The Present.

Sing.

زَهْ حَم zah q-am, I go.

تَه جی tah q-ē, thou goest.

هَه جی hayah q-i, he, she goes.

Plur.

مُوْرُ حُوْ mūʔ q-ū, we go.  
 تَاسِي حَتِي tāse q-aī, you go.  
 حَقَّه جِي hayah q-I, they go.

2) The Subjunctive of the Present.

Sing.

زَه لَار شَم وَر شَم\*) zah lār šam, var šam, I may go.  
 تَه لَار شِي tah lār sē, thou mayst go.  
 حَقَّه لَار شِي hayah lār šī, he, she may go.  
 حَقَّه دِ لَار شِي hayah de lār šī, he, she should go.

Plur.

مُوْرُ لَار شُو mūʔ lār šū, we may go.  
 تَاسِي لَار شِي tāse lār šaī, you may go.  
 حَقَّه لَار شِي hayah lār šī, they may go.  
 حَقَّه دِ لَار شِي hayah de lār šī, they should go.

3) The Future.

Sing.

زَه بَه لَار شَم وَر شَم\*\*) zah bah lār šam, zah bah var šam,  
 I shall go. etc. etc. (like the Subjunctive).

\*) وَلاَرَم vō lār-am and لَارَم lār-am is also in use; حَم ham is hardly ever found in the Subjunctive. وَر شَم var šam is regularly conjugated.

\*\*) زَه بَه حَم zah bah ham is also found in the Future.

#### 4) The Imperfect.

Sing.

زَ تَلَم, تَلَمَ *)	zah tl-al-am, tl-am, I went.	
تَه تَلِي, تَلِي	tah tl-al-ē, tl-ē, thou wentst.	
هَه تَلِي (م)	hayah t-ah (tā), he	} went.
هَه تَلِي (ف)	tl-al-āh, tl-āh, she	

Plur.

مُور تَلُو, تَلُو	mūz tl-al-ū, tl-ū, we went.	
تَاسِي تَلِي, تَلِي	tāse tl-al-aī, tl-aī, you went.	
هَه تَلِي (م)	hayah tl-al-ā, tl-ā	} they went.
هَه تَلِي (ف)	tl-al-ā, tl-ā	

#### 5) The Habitual Imperfect.

Sing.

زَ بَه تَلَم, تَلَمَ zah bah tl-al-am, tl-am, I used to go.  
etc. etc. (like the Imperfect).

#### 6) Conditional (Optative) of the Imperfect.

تَلِي, تَلِي, تَلِي **)	zāh, tāh, hayāh	} (tl-al-ai, tl-al-āē, hayāh)
مُور, تَاسِي, هَه	mūz, tāse, hayāh	

(If) I, thou, he, she, we, you, they would go; or: would that I, thou etc. would go!

\*) Either form may be used.

\*\*) The form لَرَاي lārāi etc. is also used (derived from the Aorist).

# 7) The Aorist.

Sing.

- \*) زَو لَارَام, وَلاَزَمُ zah lār-am, vō lār-am, I went.  
 تَه لَارَاه, وَلاَزَمْتَ tah lār-ē, vō lār-ē, thou wentst.  
 \*\*) هَاه لَار, وَلاَزَمَتْ (m.) hayah lār, vō lār, he  
 لَاه, وَلاَزَمَتْ (f.) " lār-āh, vō lār-āh, she } went.

Plur.

- مُو لَارَام, وَلاَزَمْنَا mu lār-ā, vō lār-ā, we went.  
 تَاه لَارَاه, وَلاَزَمْتُمْ tāse lār-aī, vō lār-aī, you went.  
 هَاه لَارَاه, وَلاَزَمُوا (m.) hayah lār-āī, vō lār-āī }  
 لَاه, وَلاَزَمُوا (f.) " lār-ē, vō lār-ē } they went.

# 8) The Habitual Aorist.

Sing.

- زَه بَاه لَارَام, وَلاَزَمْتُ zah bah lār-am, bah vō lār-am, I used to go.  
 etc. etc. (like the Aorist).

The tenses and moods, which are formed with the participle perfect (تَلَّى tl-al-ai or تَلَّى tal-ai) and the auxiliary „to be“, are quite regular.

\*) The full form لَارَالَام lār-al-am and وَلاَزَمْتُ vō lār-al-am is also in use in the I. and II pers. Sing. and Plur. and in the III pers. fem. Sing. and Plur.

\*\*) لَارَاه is also used.

VII. The defective verb رَأَغَلَ *rā-yl-al*, to come.

Infinitive: رَأَغَلَ *rā-yl-al*, to come.

Imperative.

Sing. رَأْهْ *rā-ḡah*, رَأْهْ *rā šah*, come!

Plur. رَأْهِي *rā-ḡai*, رَأْهِي *rā-šai*, come ye!

1) The Present.

Sing.

زَهْ رَأْهَمْ *zah rā-ḡ-am*, I come.

etc. etc.

2) Subjunctive of the Present.

Sing.

زَهْ رَأْهَمْ *zah rā-šam*, I may come.

etc. etc.

3) The Future.

Sing.

زَهْ رَأْهَمْ *zah bah rā-šam*, or: رَأْهَمْ *rā bah šam*, I shall come; etc. etc.

4) The Imperfect.

Sing.

زَهْ رَأْتَلَمْ *zah rā-tl-al-am*, رَأْتَلَمْ *rā-tl-am*, I came.

etc. etc. (like the Imperfect of تَلَم).

5) The Habitual Imperfect.

Sing.

زَهْ رَأْتَلَمْ *zah bah rā-tl-al-am*, رَأْتَلَمْ *bah rā-tl-am*, I used to come; etc. etc. (like the Imperfect).

6) The Conditional (Optative) of the Imperfect.

زَ رَا تَلَيَّ , رَا تَلَيَّ , رَا تَلَيَّ (رَا تَلَيَّ) zah rā-tl-al-ai, tl-al-ē, tl-al-āe  
(rā-tl-āē),

(If) I etc. would come; or: would that I etc. would come!

etc. etc. (like the Conditional of تَلَيَّ).

7) The Aorist.

Sing.

زَ رَاغَلَمَ , رَاغَلَمَ zah rā-yl-al-am, rā-yl-am, I came.

تَ رَاغَلَيَّ , رَاغَلَيَّ tah rā-yl-al-ē, rā-yl-ē, thou camest.

هَ رَاغَيَّ (m.) hayah rā-yl-ai, he

هَ رَاغَلَّه , رَاغَلَّه „ (f.) „ rā-yl-al-āh, rā-yl-āh, she } came,

Plur.

مُورَاغَلُّو , رَاغَلُّو mūrā-yl-al-ū, rā-yl-ū, we came.

تَاسَ رَاغَلَّتَيَّ , رَاغَلَّتَيَّ tāse rā-yl-al-aī, rā-yl-aī, you came.

هَ رَاغَلَّو , رَاغَلَّو (m.) hayah rā-yl-āl, rā-yl-āh

هَ رَاغَلَّيَّ , رَاغَلَّيَّ „ (f.) „ rā-yl-al-ē, rā-yl-ē } they came.

Other form of the Aorist \*).

Sing.

زَ وَرَاغَلَمَ , وَرَاغَلَمَ zah vōrayl-am, I came.

تَ وَرَاغَلَيَّ , وَرَاغَلَيَّ tah vōrayl-ē, thou camest.

هَ وَرَاغَيَّ (m.) hayah vōray-ai, he

هَ وَرَاغَلَّه , وَرَاغَلَّه „ (f.) „ vōrayl-āh, she } came.

\*) This form comes from the Infinitive وَرَاغَلَّ vōrayl-āl (cf. § 119) and is only used in the Aorist; vō is a verbal prefix and not the prefix of the Aorist.

Plur.

مَوْرُ دُرَّغَلُو mūz vōrayl-ū, we came.  
 تَاسِي دُرَّغَلَيِ tāse vōrayl-ai, you came.  
 هَمَّ دُرَّغَلَلِ, دُرَّغَلَه (m.) hayah vōrayl-āl, vōrayl-ah } they came.  
 دُرَّغَلِي „ (f.) „ vōrayl-ē }

8) The Habitual Aorist.

Sing.

زَهْ بَهْ رَاعَلَمَ or زَهْ بَهْ رَاعَلَمَ zah bah rā-yl-am or: zah bah vōrayl-am,  
 I used to come; etc. etc. (like the Aorist).

The other tenses and moods, formed with the participle perfect  
 رَاعَلَيِ (rā-ylai \*), come, and the auxiliary „to be“, are quite regular.

\*) The full form رَاعَلَيِ رَاعَلَيِ rā-yl-al-ai is not in use. Instead of رَاعَلَيِ,  
 رَاعَلَيِ rā-yl-ai, رَاعَلَيِ rā-lai may also be substituted, both participles perfect  
 having the same signification.

Corrections.

On page 221 after the superscription: 'Tenses and moode etc.  
 § 148 should be added and the following §§ up to § 152 (inclus.)  
 should be advanced by one respectively. An occasional slip or mis-  
 placement of the vowel-points could not always be avoided though  
 great care was taken in this respect; but the reader will find no dif-  
 ficulty in setting a few mistakes of this kind right. For instance on  
 p. 220, l. 18 instead of كُرُر read كُرُر; p. 316, l. 18. 20 instead of  
 شَبِي read شَبِي.
